In the Administration Division, proposed new positions include 1 supervising traffic inspector and 1 state traffic lieutenant which are continuations of positions established by transfer and reclassification in the reorganization; 1 safety engineer is proposed to combat the industrial accident problem; 1 additional administrative analyst; 1 business services officer, and 10 positions of various classifications are proposed in accordance with workload needs and established criteria.

Of the new positions proposed for Field Operations 75 state traffic officers and 7 state traffic sergeants are needed to maintain a constant level of service in the face of workload created by increasing population and vehicle registration in the State; 32 scale and brake specialist, 2 clerical positions, and 2 janitors are required to man new scale and brake inspection stations at Banning and Castaic; 1 clerk to staff a new substation at Running Springs; and 30.5 clerical, custodial, and automotive servicemen in accordance with established workload criteria.

The department's equipment request for the Division of Field Operations includes $71,400 for microwave radio equipment. The entire amount is for the replacement of control repeater facilities by means of microwave links. This is necessary since the present control repeater facilities are severely restricted as to use, due to interference with local television stations and equipment obsolescence. No additional replacement of 72-76 megacycle control repeater stations with microwave radio equipment is planned. However in future years, obsolescence or interference with local television stations may necessitate additional replacements in order to comply with Federal Communications Commission requirements.

Proposed new positions in the Operational Planning and Analysis Division include one state traffic inspector, one state traffic captain, one state traffic lieutenant, and one sergeant which are extensions of existing positions established by transfer and reclassification as a result of the reorganization. Three key punch operators and two clerical positions are proposed as workload adjustments.

The Safety Services Division proposed new positions include one state traffic inspector which is a continuation of an existing position established by transfer in the reorganization. Other new positions include one research writer, one assistant engineer, and 4.5 clerical positions based on workload factors.

One assistant cook and one stock room clerk are requested for the Training Division, based on workload at the academy; and 0.5 clerical position is requested for workload in the Training Division office.

GENERAL ANALYSIS

Objectives

This regulatory and tax collection agency is responsible for issuing the license which is required for each motor vehicle operated in California, issuing the license to the qualified individual to operate motor vehicles on public roads, and ascertaining the financial responsibility of individuals involved in motor vehicle accidents.

Program and Performance

The department operates through 4 divisions headquartered in Sacramento. Branch offices are maintained in principal cities of the State and part-time service is provided in many communities by traveling crews. Through these media the department's basic functions are: the registration and titling of vehicles; the examination of applicants for and the issuance of drivers' licenses; the collection of fees; the maintenance of records in accordance with the laws; the administration of the driver improvement program; the administration of the Financial Responsibility Law; the licensing and control of driving schools and driving instructor services; the licensing of motor vehicle dealers, salesmen, wreckers, manufacturers, and transporters; and the investigation and enforcement of laws pertaining to the registration of vehicles and of driver licensing.

A total of 154 new positions, plus 31.9 man-years of temporary help, at a cost of approximately $611,400, are requested effective January 1, 1963, to meet basic workload requirements. The other major increases for the 1962-63 fiscal year are approximately $1,950,000 for salary increases and an estimated $300,000 required to cover the additional postage cost due t rate changes and changes in postal regulations.

The major budget year increase for the department is for 408.2 man-years for increased workload at a cost of approximately $1,983,000. This includes 154 new positions and 63.8 man-years of temporary help to continue the workload positions requested for the 1962-63 fiscal year. Other major changes are; (1) 81.1 man-years for restoration or partial reinstatement o programs assigned to this department by the Legislature that had been either eliminated or reduced in scope at a cost o $525,455, and (2) 21.4 man-years for additional services at cost of $120,280. Included in this amount is $23,586 for a new field office in Kern County. In addition, $250,000 is requeste for study and training of personnel in connection with the development of an electronic data processing system to automat the drivers' license record file, and for file conversion if needed A net reduction of 104 man-years in Division of Registration Automation Section, is reflected in anticipation of the installation of an electronic data processing system.

The following are the major workload factors for this department:

	Actual 1961-62	Estimated 1962-63	Estimated 1963-64	
Registrations	9,271,000	9,716,000	10,077,000	361,000 (3.7%)
Drivers' licenses	2,388,500	2,800,000	2,887,000	87,000 (3.1%)

DEPARTMENTAL ADMINISTRATION

Objectives

The director is responsible for the administration of all sections of the Vehicle Code not delegated to the Department of the California Highway Patrol. He establishes departmental policy and directs the work of the 4 divisions.

Program and Performance

The Division of Administration provides the director with information on fiscal expenditures; develops budget plans for current and long-range fiscal requirements; projects workload estimates for the divisions; accounts for all revenues derived from the department's fee collection activities, and accounts for all property owned by the department. Department-wide service activities consist of assisting the director and the division chiefs in personnel matters, including in-service training. Real property rentals are located, negotiated, and executed for the department. Supplies, including license plates and tabs, are purchased, stored, and distributed. Departmental programs and procedure are analyzed to provide more efficient and economical adminis tration. Departmental communication and information reques services are co-ordinated among the divisions both in Sacra mento headquarters and field offices.

The 1962-63 fiscal year includes an increase of 0.6 man-year of temporary help and an extension of a limited-term positio for the Highway Safety Research program which is finance by reimbursements from the Federal Government. In addition man-years of temporary help are included to reflect service rendered to the United States Public Health Service in connec tion with a driver vision study project. This program is wholl reimbursed.

1963-64 fiscal year increases include 5.8 man-years for i creased workload, and 15.5 man-years for research on traffi safety and study of drivers' records.

DIVISION OF REGISTRATION

Objectives

This division is responsible for the administration of the provisions of the Vehicle Code relating to the following: issuance, suspension, and revocation of vehicle registrations, issuance of certificates of ownership for all vehicles; licensing and suspension of automobile, truck and trailer manufacturers, transporters, dealers, and wreckers; assessment of vehicles and collection of vehicle license fees.

Program and Performance

This division will register approximately 10,077,000 vehicles in the State during the 1963-64 fiscal year. Accomplished through the processing and service units, registration provides a system of ready identification and control. provides a means of establishing ownership, and provides the mechanism for collecting fees. This division has in its Sacramento files a history of every motor vehicle registered in California. The records

DEPARTMENT OF MOTOR VEHICLES—Continued

DIVISION OF REGISTRATION—Continued

Program and Performance—Continued

are maintained under the registered owner's name in alphabetical order, under the license number in numerical sequence, and by engine or identification number in numerical sequence. The Automation Section of this division employs punched cards to record all data concerning all registered vehicles. As the fees are changed from year to year, the mechanical equipment is used to rerate the vehicles, and prepare potential registration cards which are mailed in advance of the renewal period.

The investigation of automobile dealers and wreckers is accomplished by this division through the use of trained investigators. The investigators also serve briefs for the department, collect fees in the event of improper or inadequate payments, and perform other allied investigative functions, among them being the licensing and regulation of salesmen and the enforcement of the registration compliance program.

In the 1962-63 fiscal year an Assistant Division Chief was established to direct and co-ordinate the functions and operations of the Staff Services Section and Investigations Section of this division.

Sixty-two and eight-tenths man-years are requested effective January 1, 1963, to meet basic workload requirements.

This division will install an electronic data processing system in the calendar year of 1963. The installation of this system will result in the abolishment of 128 permanent positions in the budget year. Twenty-four of these positions will be reclassified to positions suitable to electronic data processing for a net reduction of 104 positions.

A total of 212.1 man-years shown as proposed new positions in the 1963-64 fiscal year budget consists of:

(1) 84.5 man-years to continue the workload positions requested for the 1962-63 fiscal year;
(2) 70.7 man-years for the anticipated workload increases of 1963-64 over the 1962-63 level;
(3) 4 man-years to augment the program for auditing licensed dealers and wreckers;
(4) 10 man-years to augment the Registration Compliance Program;
(5) 24 positions reclassified from positions abolished for electronic data processing installation;
(6) Continuation of the assistant division chief position established during 1962-63 fiscal year; and
(7) 17.9 man-years of temporary help to extend the present electronic data processing training and limited-term positions.

DIVISION OF DRIVERS' LICENSES

Objectives

This division is responsible for the issuance of all original drivers' licenses, the renewal of expiring licenses, and maintaining of drving histories of all drivers, the direction of the driver improvement program, and the administration of the State's financial responsibility laws.

Program and Performance

This division licenses and maintains a post licensing control of approximately 8,950,000 drivers. It is estimated that approximately 2,887,000 original and renewal licenses will be issued in the 1963-64 fiscal year, an increase of 87,000 over the issuance estimated for the 1962-63 fiscal year. The drivers license file contains more than 34,500,000 driver record documents. The licensing function is accomplished primarily by clerical forces in handling applications as received from the field offices.

Another use of driver records is the Information Request Service in which the division furnishes driver record transcripts. This activity is completely reimbursed since statute provides that this information be furnished upon payment of at least the cost of producing the information report.

Driver improvement includes the general function of post licensing control of drivers with problems that cause their records to show that they are a hazard to themselves or the general public. The mandatory actions are those spelled out in the law requiring automatic action after certain specific convictions, such as drunken driving and certain other offenses including felonies. Discretionary actions are provided for habitual violators. The discretionary provision is extended to physical or mental disabilities which would result in danger to the individuals themselves or to the general public. To carry out these functions the division uses re-examination, interviews, investigations, warnings, and hearings before a driver improvement analyst. Under this discretionary program the division endeavors to improve poor driving habits and attitudes.

The division is also responsible for the administration of the financial responsibility laws. It is the purpose of this function to provide reasonable assurance that persons suffering injury or property damage in motor vehicle accidents are compensated by those responsible for such injury or damage. Drivers who fail to meet their financial obligations by insurance or otherwise, are deprived of the privilege of operating a motor vehicle, and their vehicle registration may be suspended for the same cause.

A total of 77.2 man-years is requested, effective January 1, 1963, to meet basic workload requirements. In addition 12 positions have been established in the 1962-63 fiscal year for the information request program. These positions are financed from reimbursements. One position was established in 1962-63 for the Aid to Needy Children program. This position is financed from the General Fund. Ten positions were re-established in 1962-63 to purge driver record files. These positions are limited to June 30, 1963 and are financed by reimbursements.

The Aid to Needy Children program is funded through reimbursements from the Department of Justice in the 1963-64 fiscal year. In previous years this program was supported by a General Fund appropriation directly to the Department of Motor Vehicles.

The 241.7 man-years shown as proposed new positions in the 1963-64 fiscal year consist of:

(1) 77.4 man-years to continue the workload positions requested in the 1962-63 fiscal year;
(2) 23 positions established during the 1962-63 fiscal year for Information Request Service, to be financed by reimbursements;
(3) 62 man-years to cover the anticipated workload increases of 1963-64 over the 1962-63 level;
(4) 34.2 man-years for study and training of personnel in connection with the electronic data processing system, and for file conversion, if needed;
(5) 28 man-years necessary to continue hearings on negligent operators who have accumulated 5 violation point counts;
(6) 6.7 man-years necessary to issue warning letters to all drivers receiving 4 convictions during a 12-month period;
(7) 7.4 man-years to provide for maintenance of the program for purging the department's legal files; and
(8) 3 man-years for administration of regulations governing ambulance service. Section 2418 was added to the Vehicle Code effective September 15, 1961, requiring the enforcement of regulations deemed necessary for public health and safety regarding the operation of all ambulances used for emergency services.

DEPARTMENT OF MOTOR VEHICLES—Continued

DIVISION OF FIELD OFFICE OPERATIONS

Objectives

This division provides a statewide network of field offices responsible for examining applicants for drivers' licenses; issuing vehicle licenses; receiving, processing, and accounting for applications and fees for both vehicle registration and drivers' licenses, as well as for dealers and vehicle salesmen; providing information on financial responsibility laws, brief service, and driver school licensing.

Program and Performance

This division maintains 142 permanent full-time offices and 27 travel crews serving 61 smaller and isolated communities. Complete vehicle registration and drivers' licensing services are provided in the permanent offices. Trained examiners are used in the travel crews to provide drivers' licensing service. Applicants for drivers' licenses are required to submit to a written test of their knowledge of the Vehicle Code, a vision screening test, an actual demonstration of their ability to operate a vehicle, and their ability to read simple English. A $3 application fee entitles the applicant to 3 tests within 6 months. Complete registration service is available in all permanent branch offices located in all principal cities of the State. In addition, during the annual registration renewal preiod service on potential registration cards is offered at approximately 144 banks. Certain registration services are also rendered by automobile clubs. This service is reviewed and audited by field offices. Traveling registration crews visit many other points for stated periods as a convenience to the public. Many field offices serve as headquarters for the motor vehicle investigators and driver improvement analysts.

A total of 45.8 man-years is requested, effective January 1, 1963, to meet basic workload requirements. In addition, a net of 2 janitor positions were established in the current year to meet the workload requirements of various offices, and an additional 0.3 clerical position was established for the field office at Lakeport because of increased workload.

A total of 138 man-years shown as proposed new positions in the 1963-64 fiscal year consists of:

(1) 57.9 man-years to continue the workload positions requested for the 1962-63 fiscal year;
(2) 52.2 man-years to cover the anticipated workload increases of 1963-64 over the 1962-63 level;
(3) 2.5 man-years to establish a new field office in Kern County;
(4) 0.4 man-years to establish a one day a week travel service in Oakhurst; and
(5) 25 man-years for additional drivers' license examiners to reinstate the following levels of service in issuing drivers' licenses:
    a. Give the examiner discretion in requiring a driving test of renewal applicants who appear to be incapacitated because of age or physical disability.
    b. Give driving test to all applicants who take the oral law test or the foreign written test.

LAND AND BUILDINGS

Program and Performance

This function includes the maintenance, operation, and repair of all office buildings owned or leased by the department. This function provides operating expenses for the maintenance and operation of all department facilities. Personnel is not provided and it is not an operating function.

The major increase for the budget year is for the full year cost of maintaining the new Sacramento Headquarters Building during the current year. This cost is approximately $244,500.

Department of Public Works

DEPARTMENTAL ADMINISTRATION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	

GENERAL ANALYSIS

Objectives

Departmental Administration has responsibility for the overall administration and direction of the Department of Public Works.

Program and Performance

The executive group consists of the director, a chief deputy, 2 other exempt deputies (1 for planning and 1 for management), and 2 assistant directors.

The director's office performs the primary functions of departmental policy formulation, co-ordination, and overall direction of the activities of the organization.

Projected staffing for the budget year is the same as for the current year. Creation of a position of Operations Security Officer as shown in the 1962-63 Governor's Budget is reflected in this budget. This position operates as a special assistant to the director, making investigations to insure compliance with laws and policies, particularly in the highway program. With the expansion of the highway program such a position is necessary in order to provide an independent follow-up on allegations regarding possible irregularities. It deals with broader non-fiscal aspects than the Internal Audit Section.

The director carries out the work of the department through broad delegations of authority to 4 division chiefs, each of whom is fully responsible to the director for the work in his division. Two of these division chiefs, the State Architect (Division of Architecture) and the State Highway Engineer (Division of Highways) are statutory positions heading statutory divisions, but most of the authority and responsibility they exercise is by delegation from the director. The other 2 division chiefs head divisions (Division of San Francisco Bay Toll Crossings and Division of Contracts and Right-of-Way) which were created by order of the director, rather than by statute.

The director also exercises important policymaking responsibilities over the highway program as chairman of the California Highway Commission, to which the Legislature has granted broad authority and responsibility. This includes determining the state highway budget and the exact location of state highway routes within legislative guidelines, and for authorizing condemnation of property for highway use.

The director is also a member and secretary of the California Toll Bridge Authority, an ex-officio body which is concerned with the construction or acquisition of toll highway crossings and transportation facilities appurtenant thereto. The department provides all of the staff work for the authority.

Effective September 1961, the Division of Aeronautics was placed by law in the Department of Public Works. However, the State Aeronautics Board and the director of the division, who serves at the pleasure of the board, have the full statutory authority and responsibility for this activity. The Division of Aeronautics is financed primarily by appropriation from the General Fund.

The State Highway Fund and the Division of Architecture Revolving Fund are charged on a pro rata basis for the entire cost of Departmental Administration.

GENERAL ANALYSIS

Objectives

The Division of Aeronautics provides the Board of Aeronautics with the staff assistance needed to give planning, engineering, zoning, assistance in establishing facility eligibilities for State and Federal Aid to airports, air safety and use (schools vs. airport noise and hazards) and economic analyses services to and for public utilities and corporations (districts) integrated with the local and the State's public interest in a statewide system of airports.

Program and Performance

The State Board of Aeronautics consists of 5 members appointed by the Governor for 4-year terms.

The more important activities performed by the division are shown in the following table:

	Actual 1960-61	Actual 1961-62	Estimated 1962-63	Estimated 1963-64
Airport, heliport, drop zone site approvals and permits	47	43	85	93
New airport, heliport, drop zone site studies	171	184	255	280

Public service information furnished and public appearances	265	326	440	484
Zoning assistance provided cities and counties	45	70	82	90

Federal aid is available to local airports through Public Law 377. During the past year the division, upon request, assisted in the preparation of federal aid applications for public airports, the airports receiving approximately $7,200,000. The airports will receive an estimated $7,600,000 during the current year and $7,800,000 during the budget year. Other activities included aviation safety, promotion of public acceptance and use of air transportation through publications, maintenance of a film library, and radio and television presentations. Direct assistance is rendered to various state departments in advising on industry needs.

Department of Public Works

DIVISION OF AERONAUTICS—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—continued

Section 8352 of the Revenue and Taxation Code creates the Airport Assistance Fund with a continuing appropriation from the Motor Vehicle Fuel Fund in the amount of $350,000 available each year for the purpose of assisting cities, counties, and airport districts which own and operate airports under a valid permit issued by the division. Section 21681 of the Public Utilities Code provides that $15,000 is available each year from this fund for the support of the division for the division's activities in connection with the administration of this fund. In the 1962-63 fiscal year 1 clerical position was administratively established because of the additional workload which the divisio incurred in the administration of this fund. This is shown as proposed new position for fiscal year 1963-64. The balance o the $15,000 a year will be used to increase the amount available for local assistance. Subject to proposed legislation, schoo site inspections which are performed by the division pursuant t the provisions of Section 15005.5 of the Education Code are t be financed from the Architecture Public Building Fund. Approximately 181 of these inspections are anticipated at an average cost of $75 per site for a total expenditure of $13,575 from this source.

AERONAUTICAL CHART AND AIRPORT DIRECTORY

This program was included to provide adequate aeronautical charts for the State of California. The California aeronautical charts were printed in the past fiscal year and replaced charts more than 11 years old. The 9 charts prepared by the Federal Government are limited to airports in the National Airport Plan, and cover only 20 percent of California's airports. The new charts have all the airports on 1 chart. There are 102,000 pilots in California, and these charts were needed for the safety of California pilots.

GENERAL ANALYSIS

Objectives

This unit checks and approves plans and specifications for all new public school building construction and for all alterations and additions exceeding $10,000 in estimated cost. By authority of the Field Act (Sections 15451 to 15465, inclusive, of the Education Code), the division is responsible for the checking and approval of all public school building plans, including alterations, and for the inspection of such projects during construction to make certain that public school buildings are properly designed to meet all safety requirements, including earthquake, fire, panic and storm. The unit is entirely self-supporting in that all funds appropriated for the support of the unit are from the Architecture Public Building Fund which, in turn, is supported by fees charged for services rendered by the division in connection with the checking of plans and specifications and supervision of construction. The fee schedule is established in Title 21, California Administrative Code.

Program and Performance

The volume of public school construction for fiscal year 1961-62 was $288.8 million. For fiscal year 1962-63 the volume is estimated at $289 million. The estimated volume for Budget Year 1963-64 is $320 million. With this anticipated workload and the revised fee program authorized by Chapter 1767, Statutes of 1961, the anticipated revenue from plan approval fees will approximate $1,360,000 in the budget year. Concurrently the estimated deficit as shown in the Fund Conditio Statement will continue to decrease. With the continued application of the higher fee structure over the last 3 years th deficit will eventually disappear and some accumulated surplu should be apparent.

Local School Districts, upon application, and approval by th State Allocations Board receive loans with provisions for repayment of the principal according to an equalization formul which usually allows 30 years and up to 40 years if defermen provisions are used. Since the start of this program, an estimated $110,997,721 will have been repaid to the State as o June 30, 1962.

Since the inception of the State-aided Program in 1947, th State has authorized $1.4 billion to assist school districts i school construction. The State has approved $1.212 million i state aid through October 31, 1962, which, together with $49 million in local district contributions, to bring the total construction approved under this program to $1,711 million. Presen available funds are estimated to carry the program throug December 1963. A total of 40,324 classrooms had been finance through October 31, 1962, providing seating for 1,348,180 children.

The costs of administering these programs are incurred i the Division of Architecture, Division of Aeronautics, Department of Education, State Controller, and Department of Finance. They are summarized here for informational purposes

GENERAL ANALYSIS

Objectives

The principal functions of the Division of Highways are to plan, construct, and maintain the 16,355 miles of the state highway system. Other functions include various special studies in the transportation field and certain responsibilities in connection with county roads on the Federal-aid Secondary System, with the expenditures of state gasoline tax funds on city streets, and with supervision of the Outdoor Advertising Act.

Program and Performance

The planning and construction of state highway improvements is carried as a continuous long-range planning program in accordance with policy established by the Legislature and is tailored to funds available from various sources, including federal aid, as provided by the Legislature and to statutory controls governing geographical distribution of construction expenditures in the northern and southern county groups and within individual counties. Funds for construction and rights-of-way are allocated by the California Highway Commission in accordance with these statutory requirements and on the basis of priority of need to best serve traffic. The California Highway Commission is a statutory body of 7 members, 6 of whom are appointed by the Governor, with consent of the Senate, for staggered 4-year terms. The Director of Public Works serves as ex officio seventh member and chairman of the commission. The commission also has the responsibility for adopting the location of state highways on routes authorized by the Legislature, and for declaring certain routes as freeways.

This program is financed through the State Highway Fund. The first highway fund was authorized by the "State Highway Act" of 1909 which provided for the First State Highway Bond Issue. Subsequently 2 more bond issues and several other highway funds were established. The State Highway Fund as it now stands was created by an act of the 1933 Legislature. The major sources of revenue to the fund are from fuel taxes, registration and weight fees, transportation tax, and federal subventions, summarized below.

REVENUE SOURCES *(State Highway Fund)*

	ACTUAL 1961-62	ESTIMATED 1962-63	ESTIMATED 1963-64
Fuel License Tax (6¢ per gallon) [b]	$260,777,822	$273,146,818	$284,171,206
Use Fuel Excise Tax (7¢ per gallon)	22,730,103	23,905,249	25,500,000
Transportation License Tax	11,930,396	8,872,545	13,569,666
Vehicle Registration, Weight Fees, Drivers' Licenses, etc.	56,779,024	61,542,995	60,236,164
Federal Aid:			
Major State Highways [c]	252,731,568	277,415,417	296,721,250
Federal-aid Secondary	9,161,270	9,215,600	8,884,750
Miscellaneous	17,660,268	12,687,690	3,127,000
Estimated Revenue Adjustment	17,302,935	–	–
Total Revenues	$649,073,386	$666,786,314	$692,210,036

---

[a] These positions financed from toll bridge revenues.

[b] This is the balance of the 6-cent tax going to the State Highway Fund.

[c] For the major interstate highway system, primary and urban. Other federal aid is carried in federal aid miscellaneous.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS—Continued

Program and Performance—Continued

There are additional revenues which go directly to local agencies for highway purposes without going through the State Highway Fund. In 1961-62 this amounted to $77,401,643. An additional $56,343,871 was subvened from the State Highway Fund in 1961-62 to local agencies bringing the total revenues received by local agencies from these tax sources to $133,745,514.

Because the state highway program reaches into every corner of California, the division operates in the field through 11 districts. Nine of these districts are headed by district engineers; the 2 metropolitan districts (San Francisco and Los Angeles) are headed by assistant state highway engineers. Each district is organized along the lines of the headquarters office. Construction of bridges and other highway structures on a statewide basis is administered by the Bridge Department, having offices in Sacramento and Los Angeles.

The first expenditures for the State Highway System commenced January 1, 1912, and the total expenditures to June 30, 1962, are $6,008,846,172. In order to gain a better perspective on the entire highway program, the expenditures from all parts of the budget are summarized below.

SUMMARY OF EXPENDITURE PROGRAM *(State Highway Fund)*

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

CONTRACTS AND RIGHTS-OF-WAY

Program and Performance

The Division of Contracts and Rights-of-Way is a division of the Department of Public Works, administratively established by the director under Government Code Section 14005, which provides legal services for the department, including the Division of Highways. It handles legal problems and litigation arising out of such activities as eminent domain and other legal phases of highway right-of-way acquisition, including matters involving public utilities, contracts, claims, financial affairs and collections, operations of toll bridges, and activities involving other governmental agencies.

MAINTENANCE OF STATE HIGHWAYS

Program and Performance

The function of state highway maintenance is to preserve roadways and structures in the safe and usable condition to which they have been built or improved. This description covers hundreds of different tasks, ranging from routine patching to emergency slide removal. About one-fifth of the employees of the Division of Highways are engaged in maintenance work.

Replacement and restoration work on highway facilities is performed by the division forces, with major work of this nature, including resurfacing, being done by contract.

MAINTENANCE OF TOLL BRIDGES

Program and Performance

The Division of Highways is responsible for the operation and maintenance of 5 major bridges in the San Francisco Bay area: the San Francisco-Oakland Bay Bridge, the Richmond-San Rafael Bridge, the San Mateo-Hayward Bridge, the Dumbarton Bridge, and the Carquinez Bridge. All of these are toll facilities. Since September 1957, toll bridge maintenance costs are paid from the State Highway Fund as provided by Chapter 2249, Statutes of 1957. Formerly these costs were paid from toll bridge revenues.

Operation of these bridges is a function of the Bridge Department, with specific responsibility assigned to a principal bridge engineer, whose office is located at the east end of the San Francisco-Oakland Bay Bridge.

HIGHWAY PLANNING

Program and Performance

Broad-gauge special investigations and studies not closely tied in with localized projects are grouped under the heading of highway planning. These include the annual and monthly traffic counts, long-range research studies of all types, and studies of the economic and other effects of freeways. Current and imminent major projects include co-ordination of the statewide city and county street and road deficiency studies called for by Senate Concurrent Resolution No. 62 of the 1959 Session, and a scheduled re-estimating of Interstate Highway System deficiencies as required by federal legislation.

In the 1963-64 fiscal year, this function has been categorized as a part of the cost of construction and therefore is included within the Capital Outlay portion of the budget. Heretofore, this function has been included in Administration.

DIVISION OF HIGHWAYS—Continued

SUPERVISION OF OUTDOOR ADVERTISING

Program and Performance

Administration of the Outdoor Advertising Act has been assigned to the Division of Highways in accordance with Article 2 of that act, and is carried on as a function of the Maintenance Department. It is a self-supporting function, financed from revenues received from license and permit fees paid by outdoor advertisers who place displays within view of public highways, outside incorporated areas.

GENERAL ANALYSIS

The Golden Gate Authority Commission, established by Chapter 1714, Statutes of 1959, studied the advisability of operating the bridges, port facilities, and airports in the San Francisco Bay Area under a single agency and made its report to the 1961 Legislature pursuant to provisions of that statute. The Legislature has not enacted any legislation pertaining to the recommendations in that report.

This project was completed at a cost of $126,127, approximately one-half of the appropriation provided for this purpose. The Commission's statutory authorization terminated December 31, 1961.

GENERAL ANALYSIS

Objectives

It is the objective of this department to promote and develop the welfare of the wage earners of the State, improve their working conditions, and advance their opportunities for profitable employment.

Program and Performance

The department, established and operated under the provisions of Division 1, Chapter 1 of the Labor Code, through its 9 line divisions, negotiates with parties in disputes when a work stoppage is threatened; adjudicates claims under the Workmen's Compensation Law; establishes, enforces, and promotes standards of safety for all phases of industrial activity; enforces labor laws and issues and enforces orders relating to men, women, and minors; promotes opportunities for apprentices; enforces laws relating to housing; prepares labor statistics; and promotes fair employment practices. The Division of Administration provides central services for the line divisions.

A pilot program to review all serious industrial injury cases to determine vocational rehabilitation needs has been assigned to the department and placed in the Division of Administration. Approximately $75,000 for 6.5 positions and related expenses is proposed in 1963-64 to implement this program.

In the promotion of opportunities for apprentices, recognition is given to the increased emphasis the department has placed on equal opportunity without regard to race, creed, color, or national origin. A total of $20,000 for 2 apprenticeship consultants, 1 clerk, and related expenses is proposed in 1963-64 specifically for increased work with minority groups.

In the Division of Fair Employment Practices $67,000 for 6 positions and related expenses is proposed to meet the enforcement responsibilities included in proposed legislation for amendments to existing law relating to discrimination in publicly assisted housing.

For the year 1961, disabling job-connected injuries totaled 162,055, an increase of 2 percent from 158,663 reported in 1960. During this same period the average number of persons employed in industries covered by the California Workmen's Compensation Act also increased about 2 percent; therefore, the overall work injury rate in California industries was unchanged —31.9 disabling injuries per 1,000 workers.

Total filings received by the Industrial Accident Commission in 1961-62 was 70,980 compared with 62,019 in 1960-61. This was an increase of 14.4 percent. A 15 percent increase in filings is estimated for the current and budget years resulting in a need for 10 additional referee units which are included in 1963-64 at a cost of approximately $383,000.

Complaints regarding wages, hours, and employment conditions affecting industrial welfare and labor law enforcement workload continue to increase; an increase of 6.8 percent for 1961-62 over 1960-61 was received by the Division of Labor Law Enforcement. The division anticipates an average workload increase of 10 percent for the current and budget years.

The 1963-64 budget provides for the following increases in personnel:

	Positions
1. Administration central services	2
2. Industrial injuries rehabilitation program	6.5
3. Conciliation services	1
4. Industrial accident referee teams	41
5. Industrial safety inspections	11
6. Welfare and labor law complaint services	15
7. Apprenticeship services	3
8. Labor statistics and research	10.5
9. Fair employment practices	10.5
Total	100.5

Each position and its purpose is described in the program and performance statements in the appropriate division.

DIVISION OF ADMINISTRATION

Objectives

To carry out the administration's policy and provide effective economical administration of the laws affecting this department.

Program and Performance

This division performs policy making, accounting, budgeting, personnel, procurement, housing, and duplicating functions of the department.

It is proposed for 1963-64 to implement the departmental responsibility to review all serious industrial injury cases to determine vocational rehabilitation needs. This will require an estimated $75,000 for 6.5 positions and related expenses to establish a pilot program. Upon review of injury reports the director will:

1. Select cases that appear to require vocational rehabilitation;
2. Investigate those cases;
3. Advise injured workers of their vocational rehabilitation rights under the law;
4. Determine which cases require and can be expected to benefit from vocational rehabilitation; and
5. Follow up to assist in securing for the injured worker whatever is reasonably necessary to effectuate vocational rehabilitation.

It is estimated that only one-third of the industrially injured who could benefit from vocational rehabilitation services are presently being provided the needed service.

Two positions are proposed to meet workload problems relating to central services; 1 administrative assistant to assist the administrative officer and personnel officer in handling budgetary, personnel, and administrative problems, and 1 clerical position for the duplicating unit.

Provision is also made for increases in rent at locations where renewal of existing leases must be negotiated at higher rates or additional personnel in field offices necessitates additional space.

One man-year of fractional time permanent janitors is shifted to 1 man-year of temporary help for janitorial services during 1962-63 for better utilization of manpower.

DIVISION OF CONCILIATION

Objectives

To promote sound union-management relationships in accordance with section 65 of the Labor Code which provides for mediation activity in the Department of Industrial Relations.

Program and Performance

The State Conciliation Service adjusts labor-management disputes through conciliation, mediation, and arbitration procedures; conducts representation elections; prevents critical disputes and work stoppages through investigation; aids in the solution of labor problems which threaten curtailment of production of services; and administers certain arbitration, election, and grievance procedures of the Los Angeles Metropolitan Transit Authority Act, the Alameda-Contra Costa Transit District Act and the San Francisco Bay Area Rapid Transit District Law.

An intermediate stenographer position is requested to relieve the clerical burden in the State headquarters office of the division. This problem is caused by the statewide dispute caseload and conciliator staffing increases since 1948 when the existing 2 clerical positions were provided.

DIVISION OF INDUSTRIAL ACCIDENTS

Objectives

To obtain for the injured workman and his dependents, with the least possible delay, all the benefits they are entitled to by law.

Program and Performance

The Industrial Accident Commission is established and operates under the provisions of Division 1, Chapter 5 of the Labor Code. In its judicial function it is a court of limited jurisdiction to adjust litigated cases arising under the workmen's compensation laws. A staff of 84 referees assists the commission in deciding cases brought before it. Original decisions are made by the referees, except for a few special types of cases. If a party is dissatisfied with the referee's decision, he may then petition the commission or one of its panels for a reconsideration, or the commission itself, on its own motion, may grant a reconsideration.

In 1961-62, 70,980 filings were recorded and 67,644 dispositions made for an average of 914 dispositions for each of th 74 referee units authorized. It is anticipated that a 15 percen increase in filings will occur to a total of 81,600 in 1962-6 and 93,900 in 1963-64. The rate of production per referee uni is expected to continue to improve because of the pretrial metho of handling selected cases and the decentralization of personne and workload, resulting in reduced travel time for referees an hearing reporters.

Because of the 15 percent anticipated increase in filings an substantial existing pending caseload, 10 additional referee unit (4 positions each) plus ancillary help by 1 additional permanent disability rater are included at a cost of approximatel $383,000. The anticipated vacancy rate is reduced to reflect th administrative effort being made in both 1962-63 and 1963-6 to ensure maximum utilization of presently authorized and proposed additional positions in the referee units.

DIVISION OF INDUSTRIAL SAFETY

Objectives

The primary purpose of this division is to reduce work injuries in employment and places of employment.

Program and Performance

The division has jurisdiction over all employments—except for household domestics, federal employees, operating employees of interstate railroads, and seamen—and it covers some 400,000 places of employment in such industries as agriculture, construction, mineral extraction, manufacturing, trades, services, transportation, and utilities. The division promulgates, after public hearings, standards of safety for all employments and conducts educational programs, including the preparation and distribution of educational materials.

The Industrial Safety Board, established by Division 1, Chapter 6 of the Labor Code, consisting of 4 members appointed by the Governor for overlapping 4-year terms, with the Director of Industrial Relations as chairman, adopts minimum safety standards for various operations. The safety standards, known as general safety orders, are published in the California Administrative Code, Title 8. Safety orders for noise control are now being considered in the administrative adoption process.

The work injury rate in California increased from 32 per thousand in 1958 to 33.7 in 1959 but decreased in 1960 to 31.9 and remained at this same rate during 1961. However, the total disabling injuries increased from 158,663 in 1960 to 162,055 in 1961 with fatalities increasing from 811 to 832. The first 6 months in 1962 show this same trend with disabling injuries rising from 77,445 in 1961 to 80,569 in 1962 for the first 6 months. The increase in fatalities during this same 6-month period rose from 414 to 490.

In 1961 the Radiation Control Law was enacted which required California to take over a portion of the federal Atomic Energy Commission program in this State. This takeover is now in progress. Two senior health physicists of the Division's Environmental Engineering Unit, are responsible for the technical evaluation of license applications and under agreement with the Department of Public Health are co-operating with the administrating of this program in California.

For the 1963-64 fiscal year 8 safety engineers and 3 clerks are proposed. Workload formula developed on the basis of the numbers of employers and employees in the State, justify 3 engineers in the Elevator Section and 3 for the activities in construction, electrical, and general industry. Two clerical positions are the necessary assistance for these engineering positions. Two safety engineers and 1 intermediate typist-clerk, temporarily approved in the current year, are proposed for workload in connection with inspection of industrial radiation users. These 3 positions for radiation inspection are supported by a reimbursement from the Department of Public Health collected license fees on industrial users of radioisotopes.

DIVISION OF INDUSTRIAL WELFARE

Objectives

Maintain the health, welfare, safety and comfort of women and minors employed in any occupation, trade, or industry through the adoption of minimum standards regulating the maximum hours, minimum wages, and working conditions.

Program and Performance

In the division, the Industrial Welfare Commission is composed of 5 members appointed by the Governor as established by Division I, Chapter 2 of the Labor Code. The commission issues orders establishing minimum wages, maximum hours and conditions of labor in various industries.

Jurisdiction of the Division of Industrial Welfare extends to the administration and enforcement of all laws and regulations for women and minors which control their minimum wage, maximum hours, and standard conditions of labor as prescribed by the Labor Code and the administrative regulations adopted by the Industrial Welfare Commission. Two new Industrial Welfare Commission orders for agricultural occupations became effective August 28, 1961. All employments of women and minors are now covered by wage orders with the exception of domestic service. A total of 62,500 farm employers are now included in the division's workload.

The division is directed by statute to supervise the payment of unpaid minimum wages and unpaid overtime pay for all women and minors in addition to the individual complainant wherever a violation is found. The hours regulations require payment of premium rates for overtime based on the regular rate of pay. In addition to enforcing the many provisions which regulate all working conditions, the division must license and regulate industrial homework; license and regulate the employment of handicapped women and minors at special wage rates; issue special exemptions from the Industrial Welfare Commission regulations and enforce the equal pay law for women.

During the 1961-62 fiscal year the division completed 3,486 cases and corrected 18,654 violations benefiting 75,087 employees. A total of $255,566 was collected, representing minimum wage underpayments and penalty overtime pay. Homework licenses numbering 99 were issued to employers and 816 permits to individual homeworkers. A total of 1,627 special minimum wage permits and 115 exemption permits were processed and issued.

All of the commission's wage orders were reopened during 1961-62; and review by wage board members appointed by the commission, as required by Labor Code Section 1178, is expected to be completed during 1962-63. One technical assistant and 2.5 clerical positions provided to handle the workload resulting from reopening of these Industrial Welfare orders, are reduced for 1963-64.

It is proposed to add 0.5 intermediate stenographer for 1963-64 to bring the Santa Rosa clerical staffing up to a full-time position on the basis of existing workload in that office.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF LABOR LAW ENFORCEMENT

Objectives

To protect the rights of the general public and those employees whose interests fall within the provisions of the California Labor Code.

Program and Performance

This division has the overall responsibility for administering and enforcing all labor laws that are not specifically delegated to any other authority. The major part of the work of the division deals with the enforcement of wage payment laws, the collection of unpaid wages; laws requiring contribution by employers to health and welfare funds; the payment of prevailing wage rates and overtime on public works projects; the compulsory workmen's compensation insurance law; the bonding of employers in certain industries; and laws restricting the hours of work in certain occupations. A substantial part of the division's activity is related to the licensing and regulation of private employment agencies, labor contractors and artists' managers, farm labor contractors and unloaders of farm produce in urban centers. The division is also charged with responsibility for enforcement of Child Labor Laws and the certain restrictions upon employment of minors with the exception of those regulations that deal with minimum wages.

The statistics for the division again reflect a significant increase over previous years. This increase represents a 6.8 percent gain over the 1960-61 fiscal year for total complaints and controversies received. Of significance is the fact that the backlog of cases to be disposed of at the end of 1961-62 increased by almost 4,000 cases. The recovery of workers' wages again reached a new high in California during 1961-62 and amounted to $3,044,941.

The work of the division continues to grow in volume and in complexity; and the activity becomes more time consuming as a result of this complexity, which is attributable to the refined patterns of employer-employee relations. This trend in government and labor-management relations is continuing and has resulted in the frequent attendance at hearings of the division by attorneys, personnel management specialists, and labor relations experts.

A great many claims involve payment of commissions and bonuses. Such cases are more complicated than those dealing with disputes over hourly and daily wages, and they involve more subtle issues. These changes in the composition of the work force and in the character of industrial relatiions have been reflected in the workload of the deputy labor commissioners.

The workload is rising at an accelerated rate with the continuing population growth aggravated by economic shifts. The area where there has been a drop in employment, brings greater activity to the division because of the increased difficulties of various employers in meeting payrolls, while those areas in which the economy burgeons bring the problems inherent in change and growth. The division anticipates an average increase of 10 percent for the current and budget years.

On this basis, the caseload anticipated by the division is estimated at 54,646 for the 1962-63 fiscal year and 60,111 for 1963-64.

The caseload per deputy is almost 30 percent over optimum because of the tremendous figure continuing for total complaints and controversies. In addition, as mentioned above, the backlog of cases not yet settled has increased by about 13 percent.

Four deputies, 3 investigators and 7 clerical positions are proposed for the 1963-64 budget to meet the workload increases. A temporary help increase of 0.5 man-year is included to assist deputies in peak workload situations.

DIVISION OF APPRENTICESHIP STANDARDS

Objectives

Promotion and development of apprenticeship and other on-the-job training under provisions of the Shelley-Maloney Apprentice Labor Standards Act of 1939, Sections 3070-3093 California Labor Code.

Program and Performance

The Apprenticeship Council establishes labor standards for apprentice agreements and issues rules and regulations which are administered through the division. The council has 16 members who represent employers, employees, the public, and state government. The Director of Industrial Relations is ex-officio secretary of the council and administrator of apprenticeship.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

DIVISION OF APPRENTICESHIP STANDARDS—Continued

Program and Performance—Continued

Both apprenticeship and other on-the-job training programs are voluntary on the part of employers and employees and their organizations. It is the division's function and responsibility to encourage and assist these groups to establish training programs that will meet the State's growing needs for skilled workers and expand on-the-job training opportunities for the increasing number of youth entering the labor market and for workers who may be, or have been, displaced by automation and other technological changes.

The division provides consultative services in the development and maintenance of training programs, advising and assisting management and labor in drawing up written apprenticeship and other training on-the-job standards and agreements for approval under the regulations of the Apprenticeship Council, Title 8, Chapter 10, California Administrative Code.

The division vigorously promotes equal opportunity in apprenticeship and training without regard to race, creed, color, o national origin. In order to expand the special consultative work required in dealing effectively with the minority problems, 3 additional positions including 2 professional and 1 clerical positition are proposed in 1963-64.

A tabulating machine operator is reduced in 1962-63 as a result of the Division of Labor Statistics and Research assuming the necessary tabulating workload.

DIVISION OF HOUSING

Objectives

Protection of the health and safety of occupants and the public through administration and enforcement of state housing laws and related administrative regulations.

Program and Performance

In addition to its direct enforcement jurisdiction, the division has supervisory enforcement responsibilities where local enforcement agencies assume primary enforcement of the State law.

The division furnishes consultative assistance to local officials, architects, builders, and interested groups in the enactment and enforcement of adequate building codes, investigation of sub-standard housing conditions, and organization of local housing rehabilitation and urban renewal programs.

The chief of the division serves as chairman of the State Housing Appeals Board which is composed of himself and 10 others appointed by the Governor as authorized by Sections 17930 through 17941 of the Health and Safety Code. The Appeals Board hears appeals of the application of rules and regulations by the department.

Inspection and reinspection coverage of approximately 8,000 labor camps in the State, including an effective camp registration program is a continuing responsibility.

The division provides construction supervision and annua inspection of mobilehome parks and construction supervisio and minimum maintenance inspection of auto courts, resorts and motels. Fees are set by statute for these annual inspections.

Enforcement of state building and housing standards applicable to apartment houses, hotels, and dwellings, under provisions of the State Housing Law is carried on, as is construction supervision under provisions of the Earthquake Protectio Law, where no local enforcement agency is established. Construction fees are collected for these services. Efforts will continue toward adoption and enforcement by cities and countie of building and housing codes applicable to apartment houses hotels, dwellings, mobilehome parks, and motels.

The division also enforces plumbing, electrical, and heatin standards, and issues insignia of approval, for all trailer coache sold in California manufactured after September 1, 1958, i accordance with Section 18370, Health and Safety Code. Cost of this program are reimbursed by fees charged manufacturer and sales agencies for services.

No change in staffing is proposed for 1963-64, as the Divisio will continue the 1962-63 program. Consolidation of change in administration involved in the implementation of the 196 State Housing Law, the Mobilehome Park Law, and the Mote Act, is in progress.

DIVISION OF LABOR STATISTICS AND RESEARCH

Objectives

The Division of Labor Statistics and Research has the responsibility for compiling labor statistics for the State and administrative statistics for the department as assigned under the provisions of Section 150-153 of the Labor Code.

Program and Performance

The division compiles and publishes monthly statistics of employment, earnings, and hours, by industry, for California and 9 major metropolitan areas, and, in co-operation with the Department of Employment, prepares monthly estimates of civilian employment and unemployment in the State. Employment, earnings, and hours statistics for nonagricultural industries are collected under a co-operative program with the United States Department of Labor, Bureau of Labor Statistics. The division compiles statistics of work injuries to provide information for use in accident prevention work—to make known how, where, and why accidents occur. It makes studies and investigations in the field of industrial relations and studies of wages and hours in industries employing women for minimum wage determination. In connection with the legal responsibility of the department to monitor the payment of prevailing wages on public works, the division has responsibility for maintaining a file of current wage rates for all building trades occupations in all counties in the State. Administrative statistics are compiled regularly for the other divisions of the department.

Increases in the population and labor force of California have substantially increased the workload of the division. Furthermore, as the volume of work of the other divisions increases, the workload of the Division of Labor Statistics and Research increases in connection with the compilation of the administrative statistics and the performance of operating services. Much of this additional load has been carried on through greater utilization of punched card and tabulating machine techniques, but nevertheless additional staff is required to handle the expanded workload.

A total of 10.5 additional positions are included in 1963-64 for the following purposes:

Four new positions are requested for the Work Injury Statistics Section for compilation of Industrial Accident Commission administrative statistics and work injury statistics for accident prevention purposes. No additional staff has been budgeted for IAC administrative statistics since 1954. Because of the rapidly increasing workload in IAC administrative statistics and the increased number of offices each of which requires a separate set of statistics, the division has fallen behind in its work for the commission. Likewise, the number of work injuries reported has continued to rise and without added staff the division has fallen behind in processing the reports and has not been able to carry out the research and analysis that needs to be done in this field for accident prevention purposes.

Four new positions are requested for the Employment Statistics Section to enable the division: (a) to bring the sample of reporting establishments up to acceptable standards for accuracy and reliability; (b) to develop current employment, hours, and earnings statistics for more detailed industries for major areas of the State and to develop much needed statistics for smaller metropolitan areas; (c) to develop statistical data on new plants in California to be derived from factory registrations; and (d) to apply seasonal adjustments to more employment series to pinpoint underlying forces shaping our economy.

In addition, 2.5 new positions are proposed to keep the "Budget for a self-supporting working woman" on a current basis for use by the Division of Industrial Welfare. This addition will also provide staffing to improve the quality of the budget and will permit some analysis of consumption habits as an additional factor for use in evaluating minimum needs.

DIVISION OF FAIR EMPLOYMENT PRACTICES

Objectives

To protect, safeguard, and promote the right and opportunity of all persons to seek, obtain, hold, and advance in employment without abridgment on account of race, religious creed, color, national origin, or ancestry and to secure housing without any such abridgment or denial.

Program and Performance

The Fair Employment Practice Commission, established in September 1959, consists of 5 members appointed by the Governor for 4-year terms. The commission's program includes education, conciliation, and enforcement activities. The commission formulates broad policy and program, sits as a hearing panel for cases of alleged job discrimination which are not settled through conference and conciliation, issues orders, and directs enforcement when necessary. The commission is generally charged with responsibility for studying problems of discrimination, fostering good will and co-operation among the State's various ethnic, religious, and other population groups, and seeking through educational means to minimize discrimination because of color, creed, or ancestry.

A total of 10.5 additional positions is included for 1963-64.

Legislation will be proposed to amend the existing law relating to discrimination in publicly assisted housing to provide for enforcement responsibility in this division. This responsibility includes the functions of promoting equality of opportunity in public financed housing and of receiving, investigating, and seeking to resolve complaints of discrimination in said housing according to the same procedures by which the Fair Employment Practice Act is presently administered. To implement this additional responsibility a total of 6 positions including 3 consultants, 1 education officer and 2 clerical positions is proposed in 1963-64. The 3 consultants are required as minimum essential staff for investigation and conciliation of cases of alleged violation of the housing act. An assistant education officer is proposed to perform the responsibility to inform all affected persons and businesses of the meaning of the law; of the procedures, rules, and regulations by which it is to be administered; of the feasibility and community advantages of nondiscrimination in housing; of scientific fact concerning property values and minority occupancy; and otherwise to encourage and assist toward maximum voluntary adherence to the objectives and standards of the fair housing law. This activity should minimize the number of complaints of violations which the division would be obligated to investigate and resolve. Two stenographers are proposed as related clerical staff for the 4 additional professional positions in the housing program.

To strengthen the division and provide the means for beginning a program of affirmative compliance, 2 consultants are requested. The affirmative compliance function involves engaging industry and labor in discussions, surveys of employment practices, and reviews of recruiting activities in order to accelerate employment integration throughout California. These positions will assist in handling existing complaint workload, and will also work toward the development of the advisory or conciliation councils contemplated in Section 1419(h) of the Fair Employment Practice Act.

The existing clerical staff is augmented by 2 additional intermediate stenographers and 0.5 man-year temporary help. Past experience has shown that, particularly at the higher levels in the division, clerical staff has been inadequate to meet the demands of a growing program. No provision has been made for temporary help and this has had the effect of limiting the effectiveness of permanent staff during periods of exceptional activity.

GENERAL ANALYSIS

Objectives

The principal function of the State Fire Marshal is fire prevention and protection.

Program and Performance

The Fire Marshal's program includes fire prevention engineering, advisory and plan-checking services to the Departments of Corrections, Public Health, Mental Hygiene, Public Works, Social Welfare, and Youth Authority. Working drawings are checked for all public and private institutional occupancies, including jails and all public schools in California.

The field inspection program covers all schools, public and private, fairs and other places of public assembly, all institutional occupancies, organized summer camps, all state institutions, and dry cleaning establishments.

Law enforcement activities include: fireworks, transportation and storage of explosives, transportation of flammable liquids, sale and servicing of fire extinguishers, treatment and use of flammable decorations, flammable wearing apparel, and a bulletin listing service of building construction materials and equipment distributed on a subscription basis. The Fire Marshal also operates a laboratory to test various materials in order to establish fire safety standards.

A co-ordinated program for administering state fire safety laws, rules and regulations has been established between the office of the State Fire Marshal and local city, county, and district fire officials. This co-ordinated program was made possible by the creation of the State Fire Advisory Board in 1945. The State Fire Marshal, with the assistance of this board develops fire safety standards and administers and enforce these standards. Through the board, it has been possible t develop uniform statewide standards of fire safety and provid for their administration and enforcement without creating overlapping authority and duplication of effort, and at the sam time preserve local autonomy.

The 1963-64 budget includes 4 additional positions.

In order to meet the general increase in workload in the enforcement of fire and panic regulations and to meet the increasing workload in the dry cleaning plant inspection program, 2 deputy state fire marshal positions are proposed.

One fire prevention engineer position is included in order t provide fire prevention engineering services in basic design and construction of buildings for the state college construction program. The cost for this service will be recovered from the Trustees of the State Colleges on a project basis.

The increasing clerical workload in the Los Angeles office requires the services of 1 additional clerical position.

Estimated reimbursements for the Fire Extinguisher Program are below the original estimates when the program was established in 1961-62. The decreased estimates are base on a reduction in the annual fire extinguisher retail license fee from $3 to $1 in accordance with the provisions of Chapter 8, Statute of 1962.

GENERAL ANALYSIS

Objectives

The Department of Justice, under the direction of the Attorney General, is the senior law office of the State to interpret laws, render opinions, and represent the State in civil and criminal proceedings. To assist in law enforcement, the department maintains a fingerprint file for identification purposes, compiles statistics pertaining to crime, assists peace officers in civil and criminal investigations, and participates in direct enforcement in use, possession, and sale of narcotics.

Program and Performance

Under the direction of the Attorney General, the Department of Justice provides legal advice and assistance to the various state departments, boards, and commissions. The department passes on the constitutionality of each law passed by the Legislature for the final consideration of the Governor, and represents the State on all criminal matters before the Appellate and Supreme Courts. Another important function is the identification of criminals through current fingerprint and criminal record files and by related technical aid and assistance to local agencies. Closely allied with this service is the coordination of requests from local enforcement agencies, and assistance in the locating of deserting parents.

The State Narcotics Act is enforced through offices located in Fresno, Los Angeles, Sacramento, San Diego, and San Francisco. Agents operating from these offices investigate known and suspected persons for illegal possession, use, and sale of narcotics. Prosecution of violators is accomplished through the district attorney in each county.

The 1963-64 Budget provides for the following increases in personnel:

Organization	*Positions*	*Salary and related expenses*
Division of Administration	30	$159,000
Division of Civil Law	8	91,000
Division of Criminal Law and Enforcement:		
Executive	4	21,000
Bureau of Criminal Law	14	148,000
Bureau of Criminal Statistics	3	14,000
Bureau of Criminal Identification and Investigation	6	33,000
Bureau of Narcotics Enforcement	2	10,000
Total	67	$476,000

DIVISION OF GENERAL ADMINISTRATION

Objectives

This division carries out the administrative responsibilities of the Attorney General, maintains the general services necessary to the operating divisions of the department and operates the State Teletype System.

Program and Performance

Through the Accounting Office, the Division of General Administration maintains fiscal control and internal management, budget preparation, purchasing, and mail messenger and duplicating services. The State Teletype System is a communication service primarily for police offices with secondary use by government agencies. Departmental control centers are located in Sacramento, Los Angeles, and San Francisco.

In the Business Frauds Section, during 1962-63 and 1963-64, an intermediate stenographer has been changed to an auditor III and is shown in the Division of Civil Law as an established position for 1962-63 and proposed new for 1963-64. This action more effectively aligns the duties to the needs of the program.

A total of 30 new positions are included in the 1963-64 Budget. One technician and 2 clerks are included in the Accounting and Records section to handle increased workload. A total of 19 secretarial positions are included in 1963-64 of which 13 are to provide stenographic assistance on a formula basis for the additional attorneys and 6 are to provide an improvement in the staffing ratio of attorneys to stenographic positions for supervising attorneys. One librarian and two clerks are included to staff the law libraries in Los Angeles and Sacramento. These positions will be utilized in the cataloging of briefs and related legal documents as well as updating the index system and generally improving the library services of the three law offices. Five clerical positions are included for the three law offices to perform clerical and related duties other than stenographic. These positions are necessary in order to relieve the attorney and stenographers of the routine office duties such as messenger service, general filing of letters, memos, and reports and to assist in the establishment of central files in the three law offices.

DIVISION OF CIVIL LAW

Objectives

This division is responsible for handling the civil and administrative legal problems of state departments, boards, and commissions.

Program and Performance

Attorneys operating out of San Francisco, Los Angeles, and Sacramento represent the State of California in federal and state courts at all levels and represent officers, boards, and commissions before administrative tribunals. Legal opinions, either formal, informal, or oral are rendered as required by law, not only to state officers, boards, and agencies, but also to Members of the Legislature, district attorneys, and county counsels. In addition, other legal services normally performed by a firm of private attorneys for its clients are furnished, including the drawing of legal documents, consultation, and the rendering of advice on legal matters.

A total of 7 additional positions have been included in the 1963-64 Budget, of which 4 are attorneys to handle the increased workload. Two investigators and 1 auditor are included in the Business Fraud Section to provide and maintain a continuing investigation on a statewide basis of investment frauds and business crimes. Also, in relation to the Business Fraud Section an auditor III position in the San Francisco office has been changed from an intermediate stenographer shown in the Division of General Administration-Secretarial. This position has been temporarily approved in 1962-63 and also shown as proposed new in 1963-64. A special consultant position has been eliminated from the authorized positions and included as an operating expense in Consulting Services for 1962-63 and 1963-64.

The Colorado River Litigation Section has handled legal action in the suit, *Arizona* v. *California* before the United States Supreme Court since the initial step in the long legal process was taken by the State of Arizona in August 1952. The report of the special master appointed by the supreme court to adjudicate the dispute has been filed and its recommendations to that body are unfavorable to the State of California. The Supreme Court directed reargument in November 1962, and a decision may or may not be rendered prior to July 1963. Four clerical positions and related expenses, included in the 1962-63 Budget by the 1962 Legislature, are continued into 1963-64 to handle the current workload as well as a limited amount of workload that may arise from an order of the court.

DIVISION OF CRIMINAL LAW AND ENFORCEMENT

Objectives

This division insures criminal justice in California through periodic meetings with local law enforcement agencies. Prosecution is assumed when local enforcement is negated.

Program and Performance

The legal staff of this division represents the State on all criminal proceedings when appealed from trial courts, prepares documents for extradition of fugitives, processes forfeiture of vehicles for violation of State Narcotics Act, enforces antitrust laws, and registers and reviews all charitable trusts. Chapter 2112, Statutes of 1961, requires registration or the loss of tax exemption privelege for all charitable trusts. As a result of the enactment of this statute, the registration of these organizations increased from 2,950 in November 1961 to 4,270 in December 1962. The compilation of crime statistics is a responsibility of this division. This is accomplished by the Bureau of Criminal Statistics located in Sacramento which maintains detailed statistics of all crimes committed in California, records of turnover rate of prisoners, juvenile delinquency figures, and a reporting system for narcotic violations.

This division functions as a clearinghouse for information concerning criminals and as a source of technical aid and assist-

[b] Transferred from General Administration and changed from intermediate stenographer during 1962-63.

DIVISION OF CRIMINAL LAW AND ENFORCEMENT—Continued

Program and Performance—Continued

ance in the investigation of crime and the apprehension of criminals. Fingerprint files are maintained on a 24-hour basis to provide maximum service to local police jurisdictions. A laboratory and a staff of qualified technicians including specialists in the operation of the polygraph provide assistance to local agencies and other state agencies when requested.

Special training is given local law enforcement personnel in the aspects of narcotic enforcement. Specially trained inspectors, operating under cover, contact known informers and purchase evidence or information leading to the arrest of narcotic users and suppliers. Pharmacist inspectors insure the legitimate use of drugs by professional people.

A total of 29 new positions are included in the 1963-64 Budget as follows:

In the Executive office, 1 clerical position was temporarily approved during 1962-63 and is proposed as new in 1963-64 to handle increased workload; this position was transferred from the Bureau of Narcotic Enforcement. In the Charitable Trust Unit, 3 clerical positions are included to handle the increased registration workload.

In the Bureau of Criminal Law, 13 deputy attorneys general and 1 investigator are included, of which 11 deputies are to handle criminal appeals, writs and trials; 1 attorney to handle increased workload in the Charitable Trust Unit; and 1 attorney and 1 investigator in the Consumer Fraud Section to investigate and protect the public from fraudulent practices.

In the Bureau of Criminal Statistics 2 clerical positions and 1 tabulating machine operator are included to handle increased workload.

In the Bureau of Criminal Identification and Investigation 1 junior clerk is included in Administration and 5 fingerprint technicians are included in the Fingerprint Section to handle increased workload.

In the Bureau of Narcotic Enforcement, 2 clerical positions are included; 1 position for the Headquarters office in Sacramento to handle increased general clerical workload and assist in the bureau's in-service training program, and 1 position to perform general clerical duties in the Los Angeles field office. The in-service training program is being instituted during 1962-63 and funds are included in the 1963-64 Budget to continue the program.

GENERAL ANALYSIS

Objectives

The Commission on Peace Officers' Standards and Training is charged with the responsibility of raising and maintaining the level of competence of local law enforcement officers.

Program and Performance

This commission was established in the 1959-60 fiscal year in accordance with the provisions of Chapter 1823, Statutes of 1959 and carries out its assigned duties and responsibilities under the provisions of Section 13500 of the Penal Code. The commission is composed of 9 members appointed by the Governor for 3-year terms. Five are either sheriffs or chiefs of police or peace officers nominated by their respective sheriffs or chiefs of police, 2 are elected officers or chief administrative officers of cities in this State, 2 are elected officers or chief administrative officers of counties of this State, and the Attorney General, who serves as an ex officio member of the commission.

This commission adopts rules establishing minimum standards relating to physical, mental, and moral fitness, which govern the recruitment of any city or county police officers for any city or county which receives state aid for training of peace officers through the provisions of Chapter 1823, Statutes of 1959. It also establishes rules governing the training of police officers with the same conditions prevailing.

Following the creation of the commission, during fiscal year 1959-60 standards were developed and adopted, rules and regulations were established, and procedures were initiated to start the program. At that time, there were 429 jurisdictions identified as having law enforcement organizations subject to enforcement standardization. During fiscal year 1962-63 there are 434.

At the start of the program there were 72 jurisdictions eligible for state assistance. In 1960-61 there were 204 eligible and in 1961-62 there were 281, representing 90 percent of the State's population. The commission is continuing to direct its efforts to cause the remaining 153 jurisdictions to adopt ordinances and participate in the program.

Total expenditures for State assistance to local jurisdictions during 1963-64 is estimated to be $535,238. The detail program statement is shown in the local assistance section of this budget.

A proposed new field representative position is included in the 1963-64 Budget to meet increased workload in the areas of compliance, inspection of standards and practices, in the development of manuals and study courses and the improvement of lesson plans.

GENERAL ANALYSIS

Objectives

The Military Department includes: the California National Guard, to help guarantee internal security of the State and provide an organization prepared in an emergency to become a part of the active federal military forces; the California National Guard Reserve, to provide for defense and security of California while the California National Guard is in active federal service; and the California Cadet Corps to provide a program of military education for high schools and junior colleges.

Program and Performance

The primary programs of the Military Department are the operation of the California Army National Guard and the California Air National Guard. Within these programs the State provides a personnel procurement program which enters the field of selection and appointment of officers and warrant officers and recruitment of enlisted personnel; maintains records of the military history of individuals, recording personnel actions, verification of service or deeds, and qualifications for federal retirement; publishes orders and directives on policies and procedures affecting the military; determines locations of organizations and units allocated to the State; provides for training, in conformance with the discipline prescribed by the Department of the Army and Department of the Air Force; operates army officer candidate schools; prepares plans for use of National Guard as state military forces and uses such forces as required for emergency situations, such as flood duty and fire fighting; participates in the air defense program of the United States both in missiles and aircraft; maintains and operates armories, airfields, rifle ranges, supply points, repair and other facilities; establishes priorities for the use and distribution of federal funds, equipment, and supplies; and administers federal funds in excess of $24,000,000 allocated to California covering pay, schools, uniforms, equipment, material, and supplies.

The California National Guard Reserve program encompasses all the activities of the California Army National Guard except for the officer candidate schools and those activities financed from federal funds. All activities are conducted at a reduced level compared to the National Guard operation, due to the cadre nature of the organization.

The following tables show personnel strength, units, and installations of the state military forces. The personnel strength and unit figures shown for the Army National Guard do not reflect changes recently proposed by the Federal Government.

	Actual 1961-62	Estimated 1962-63	Proposed 1963-64

Air Bases			
Flying bases	4	4	4
Other bases	3	3	3

The 1963-64 Budget includes 3.1 proposed new positions. The position of civil defense signal officer was established administratively during the current year and is presented as proposed new in the budget year. This position, one-half federally financed, is required for staff technical assistance in improving and maintaining emergency communication capability and to co-ordinate the military communication network affiliated with the Civil Defense Regional Office, the State Disaster Office, and other State agencies.

Also included in the budget are two changes in positions affecting the Table of Organization and presented as proposed new positions in the budget year. In the headquarters information and recruiting section it is proposed to reclassify the staff sergeant-photographer position to warrant officer-assistant recruiting officer and photographer. The position of automotive equipment operator in the Adjutant General's Office was administratively changed from civil service to military status-warrant officer during the current year. It is proposed that this position be continued through 1963-64, and it is shown as a proposed new position. Temporary help of 0.1 position is proposed for custodian relief for new armories to be completed during the current year.

In the current year 18 security guard positions, plus relief, for the Air National Guard bases were established and are continued in the budget year. These positions are fully financed from federal funds. One stock clerk position in the headquarter's warehouse is abolished.

GENERAL ANALYSIS

Objectives

The department is responsible for enforcement of Division 9 of the Business and Professions Code known as the Alcoholic Beverage Control Act. It issues and transfers licenses and conducts qualification and compliance investigations. In the enforcement of the Alcoholic Beverage Control Act, it is responsible for preventing the sale of alcoholic beverages where any activity contrary to the public welfare is associated with a licensee or licensed premises.

Program and Performance

The department functions through a headquarters office and area, district and branch offices. The field offices take and investigate applications for new licenses and transfers of licenses, investigate the character of applicants, provide direct law compliance, and encourage, train and assist local law enforcement agencies to enforce the Alcoholic Beverage Control Act. Compliance is determined by inspection and investigation. Areas of most frequent violation include sales to minors, sales during restricted hours, sales to obviously intoxicated persons, operating disorderly premises and business practices contrary to rules and regulations on fair trade, price posting and secret rebates. During 1961-62, there were approximately 46,145 active licensees subject to this act. Licenses include on-sale beer, on-sale beer and wine and on-sale general licenses for trains, boats, airplanes and bona fide business establishments; retail package off-sale establishments, dealers, wholesalers, importers, warehouses, brokers and manufacturers of beer, wine, alcohol, brandy and distilled spirits.

The total number of licensees has remained fairly constant until recent years when it has increased slightly from 45,500 to 46,145. The number of transfers and licensing actions other than renewals processed by the department annually approximates 19,400. This is an increase of about 29 percent in the past two years.

At the present time, the department is handling about 67,000 licensing transactions annually. There are 32 different kinds of licenses involved. The allocation of new, transfer, renewal and offer in compromise fees, 90 percent of which goes to cities and counties where the licensees are located, involves 57 countie and 371 cities.

As of August 1, 1962, 241 new licenses have been issue and 97 intercounty transfers have been effected pursuant t Chapter 783, Statutes of 1961. These include 93 new on-sal general, 148 off-sale general, plus intercounty transfers of 3 on-sale general and 59 off-sale general licenses. The legislativ authority for intercounty transfers expires June 1, 1963.

The department conducts approximately 2,050 investigation per month for applications and alleged violations of the Alcoholic Beverage Control Act. During 1961-62, 2,488 forma actions were recorded consisting of 1,834 accusations, 653 petitions and protests, and 1 voided action; 653 applications wer denied; 1,922 licensees were disciplined; and 193 accusation were dismissed.

Included in the 1963-64 Budget is a request for $31,898 additional funds for converting to a machine licensing progra under contract with the Department of Agriculture. Followin the year of conversion, annual savings of approximately $22,00 are estimated assuming that permanent licenses would b issued and renewals would be processed by data processin equipment. In addition, the data processing services now bein performed by the Board of Equalization will be performed b the Department of Agriculture beginning in 1963-64.

The work to be performed by contract with the Department of Agriculture would include the annual premises count the fee allocation to cities and counties, the processing of renewals, the writing of licenses, and would make license information available to anyone in the public who wishes to purchase it. At the present time, a limited number of listin companies obtain license information. No additional request for such information can be accepted because of the limitation involved in manual writing of licenses.

The budget also includes 4 additional clerical positions t handle increased workload in 3 southern area branch office as a result of the increase in license investigations and transfers. The new positions will be added at the following locations 2 at San Diego, 1 at Crenshaw (Los Angeles), and 1 at Va Nuys.

GENERAL ANALYSIS

Objectives

The Alcoholic Beverage Control Appeals Board provides administrative review for any person aggrieved by a decision of the Department of Alcoholic Beverage Control.

Program and Performance

The appeals board, as provided in the Constitution, consists of 3 members appointed by the Governor and serves at his pleasure. The board determines whether the Department of Alcoholic Beverage Control has proceeded in the manner required by law, whether the department's actions are supported by the findings, and whether the findings are supported by substantial evidence in light of the whole record. Meetings are held monthly in Los Angeles, San Francisco, and Sacramento to review appealed cases. The board meets approximately semimonthly or as required in Sacramento to discuss cases and approve decisions prepared by the legal counsel in accordance with instructions from the board.

Since the creation of the board in 1954 more than 1,700 cases had been decided as of June 30, 1962. During 1961, 212 cases were appealed, and 189 decisions were issued.

DISTRICTS SECURITIES COMMISSION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS

Objectives

The Districts Securities Commission is charged with the direction and supervision of certain fiscal and physical affairs of irrigation districts and other entities of the State.

Program and Performance

The Districts Securities Commission carries out its duties pursuant to the provisions of Division 10 of the Water Code. The commission consists of the Attorney General, the Director of Water Resources, the Superintendent of Banks, and 2 members appointed by the Governor for a term of 4 years. In 1961-62 the commission reviewed and inspected the financial and physical condition of 173 districts as compared to 173 in 1959-60, and 178 in 1960-61 and assisted district officials with respect to financial problems involving the incurrence of indebtedness and other matters affecting the financial soundness of their districts. Investigations are made by the staff to determine the engineering, economic, and financial soundness of proposals by districts to incur additional indebtedness through the issuance of bonds or warrants or by contract with the Federal Government providing for water service, construction of facilities, or loans. The commission passes upon the incurrence of major indebtedness by irrigation, water, and other districts and local agencies which request certification of the eligibility of bonds as legal investments pursuant to the Districts Securities Commission Act. The commission also passes upon the expenditure of bond funds during the period of acquisition or construction of district facilities. Co-operative assistance to banks, investment companies, and other lending agencies is provided by making available factual information regarding the economic and financial condition of the districts. This is of substantial importance to both the investment companies and the districts, for, when the financial soundness of a district can be supported, the credit of the district is strengthened, and financing can be more readily secured at a reasonable rate of interest.

The federal program for assisting water resources and development by providing water service, construction of facilities, interest free loans, and/or grants for nonreimbursable parts of project costs has had a substantial effect upon the commission's workload. The execution by districts of contracts providing for such assistance is subject to commission approval, requiring substantially the same degree of investigation as would be required in the case of financing by the issuance of bonds. As of June 30, 1962, there were 70 applications, or letters of intent, filed with the United States Bureau of Reclamation by districts under commission supervision requesting contractual assistance.

GENERAL ANALYSIS

Objectives

The Horse Racing Board regulates and supervises the operation of horse racing meetings where there is parimutuel betting.

Program and Performance

The Horse Racing Board was created by Section 25a, Article IV of the Constitution and operates under the provisions of Sections 11500 through 11528 of the Government Code.

The board, which consists of 3 members appointed by the Governor for 4-year terms, licenses trainers, jockeys, track officials, and other persons employed by the racing associations. Investigators check to determine compliance with rules and regulations. Before each race, horses are inspected and after each race drug tests are made on horses under the supervision of the board veterinarian. The workload of the board is indicated by the number of racing days and the number of licenses as follows:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64
Number of racing days	535	539	545	546	548
Number of licensees	9,673	9,374	9,667	9,700	10,000

Provision is made in 1963-64 to continue the same level of service as now authorized. The budget is based on a program of 548 days of racing of which 348 days are to be at major tracks consisting of 293 days of thoroughbred and 55 days of harness horse, 90 days at fair tracks, 55 days for quarter horses, and 55 days for a combination meeting.

The equivalent of 0.5 man-year of temporary help has been eliminated during 1962-63 and 1963-64 to reflect more accurately the needs of board.

GENERAL ANALYSIS

The Department of Investment carries out its duties and responsibilities in accordance with the provisions of Title 2, Division 3, Part 7, Government Code. The department is under the control of a Board of Investment consisting of the Superintendent of Banks, the Commissioner of Corporations, the Insurance Commissioner, the Real Estate Commissioner, and the Savings and Loan Commissioner. Each member serves as chairman in established rotation. During his service as chairman of the board, the chairman is known as the "Director of Investment" and is a member of the Governor's Council.

The board meets monthly at the State Capitol. The Governor may require its members to make reports of their work to the board.

Personnel man-years	58	72.5	80	7.5

GENERAL ANALYSIS

Objectives

The primary objective of the Banking Department is to protect and safeguard the funds of that portion of the public using the facilities of the State Banking System.

Program and Performance

The Banking Department carries out its duties and responsibilities under the authority of the Banking Law, and is established under the provisions of Section 200 of the Financial Code.

The main programs of the department are to grant licenses for new state banks or branches, examine all state banks annually, and liquidate the affairs of banks when this becomes necessary.

Each application for a new state bank, branch, or trust company requires a field survey and investigation to determine, among other things, that a need exists for the banking or trust facility applied for, giving consideration to (1) competition offered by existing banks and other financial institutions; (2) the opportunity for profitable employment of bank's funds, etc.; and (3) whether or not conditions in the locality, in which the proposed bank or trust company will transact business, afford reasonable promise of successful operation.

The Banking Law requires that each state bank be examined once during each fiscal year. On each annual examination, the examiner is required to determine the condition and resources of the bank, the mode of managing its affairs, the investment and disposition of its funds, the prudence of its management, the security afforded its depositors and creditors, and whether its articles of incorporation, and all applicable provisions thereof, are being complied with and into such other matters as may seem necessary or expedient.

The Banking Department is supported by an annual pro rata assessment collected from the banks and trust companies under the supervision of the department. The amount collected, according to the law, shall be sufficient to meet the expenses of the department and provide a reasonable reserve for contingencies. At the present time the department is maintaining a reserve sufficient to pay the cost of operating the department without assessing any tax for a period of approximately 8 months.

The following table reflects the growth of state banks and the workload increases:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64
Number of banks	93	95	100	114	130
Number of branches	400	426	470	520	570
Total Offices	493	521	570	634	700

The 1963-64 Budget includes a total of 11 new positions to handle the increased workload.

Five bank examiner positions and 2 clerical positions are needed to meet the increased examination and related workload as a result of the increase in the number of banking offices and the increased assets.

Two associate counsel positions and 2 stenographer positions are included to provide legal assistance in handling the increase in the number of applications for new banks, branch offices and mergers. Of these, 1 associate counsel position and 1 stenographer position are temporarily approved during the 1962-63 fiscal year to handle the current backlog of applications. As of November 1, 1962, there were 46 applications pending for new banks and 116 applications pending for branch banks.

Support *(General Fund)*	$2,401,108	$2,754,508	$2,863,547	$109,039 (3.9%)
Personnel man-years	359.9	380	403	23

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Corporations is the protection of the public from fraud in the sale of corporate securities. The division is also charged with responsibility for preventing fraud and usury, as well as unsound business practices, in industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents, retirement systems, and trading stamp companies.

Program and Performance

The division carries out its duties and responsibilities under the authority of the Corporations Code and the Financial Code. It is established under the provisions of Section 25300, Corporations Code.

Before many types of corporate securities can be offered for sale in California, application must first be made to this division. During the 1961-62 fiscal year there were 55,639 such permits, licenses and orders issued pursuant to provisions of the Corporate Securities Law. The division investigates properties, books and prospects of the applicants and a permit, license or order is issued or denied. It is estimated that 58,508 permits, licenses and orders will be issued in 1962-63 and 61,300 in 1963-64.

Industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents and retirement systems are regulated by first obtaining a permit or license and second by conducting annual examinations in accordance with law. In 1961-62 there were 2,761 licensees subject to regulation. It is estimated there will be 2,922 such licensees in 1962-63 and 3,085 in 1963-64.

During 1962-63, 2 auditor positions are temporarily approved and 2 attorney positions are abolished in order to meet a shift in the type of workload. The 2 auditor positions are included as proposed new positions in the 1963-64 Budget as corporation examiner II positions and are offset by a reduction of 2 deputy commissioner of corporation I positions.

During 1963-64 a total of 27 new positions are proposed including the extension of the 2 temporarily approved positions which are offset by the reduction of 2 positions. Of the remaining 25 positions, 16 are included to meet a general increase in examination and licensing workload. These include 11 auditor positions and 5 clerical positions.

In order to increase the audit program of check sellers and cashers, 5 positions are proposed including 4 additional auditors and 1 clerical position. At the present time about 2 percent of approximately 5,000 check seller and casher agencies are examined each year. For the purpose of providing greater protection for the public and to guard against possible fraud and defalcations it is proposed that 10 percent of these agencies be audited each year. The entire cost of the check seller and cashers examination program is directly reimbursed by assessments to each agency audited.

It is proposed to incorporate a written examination as part of the licensing process for securities agents, brokers and dealers. Such an examination would require that any person entering the securities industry to have knowledge of the laws governing it and the basic standards of good conduct and thereby serve to better protect the using public. In order to handle this examination workload of approximately 4,000 applicants per year, 4 new positions are needed including 1 attorney position and 3 clerical positions.

GENERAL ANALYSIS

Objectives

The purpose of the Department of Insurance is to protect the general public, insurance policyholders and the rights of beneficiaries in California.

Program and Performance

The Department of Insurance is established under the provisions of Section 12906, Insurance Code. It is supported from license fees, examination fees, assessments, taxes and other revenues derived from the insurance business. The main programs of the department are to: license companies and individuals who engage in the insurance business, admit insurers to operate in California, grant permits to issue securities and make changes in capital structure, approve certain types of policy forms, approve minimum workmen's compensation insurance rates, examine financial conditions and procedures of insurers through field audits and analysis of financial statements, take over the California affairs of insurers in financial difficulty for the purpose of liquidation or rehabilitation, investigate complaints against licensees, and check activities of licensees for compliance with all insurance laws.

These programs are handled through 4 divisions: Administration, Compliance and Legal, License, and Examination and Financial Analysis.

The 1963-64 Budget provides for the following increases in positions:

Administration	0.5
Compliance and Legal	3
Licensing	4
Examination and Financial Analysis	6
Total	13.5

Administration

The functions under this division include fiscal and personnel management, office services, actuarial studies, and the administration of insurance companies in liquidation or conservation. This division also operates district offices in Sacramento and San Diego. The 1963-64 Budget proposes the equivalent of 0.5 position in temporary help to handle increased clerical workload in the Sacramento office. This workload is related to the steady increase in policy service cases being handled and the increase in the number of inquiries received from the public.

Compliance and Legal Division

This division processes applications for Certificates of Authority to do business in California, permits to issue securities, amended Certificates of Authority and withdrawal proceedings. In addition the counsels assigned to this division review policy forms, policy riders and application forms. The legal staff prepares accusations and statement of issues in disciplinary proceedings, represents the Insurance Commissioner at hearings and recommends the adoption, rejection or modification of proposed decisions, does legal research and prepares legal briefs and memoranda. The Policy Services Bureau handles complaints against insurers by policyholders while the Investigation Bureau checks the activities of licensees for compliance with all insurance laws.

A total of 3 new positions are proposed for this division in 1963-64 in order to handle the increasing workload.

One assistant counsel is needed in the Los Angeles office to cope with the increasing workload primarily due to the steady increase in the number of Certificates of Authority being issued and the number of security permits being issued in Southern California.

One junior investigator is included for the Los Angeles office to handle the increasing number of investigative cases being received.

As a result of the increased legal and investigative workload additional clerical help will be required for the Los Angeles office. Consequently, 1 additional intermediate stenographer is also included.

License Division

This division processes all applications for licenses received in the department. The division screens all such applications to determine eligibility for a license and conducts the necessary examinations throughout the State to qualify the applicants for licenses. Upon successful completion of the examination the license documents are then completed and issued by this division. The 1963-64 Budget proposes 4 new positions for this division: 3 intermediate clerk positions to be located in San Francisco and 1 intermediate clerk position in Los Angeles.

The 3 positions for the San Francisco office are requested to meet the steady increase in new licenses being issued. During 1961-62, 58,884 new licenses were issued. It is estimated that 61,604 new licenses will be issued during 1962-63 and 64,384 during 1963-64 or an increase of 9.3 percent over 1961-62.

The one intermediate clerk position requested for the Los Angeles office is to meet the increasing related licensing workload in that city.

Examination and Financial Analysis Division

This division functions to protect the public interest from loss by insolvency of insurers or loss by improper or unlawful operation. To accomplish this the division performs periodic examinations of domestic insurers, receives and analyzes financial statements and audits and reviews tax returns filed by insurers. This budget proposes a total of 6 positions for this division: 4 insurance examiners I in the Examination Section located in San Francisco, 1 insurance examiner II and 1 intermediate typist-clerk in the Financial Analysis Bureau also located in San Francisco. The number of insurers licensed in California has increased from 685 in 1950 to 750 in 1959 and 795 in 1961. In addition to examinations of California insurers the Examination Bureau participates with other states in examinations of foreign insurers although on a limited scale. Each domestic company requires an average of 200 man-days for examination. The addition of 4 examiners will enable this bureau to meet the present workload and maintain the present scope of examination.

The Financial Analysis Bureau receives over 800 annual financial statements of insurers, 1,600 quarterly financial statements, 110 annual statements of title companies and 330 quarterly statements of title companies. These last two items were added as the result of legislation enacted in 1961. The workload is too great for the present staff to perform the detailed audits needed and maintain the analytical records needed in this area. The addition of 1 insurance examiner II will permit a more extensive audit and analysis of each statement submitted. One intermediate typist is also requested for this bureau to handle the larger volume of clerical workload and typing which has resulted from the increased number of statements being anaylzed.

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Real Estate is to protect the general public in all matters relating to real estate, subdivisions, business opportunities, mineral, oil and gas, and real estate securities transactions handled through licensees and to provide funds for education and research in the field of real estate.

Program and Performance

The Division of Real Estate is established and carries out its responsibilities and duties in accordance with the provisions of Division 4 of the Business and Professions Code.

Regulation and Licensing:

The following table reflects the workload in the various regulation and licensing activities:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64
Licenses in effect, June 30	135,641	144,183	141,443	143,000	145,000
Licenses issued	53,423	57,707	51,289	52,000	52,000

Acres	61,024	70,067	51,312	–	–
Lots	143,914	129,344	120,259	–	–
Subdivisions—Out-of-State:					
Filings	6	86	84	96	100
Reports written	6	106	137	150	175
Acres	1,784	54,410	143,633	–	–
Lots	930	32,467	50,943	–	–

A primary responsibility of the division is the issuance of original real estate, business opportunity, and mineral, oil, and gas licenses to applicants of good reputation who pass the required qualification examinations. In addition, real estate brokers desiring qualification as real property securities dealers are registered upon application and the filing of the bond required by law. A second qualifying examination must be passed by the holder of an original salesman license if he is to stay in the capacity of a licensed salesman beyond two years.

In 1961-62 the number of licenses outstanding showed a decrease over the previous fiscal year for the first time since the middle of World War II. The decrease was largely confined to "inactive" salesman licenses held by licensed brokers. This decrease was anticipated because of the amendment to the law which eliminated a double examination process for broker licensees who thus no longer are impelled to keep their salesman licenses inactive after passing the first brokers' license examination. During 1961-62 the combined total of original real estate broker and salesman licenses issued was 20,728.

Since the effective date of the real property securities dealers' law in September 1961, 77 individuals, partnerships and corporations have secured endorsements as real property securities dealers, posting the required bond. Application for real property securities permits numbered 37, of which 19 were issued; 2 were renewed; 3 were denied; 6 were withdrawn; and 7 are pending.

In 1961-62 the audit staff completed 72 audits of real property security dealers, 34 resulted in recommendations for formal action. This pattern is expected to continue with small variation in 1962-63 and 1963-64.

Of interest and concern to the public is the matter of subdivisions. The law requires that a filing be made with the Division of Real Estate on any subdivision proposed to be offered to the public. In making the filing, the subdivider must give complete details about the physical aspects of the tract, sales methods and method of financing. Each proposed offering is investigated and, if it appears the offering may work a fraud on the public, a stop order or desist and refrain order is issued. If not, the Real Estate Commissioner issues a "full disclosure" type Subdivision Public Report, copies of which the subdivider is required to distribute to prospective purchasers.

The number of "promotional" subdivisions, as opposed to the conventional house and lot in a package, is increasing as are the number of co-operative apartment offerings, many using the condominium concept. Most of these require intensive checking and investigation, particularly in connection with financing arrangements. In the type of market which has been experienced over the last few years, numerous subdividers find it necessary to make material changes in their offerings or financing, entailing changes in the public report on the tract already issued by the commissioner. Therefore, in 1961-62 the total reports issued numbered 4,237, including preliminary, original and amended reports. Under the law, the commissioner is required to investigate out-of-state subdivisions when it is proposed to offer the tracts for sale in California. The citizens of California seem to constitute a favorite market for promoters of out-of-state subdivisions to exploit, as they have intensified their activities here. Five years ago there were no filings of out-of-state tracts. The increase in out-of-state subdivisions being offered for sale in this State is reflected in the above table.

In some cases, these become mail order operations, a matter of concern not only in California but nationally, and take on the aspects of a racket. As a result, extensive out-of-state investigations are being made by agency staff. The problems are compounded because most of the other jurisdictions do not maintain subdivision standards and controls matching those of this State, and there is the question of enforcement of California requirements in areas located outside the boundaries of this State. The Division of Real Estate has found it necessary to issue a number of desist and refrain orders against those out-of-state subdividers who have not met our requirements. It is inevitable too that the citizens of this State are bombarded with advertising of out-of-state land "bargains" whose promoters have not bothered to meet the law requiring a disclosure report since they confine their operation to offerings in national publications and do business by mail, maintaining no offices or agents in California. The volume of interstate sales of newly subdivided property had been estimated at over $500 million a year, with much of it purchased sight unseen.

This budget includes no additional positions although there have been workload increases in many areas. In the interest of good management a change has been made, bringing the administrative adviser to Sacramento. With the leveling off of the examination load, a position was transferred from the Examination Section to provide stenographic assistance for the administrative adviser. A clerical position was transferred from San Francisco to Sacramento to meet the workload impact in accounting and incoming mail.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The possibility of improving the licensing procedures is currently being studied by the Organization and Cost Control Division of the Department of Finance. Further improvements through mechanization or simplification in other areas are being explored by the Division of Real Estate staff.

Real estate transactions tend in the current market to become extremely complex as does the financing process in subdivisions of both the traditional and apartment types. Investigations are necessarily more complex in many of the complaints entertained and in the subdivision and finance field, making heavy requirements on the services of deputy, attorney and audit staff. The Division of Real Estate is exploring and will continue to explore the possibilities of better time scheduling in pursuing investigations without lessening service to the public.

Education and Research:

The purpose of the real estate education and research program is for the upgrading of the real estate industry toward professionalization through the advancement of real estate education and research at the University of California, the state colleges and the junior colleges. Program financing is provided from 25 percent of the license fees which is placed in the Real Estate Education and Research Fund. The state college and junior college programs are co-ordinated with each other and with the activities in real estate education and research at the University of California through the commissioner's office assisted by the Commissioner's Real Estate Education and Research Advisory Committee, comprised of representatives of the University, the colleges, and the real estate industry.

In accordance with an overall master policy plan of this committee defining areas of activity, financial aid in 1962-63 is made available to 12 state colleges for faculty travel in connection with real estate curricula; to 3 state colleges for continuation of 4 research and educational aid projects now in process; to 6 state colleges for 9 new education and research projects beginning in 1962-63; to 1 state college and the University for 2 teachers' curriculum and teaching technique workshops and an anticipated 2 additional workshops yet to be designated during the fiscal year.

Financial aid is made to the junior colleges as follows: to 47 junior colleges for initiating and upgrading of real estate courses, an increase of 22 institutions over those so serviced during the fiscal year 1961-62; to 1 junior college for the development of teaching aids and for an additional anticipated revision of a teacher's guide and student workbook.

The 1963-64 Budget provides for 11 new education and research projects to be conducted by 8 state colleges at a total cost of $97,847; $130,000 for the continuation of the junior college real estate teaching programs; and $20,000 for 3 additional teacher training institutes.

These allotments are in addition to the major real estate research program conducted by the University of California, the University Extension Real Estate Certificate Program, and the extension correspondence courses, including those in preparation.

A long-range plan for education and research has been developed which, matured, will assure a broad range of professional real estate educational opportunities in the public institutions of higher learning in this State. The plan will result eventually in a cut in research projects; but, in the meantime, the research will continue to provide the basis for instructional offerings and for licensee information. In addition, a number of the reports and findings are proving of interest and value to public agencies and jurisdictions at the local, regional and state level.

DIVISION OF SAVINGS AND LOAN

Headquarters Office at Los Angeles

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
SUMMARY				
TOTAL EXPENDITURES				
Support *(Savings and Loan Inspection Fund)*	$988,644	$1,258,592	$1,297,873	$39,281 (3.1%)
Personnel man-years	87.8	108.5	114.5	6

GENERAL ANALYSIS

Objectives

The Division of Savings and Loan is responsible for safeguarding investors' funds in savings and loan associations.

Program and Performance

The duties and responsibilities of the Division of Savings and Loan are set forth in Division 2 of the Financial Code, known as the Savings and Loan Association Law.

The major responsibilities of the division are examining state-licensed savings and loan associations and all branch offices; test checking appraisals of all savings and loan associations' loan portfolios; investigations, hearings and decisions on applications for approval of articles of incorporation of new associations, and for the licensing of new branches of associations; processing miscellaneous requests of associations such as the sale of loans, approval of mergers, changes in capital structure and the relocation of facilities.

The number of facilities requiring examination are:

	Actual 1959-60	Actual 1960-61	Actual 1961-62	Estimated 1962-63	Estimated 1963-64
Number of associations	174	192	189	208	219
Number of branches	149	161	186	199	220
Total Facilities	323	353	375	407	439

The division is supported by an assessment of an annual fee against each state-licensed association based pro rata on its total assets. The rate of assessment levied on December 31, 1961, was 15.1 cents per $1,000 of association assets.

Headquarters offices are maintained in Los Angeles with a branch office in San Francisco.

A joint examination program of state-licensed savings and loan associations officially began in 1961 between the division and the Federal Home Loan Bank Board. Because of the success and projected enlargement of this program no additional examiner personnel will be required in 1963-64 although an overall increase in workload is forecast.

A new assistant savings and loan commissioner position and 1 supporting clerical position are included in the 1963-64 budget. This new assistant savings and loan commissioner position is needed to direct the operations of the Los Angeles office and thereby free the chief deputy savings and loan commissioner to further assist the commissioner with statewide policies and programs.

The budget also includes the equivalent of one-half man-year in temporary help to provide additional clerical help during peak workload periods and thereby prevent unnecessary delays in processing applications and reports.

GENERAL ANALYSIS

Objectives

This board was established to maintain high standards for the osteopathic profession, and to assist and protect licentiates and the public.

Program and Performance

The Board of Osteopathic Examiners was created by initiative measure in 1922 and consists of 5 members appointed by the Governor for 3-year terms from graduates of osteopathic schools who are licensed to practice in this State and have been citizens for 5 years preceding appointment. With the passage of the amendment to the Osteopathic Act (Proposition 22) in November 1962, it is planned to study the results in relation to the policies and work program of this board. The 1963-64 Budget proposes a continuation of the board activities at the previously approved level of service until the results of the study can be considered.

GENERAL ANALYSIS

Objectives

Pursuant to Section 3820 of the Harbor and Navigation Code, this board has responsibility for the safety of navigation at the Port of Eureka and Humboldt Bay.

Program and Performance

The Board, established under the provisions of Section 3800 of the Harbors and Navigation Code, consists of 3 members appointed by the Governor with the consent of the Senate. Each commissioner serves for a 4-year term. One commissioner, designated by the Governor, acts as ex officio surveyor of the port and secretary of the Board.

The Board's goals are two-fold: First, to insure that the Corps of Engineers, United States Army, maintains the harbor standards adopted in 1953; and second, to further substantiate and justify the need for improvement of ingress to the harbor and deepening of existing channels.

The Board is being reactivated in the current year because of unsafe conditions which have arisen in this harbor.

GENERAL ANALYSIS

Objectives

The purpose of the board is to protect the public and users of the San Diego port facilities by assuring that pilots are qualified to perform their function.

Program and Performance

The 3-member board is appointed by the Governor to serve at his pleasure for terms not exceeding 4 years. Members include the mayor of San Diego as ex officio member, a nautical man, and 1 citizen, who must be residents of San Diego.

The board licenses pilots operating vessels on the San Diego Bay, after careful examination of qualification; fixes rates of pilotage, and records fees received by each pilot as submitted to the board on monthly reports.

GENERAL ANALYSIS

Objectives

This board qualifies persons as pilots operating vessels on San Francisco, Suisun, and San Pablo Bays.

Program and Performance

The Board of Pilot Commissioners for the Bays of San Francisco, San Pablo, and Suisun consists of 3 members appointed by the Governor for 4-year terms.

At the present time 35 pilots are licensed by the board. Revenues are received from pilotage fees.

Chapter 2227, Statutes of 1961 created the Pilotage Rat Committee for San Francisco, San Pablo, and Suisun Bays consisting of 5 members appointed by the Governor. Operativ July 1, 1962, the committee's function is to make biennial reports to the Legislature concerning pilotage rates. The secretary and employees of the Board of Pilot Commissioners fo the San Francisco, San Pablo, and Suisun Bays perform th necessary clerical, administrative and other services for th Pilotage Rate Committee.

GENERAL ANALYSIS

Objectives

To protect the public health, welfare and safety by licensing only persons and firms of demonstrated knowledge and abilities to perform services for the public, to prevent unauthorized practices upon the public, and to discipline those licensed who fail in their public trust.

Program and Performance

The 27 boards and commissions of this department are responsible for regulating approximately 600,000 persons practicing some 50 professions and vocations in the State of California. A total of over 1,800 people are needed annually to fulfill the department's responsibilities, including 241 board and committee members, 601 permanent employees, and approximately 1,000 part-time expert examiners, proctors, and other temporary help.

The member boards of the Department of Professional and Vocational Standards are headed by boards of 5 to 13 members appointed by the Governor from members of the particular profession or vocation regulated. The members usually serve overlapping 4-year terms. One additional board member, to represent the public has been added to most of the member boards pursuant to Chapter 1821, Statutes of 1961.

In general, the boards have authority to determine the qualifications of applicants for licenses, to give examinations and issue licenses, and to regulate licenses by means of inspection, investigation, and formal disciplinary action.

Each board employs a staff to assist with these functions. The cost of operations of the member boards is generally paid by the fees collected from those engaged in the occupations regulated.

The 1963-64 Budget of the member boards and departmental administration include the following proposed new positions:

Organization	Program	Number of positions	Salary an related expenses
Departmental Administration	Clerical and investigation	12	$66,7
Board of Architectural Examiners	Examination	0.5	3,75
Board of Barber Examiners	Clerical	1	4,4
Cemetery Board	Clerical	0.1	26

Personnel man-years	169.3	196.7	198.7	2

GENERAL ANALYSIS

Objectives

The departmental administration co-ordinates and supervises the administrative and financial affairs of its member boards, bureaus, and commissions.

Program and Performance

In carrying out the duties required under the Business and Professions Code beginning with Section 100, the departmental administration performs centralized accounting, budgeting, personnel, business data processing, internal auditing, legal, management and procedures analysis, business and other bookkeeping services for these agencies, and manages properties under the control of the department. In addition, investigative services are provided through the Division of Investigation.

To carry out these various duties a total of 12 new positions are proposed for 1963-64.

Administration: 1 clerical position in the personnel section is required to meet workload increases.

Data Processing Section: 1 clerical position is required in data processing to meet the increased workload and provide additional data processing services to the boards. This position is temporarily approved during the 1962-63 fiscal year and is proposed on a permanent basis in the 1963-64 fiscal year.

Division of Investigation: 10 new positions are included in 1963-64 to handle the workload. Of these, 5 are stenographer positions which were authorized by the Legislature on a limited-term basis through June 30, 1963, pending a study of workload. A review of the workload has indicated that continuation of these positions on a permanent basis is needed for the transcribing and typing of investigative reports.

Four new investigator-structural pest control positions are included as proposed new to handle the increased workload related to the structural pest control inspection report program. These positions are temporarily approved during the 1962-63 fiscal year.

One special investigator position is temporarily approved in 1962-63 to handle the increased workload involved in the investigation of unlicensed operators in the Bureau of Private Investigators and Adjusters. The position is included in 1963-64 to continue it on a permanent basis.

Building Maintenance and Operation:

Section 403 of the Business and Professions Code provides that the costs of operation, maintenance, repairs, and other reasonable and necessary expenses shall be paid from rentals, and that the building will be subject to the supervision of the Department of Professional and Vocational Standards in accordance with rules and regulations established by the Department and the Department of Finance.

The annex is being operated with the main building as a self-sustaining enterprise. Major tenants, in addition to the Department of Professional and Vocational Standards, are the Board of Equalization and the Division of Corporations. Also occupying space are small units of the State Controller's Office and the Department of Finance. Plans are being completed for the movement of the Controller and Finance units to other buildings, with the Division of Corporations moving to the vacated space. The area that will thus be vacated by the Division of Corporations will provide additional space required by the department to eliminate overcrowding and unsatisfactory working conditions.

BUSINESS AND PROFESSIONS BUILDING ANNEX

Section 403 of the Business and Professions Code provides that the costs of operation, maintenance, repairs, and other reasonable and necessary expenses shall be paid from rentals and that the building will be subject to the supervision of the Department of Professional and Vocational Standards in accordance with the rules and regulations established by the department and the Department of Finance. Out of the rentals received from state boards occupying space in the building and fees paid by users of its parking facilities, are defrayed th cost of operating and maintaining the building. Generally, th remaining receipts are apportioned back to the boards co tributing to the cost of the building in proportion to their r spective investments.

Repayments to investing boards are estimated on an accru basis. Actual repayments are made semiannually, after th close of the period in which net rentals accrued.

INVESTING AGENCIES	Investment as of July 1, 1962	Estimated Repayments	
		1962-63	1963-64
Department of Professional and Vocational Standards:

GENERAL ANALYSIS

Objectives

The Board of Accountancy administers the laws by establishing and enforcing regulations pertaining to the activities of Certified Public Accountants and Public Accountants and the prequalification, examination, and licensing of these persons so as to protect the using public.

Program and Performance

The Board of Accountancy consists of 8 members appointed by the Governor for 4-year terms. The board maintains headquarters in Sacramento with branch offices in Los Angeles and San Francisco.

While the total number of licensees has remained fairly constant over the past several years, this figure does not accurately portray the actual workload increase in the board. Two types of principal licenses are issued by the board, Certified Public Accountants and Public Accountants. The number of Public Accountants licensed has diminished substantially over the years whereas the number of Certified Public Accountants licensed has increased. The workload increase has been due to the increased number of examinations conducted in licensing Certified Public Accountants and in the maintenance and evaluation of experience records for such persons prior to the issuance of licenses.

The board's workload is reflected in the following table which reflects the correlation of increases and decreases in Certified Public Accountants and Public Accountants.

	Actual			Estimated	
Licenses:	1959-60	1960-61	1961-62	1962-63	1963-64
Certified Public Accountants	8,687	8,373	9,124	9,875	10,500

Support *(Architectural Examiners' Fund)*	$91,184	$106,537	$108,285	$1,748 (1.6%)
Personnel man-years	8	7.9	8.1	0.2

GENERAL ANALYSIS

Objectives

The Board of Architectural Examiners enforces laws and makes regulations pertaining to the practice of architecture. It determines acceptable qualifications, examines, and licenses persons to practice architecture so as to protect the using public.

Program and Performance

The board consists of 6 members appointed by the Governor for 4-year terms. The board maintains headquarters at Sacramento with branch offices at San Francisco and Los Angeles.

The principal workload of the board is in the prequalification and examination of applicants to practice architecture. The number of applicants, examinations conducted, and licentiate shows a continuing yearly increase.

The increase of expenditures for the board for both the current and the budget year is due principally to salary increase and the need for additional expert examiners and temporar help to meet the increasing workload.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-6

GENERAL ANALYSIS

Objectives

The Athletic Commission administers the boxing and wrestling laws by establishing and enforcing rules and regulations pertaining to all professional and amateur matches and all persons who participate in them.

Program and Performance

The commission consists of 5 members serving 4-year terms. Headquarters are maintained in Sacramento with branch offices in Los Angeles and San Francisco.

On September 18, 1961, the Athletic Commission Fund was abolished and all balances available were transferred to the Athletic Commission Account in the General Fund in accordance with the provisions of Chapter 1413, Statutes of 1961.

The number of shows supervised by the commission increased in the 1961-62 fiscal year with a resulting increase in revenue.

The commission's workload is indicated by the following figures:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

BOARD OF BARBER EXAMINERS

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
SUMMARY				
TOTAL EXPENDITURES				
Support *(Barber Examiners' Fund)*	$202,030	$224,613	$233,231	$8,618 (3.8%)
Personnel man-years	9.7	10.7	10.5	—0.2

GENERAL ANALYSIS

Objectives

The Board of Barber Examiners enforces laws, rules, and regulations pertaining to the practice of barbering. The board also establishes minimum price schedules within any city or county upon petition signed by 75 per centum of the barbers in that city or county.

Program and Performance

The board consists of 5 members appointed by the Governor for 4-year terms. Headquarters are maintained in Sacramento with a branch office in Los Angeles.

The receipt, by the board, of petitions to establish minimum price schedules has increased substantially and a backlog problem exists in this area. Temporary help funds are included in the current and budget years to handle this workload. Other increased expenditures are due to the printing of barber act law books and increased travel costs through the addition of 2 board members.

The board's workload is reflected in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

GENERAL ANALYSIS

Objectives

The Cemetery Board is charged with the administration and enforcement of laws pertaining to certain cemeteries and the licensing of cemetery salesmen and brokers.

Program and Performance

The board consists of 6 members appointed by the Governor for 4-year terms. The board maintains headquarters in Sacramento with a branch office in Los Angeles.

In addition to regulating certain cemeteries and licensing cemetery salesmen and brokers, the board is required to examine endowment care funds of cemetery authorities to determine the status and proper investment of such funds.

The board's workload is reflected in the following table:

GENERAL ANALYSIS

Objectives

The Board of Registration for Civil and Professional Engineers administers the laws by adopting and enforcing rules and regulations pertaining to the practice of engineering and land surveying and involves the prequalification, examination, and licensing of persons to practice engineering and land surveying so as to protect the using public.

Program and Performance

The board consists of 9 members appointed by the Governor for 4-year terms. Seven members are engineers, 1 member is a land surveyor, and 1 member is appointed from the public. The board maintains headquarters in Sacramento, with branch offices in Los Angeles and San Francisco.

During 1962-63 the Board is requesting a study of the licensing and clerical operations, field operations and general organization structure and control of the board by the Division of Organization and Cost Control Department of Finance. It is expected that the study will be completed in sufficient time to reflect any significant changes in the 1964-65 budget.

In order to meet the increasing application and examination workload, 3 new clerical positions and the equivalent of three-tenths of a man-year in intermittent expert examiner help are included in the 1963-64 Budget.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64
Licensees	37,930	38,806	40,090	42,250	43,400

Support *(Collection Agency Fund)*	$194,351	$212,879	$251,995	$39,116 (18.4%)
Personnel man-years	13.7	16.1	20	3.9

GENERAL ANALYSIS

Purpose

The Collection Agency Licensing Bureau enforces laws and regulations pertaining to collection agencies and the examination and licensing of officers and employees of collection agencies. In addition, the bureau registers employees, licensees, examines the financial accounts of licensees, and appoints conservators for liquidations when necessary.

Program and Performance

The chief of the bureau is appointed by the Governor and serves under the direction and supervision of the director of the Department of Professional and Vocational Standards. In addition, the chief serves in the same capacity for the Bureau of Private Investigators and Adjusters with the salary expense being shared equally by each bureau. There is within this bureau a California Advisory Board of Collection Agencies which consists of 5 members appointed by the Governor for 4-year terms.

The bureau maintains headquarters in Sacramento with branch offices in Los Angeles and San Francisco.

The 1963-64 Budget includes 3.5 new positions of which 0.5 position is an assistant chief of bureau and 3 are auditor positions. The additional 0.5 assistant chief of bureau position will enable the employment of a full-time person in the Los Angeles office to handle the increased supervisory workload and to provide additional technical assistance in handling cases requiring prosecution or disciplinary action. The 3 auditor positions are required in order to enable the bureau to conduct an audit of the estimated 633 collection agencies at least once every 3 years.

Most of the license fees were increased on a temporary basis under the provisions of Chapter 12, Statutes of 1962 in order to continue the bureau's program on a self-supporting basis during the 1962-63 fiscal year. The increased fees will be in effect until May 31, 1963, at which time the fees will revert to the previously authorized level. The 1962-63 revenue estimate, however, will not approach the amount previously estimated because of a drop in the number of licentiates from the original

---

[a] Includes license fees on a biennial renewal basis in accordance with provisions of Chapter 1252, Statutes of 1961.

estimate of 740 to 633 or a reduction of 107. A loan of approximately $15,000 from the General Fund will be required in order to continue operations during the 1962-63 fiscal year.

Legislation will be introduced at the 1963 General Session of the Legislature to increase fees in order to continue the program on a self-supporting basis. The revenue estimates for 1963-64 reflect these proposed fee increases.

The bureau's workload is indicated in the following table:

Support *(Contractors' License Fund)*	$1,213,585	$1,587,406	$1,518,609	—$68,797 (—4.3%)
Personnel man-years	107.9	131.5	131.5	–

GENERAL ANALYSIS

Objectives

The Contractors' License Board administers the laws by establishing and enforcing rules and regulations pertaining to contractors and the pre-qualification, examination, and licensing of persons to practice in the various branches of the construction industry.

Program and Performance

The Contractors' License Board consists of 8 members appointed by the Governor for 4-year terms. The members, with the exception of the public member, are appointed as follows: 3 general building contractors, 3 specialty contractors, and 1 general engineering contractor. Appointments to fill vacancies in these categories will be from the same branch of the contracting industry as the member whose term expired. The public member must not be licensed by the board.

As a result of the survey made by the Organization and Cost Control Division of the Department of Finance, organizational and procedural changes are being put into effect during the current and budget years.

The budget reflects an increase of the equivalent of 2 man-years of temporary help in 1962-63. This additional temporary help is needed to provide clerical assistance to handle the increased licensing workload and to assist in the conversion of the files to a more efficient filing and reference system.

In order to meet the increased examination evaluation workload and to assist in the revising and formulating of examinations 1 assistant examiner position is proposed for 1963-64.

Also included is 1 new permanent position of intermediate typist-clerk which will be offset by a reduction in the equivalent of 1 man-year in temporary help. The revised clerical procedures have enabled the board to level out the clerical workload for better management control.

The following table indicates the board's workload:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

SUMMARY				
TOTAL EXPENDITURES				
Support *(Cosmetology Contingent Fund)*	$412,566	$476,101	$477,642	$1,541 (0.3%)
Personnel man-years	19.5	20.8	23.4	2.6

GENERAL ANALYSIS

The Board of Cosmetology, which consists of 7 members appointed by the Governor for 4-year terms, examines, licenses, and regulates the practice of hairdressers, cosmeticians, manicurists, electrologists, beauty shops, and cosmetology schools.

The board maintains headquarters in Sacramento with branch offices in San Francisco, Los Angeles, and San Diego and in addition maintains examination facilities in San Francisco and Los Angeles.

The budget provides for 2 new clerical positions and the equivalent of six-tenths of a man-year in additional temporary help to handle the increased workload resulting from the increases in the number of licentiates and applications for new licenses.

A decrease in board member per diem is reflected in 1963-64 as a result of an increased use of expert examiners in conducting examinations.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

GENERAL ANALYSIS

Objectives

The Board of Dental Examiners administers the laws by establishing and enforcing rules and regulations pertaining to the practice of dentistry and the prequalification, examination, and licensing of persons to practice as dentists and as dental hygienists.

Program and Performance

The Board of Dental Examiners consists of 8 members appointed by the Governor for 4-year terms. Seven of the members must be practicing dentists and 1 is a public member. The board maintains headquarters in Sacramento, with branch offices in San Francisco and Los Angeles.

The principal workload of the board is in the prequalification and examination, both written and practical, of applicants to practice dentistry. The number of applicants, examinations conducted, and licentiates shows a continuing yearly increase.

Legislation will be introduced at the 1963 General Session to increase fees in order to continue the program on a self-supporting basis. The revenue estimate for 1963-64 reflects the proposed fee increases.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

GENERAL ANALYSIS

Objectives

The Board of Dry Cleaners administers the law by adopting and enforcing rules and regulations pertaining to the practice of dry cleaning and the examination and licensing of applicants to practice dry cleaning.

Program and Performance

The Board of Dry Cleaning consists of 7 members appointed by the Governor for 4-year terms. The board maintains headquarters in Sacramento, with branch offices in Los Angeles and San Francisco.

During the 1961-62 fiscal year the impact of the coin-operated cleaning establishments became noticeable and this workload is expected to increase.

The 1963-64 budget includes 1 new clerical position, which has been temporarily approved in 1962-63, in order to provide information services to the public in the Los Angeles office and to provide stenographic help to the board and executive secretary when working in Los Angeles.

The board's workload is indicated in the following table:

GENERAL ANALYSIS

Objectives

The Board of Funeral Directors and Embalmers administers the laws by establishing and enforcing rules and regulations pertaining to funeral directors, embalmers, and apprentice embalmers, and the examination and licensing of persons to so act.

Program and Performance

The board consists of 6 members appointed by the Governor for 4-year terms.

The board, in addition to the examination and licensing program, maintains control over an apprentice embalmer program. This program constitutes a substantial portion of the workload and is of increasing importance in policy considerations of the board.

The board's workload is indicated in the following table:

BUREAU OF FURNITURE AND BEDDING INSPECTION

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
SUMMARY				
TOTAL EXPENDITURES				
Support *(Bureau of Furniture and Bedding Inspection Fund)*	$442,317	$508,436	$510,461	$2,025 (0.4%)
Personnel man-years	15.9	16.6	16.2	—0.4

GENERAL ANALYSIS

Objectives

The Bureau of Furniture and Bedding Inspection administers the laws by establishing and enforcing rules and regulations pertaining to the selling and manufacture of furniture and bedding containing any types of filling materials and the licensing of persons to engage in such activities.

Program and Performance

Within the Bureau of Furniture and Bedding Inspection there is an advisory board which consists of 7 members appointed by the Governor for 4-year terms. The bureau maintains headquarters in Sacramento, with branch offices in Los Angeles, San Diego, and San Francisco. A laboratory is maintained and provides the necessary analysis of filling materials to insure compliance with legal requirements for the protection of public health and welfare. Because of the many advances in materials and fabrics, the laboratory maintains a continuing analysis program. In addition, the laboratory furnishes analytical services to the Purchasing Division of the Department of Finance on a reimbursement basis.

One new clerical position is temporarily approved in 1962-63 and is proposed for continuation on a permanent basis in 1963-64. This position is needed to handle unanticipated clerical workload related to the processing of investigative and inspection reports from the Division of Investigation.

The increase of 0.2 man-year in temporary help in 1962-63 and the decrease of a like amount in 1963-64 reflect the temporary help needs as a result of the statutory change to biennial licensing which will commence in the 1962-63 fiscal year.

Approximately $20,000 additional operating expenses and equipment have been administratively approved in 1962-63 to finance the equipping and additional rent for the relocation of the bureau's Sacramento laboratory. The relocation was determined essential because of the health and fire hazards involved in the present location, which is in the basement of the Business and Professions Building.

The bureau's workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

GENERAL ANALYSIS

The Board of Guide Dogs for the Blind consists of 7 members. These include 5 appointed by the Governor for 4-year terms, 1 is the superintendent of the California School for the Blind, and 1 is the head of the Bureau of Vocational Rehabilitation. This board was established for the purpose of licensing and regulating guide dog schools and guide dog trainers. Nine licenses are in effect. Staff for this agency's work is currently provided jointly by the Department of Professional and Vocational Standards and the Department of Education.

GENERAL ANALYSIS

Objectives

The Board of Landscape Architects administers the laws by establishing and enforcing rules and regulations pertaining to landscape architecture and the examination and licensing of persons to so practice under the title of Landscape Architect.

Program and Performance

The Board of Landscape Architects consists of 6 members appointed by the Governor for 4-year terms.

The principal workload of the board is in the prequalification and examination of applicants to practice landscape architecture.

Workload of the board is indicated in the following table:

GENERAL ANALYSIS

Objectives

The Board of Medical Examiners administers the laws by establishing and enforcing rules and regulations for physicians and surgeons, podiatrists, drugless practitioners, and midwives.

Program and Performance

The board consists of 11 members appointed by the Governor for 4-year terms. Within the board there is a Podiatry Examining Committee of 6 members which reviews applications and examines applicants for licensing as podiatrists; a Psychology Examining Committee of 8 members which examines and passes upon the qualifications of applicants for certification and registration as psychologists; and a Physical Therapy Examining Committee of 5 members which reviews applications and examines applicants for licensing as physical therapists subject to approval by the board.

With the passage of the amendment to the Osteopathic Act (Proposition 22) in November, 1962, workload of the Board of Medical Examiners will increase as licentiates change their designation from Doctor of Osteopathy to Doctor of Medicine. The work program of the Board of Osteopathic Examiners will be studied in relation to the amount of work to be assumed by the Board of Medical Examiners. Pending results of the study, this budget is projected into 1963-64 at approximately the same level authorized in 1962-63.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64
Licentiates:

GENERAL ANALYSIS

Objectives

The Board of Nursing Education and Nurse Registration administers the laws by: the establishing of curricula for schools of nursing upon which accreditation of said schools may be based, and by establishing and enforcing rules and regulations pertaining to the practice of professional nursing and the examination and licensing of persons to practice as registered nurses.

Program and Performance

The board consists of 6 members appointed by the Governor for 4-year terms. Of the 6 members, 5 are licensed professional nurses and 1 member is a public member. The board maintains headquarters in Sacramento with branch offices in Los Angeles and San Francisco.

The budget includes a total of 3.5 proposed new positions which were established temporarily in the current fiscal year. For the Sacramento office 3 clerical positions are proposed in order to reduce application backlogs and delays in the issuance of licenses and permits, and to expedite the processing of disciplinary actions. These 3 positions and several changes to improve procedures and organization in order to better serve the public were recommended in a management survey by the Organization and Cost Control Division in the Department of Finance. Of the 3 positions, 1 represents recognition of a man-year of workload on a permanent basis rather than temporary. Consequently, the offsetting reduction of 1 man-year in clerical temporary help services is included.

An additional one-half clerical position is included for the Los Angeles office in order to meet the increasing demands for service by the public in that area and to provide additional clerical support for the nursing consultants in that office.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

GENERAL ANALYSIS

Objectives

The Board of Optometry administers the laws by establishing and enforcing regulations pertaining to the practice of optometry, the inspection and accreditation of schools teaching optometry, and the examination and lincensing of persons to practice optometry.

Program and Performance

The Board of Optometry consists of 6 members appointed by the Governor for 4-year terms.

The principal workload of the agency is in the prequalification and examination of applicants and in the maintenance of required records, which is reflected in the following table:

Support *(Pharmacy Board Contingent Fund)*	$365,594	$405,958	$417,709	$11,751 (2.9%)
Personnel man-years	22.2	23.1	24.9	1.8

GENERAL ANALYSIS

Objectives

The Board of Pharmacy administers the laws by adopting and enforcing rules and regulations pertaining to pharmacists, pharmacies, manufacturers and wholesalers of drugs, the prequalification, examination, and licensing of persons to so practice; and the control of sales of poisons and dangerous drugs.

Program and Performance

The Board of Pharmacy consists of 8 members appointed by the Governor for 4-year terms. Seven members must be registered pharmacists and 1 is a public member who must not be licensed under any of the healing art acts.

The board maintains headquarters in San Francisco with a branch office in Los Angeles.

Greater emphasis is being placed by all law enforcement agencies on the sale and control of dangerous drugs since such drugs are rapidly creating a problem area which ranks with the narcotics problem.

In accordance with this emphasis the board is increasing its liaison and training activities with law enforcement agencies.

The budget provides an assistant to the executive secretary which would allow the executive secretary the necessary time to initiate and maintain the increased liaison and training program. In addition, 1 clerk is included for increased licensing workload due to law and board rule changes.

The board's licensing workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

BUREAU OF PRIVATE INVESTIGATORS AND ADJUSTERS

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
SUMMARY				
TOTAL EXPENDITURES				
Support *(Private Investigator and Adjuster Fund)*	$122,493	$139,412	$145,096	$5,684 (4.1%)
Personnel man-years	6.5	7.1	7.1	–

GENERAL ANALYSIS

Purpose

The Bureau of Private Investigators and Adjusters administers and enforces the laws and regulations relating to private investigators, adjusters, repossessors, and employees and officers of private investigator agencies. The bureau also examines and licenses all private investigators, adjusters and repossessors.

Program and Performance

The chief of the bureau is appointed by the Governor and serves under the direction and supervision of the Director of the Department of Professional and Vocational Standards. In addition, the chief serves in the same capacity for the Collection Agency Licensing Bureau with the salary expense being shared equally by each bureau. The bureau maintains headquarters in Sacramento with a branch office in Los Angeles.

The equivalent of 2.5 new positions were temporarily approved in 1962-63. These included 0.5 assistant chief of bureau position, 1 clerical position and the equivalent of 1 man-year in temporary help. The 0.5 assistant chief of bureau position and the 1 clerical position are proposed for continuation on a permanent basis in 1963-64. In addition 1 other clerical position is proposed for a total of 2.5 new positions in 1963-64.

In 1962-63 funds have been temporarily approved for services of the Division of Investigation in the amount of $4,500, which is equivalent to the salary and related expenses of 1 investigator for the period of January 1, 1963, through June 30, 1963. For 1963-64 the amount of $8,500 is included to continue the position on a permanent basis. It is necessary that the position be included during 1962-63 to handle the workload involved in the investigation of an increasing number of unlicensed operators.

The additional 0.5 assistant chief of bureau position will enable the bureau to employ a full-time person. The full-time duties of this position are required in order to handle the supervisory workload related to the increased enforcement activities and to provide continuous review and upgrading of the testing procedures. Also, the full-time assistant chief of bureau is needed to review and recommend modifications of the Private Investigators and Adjusters Act.

The 2 additional clerical positions are needed in order to reduce the backlog of applications for registration and to perform increased clerical workload related to the examination and investigative programs.

Emergency legislation increasing license fees will be required during the 1963 General Session of the Legislature in order to maintain the bureau's program on a solvent basis during 1963-64.

The following table indicates the bureau's workload:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64

GENERAL ANALYSIS

Objectives

The Certified Shorthand Reporters Board administers the laws by establishing and enforcing regulations pertaining to the practice of shorthand reporting under the title of Certified Shorthand Reporter, and the prequalification, examination, and licensing of persons to so practice. The board reviews qualifications, examines and licenses qualified persons to practice as Certified Shorthand Reporters in order to protect the using public.

Program and Performance

The Certified Shorthand Reporters Board consists of 5 members appointed by the Governor for 3-year terms.

The principal workload of the board is in the examination and qualification of persons to use the title of Certified Shorthand Reporter. Two examinations are given each year. The number of successful candidates in 1961-62 increased sharply with 69 candidates passing the May 1962 examination for whom licenses were issued after July 1, 1962.

The board's workload is indicated in the following table:

GENERAL ANALYSIS

Objectives

The Board of Social Work Examiners administers the laws by establishing and enforcing regulations pertaining to the registration of social workers and examines and licenses persons to use the title of Registered Social Worker.

Program and Performance

The board consists of 7 members appointed by the Governor for 4-year terms.

The increase of expenditures for the budget year is due principally to the biennial printing of the directory.

The board's workload is indicated in the following table:

STRUCTURAL PEST CONTROL BOARD

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
SUMMARY				
TOTAL EXPENDITURES				
Support *(Structural Pest Control Fund)*	$193,724	$279,259	$290,019	$10,760 (3.9%)
Personnel man-years	10.4	16.7	18.7	2.

GENERAL ANALYSIS

Objectives

The Structural Pest Control Board administers the laws by establishing and enforcing rules and regulations relating to structural pest control and the examination and licensing of persons to practice structural pest control. The board also receives and maintains structural pest control inspection reports filed by structural pest control operators and furnishes copies of these reports to interested escrow holders or real estate brokers.

Program and Performance

The board consists of 6 members appointed by the Governor, of which 5 are licensed structural pest control operators and 1 is a public member.

During the 1961-62 fiscal year a considerable increase in operations was experienced due to the increased workload required under the provisions of Chapters 1568 and 1704, Statutes of 1961. Under these provisions it is mandatory to file all structural pest control inspection reports with this board and certified copies of such reports must be furnished to escrow holders or real estate brokers involved in cases where transactions are being processed concerning the transfer of real property which includes structures. During the 1962-63 fiscal year there is increased investigative workload resulting from conflicting reports filed with the board. This increased workload ar their investigative work will be handled by 1 additional investig tive positions in the Division of Investigation. The financing these positions was authorized in the 1962-63 Budget and is co tinued in 1963-64.

During the 1963-64 fiscal year 2 additional positions are i cluded in the budget. These include 1 deputy registrar to revie reports and perform administrative duties in the Los Angel office and 1 intermediate stenographer position for increas clerical workload in the Sacramento headquarters office. Th need for these positions is partially due to increased worklo in the structural pest control reporting activity and partial due to the increased workload related to the increased numb of applicants.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-

GENERAL ANALYSIS

Objectives

The Board of Examiners in Veterinary Medicine administers the laws by establishing and enforcing rules and regulations pertaining to the practice of veterinary medicine, by the examination and licensing of persons to practice veterinary medicine, and the inspection of premises used by persons to so practice.

Program and Performance

The Board of Examiners in Veterinary Medicine consists of 6 members appointed by the Governor for 4-year terms. The principal workload of the board is in the prequalification, examination (practical and written), and licensing of persons to practice veterinary medicine.

The board, in the latter part of fiscal year 1961-62, revised the examination procedures by assuming a greater role in the preparation, administering and grading of examinations. Accordingly, both the intermittent examiners and the contractual services for examinations have been reduced or eliminated which approximates the costs of additional per diem and traveling expense of board members. The revised budget for fiscal year 1962-63 reflects the continuation of the change in examination procedures.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1959-60	1960-61	1961-62	1962-63	1963-64
Licentiates	1,894	1,972	2,097	2,250	2,425
Applications	210	213	152	200	210

The board will begin licensing on a biennial basis in September 1963.

GENERAL ANALYSIS

Objectives

The Board of Vocational Nurse Examiners administers the law by establishing and enforcing rules and regulations pertaining to Vocational Nurses and Psychiatric Technicians, by establishing curriculums for schools teaching vocational nursing, and by the examination and licensing of persons to practice as vocational nurses and psychiatric technicians.

Program and Performance

The Board of Vocational Nurse Examiners consists of 9 members appointed by the Governor for 4-year terms. In fiscal year 1962-63 one additional clerk and 0.2 temporary help are temporarly approved to handle the backlog of application processing, file maintenance and general correspondence. To handle this continuing workload and to meet the anticipated workload increases these positions are proposed for continuation on a permanent basis in fiscal year 1963-64. One full-time nursing education consultant is proposed as new for 1963-64. This position has been carried in the Psychiatric Technician activity with one-half of the service reimbursed from the Vocational Nurse activity. With the implementation of the federal Manpower Development and Training program, and the anticipated termination of the Psychiatric Technician program, workload is expected to increase in the Vocational Nurse activity.

Revenue during the 1962-63 bienniel license renewal cycle for the Psychiatric Technicians failed to meet the original estimates to the extent that the current year activity is reduced to a minimum subsistence level in order to maintain an expenditure program within available resources. Because of the complete depletion of resources during the current year, the activity is unable to continue in 1963-64. Legislation will be required during the 1963 session to either repeal the act or take corrective measures to continue the activity on a sound financial basis.

Workload of the board is indicated in the following table:

	Actual			Estimated	
Licensees:	1959-60	1960-61	1961-62	1962-63	1963-64

YACHT AND SHIP BROKERS COMMISSION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

Objectives

The Yacht and Ship Brokers Commission administers the law by establishing and enforcing regulations pertaining to yacht and ship brokers including the licensing of persons to practice as yacht and ship brokers and salesmen.

Program and Performance

The commission consists of 5 members appointed by the Governor for 4-year terms. The registrar also serves as the executive secretary to the Board of Landscape Architects, the Board of Examiners in Veterinary Medicine, and the Certified Shorthand Reporters Board. The full cost of the personal services of the registrar position is shown for administrative purposes in this budget with approximately 75 percent of these costs being recovered through reimbursements received from the 3 other boards.

The commission's workload is indicated in the following table:

	Actual			Estimated

GENERAL ANALYSIS

Objectives

It is the duty of the commission to secure adequate and safe services or rates that are fair and reasonable for both the public and the privately owned utilities and transportation companies.

Program and Performance

The Public Utilities Commission was created under the provisions of Article XII, Section 22, of the Constitution and carries out its assigned duties and responsibilities under the sections contained in the Public Utilities Code.

The commission consists of 5 members appointed by the Governor for 6-year terms to hear matters relating to rates, charges, services, safety and affairs of the utilities and carriers under its jurisdiction. The commission determines intrastate rates and services of privately owned utilities and transportation companies. These include gas, electric, telephone and telegraph utilities; street cars, trucks, buses, airlines and vessels transporting freight or passengers in intrastate commerce; warehousemen, wharfingers, carloaders, and pipeline operators.

The commission regulates the issuance of securities and other transactions relating to the capital structure of public utilities, and protects the public interest by appearing before Federal agencies and courts as an advocate in interstate proceedings.

During 1961-62 the commission authorized increases in utility revenues of $7,393,421 per year, while revenues of other utilities were reduced $6,718,260. The net increase in utility charges on a statewide basis was only $675,161 per year. The largest single increase authorized was for gas service of one utility totaling $6,190,000, while the major decreases in annual charges were for telephone service totaling $5,548,627.

The commission is continuing to resist excessive charges for out-of-state natural gas and is actively participating in hearings held by the Federal Power Commission on natural gas matters. During the calendar year 1961 California utilities bought a total of 881,443 million cubic feet of out-of-state gas, or approximately 75 percent of the total consumed. The immediate objective has been to obtain as great a refund as is justifiable from El Paso Natural Gas Company, the main out-of-state supplier.

Passenger fare increases totaling $6,017,604 were authorized for railroads, bus companies, water carriers and airlines. Upward adjustments were also necessary in minimum rates for truck carriers of freight. Revenues of for-hire carriers of freight operating intrastate rose to $835,644,075 in 1961 compared to $770,135,766 the previous year. The bulk of this increase is attributed to the growth of the State.

Safety always has been an important part of commission work and steady progress has been made in safeguarding the public and employees. Installation of better automatic protection at railroad-highway grade crossings as well as construction of overpasses and underpasses at the most heavily traveled crossings has reduced hazards materially. Both of these programs have been stimulated by legislative action making funds available to assist cities and counties in paying their share of costs. Inspections for impaired clearances along railroad tracks, overhead power and communication lines, and gaslines and underground gas storage facilities were made to insure their safe construction and maintenance. Complete inspections were made of 4,671 vehicles in use by bus and trucklines, including 3,798 heavy duty trucks, to reduce highway hazards to the public. 598 truck terminals and related maintenance records were checked to see that an adequate safety program was in effect.

The commission's comprehensive study of the natural gas industry in California, instituted during 1961-62, has been completed. Upon interpretation and compilation of data and hearing transcripts a report will be made available for general distribution.

The study of commission regulated statewide transportation, including air, rail, vehicular, and water, is continuing and is expected to be completed during 1963-64.

The 1963-64 Budget provides for the following proposed new positions:

Organization	*Positions*	*Salary and related expenses*
Administration:		
Accounting officer II	1	$8,000
Senior stenographer	1	6,000
Utilities Division:		
Senior stenographer	1	6,000
Utilities Finance and Accounts Division:		
Principal financial examiner	1	15,000
Transportation Division:		
Assistant transportation engineer	1	9,000
Assistant motor carrier operations supervisor	1	8,000
Assistant transportation rate expert	1	8,000
Intermediate stenographer	2	10,000
Examiner Division:		
Engineer examiner	1	13,000
Transportation rate examiner	1	14,000
Reporting:		
Reporter	1	9,000
Totals	12	$106,000

ADMINISTRATION

Objectives

The Administrative Division carries out the statutory duties provided for in the Public Utilities Code and maintains the general services necessary to the commission and its operating divisions.

Program and Performance

The statutory duties include receiving and recording all official filings; processing and distribution of all commission decisions and orders; release of all official correspondence; administering oaths; certifying all official acts; issuing subpoenas for attendance of witnesses; processing notices of commission actions; authenticating official documents and testimony in any inquiry, investigation, hearing, or proceeding.

Other services provided by this division include the preparation of the annual budget; internal fiscal accounting; revenue collection; supervision of general business affairs of the commission; central personnel services; records management; sale of documents to the public; reproduction of papers, receiving, controlling and delivering incoming mail; dispatching all outgoing mail; custody of official property; maintaining storeroom for supplies; execution of all contracts, agreements and leases of property; advising the commission on administrative matters; and handling inquiries from the public and other state agencies regarding commission actions and procedures.

The number of overall formal filings received by the commission in 1961-62 amounted to 7,684, as compared with 8,171 for 1960-61.

PUBLIC UTILITIES COMMISSION—Continued

ADMINISTRATION—Continued

Program and Performance—Continued

Work volume connected with formal pleadings continued at a high level, with 1,358 such matters docketed. These consisted of 1,029 applications, 7 supplemental applications, 145 complaints, 85 petitions for rehearing, and 92 investigations.

During 1961-62 there were 152,018 copies of 1,900 decisions and orders prepared and served by registered mail, regular mail, or personal service to interested or affected parties as required.

Two additional positions are proposed for 1963-64 to further strengthen the management structure of the commission and to meet continuing workload increases in administration. An accounting officer II is included to handle the more complex technical accounting workload as well as assist the accounting officer III in the control of the commission's fiscal affairs. A senior stenographer position is included to assist in the records management program instituted during 1961-62 and to provide clerical assistance to the administrative analyst position.

UTILITIES DIVISION

Objectives

The Utilities Division assists the commission in protecting the public by the regulation of privately owned gas, electric, communication, water and steam heat utilities within the framework of the Public Utilities Code.

Program and Performance

Assignments of the Utilities Division include processing certain phases of rate increase applications for utility service, valuations of utility property for condemnation purposes, future requirements of utility service and adequacy of supply, certification matters, abandonment of service, analysis of special rate agreements, operational aspects of transfers and sales of properties, utility status, separation of plant, revenues and expenses between jurisdictions, and others.

The work program of the division includes the assignment of 64 percent of its staff's time to formal proceedings. A considerable number of staff assignments are concerned with certificates to establish new utility systems and/or facilities and utility engineering aspects of utility tariffs, services, and facilities. The determination of property lives and net salvage for depreciation purposes is an essential part of regulatory control. Emphasis will be continued in ascertaining the cost to produce and deliver out-of-state gas as well as the adequacy of gas and electric resources to meet the growth of California.

Investigating informal complaints, disputed bills, and other public inquiries is expected to conform with experience of recent years. It is estimated that about 2,300 informal complaints and 9,000 public inquiries will be investigated and answered in this fiscal year. This represents about 8 percent of the division's activity.

Administration of general orders, including many phases of public safety, is expected to require 12 percent of the staff's time. Fifteen percent of its time is for division administration and various activities designed to insure reasonable utility service and rates, as well as a small amount of time for in-service training.

During 1962-63 three engineering positions were temporarily approved on a reimbursable basis in order to complete the valuation studies of the Monterey Peninsula Water District and the City of North Sacramento Water District.

A proposed new senior stenographer position is included in 1963-64 to handle increased clerical workload of the division's stenographic pool operation.

UTILITIES FINANCE AND ACCOUNTS DIVISION

Objectives

This division reviews applications for authorization to issue securities, prepares rate of return and cost of money studies and otherwise participates in the financial aspects of rate and certificate proceedings, makes accounting examinations of financial data of carriers and other utilities, reviews annual and other financial reports, supervises the application of accounting procedures prescribed by the commission, and conducts financial review and interpretation, rate and cost studies in connection with out-of-state natural gas producers and pipelines regulated by the Federal Power Commission.

Program and Performance

The major portion of this division's time and manpower is consumed in formal proceedings. During the fiscal year 1961-62 this division actively participated in 92 formal rate proceedings before this commission and 7 rate proceedings involving utilities regulated by the Federal Power Commission. This participation in formal rate proceedings required the expenditure of 3,464 man-days or approximately 50 percent of the available time of the technical personnel employed in the division. Further, this division participated in numerous other formal proceedings concerning, among other things, the issuance of securities and related matters, expending 778 man-days of the time of technical personnel on this class of work. Thus, approximately 60 percent of the available time of the technical personnel is expended on formal proceedings.

Outside of formal proceedings, the activity requiring the expenditure of substantial amounts of time is the audit of carriers in connection with the reporting of revenues subject to the $\frac{1}{3}$ of 1 percent rate fund fee. During 1961-62 the division expended 910 man-days of time in conducting 795 such audits and ascertained that revenues had been under-reported in the amount of $12,059,607. The additional fees and penalties billed as a result of these audits totaled almost $50,000.

Applications considered by the commission resulted in the granting of authorization for the issuance of securities aggregating $1,265,885,364 in 1961-62. Corresponding authorizations in 1960-61 were $384,978,053. While there is considerable distortion in these comparisons due to stock splits in 1961-62 involving Pacific Gas and Electric Company and Southern California Edison Company, considerable staff time was expended in reviewing the applications involving the stock splits. If the effect of the 2 stock splits is eliminated from the total, security authorizations for 1961-62 would be $447,109,774.

Annual and other financial reports of utilities filed with this division for 1961-62 totaled 4,296.

A proposed new principal financial examiner position is included in 1963-64 to provide highly technical supervision over rate of return studies and insure reasonable profits to the utilities at equitable rates to the consumers. The position will also supervise the review of applications submitted by utilities for changes in capitalization due to growth or merger. Finally, because of the technological changes in accounting systems, a higher quality of audit and audit supervision is necessary in order to insure compliance with commission rules, regulations, and orders.

TRANSPORTATION DIVISION

Objectives

This division regulates rates, service, safety and operating conditions of privately owned, for-hire carriers of passengers and property by railroad, highway, and water, and to a limited extent, by air.

Program and Performance

The division studies cost factors, service rates, and regulations applicable to the movement of freight and passengers by railroad, highway, airlines, water carriers, express corporations, freight forwarders, warehousemen, wharfingers and carloaders. These studies are presented as exhibits in public hearings before the commission involving the establishment of minimum rates throughout the State. The staff examines tariffs filed with the commission for compliance with statutes and commission regulations; audits summaries of rates charged by carriers to determine violations of established rates; quotes rates to the public; and participates and presents evidence in transportation rate hearings before the Interstate Commerce Commission to protect the interests of California shippers. Formal proceedings involving increased tariff rates sought by carriers are expected to be at the same level as the current year. This work involves the technical activities of rate expert and cost engineering personnel.

Traffic Engineering Branch

Public safety at points where highways and streets cross railroad tracks has assumed greater importance in recent years and had added substantially to the workload. In 1963-64 it is estimated that this work will consume 8.4 man-years out of available manpower of 14 man-years. The growth of the State and the construction of residential and business areas near railroad tracks have added to the number of crossings and increased the exposure to accidents. The work in this category involves arranging with cities, counties, state agencies and the railroads to share in the cost of installing automatic signals. Also involved is the administration of the Grade Crossing Protection Fund established by the Legislature, under which the fund bears one-half of the share of cities and counties of the cost of signal installations. The work also involves the establishment of an annual priority list for railroad grade separations to be constructed by cities and counties with financial assistance from the Grade Separation Fund established by the Legislature. One assistant transportation engineer is proposed as new in 1963-64 to assist in this phase of highway safety.

During 1963-64 1,015 main and sub-terminals for trucks will be inspected compared to 1,450 terminals in 1961-62 because of increases in violations of safety regulations by carriers which warrant institution of formal proceedings by the commission involving possible suspension or revocation of operative rights or fines. In these matters, the staff must develop detailed evidence of the violations found and present it at the hearings. During 1963-64 it is estimated there will be an increase of 236 new carriers which will bring an additional 5,659 motor trucks under the commission's safety jurisdiction. In order to maintain the existing regulatory level and handle the increased number of vehicular inspections 1 additional assistant motor carrier operations supervisor is proposed as new in 1963-64.

In other safety activities, it is planned in 1963-64 to inspect 3,890 miles of mainline railroad track and 845 miles of short line railroad track for unsafe conditions. This compares with 4,360 miles and 621 miles, respectively, to be inspected in 1962-63.

Rate Branch:

Enforcement of lawful rates, requirements for licenses, and other statutory provisions, continue to need particular attention. Formal proceedings are expected to increase about 13 percent, enforcement work involving other than formal proceedings about 6 percent, and rate analysis summaries from 2,653 in 1962-63 to 2,812 in 1963-64. Misdemeanor prosecution proceedings are expected to rise from 294 in 1962-63 to 311 in 1963-64. To handle the increased workload 1 additional assistant transportation rate expert is proposed for 1963-64.

PUBLIC UTILITIES COMMISSION—Continued

TRANSPORTATION DIVISION—Continued

Program and Performance—Continued

License and Compliance Branch:

The 14 field offices effect compliance of the carriers transporting property within the State by field investigations of carrier records, as well as advising carriers regarding operating procedures and practices directed toward a dependable and adequate transportation system in the State. In order to handle the increased workload in the El Centro, San Diego, Santa Ana and Santa Barbara field offices it is proposed that the clerical staff in each of these offices be increased from half-time positions to full time. Therefore, the 1963-64 budget includes the equivalent of 2 clerical positions as proposed new for this purpose.

LEGAL DIVISION

Objectives

The Legal Division provides legal service to the commission and staff counsel in certain proceedings before the commission.

Program and Performance

This division represents the commission in proceedings in all of the federal courts and California courts, as well as federal regulatory agencies. It also represents the public interest in proceedings before the commission. A very important part of the federal litigation involves the oil and gas producers and pipeline corporations.

The chief counsel and assistant chief counsel review all proposed commission orders and actions. The Legal Division staff co-ordinates with the Division of Corporations on security issues of utility corporations; provides staff counsel in certain proceedings before the commission; handles legislative matters; just compensation proceedings; analyzes records and recommends action on petitions for rehearing; advises concerning legality of pleadings and filing problems; handles complaints seeking immediate injunctive relief by interim order; advises the commission, the technical staff, political subdivisions, utilities, carriers, and the public on legal and procedural matters; reviews the technical staff's informal investigations and determines and recommends whether or not formal proceedings or court action should be taken.

The Legal Division spent a substantial amount of time representing the commission in proceedings in the United States Supreme Court, courts of appeal and district courts, in the California Supreme Court, district courts of appeal and superior courts, as well as before the Federal Power Commission and Interstate Commerce Commission. It also represented the public interest in matters before the California Public Utilities Commission itself.

Proceedings out of the state are important and time consuming, requiring a great deal of preparation and absence of attorneys from the office for protracted periods. The interest of the California consumer of natural gas in just and reasonable rates is of vital importance and must be protected. Since California purchases approximately 75 percent of its natural gas from out-of-state sources the commission, in order to represent

PUBLIC UTILITIES COMMISSION—Continued

LEGAL DIVISION—Continued

Program and Performance—Continued

such interest adequately, is required to appear before the Federal Power Commission in cases involving oil and gas producers, as well as pipeline corporations.

The California commission was a party in 52 proceedings before the Federal Power Commission. There were extensive out-of-state hearings, primarily in Washington, D.C. One matter of national interest is before the Supreme Court of the United States, and two matters are pending before other Federal courts. Growth of the State and increasing reliance upon natural gas as a basic energy source requires continued participation in proceedings involving Federal regulation in this field.

During 1961-62 there were nine proceedings before the Interstate Commerce Commission, involving such matters as discontinuance of intrastate and interstate passenger trains, abandonments of portions of lines, control of the Western Pacific Railroad, rail-highway crossing accidents, and intrastate motor transportation of property.

Two proceedings are pending before the Federal Communications Commission, one relating to telegraphic communications and the other involving teletype rates and service.

In 1961-62 there were 28 review proceedings before the California Supreme Court, of which 3 were pending at the close of the fiscal year. There are 17 cases pending in the Superior Court.

Staff counsel is required in major utility and carrier rat proceedings before the commission, as well as investigatory an numerous other proceedings involving substantial questions o law. The transportation enforcement program involves review o possible violations, recommendations for proceedings in th courts or before the commission, and the preparation an handling of trials or hearings resulting from such recommendations. Time required in the performance of staff counsel functions has increased during the fiscal year.

Much time has been devoted to consideration of petitions fo rehearing and advising other divisions of the commission an the public. More briefs are being required, as well as mor detailed legal research on specific problems.

Two-tenths man-year is temporarily approved during 1962-6 to provide necessary legal counsel in connection with the reimbursable Monterery Peninsula Water District study.

In order to obtain a higher degree of proficiency from th division's authorized legal staff, 4 positions were changed fron junior counsel to assistant counsel. In so doing, 1 junior counse was administratively eliminated to provide the additional financing required for the higher level of duties included in the remaining 3 positions.

PUBLIC UTILITIES COMMISSION—Continued

EXAMINER DIVISION

Objectives

This function provides the hearing examiners to assure due process to those seeking formal relief from this agency.

Program and Performance

Examiners are assigned to all formal filings which require a decision of the commission. During 1961-62 a total of 1,900 decisions and orders were issued, of which 474 were rendered after public hearings. 1,094 days of hearings were held, 324 in San Francisco, 430 in Los Angeles, and 340 in other cities. As of June 30, 1962, there were 676 matters pending.

In order to handle the anticipated increased workload and hold the backlog of matters pending to the current level 1 additional engineer examiner and 1 additional transportation rate examiner are included in the 1963-64 Budget.

REPORTING SECTION

Objectives

This function provides the hearing reporters and transcribers for commission proceedings.

Program and Performance

Hearing reporters are assigned to all proceedings held before the commission. The reporters' notes are transcribed only if ordered by either the litigants or the commission. Transcripts were prepared in 75 percent of the hearings reported in 1961-62. There were 218,157 original folios produced in the past fiscal year. This compares with 211,264 original folios produced in 1960-61. The number of days of hearings totaled 1,102.

To improve the scheduling of hearings and insure the availability of competent reporters as well as provide full-time reporters for the increasing workload of this unit, 1 additional reporter position is included in 1963-64.

GENERAL ANALYSIS

Chapter 2037, Statutes of 1961, established the Resources Agency and authorized the appointment of an administrator. Under this organization the administrator is responsible for the supervision and the operation of the Departments of Water Resources, Fish and Game, Conservation, Parks and Recreation, State Water Pollution Control Board, the nine regional water pollution control boards, and the Water Rights Board. He is the chief adviser to the Governor in these program areas and as such participates in the development of administrative policy and insures that established policies are followed.

The agency concept was implemented in October 1961 with all costs of the office being a pro rata charge against the component departments. A position of administrator was established with 1 clerical aid. Other personal service assistance was provided by the departments involved within their authorized budgets.

It is proposed in the 1963-64 Governor's Budget to appropriate for the operations of this office directly and to strengthen the staff of the office. To this end 1 additional professional staf member and a clerk are proposed in this budget. The housekeeping activities such as accounting and related record keeping for the agency office will continue to be performed by the departments within the agency.

GENERAL ANALYSIS

Objectives

This department was created by Chapter 2037, Statutes of 1961, effective October 1, 1961. Under provisions of this statute the Department of Natural Resources was abolished and the divisions of the old department were divided between the new departments of conservation and parks and recreation.

This new department has as its principal objective the conservation, development, and utilization of the State's primary natural assets in the fields of forest, mineral, and soil resources.

Program and Performance

The department is organized into 5 divisions: Administration, Forestry, Mines and Geology, Oil and Gas, and Soil Conservation.

The Division of Administration provides personnel, accounting and general office services, and organizational and procedural analysis for the other divisions of the department.

The Division of Forestry has primary responsibility for the prevention and suppression of fires occurring on about 39,000,000 acres. In addition the division also carries forward various land management programs such as the administration and enforcement of forest practice rules, forest advisory services, range improvement programs, production of nursery stock, management of state forests, and underwriting forest and fire research programs.

The Division of Mines and Geology, through its staff of field geologists, assists the State's mineral industries in discovering, developing, and utilizing the abundant mineral resources found within the State.

The Division of Oil and Gas has supervision of the location, drilling, use or maintenance, and abandonment of all oil and gas wells to prevent waste and damage to the oil and gas deposits, to prevent contamination of fresh water sources penetrated by the wells, and to further the maximum recovery of oil and gas. The division also has responsibility for supervising repressuring operations in connection with the land subsidence which has occurred in the Wilmington area.

The Division of Soil Conservation assists in the organization and operation of local soil conservation districts and co-ordinates, under policy guidance of the State Soil Conservation Commission, the planning of the "small watershed" or Public Law 566 program.

The department is programmed to move from their present Sacramento headquarters in Office Building No. 1 to the Retirement Building on May 1, 1964.

The Division of Administration is proposed to maintain the same level of service in the budget year.

DIVISION OF FORESTRY

GENERAL ANALYSIS

Objectives

The primary mission of the Division of Forestry is the protection of over 39,000,000 acres of state and private lands having statewide interest with regard to timber production, rangelands, recreational uses, and watershed values. The various land management programs include the prevention and suppression of fires; the administration and enforcement of forest practice rules; forestry advisory services; range improvement programs; production of nursery stock for public planting, windbreaks, soil erosion control and reforestation purposes; management of state forests; control of white pine blister rust and forest insect infestations in co-operation with federal agencies and private owners; and co-operation with the Federal Government on forest surveys.

The division directly provides fire protection for approximately 30,000,000 acres of state-owned and private lands. Under a contract arrangement with the United States Forest Service, 5,000,000 acres are protected, and 4,000,000 acres are protected through contracts with 5 counties. In addition to the fire protection provided for lands of statewide interest, the division protects about 6,000,000 acres of rural agricultural land under contracts providing for reimbursement of costs from 26 counties.

Program and Performance

The critical problems in the management and protection of California's wild land areas have been brought about by the pressures of a continually growing population. The use of wild land areas for permanent and summer homesites and for recreational purposes has increased greatly during the past few years. Along with the increased use of these lands, the values for timber and rangelands and for watershed purposes have also increased with the demands of a growing population. Because of these expanding uses and pressures, the division is continuously reviewing its basic fire plan to provide personnel, equipment, and facilities planned to meet statewide needs.

As a part of the continuing conservation camp program 1 new 100-man camp and 1 new 80-man camp will be activated in 1963-64. In addition 1 60-inmate conservation camp will be replaced and increased in capacity to an 80-inmate installation.

Expansion of the air attack program of the division is proposed in 1963-64 at an increased cost of $250,000. The proposal is to provide the first complement of personnel directly assigned to this program. In addition increased amounts are anticipated for rental of aircraft to insure their availability when the emergency arises.

DIVISION OF FORESTRY—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

A youth forestry program is proposed to provide employment for up to 400 young men per year, aged 16-21, to be stationed at the facilities maintained by the Division of Forestry throughout the State. This will cost $300,000.

With the growth of the number of conservation camps, there has been no attendant increase in engineering staff to design the many projects undertaken by the inmates. As a result this budget proposes three engineers in the Division of Forestry to provide this needed staff service. One senior engineer is proposed in administration and two assistant engineers are proposed in district headquarters.

A new ranger unit is proposed in the Owens Valley. Nearly a million acres of high value domestic watershed in this valley is the responsibility of the State for fire protection. The new ranger unit will meet this responsibility together with the opening of Mono-Inyo Conservation Camp.

Also proposed is the initial complement of instructional staffing for the division's training centers. It is at these centers that the drivers and forest fire fighter crews are trained to be effective in meeting the emergencies presented by fire.

ADMINISTRATION

Program and Performance

The function of administration includes the office of the State Forester and the following staff functions: fire control; business management; engineering and conservation camps; training; fire prevention education; operation of the Davis warehouse and equipment repair shop; administration of the state nursery; and forest, range, and watershed management. The prime objectives are to develop operating policies, rules and regulations in accordance with forest and fire laws and administrative procedures of the State. In addition, technical assistance is provided to the field forces in the specialized staff fields.

The fire control section co-ordinates the statewide fire fighting forces both within the division and with other fire control organizations. In addition, they assume staff responsibility for equipment development and maintenance, communications, fire plan development and statistics, and forest fire research.

The business management section is responsible for the budget development, fiscal control, procurement agreements, and personnel matters. The section also supervises the activities of the Davis warehouse and shops.

The engineering and conservation camps section prepares administrative and fire control maps for the division's area of responsibility. In addition, they prepare construction plans and give guidance and supervision to the capital outlay and maintenance program. The section also co-ordinates the activities of the Forestry Conservation Camp Program and develops standards for construction and maintenance of roads, firebreaks, and telephone services.

The training section is responsible for the co-ordination of 2 training centers and the development of other in-service training programs.

The fire prevention education section co-ordinates the fire prevention program with other co-operating governmental agencies, industrial firms and citizen groups. It is also responsible for the law enforcement program of the division involving both civil and criminal cases.

In the field of education the division utilizes all major types of public contacts, including television, radio, and motion pictures. Motion picture films for television and other educational media have been developed including television spot announcements providing different fire prevention messages and others for motion picture theater use. These films are distributed to theaters and television stations throughout the State.

The forest and range management section includes the forest management unit which is divided into 3 functions consisting of management of state forests, forest practice, and service forestry, and deals primarily with the programs concerning the management of the timber resources on private land within the State of California. The prime objective is to assist private landowners in attaining sustained yield forest management programs and to return to full production those timber producing lands that are presently understocked or devoid of timber.

The division is responsible for the administration of 8 state forests. Three of these forests are of sufficient size to be managed as demonstration units to illustrate proper sustained yield, forest management techniques, and to be utilized in forest management research. In the orderly conversion of these managed forests from old growth to sustained yield second growth stands, the State presently realizes annual revenue in excess of $350,000 from timber sales.

The function of forest practice administers the forest practice rules which govern logging practices on privately owned timberlands.

The function of service forestry provides technical advice to small timberland ownerships throughout the State in an effort to teach the owners proper management techniques. The service foresters provide technical assistance for the federal co-operative programs concerned with the Soil Bank and the Agricultural Conservation Program. Due to the interest in the federal co-operative programs and the realization of the true worth of the timber on small ownerships, the division is receiving an ever-increasing number of requests for assistance from private owners.

Range improvement personnel are responsible for providing technical assistance to private landowners in the conversion of brushlands to more productive range types in order to increase the carrying capacity of the California rangelands.

Range improvement technicians advise private landowners regarding the most effective and economical methods to apply in converting brushlands. They also supply information concerning the adaptability of the various soil types for rangeland conversion and the recommended species of forage plants to be sown to achieve the most effective sustained results.

Demonstration ranges are maintained in co-operation with private landowners to study and demonstrate the effects of conversion by mechanical means, chemical sprays, controlled use of fire, and various combinations of these methods.

In co-operation with regular fire control forces, continuing experiments are being conducted to provide an adequate and economical method of attaining a satisfactory burn during the relatively nonhazardous periods of the year.

Emergency revegetation projects to prevent serious erosion and flood damage on critical watersheds that have been denuded by fire are also carried out under this function. These reseeding projects are financed on a matching fund basis by the State and private landowners or local political subdivisions concerned.

The state nursery program provides for operation of a nursery located near Davis and for 3 branch nurseries located at forestry conservation camps. The nurseries provide stock for public planting, windbreaks, soil control, and reforestation purposes.

A position of senior civil engineer is proposed in the engineering and conservation camp unit to review and prepare all minor and major capital outlay requests of the division. Workload in the engineering section has grown significantly due to the increase in number of conservation camps. These camps each require the expenditure of a significant amount of engineering time in the design of work projects to be undertaken by the inmates. Two new conservation camps have been opened each year while there have been no new positions for engineering projects since the 1959-60 fiscal year.

Authorized positions at Davis warehouse have been reduced by 1 watchman. The new fencing on the relocated freeway has limited the access to such an extent that this watchman position is no longer required.

DEPARTMENT OF CONSERVATION—Continued

DIVISION OF FORESTRY—Continued

FOREST PROTECTION—DISTRICT HEADQUARTERS

Program and Performance

The Division of Forestry is divided into 6 administrative districts with activities in each district co-ordinated through district headquarters under the direction of a deputy state forester. Besides providing general direction for all forestry activities, the district headquarters provides services of specialists in forest fire prevention, law enforcement, forest management, range and watershed management, engineering, construction, and automotive maintenance.

The forest ranger units receive direction and guidance in all activities from the district deputy state forester. His staff and ranger unit programs are developed and administered from this headquarters. The various specialists assist the ranger units in providing an efficient and effective program operation.

A part-time janitor is proposed in 1963-64 for the District II office in Redding. This service has been provided by the Division of Buildings and Grounds. When this service was discontinued in the 1962-63 fiscal year, funds were transferred from contractual services to temporary help to provide the needed service.

Two assistant civil engineers are proposed to relieve backlogs of projects occurring in District II (Redding) and District V (Monterey).

Presently funded projects in District II both for capital outlay and maintenance reflect needs for over 5 man-years of engineering time. There are presently 4 engineers assigned to District II.

In District V similar projects require an engineering effort in excess of 3 man-years. Currently 2 engineers are assigned to this district. In addition to this workload 2 new conservation camps are being planned in this district.

Two training centers are operated by the Division of Forestry for driver and fire fighter training. These centers are located at Sutter Hill (Amador County) and Ramona (San Diego County). Instructor staff for these centers is currently provided by reassignment of 8 existing field personnel. This budget proposes the transfer of funds from the conservation program in Corrections to establish 4 positions as permanent staff at the 2 training centers. This transfer of funds will provide more effective fire training. The assignment of 2 of these positions to each center will provide a continuity to the instructional program at these centers.

DEPARTMENT OF CONSERVATION—Continued

DIVISION OF FORESTRY—Continued

FOREST PROTECTION—FIELD SERVICES

Program and Performance

The Field Services function provides for the operation of fire suppression stations, forest fire lookouts and ranger unit headquarters offices. The prime objective is to provide adequately staffed, trained suppression crews and related equipment to make prompt and efficient initial attack on forest, brush, and range fires in order to provide "basic fire protection." The field units are designed to provide a flexible organization to develop the required manpower and equipment needs to deal with large campaign fires in line with the concept of "basic fire protection."

The 30 ranger units in the division operate 230 fire suppression stations, 79 lookouts and utilize 35 patrolmen for the protection of about 30,000,000 acres of state lands, private lands and intermingled federal lands under the division's direct protection responsibility. Related equipment includes fire trucks, bulldozers and transports. These units are integrated into the division's radio network to provide for prompt dispatch to and direction on fires.

Administrative personnel and key fire control personnel are hired on a yearlong basis. Fire fighters, cooks at suppression stations, lookouts, and a portion of the forest fire truck drivers are hired during the declared fire seasons. Crews are brought to peak strength as the fire season progresses in its intensity and are reduced as weather conditions become more favorable in the fall.

Ranger unit administrative personnel and patrolmen are actively engaged in fire prevention within their respective units. The program of fire prevention stresses both group contacts and on-the-ground contacts with individual landowners and forest users, in an effort to reduce the increasing numbers of man-caused fires as the population increases and constantly heavier use is made of our wild land areas.

The division is placing increasing emphasis on law enforcement, particularly in the field of civil action. Field administrative personnel supply the basic information for fire cost reimbursement claims that are processed through the Attorney General's Office for collection.

In addition, field administrative personnel are active in all programs of the division in forest and range management. One of the major activities in the timbered region is the inspection of logging operations to report compliance with the Forest Practice Act and to continue to develop active timber operator participation in fire prevention and suppression in his area of operation.

An augmentation to the operational initial air attack program throughout the State is proposed. Twenty foremen positions are requested to man permanent air attack bases. For administrative reasons these positions are broken down on a summer and winter basis. Sixteen of these positions will be stationed 1 each to the following locations: Hobergs, Lake County; Ukiah Mendocino County; Garberville, Humboldt County; Oroville, Butte County; Red Bluff, Tehama County; Montague, Siskiyou County; Susanville, Lassen County; Loma Rica, Yuba County; Placerville, El Dorado County; Columbia, Tuolumne County; Fresno, Fresno County; Porterville, Tulare County; Paso Robles, San Luis Obispo County; Hollister, San Benito County; Ramona, San Diego County; Ryan Field, Riverside County. Four positions will be stationed 1 each at the following helicopter bases: Pratt Mountain, Humboldt County; Badger, Tulare County; Redding, Shasta County, and Ryan Field, Riverside County.

These foremen will be responsible for co-ordinating and supervising the preparation of fire retardants on the ground with the loading and deployment of the aircraft at their base. They may also act as a drop coordinator when air tankers are used on a going fire. Mixing of materials, loading of aircraft and timekeeping requires 4 men on the ground during an operation. Most of this manpower is financed by the use of seasonal help funds. Permanent positions trained in the complexities of the ground operation and co-ordination of airborne units will provide assurance of the efficient use of aircraft and ground forces.

During the offseason period this man would be responsible for maintenance work on the mixing and loading equipment. He would assure that an adequate inventory of retardant is on hand for the following season. In addition he will inspect surplus property for use in the program as well as provide training to the contract pilots in making retardant drops during the preseason period. He will also be carrying on testing of new types of retardants. Rental of equipment has been increased $122,143 to permit firm contracts to be written for standby aircraft and to increase the number of flight hours and operational bases.

The 1963-64 Budget proposes the establishment of a ranger unit in Owens Valley for protection of 1,054,970 acres of primary watershed extending through Inyo County and the southern two-thirds of Mono County. Of this total acreage 969,170 acres were designated as State responsibility lands by the State Board of Forestry on October 23, 1958. The nearest initial attack fire crews are approximately 6 hours away and equipment is about 12 hours away. The area is high-value domestic watershed. A state forest ranger I and a firefighter foreman are proposed to provide the nucleus of this protection. Mono-Inyo Conservation Camp, scheduled to be opened on July 1, 1963, will provide a reserve firefighting force.

FORESTRY CONSERVATION CAMPS

Program and Performance

The conservation camps are operated in co-operation with the Department of Corrections and the Department of the Youth Authority. The Division of Forestry is responsible for determining the need for a camp in a given area and for the construction of such camps. Under existing agreements the division is responsible for the work program and the supervision of the inmates during the working day. In addition to the work program, the camps provide added manpower for forest protection and fire suppression work.

As of July 1, 1963, it is estimated that 2,160 Department of Corrections inmates and 345 Youth Authority wards will occupy 30 permanent camps, 3 mobile camps and 3 spike camps. The Konocti Conservation Camp which was programmed to open in 1962-63, has been delayed due to site acquisition problems. The problems have now been overcome and the camp is estimated to open early in the 1963-64 fiscal year. Likewise Mono-Inyo Conservation Camp was scheduled to open in 1962-63. Due to unforeseen circumstances this camp was delayed. It is now estimated to open July 1, 1963.

In the 1963-64 fiscal year, the Black Mountain Conservation Camp in Sonoma County will begin operation as an 80-man camp. Rainbow Conservation Camp in San Diego County is being rehabilitated and increased in capacity from 60 inmates to accommodate 80 inmates.

A new 100-man conservation camp will be activated at Chino in Riverside County during the 1963-64 year. No major facilities will be required as these are currently available.

The proposed positions are to staff the above facilities as follows: Black Mountain—1 assistant camp superintendent, 8 forestry work project foreman, 1 forestry equipment operator; Chino—1 camp superintendent, 1 assistant camp superintendent, 10 forestry work project foreman, 1 forestry equipment operator; and expansion of Rainbow—2 forestry work project foreman.

AGRICULTURAL FIRE PROTECTION

Program and Performance

The Division of Forestry contracts with certain counties to provide fire protection for local rural agricultural areas know as Zo
3 lands. The State is reimbursed for these expenditures.

DIVISION OF MINES AND GEOLOGY

GENERAL ANALYSIS

Objectives

The primary objective of this division is to serve and assist the State's mineral industries in discovering, developing, and utilizing the abundant mineral resources found within the State. As required by law, the division also maintains and operates a mineral museum, laboratory, and library in San Francisco and licenses purchasers of gold and silver.

Program and Performance

As the means of accomplishing its objectives the division encourages and makes special studies of the mineral resources and mineral industries of the State. The results of these studies are published for distribution to libraries and for sale to the public. Typical geological and mineralogical specimens are collected and displayed, and with its library and laboratory the agency serves as an information bureau for the mining industry and the public.

The mineral research and field study function consists of a program of research and field studies on mineral utilization, beneficiation of ores, geologic mapping, mineral commodities, petrography, mineralogy, and mining methods and problems.

The budget proposed for 1963-64 provides for a continuation of the level of service contemplated in 1962-63.

DIVISION OF OIL AND GAS

GENERAL ANALYSIS

Objectives

The primary responsibilities of the division are to supervise the location, drilling, use or maintenance, and abandonment of all oil and gas wells to prevent waste and damage to the oil and gas deposits; to prevent contamination of fresh water sources penetrated by the gas or oil wells; and to further the maximum recovery of oil and gas.

The division also has the responsibility of supervising the formation and operation of repressuring operations for the purpose of arresting or controlling subsidence of land overlying oil and gas deposits when such lands are in danger of inundation by the sea.

Program and Performance

Under the direction of the State Oil and Gas Supervisor, the division is organized into six districts, each supervised by an oil and gas engineer. In District No. 1, with office at Inglewood, California, the Wilmington subsidence area has been established and certain personnel there are assigned to that phase of supervision. The general duties of the division consist of: (1) inspecting oil and gas wells during drilling and abandonment operations to see that operations are properly performed as required by the law; (2) passing upon proposals to do all kinds of work upon wells; (3) determining whether or not proposed locations for new wells meet the spacing requirements; (4) preparing maps and cross sections to determine underground conditions in oil and gas fields; (5) maintaining surface maps showing locations of wells; (6) collecting data relating to wells and their production; (7) passing upon repressuring proposals for secondary oil recovery or subsidence arrestment purposes and supervising these projects; (8) passing upon proposals for underground oil field waste water disposal; (9) answering inquiries from the public; (10) preparing and writing reports for publication describing structure and history of oil and gas fields and related subjects; (11) advising oil and gas operators as to drilling procedure in California; and (12) passing upon complaints and ordering remedial work or abandonment.

The general operations and subsidence programs are each supported entirely by an annual assessment on oil and gas produced. With necessary changes for price level and salary increases, the proposed budget continues the existing level of service. The work of the division includes a well inspection service rendered to the oil and gas operators. This service is rendered on a 24-hour basis every day in the year and fluctuates with public demand for service. When this type of service requirement decreases, the engineering time released is devoted to writing of technical reports and the basic research that must be done for this purpose and to use as a basis for answering proposals to do work upon wells or to initiate secondary recovery or disposal operations. In this manner, the technically educated and trained staff is maintained at a uniform level.

It is contemplated that the headquarters office of this division, now located in San Francisco, will move to Sacramento upon the completion of the new Retirement Building on May 1, 1964.

One Associate Oil and Gas Engineer is discontinued due to a decrease in workload in District I.

DIVISION OF SOIL CONSERVATION

GENERAL ANALYSIS

Objectives

The division assists in the organization and operation of soil conservation districts and, under policy direction of the State Soil Conservation Commission, co-ordinates the planning of the "small watershed" program under Public Law 566. In addition the division authorizes purchases of equipment from the Soil Conservation Development Fund. This equipment is available for rent or sale to districts.

Program and Performance

Workload of the division is divided between the nontechnical and the technical types of assistance to the various soil conservation districts organized in the State. Nontechnical assistance generally covers advice and guidance on district administration, with suggestions and encouragement for suitable soil conservation activities.

The technical phase of assistance is performed in conjunction with the provisions of Public Law 566, as amended by Public Law 1018. The division is authorized 2 watershed planning teams which with a United States Soil Conservation Service planning team, will do planning work for small watershed projects, including upland management and diversion structures, for which the commission has approved an application. The purpose of the state-supported planning teams is to more quickly establish the state eligibility for federal funds to be used for financing flood control structures up to a maximum of 5,000 acre-feet capacity. The structures may have a capacity up to 25,000 acre-feet including water conservation features if a portion of the cost of the water conservation features is borne by local interests.

The equipment loan program has been reduced due to lack of availability of Federal surplus equipment. The position co-ordinating this program is therefore discontinued in the budget year.

WATERSHED PROTECTION BY CO-OPERATING COUNTIES

The counties listed below receive payments from the State for the prevention and suppression of fires in areas of state responsibility. Payments are based on the level of service which the Division of Forestry provides for similar areas directly protected.

OTHER CURRENT EXPENSES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
Allotment to:				
Kern County	$376,159	$376,159	$412,442	
Los Angeles County	512,839	512,839	569,640	
Marin County	119,244	119,244	132,463	
San Mateo County	68,067	–	–	
Santa Barbara County	182,234	182,234	201,379	
Ventura County	188,428	188,428	210,203	
Totals, Watershed Protection by Co-operating Counties	$1,446,971	$1,378,904	$1,526,127	$147,223 (10.7%)

PRIVATE LAND PROTECTION BY UNITED STATES FOREST SERVICE

For payment to the United States Forest Service for protection of state and private lands based upon acreages of state responsibility land inside and adjacent to national forests offset by national forest land protected by the Division of Forestry.

Protection of state-responsibility lands by United States Forest Service	$1,189,849	$1,189,849	$1,292,395	
Less: Administrative costs in support program	—11,600	—11,600	—13,400	
Contract with United States Forest Service	$1,178,249	$1,178,249	$1,278,995	$100,746 (8.6%)

CALIFORNIA YOUTH FORESTRY PROGRAM

The California Youth Forestry program is proposed to provide employment opportunities to a maximum of 400 young men per year in the age group 16-21. Provisions for enabling administration of the program will be submitted to the Legislature in the 1963 session.

Proposed expenditures	–	–	$300,000	$300,000

---

[a] Federal grants received under the Clarke-McNary Act are deposited in the General Fund, and appropriated therefrom for the support of the Division of Forestry by the Budget Act. As federal funds these amounts are excluded from the overall budget totals. These funds are provided to assist in the protection of forest and watershed lands of national interest and to assist in nursery and service forestry programs.

WHITE PINE BLISTER RUST CONTROL

OTHER CURRENT EXPENSES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63
Payments to United States Department of Agriculture to match federal expenditure for the control of white pine blister rust disease.	$80,000	$80,000	$75,000	—$5,000 (—6.3%)

EMERGENCY FIRE SUPPRESSION AND DETECTION

Additional manpower and equipment for detection and suppression of forest fires in emergency situations beyond the ability of the regular crews are provided by this item.

In the current year an additional $580,000 is provided from the Emergency Fund. Continued drought conditions prevail; however, the situation is not estimated to be as critical as that experienced in 1961-62.

OTHER CURRENT EXPENSES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

FOREST INSECT CONTROL

This program provides for the control of forest insect infestation, principally pine beetles, on state and private forest lands. State expenditures on private lands are on a cash or labor matching basis under rules established by the State Board of Forestry in accordance with Section 4455 of the Public Resources Code. A combination of the continued drought and a heavy blow-down of timber in the northern portion of the State resulting from storms has made the insect problem acute. An augmented control program is expected which may require increased expenditures in this item. An additional amount of state funds not to exceed $80,000 will be made available on an emergency basis, if under the matching provision, it becomes necessary.

OTHER CURRENT EXPENSES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

FOREST AND FIRE RESEARCH

A program of basic research, field studies, and investigations with respect to the prevention and control of forest and brush fires; reforestation of burned-over land and nonproducing lands; and other resource areas related to activities under the division's jurisdiction are provided in this item.

The major portions of the research projects are contracted to the Pacific Southwest Experiment Station and to the University of California where research specialists conduct the studies. This has the twofold advantage of having specialists in the specific field conducting the program and often the program is expanded or integrated with similar research through the use of federal or university funds.

The Forest and Fire Research Committee of the State Board of Forestry attempts to integrate all research being done by governmental agencies and private companies in order to avoid duplication of effort and to foster the exchange of information and to combine research efforts.

OTHER CURRENT EXPENSES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS

Objectives

Fundamental objectives of the department are the protection, propagation, preservation, and investigation of the State's fish and game resources, including ocean fisheries and marine products, for the utilization of and general benefit and recreation of the people of California.

Program and Performance

The director, under general policies established by the Fish and Game Commission and as prescribed by statute, administers the department and its program. Included in the department are the Wildlife Conservation Board and the Marine Research Committee.

For purposes of administration and operation the department is organized into several functions corresponding to its major activities. General policy direction is provided by the Fish and Game Commission. The commission is composed of 5 members appointed by the Governor. In addition to establishing general policy, they regulate the taking of fish and game by promulgation of regulations establishing open and closed seasons; bag and possession limits; and areas for the taking of fish and game. The commission also regulates commercial fishing to insure the taking and delivery of fish in a wholesome and sanitary condition and to prevent deterioration and waste of fish.

Anticipated expenditures in the budget year are completely funded from anticipated revenue with a small increase in surplus expected at the end of the 1963-64 fiscal year. To accomplish this the department proposes no program augmentation with the exception of fully reimbursed programs.

Adjustments have been made in staff to meet changing workload requirements. In 1962-63, 8.4 positions were abolished administratively; of these, 6.4 permanent and temporary positions were never established and are therefore being abolished, 1 position for the Yountville Game Farm and 1 position for Fillmore Hatchery were abolished due to decreased activity in these program areas. These abolishments are effective in 1962-63 and subsequent years.

In 1962-63 there were 18.5 positions established administratively. These positions are established only for the current year and will handle expanded workload in established program areas. In staff operations 0.4 seasonal aid was added for Marine Resources Branch, 4 positions for water projects and 2.1 positions for Delta Fish and Wildlife Protection Study. The activities in water projects and the Delta Fish and Wildlife Protection Study are by contract with the Department of Water Resources and are fully reimbursed. In Region I, 9 positions were added in Inland Fisheries at Trinity Hatchery and are performing activities which are reimbursed by the Federal Government. In Region II, 2 positions were established in Inland Fisheries at the Oroville Fish Facility which are reimbursed by the Department of Water Resources. In Region IV, 1 position was added which had previously been abolished in error at the time the department centralized its licensing function.

The 25.2 proposed new positions included in the budget for 1963-64 are to continue work in established program areas. Eight and seven-tenths positions are requested for staff operations under water projects and Delta Fish and Wildlife Protection Study. They are reimbursed by the Department of Water Resources. One position is requested for Marine Resources Operations under Fisheries Investigations and Activities to conduct Pelagic Fisheries Investigations. This activity is reimbursed by the Marine Research Committee. Nine positions are requested for Region I at Trinity Hatchery to continue hatchery production work which is reimbursed by the Federal Government. Three and five-tenths positions are requested for Region II at Camanche Hatchery and Spawning Facility for activities reimbursed by the East Bay Municipal Utility District. Two new positions at Oroville Fish Facility, Region II, reimbursed from the Department of Water Resources, are proposed for continuation in the budget year. One position is requested for Region IV for district headquarters. This position was abolished at the time the department centralized its licensing function. It was abolished in error. It is required for workload at district headquarters which is unrelated to the licensing activity.

REGIONAL OPERATIONS

Objectives

Regional offices were established in the department to relieve the central staff of an enormous volume of administrative work. The hunting and angling public come in contact with the department through the regional offices, which are located at Redding, Sacramento, San Francisco, Fresno, and Los Angeles. These offices provide staff familiar with problems of the locality and co-ordinate with a headquarters group responsible for statewide planning and research. Through decentralization, local supervisors of the various functions are located in the field where they can take action based on intimate knowledge and fieldwork.

Program and Performance

In general the regional program, in addition to a headquarters function, includes inland fisheries, game management, and wildlife protection. The activities of the inland fisheries operations are concentrated on hatcheries, stream improvement, fisheries investigation, and local water development problems. The activities of the game management program in the field include all phases of research, applied research, and management of big game and upland game. Field operation of the patrol is under the wildlife protection function. This latter function also supervises hunter safety programs, educational programs, and many field maintenance responsibilities.

GENERAL ANALYSIS

The game and fish management programs, known as the Pittman-Robertson and Dingell-Johnson programs are administered by the Department of Fish and Game and financed jointly by the State and the Federal Government at the rat of 75 percent by the Federal Government and 25 percent the State.

GAME MANAGEMENT (Pittman-Robertson)

This is a program under which the Federal Government allots to the states, under a formula set up in the federal law, the moneys derived from the excise tax on sporting arms and ammunition. It is allotted on the basis of 25 percent state to 75 percent federal money. The rules and regulations under which these funds are made available to the states are specific and diligently supervised by the federal agency. Under federal law, no state may spend more than 25 percent of its Pittman-Robertson funds for maintenance and this must be on areas under the Pittman-Robertson program.

The amount of these funds varies from year to year, depending upon the returns from the federal excise tax and the amount carried over from the previous year. Funds not entirely used any one year may be carried over for one subsequent ye before they revert to the Federal Government.

It was also the full intent to permit use of these funds encourage basic research.

Section 400 of the Fish and Game Code authorizes the a ceptance of the federal funds and further provides that . . . " funds accruing to the State of California from license fees pa by hunters shall be diverted for any other purpose than th administration of the Department of Fish and Game and f the protection, propagation, preservation, and investigation fish and game."

SUMMARY OF PROJECT COSTS

Wildlife management co-ordination	$39,189	$33,000	$33,000

GRAY LODGE WATERFOWL MANAGEMENT AREA

Operation and development of this project provides a feeding and resting area for migratory waterfowl and includes:

Development—construction of levees, ditches, and roads; farming to grow waterfowl food crops; ponding to provide feeding and resting areas and waterfowl shooting 64%

Maintenance—of roads, buildings, and water control facilities 14%

Management—predator control; construction of hunter blinds; assist on deer checks; public shooting of waterfowl and pheasants 22%

GAME HABITAT DEVELOPMENT

Upland game and big game habitat is developed and maintained under this project. Efforts are devoted to:

Development—provide cover, water, and feed for game by spring development, guzzler construction, control burning, and range seeding 62%

Maintenance—maintain water developments and access roads and equipment 21%

Management—construct access roads, operate co-operative hunting areas, conduct special hunts, and gather game data in order to make recommendations for setting seasons and bag limits 17%

WATERFOWL INVESTIGATION AND MANAGEMENT

This project provides for detailed surveys and evaluation of waterfowl migration, breeding areas, and wintering areas. Compiled data is utilized for efficient management of waterfowl. The development of practical techniques for marshlands management for waterfowl use is also a goal. Included in this project are:

Investigations—establish methods of growing natural foods and increasing waterfowl use of marsh areas, establish extent of annual vernal plants by waterfowl, analyze data and write reports of investigations 41%

Management—trap, band, and analyze band returns to determine migration patterns, mortality rates, and population turnover; make periodic censuses on breeding areas and wintering grounds to determine population changes; make reports on status of waterfowl population for Pacific Flyway Committee as the basis for recommending seasons and bag limits to the Fish and Wildlife Service; calculate bag check from annual game take survey and make recommendations to waterfowl management area managers as to marshlands management procedures 59%

UPLAND GAME INVESTIGATION AND MANAGEMENT

Under this project statewide surveys are conducted to determine the distribution, numbers and habitat needs of the various upland game bird species pertinent to setting proper seasons and bag limits and for other management purposes. Project activities include:

Investigations—select release sites and release exotic game birds and obtain follow-up information on such releases, analyze and write up data previously collected on pheasants, study and evaluate methods of propagating and adapting plant species to improve upland game cover 62%

Management—determine pre-nesting population of mourning doves, determine post-breeding season of pigeon population, determine population trends of resident upland game, determine hunting pressure and harvest trends on upland game, advise regions of upland game matters and prepare special reports, and assist in trapping and banding Canada geese 38%

WILDLIFE INVESTIGATION LABORATORY

The primary functions under this project are the determination and control of wildlife diseases, investigations of food habits, and study of the effects of pesticide chemicals used in agriculture on wildlife. Included in this project are:

Investigations—to evaluate losses and recommend possible control measures concerning various wildlife diseases, investigations of food habits, and study of the effects of pesticide chemicals on fish and wildlife 51%

Management—investigate reported disease in wildlife and recommend procedures for control, determine wildlife losses caused by pesticides, and determine use practices for pesticides and report new developments and remedial measures where necessary to field personnel 49%

FISHERIES MANAGEMENT (Dingell-Johnson)

Federal aid in fish restoration is carried on under the Dingell-Johnson Act, which became effective in 1952. The funds allocated to the states are derived from the federal excise tax levied upon sport fishing tackle and equipment, and activities so financed are limited to the improvement of sport fishing. The states contribute 25 percent of the project costs.

California is 1 of 6 states which are able to conduct Dingell-Johnson financed work on marine or anadromous species because of the extensive sport fishery which is based upon at least 20 marine fishes.

The department's policy in suballocating the federal aid funds to marine projects and to inland or fresh water projects (including salmon and steelhead) has been to base the split upon the ratio of fishing days in coastal waters including bays and estuaries to the number of fishing days in inland waters as determined by sampling surveys. The ratios are revised occasionally. This results in a present annual apportionment of approximately 26 percent of the federal aid program to projects operated in conjunction with the Marine Resources Operation. This basis is a practical, workable method for making such a division of funds. Unusual or emergency conditions may give rise to a greater need for research or management and development on marine sport fisheries, in which event an adjustment to this ratio may be desirable to meet this emergency. Such an adjustment between the 3 projects currently conducted in conjunction with marine resources has recently been effected.

All of the department's federal aid to fisheries projects come under the general administrative supervision of a coordinator stationed at Sacramento headquarters. One project leader is stationed at the headquarters for Northern California investigations at Menlo Park; 2 project leaders are located at Terminal Island. Each project leader is subject to a chain of supervision, beginning with the supervisor of Northern California investigations at Menlo Park and the equivalent supervisory position at Terminal Island. Combined supervisory authority is vested in the manager of Marine Resources Operations at Terminal Island. Ultimately the projects come within the administrative responsibility of the above-mentioned federal aid coordinator at Sacramento. There is further intermediate technical direction of marine federal aid projects by a marine resources operations coordinator, located at Terminal Island. The U.S. Fish and Wildlife Service, in monitoring the program, will look to the headquarters coordinator, not the Marine Resources Operations.

The federal aid projects are subject to a requirement for periodic quarterly reports of progress. This is a more rigid standard of reporting than is applied to the normal marine resource projects.

Section 401 of the Fish and Game Code authorizes the acceptance of these funds and further provides that . . . "no funds accruing to the State of California from license fees paid by fishermen shall be diverted for any other purpose than the administration of the Department of Fish and Game and for the protection, propagation, preservation, and investigation of fish and game."

EXPENDITURE DETAIL BY PROJECT

FISH MANAGEMENT CO-ORDINATION

General direction, co-ordination, and inspection of the Dingell-Johnson program is provided by this project. The coordinator assists with the selection, planning, and supervision of all projects. The coordinator also acts as the project leader of t statewide stream and lake improvement project.

STREAM AND LAKE IMPROVEMENT

The purpose of this statewide project is to increase the yield of sport fishes through the restoration and improvement of habitat, as well as the development of access. During the 1963-64 fiscal year it is estimated that the program will receive the following emphasis:

Habitat improvement by removal of barriers to migrating fish — 30%
Construction and evaluation of stream and lake improveme devices — 6
Habitat improvement by control of undesirable fish popul tion and aquatic plants — 60
Improvement and maintenance of existing structures — 4

TROUT MANAGEMENT STUDY

This project, completed during the 1961-62 fiscal year, was designed to show which species, size, and strains of trout are best suited for lakes of the type found in the Lakes Basin Recreation Area of Sierra County. During the 1961-62 fiscal year this project received the following emphasis:

Analysis of data and preparation of final reports on this project ---------- 100%

STURGEON AND STRIPED BASS STUDY

This project is primarily concerned with the striped bass population inhabiting the Sacramento and San Joaquin River systems, San Francisco Bay, and the Pacific Ocean off the coast of central California. Its work is directed to following trends in the fish population and fishery, to maintain adequate angling regulations, and to studying certain life history aspects to insure maximum protection for the striped bass from the operations of water development projects and private industry. During the 1963-64 fiscal year it is estimated that the various phases of the project will receive the following emphasis:

Processing and analysis of tag returns to determine natural and angling mortality rates, and to study variations in the migratory pattern of striped bass ---------- 5%

Creel censuses to develop indices of recruitment and fish abundance for the striped bass population, and to determine the age and size composition of the catch ---------- 15%

Tow net surveys to measure the abundance of young-of-the-year striped bass ---------- 15%

Analysis of striped bass party boat records to obtain angler success and fish abundance ---------- 5%

Striped bass food habits studies ---------- 20%

Development of methods for capturing and marking yearling and 2-year-old bass ---------- 15%

Study of factors controlling survival of striped bass eggs and larvae ---------- 10%

Other miscellaneous striped bass studies ---------- 10%

Miscellaneous work on sturgeon ---------- 5%

COASTAL STREAMS ANADROMOUS TROUT AND SALMON STUDY

The purpose of this study is to determine effective means of maintaining and enhancing stocks of salmon and steelhead trout in coastal streams. During the 1963-64 fiscal year it is estimated that the program will receive the following emphasis:

Establish a norm for variation of fish populations in 2 streams within an unlogged watershed. This will be used to gauge the effect of road building and logging on the fish population of 1 stream which will be logged soon ---------- 54%

Evaluate results of stocking yearling silver salmon and steelhead trout in coastal streams ---------- 43%

Establish an egg-source for short-run king salmon by transplantation and propagation ---------- 3%

BARRACUDA AND WHITE SEA BASS MANAGEMENT STUDY

The purpose of this study was to obtain data on the abundance, distribution, range, and life history of barracuda and white sea bass in order to institute proper management practices. This project terminated June 30, 1962, with some of the work carrying over to the new Southern California Marine Sport Fish Survey. During the 1961-62 fiscal year this project received the following emphasis:

Analysis of tag recoveries to determine movement, rate of exploitation, and distribution of barracuda and white sea bass 10%

Biological studies including age and rate of growth, maturit and fecundity, food habits, and racial studies 60%

Maintenance and analysis of catch statistics of both species 5%

Collection and analysis of oceanographic data in order t evaluate these data with respect to barracuda and white se bass 5%

Sampling the sport and commercial catches to learn thei age and size composition, and to obtain material for biologica studies 20%

OCEAN FISH HABITAT DEVELOPMENT

The purpose of this study is aimed at increasing the yield of marine sport fishes, especially near harbors used by small boat fishermen, through developing, testing, and applying methods for improving the environment. During the 1963-64 fiscal year it is estimated that the program will receive the following emphasis:

Evaluating the devices used to increase the angler yield. Quarry rock, concrete shelters, car bodies, and streetcars have been used to create artificial reefs. The evaluation is accomplished mainly by underwater observation by biologist-diver Diving observations will be supplemented by fish yield observa tions aboard sport fishing boats fishing the artificial reefs 80%

Continue studies to develop successful kelp transplantatio techniques 5%

Aid to counties and other interested parties in establishin new reefs, introduction of exotic fish, and other miscellaneou work 15%

EXPERIMENTAL MANAGEMENT OF WARMWATER RESERVOIRS

The objectives of the warmwater reservoir project are to develop and evaluate effective management techniques which will improve angling quality in older reservoirs such as Millerton and Shasta lakes, and maintain or enhance fishing quality in comparatively new reservoirs such as Folsom and Berryessa lakes. During the 1963-64 fiscal year, the major emphasis will be placed as follows:

A continuing study of the dynamics of the warmwater fishery at Folsom Lake which will include measurements of angler success, mortality rates, and growth rates. These studies are required for proper evaluation of experimental managemer techniques which will be tried 40%

A search for a more suitable predator species 15%

Continuing studies of the relationship between the wate withdrawal regime of a reservoir and the limnology of a rese voir 15%

Determination of conditions limiting the success of Ce trarchid spawning in reservoirs 15%

An evaluation of the effects of shelter in reservoirs 15%

BLUE ROCKFISH MANAGEMENT STUDY

The objective of this project is to obtain necessary life history information on the blue rockfish essential for its proper management. During the 1963-64 fiscal year it is estimated that the different phases of the project will receive the following emphasis:

Biological studies including rate of growth, spawning seasons, spawning areas, food habits, and age compositions of the population or populations 15%

Tagging and analysis of tag recoveries to determine migration patterns and rate of exploitation 25%

Sampling the sport catch to determine angler success and to collect material for biological studies 40%

Maintenance and analysis of catch statistics on blue rockfish and other bottomfish, including the important ling cod in the key fishing areas of Bodega Bay, Princeton, Santa Cruz, Morro Bay, and Avila 20%

SOUTHERN CALIFORNIA MARINE SPORT FISH SURVEY

The purpose of this project is to provide data necessary for managing Southern California's marine sport fishes. The area to be covered extends from the United States-Mexican boundary to Point Arguello, including the marine waters around the off-shore islands. Research on white seabass, begun under the Barracuda-White Seabass Management Study, will be continued on this project. During the 1963-64 fiscal year, the program will receive the following estimated emphasis:

Sampling the Southern California marine sport catch to obtain estimates of the total catch, species composition, and angler use. Fishermen fishing from private boats, piers, shore, and by skin diving will be interviewed 75%

Determining the relative value of Southern California marine sport fishing to other fisheries and recreational pursuits and the degree of competition for the same species between sport and commercial fishery interests 10%

Collecting data for life history studies on important species other than white seabass 5%

Studying the abundance, harvest, range, and life history of the white seabass 10%

LAKE TAHOE FISHERIES STUDY

The purpose of this project is to test methods of improving angling at Lake Tahoe. One method is the experimental planting of large numbers of trout of various species and strains. To evaluate these plants, and to provide background data for future test methods, a creel census program is conducted. Other possibilities include improvement of the tributaries and the introduction of suitable forage organisms. To properly assess the latter a broad study of the fishes and invertebrates is underway. The future role of kokanee in Tahoe is also being evaluated. During the 1963-64 fiscal year it is estimated that the various phases of the project will receive the following emphasis:

Creel census to establish base line and evaluate fish plants 15%
Experimental fish planting 10%
Tributary studies 10%
Kokanee evaluation 5%
Evaluation of need for new forage organisms 45%
Search for suitable forage organisms 15%

Support *(Fish and Game Preservation Fund)*	$85,796	$92,201	$113,205	$21.004 (22.8%)

GENERAL ANALYSIS

Objectives

Objectives of the Marine Research Committee are the development of commercial fisheries of the Pacific Ocean and of marine products susceptible to being made available to the people of this State.

Program and Performance

Research projects are selected by the 9-member committee which includes 5 members actively engaged in the sardine industry, 1 member of an organized sportmen's group and at least 1 representative of organized labor.

Research is financed from a privilege tax of 5 cents per 100 pounds of sardines, Pacific and jack mackerel, squid, herring and anchovies. Under provisions of Section 8046, Fish and Game Code, the privilege tax will expire December 31, 1963. Continuation of the program is dependent upon passage of legislation to extend the privilege tax.

Carrying out of research projects selected by the committee is accomplished by contracting with other public and private agencies. The principal agencies whose services are utilized are the United States Fish and Wildlife Service, Scripps Institute of Oceanography, and the Department of Fish and Game.

Principal research and investigations sponsored by the committee have concerned the Pacific Sardine Fishery which declined to a very low ebb in 1947-48. It was during this period the Marine Research Committee was formed by the Legislature. The committee has devoted a major share of its revenue to sardine investigations in an effort to restore this fishery.

In addition to sardine research, the committee sponsors research and investigations of mackerel, anchovy, herring and related species; studies of oceanographic factors, including food habits, relating to the life history of these fish; and assesses the abundance and distribution of the various species.

The budget proposed for 1963-64 continues these investigations and research projects at a level commensurate with available funds.

Staff assistance to the committee is provided by contract with the Department of Fish and Game.

GENERAL ANALYSIS

Objectives

Under provisions of the Wildlife Conservation Law of 1947 the board is authorized to acquire, restore, and maintain in a high state of productivity areas which can successfully sustain wildlife and provide adequate and suitable recreation for the people of the State. To accomplish this end the board may study and investigate suggested programs.

Program and Performance

The board is composed of the Director of Finance, the Director of Fish and Game, and the President of the Fish and Game Commission. The board is advised by a joint interim investigating committee consisting of 3 Members of the Senate and 3 Members of the Assembly. Annually $750,000 is transferred to the Wildlife Restoration Fund from license fees collected for conducting horse races. The board is charged with the administration of this fund.

Through its staff the board conducts necessary investigations and studies to determine the areas within the State most essential and suitable for wildlife production and preservation and which will provide recreational advantages.

As a result of such studies the board determines which lands or rights in lands or water should be acquired by the State to effectuate the wildlife conservation and recreation program. After acquisition and completion of such development and facilities as are necessary for the purpose for which the lands were acquired, the areas are managed and maintained by the Department of Fish and Game. The department is authorized to contract with other public agencies for such construction, management or maintenance.

During 1962-63 a special consultant is being employed to assist in summarizing program accomplishments and preparing a 5-year plan.

The staff is to review the present program and project a 5-year program for the Wildlife Conservation Board. The employment of the consultant was approved by the board on August 10, 1962.

GENERAL ANALYSIS

Objectives

The Department of Parks and Recreation was created by Chapter 2037, Statutes of 1961. This statute likewise abolished the Department of Natural Resources. The new department consists of 3 statutory divisions: the Division of Beaches and Parks, Division of Recreation, and the Division of Small Craft Harbors. To provide administrative services for these divisions, a Division of Administration was created.

The objectives of this department are to stimulate, as well as provide, recreation facilities for the use and enjoyment of the people of the State.

Program and Performance

The program is carried on by the 3 statutory divisions of the department. The Division of Administration will provide personnel, fiscal, and general office services and organizational and procedural analysis to the program divisions.

The Division of Beaches and Parks acquires, develops, and operates recreation units of statewide significance as well as preserves noteworthy or significant scenic and historic areas of the State.

The Division of Recreation, with the recommendation of the Recreation Commission, develops policy and program for assisting and co-ordinating recreation programs of other levels of government and private enterprise.

The Division of Small Craft Harbors, together with the Small Craft Harbors Commission, assists local government and harbor districts in the development of small craft harbors and waterways. On July 1, 1962, small craft registration was transferred to this division from the Department of Motor Vehicles in accordance with Chapter 2132, Statutes of 1961. Other programs in boating safety education, harbor of refuge planning, and review of local boating ordinances were started in 1962-63 as a result of legislation passed at the 1961 legislative session.

A new recreation policy and program has been adopted for the State of California. This policy is planned to operate in concert with the State Development Plan now being completed by the State Office of Planning and the recreational aspects of the California Water Plan (Davis-Dolwig Act); and to improve overall recreation planning and development.

Lands, facilities, and service currently available are inadequate to meet present recreational needs. This recreation program is being implemented because of increasing competition for the use of land and the need for a co-ordinated approach to planning and funding recreational facilities. The Department of Parks and Recreation has the responsibility for drawing up reasonable goals and making recommendations for the orderly co-ordination of governmental and nongovernmental groups to meet public recreation demands.

Several definitions of activities involved are provided below.

Advance planning—The process of reviewing and expressing in standard terms recreational resources available, determining total and type of recreational facilities necessary in any area on a statewide basis, and recommending the sector of the economy, public or private, best capable of meeting the needs.

Advance project planning—The process of deciding the best use of real property that has been classified as state responsibility recreational land regardless of ownership and determining the types of facilities best suited to the natural features of the area consistent with meeting the needs expressed under *Advance planning*.

Master project planning—The process of assigning and documenting in general terms the complete land-use plan of a specific state responsibility recreational area, consisting of but not limited to projected outside perimeter, areas of concentrated recreational use, areas of wildland or historic preservation, total ultimate capacities by various types of recreational use.

Project planning—The process of designing a specific building or facility to assure the timely implementation of a phase of the *Master Project Plan* to meet increased usage of a park or recreational area.

Under proposals made in this budget the Division of Recreation will assume the advance planning role, with the Division of Beaches and Parks and the Division of Small Craft Harbors assuming advance project planning, master project planning, and project planning functions in their specific areas of responsibility.

Specific program and performance information relative to each division's activities are shown in the budget presentation for each division.

DIVISION OF ADMINISTRATION

Objectives

With the creation of the Department of Parks and Recreation by Chapter 2037, Statutes of 1961, the Division of Administration was organized to provide staff services and office facilities for the director and to provide administrative services for the department's operations.

Program and Performance

This division, in addition to providing administrative and office services, assists the director through exercise of the review function with regard to the fiscal, budgetary, and personnel operations of the department.

Nine-tenths of a position was added during 1962-63, 0.5 for services of a special consultant reimbursed by the Small Craft Harbor Revolving Fund and 0.4 equivalent position in overtime funds to permit completion of small craft registration renewal work.

In 1963-64 it is proposed to convert 3 temporary help man-years to 3 permanent positions. These 3 positions are clerical

---

[a] A nonrevenue fund. Neither the revenue nor the expenditures areincluded in the overall budget totals. For a statement of fund condition see Local Assistance for Public Works.

DEPARTMENT OF PARKS AND RECREATION—Continued

(Formerly Department of Natural Resources)

DIVISION OF ADMINISTRATION—Continued

Program and Performance—Continued

positions to handle workload in the claims section and general services sections.

On July 1, 1963, it is proposed to move the existing concessions officer position and clerk from the Division of Beaches and Parks to the Division of Administration as reflected in the Salary supplement. In addition an auditing position and clerk are proposed to perform audits of all concession enterprises of the department. Also 1 position of assistant concessions specialist is proposed by decreasing temporary help by 1 equivalen man-year. It is anticipated that with this augmented concessions office responsible to the administration division increase emphasis can be placed on stimulating new concessions and improving existing agreements. This office will be concerned wit both small craft harbor loan projects and beach and par projects.

DIVISION OF BEACHES AND PARKS

Objectives

The State Park System is directly administered by this division through its headquarters office in Sacramento and district headquarters and field locations throughout the State. The 3 essential objectives of the division in administering the State Park System are to make the necessary plans, investigations and surveys which will enable them to acquire and develop those recreation areas that are of statewide importance, to preserve for public enjoyment and education outstanding scenic areas of the State, and to acquire, restore and preserve significant historic sites and buildings.

Program and Performance

The Director of Parks and Recreation is responsible for the administration of the program; however, general policies established by the State Park Commission provide guidance to the director and the chief of the division in the administration, protection, and development of the State Park System. The commission consists of 7 members appointed by the Governor with the advice and consent of the Senate for 4-year staggered terms.

Major efforts of the division for the past several years have been on an extensive acquisition and development program established in 1956 and 1957. The workload of the division for the 1963-64 fiscal year is predicated upon a $6,000,000 development program. The details of the development program will be found in the Capital Outlay section.

The State Park System was previously funded from the State Beach and Park Fund. This special fund was abolished by Chapter 1878, Statutes of 1961 and beginning in the 1961-62 fiscal year the program is financed from the General Fund as supplemented by the revenue earned from service fees and concession charges.

The work of the division is divided into 5 functions: administration, planning, technical services, operations and the Squaw Valley operation. The support budget for the 1963-64 fiscal year provides personnel, equipment, and operating funds for increased workload in the division. The principal budget increases are caused by the addition of new developments, increased public use and attendance at existing beaches, parks, and historical monuments, the creation of an advanced project planning unit, the addition of staff for the development unit, and additional staff for reimbursed activities under the Davis-Dolwig Act. Detail of the various program changes are reported in the program and performance for each function.

ADMINISTRATION

Program and Performance

The administration unit includes the staff and funds for operations of the State Park Commission and the chief of the division. The divisional business management activities were formerly conducted by the administrative services section. However, this section has been consolidated into the Department of Parks and Recreation, Division of Administration, as the result of a task force study.

One temporary clerical position was established administratively under the executive function during 1962-63. This position was funded through a decrease in seasonal funds—temporary from the Division of Beaches and Parks.

PLANNING

Program and Performance

This unit is to be separated from the Technical Services section in order to assure that vital advance project planning and master project planning responsibilities of the division are given increased emphasis. This new unit will report directly to the division chief and will provide him with a centralized staff of specialists to help him more effectively direct the growth of the State Park System. The unit will also conduct the surveys required by the Public Resources Code as amended by Chapter 2164, Statutes of 1959.

The new unit will receive as initial staff 8 positions, 6 of which were provided in 1960-61 to the development unit of the Technical Services section. The 2 other positions will be transferred from positions currently provided in the Technical Services section.

Fourteen additional positions are proposed to augment park project advanced and master planning activities. An additional 7 positions are proposed from reimbursements from the Department of Water Resources to accomplish advanced and master project planning work on recreational lands around reservoirs created under the provisions of the California Wate Development Program. This latter work will be undertaken t implement the Davis-Dolwig Act.

The unit will be responsible for the completion of all plan required to justify funding of future Capital Outlay requirements of the division. During the first year of operation th unit should complete approximately 15 master project plans. I 1964-65 it is anticipated that 7 positions in the developmen unit of Technical Services will be transferred to the plannin unit to increase this unit's capability to produce 30 master plan annually.

The 29 man-years of effort programmed for this unit i 1963-64 will be assigned to the following functions in th amounts indicated: supervision-administration, 2 man-years advanced project planning, 7 man-years; master project planning, 6 man-years; water project planning, 4 man-years; Davis Dolwig project planning, 7 man-years; and co-operative governmental planning and legislative studies, 3 man-years.

TECHNICAL SERVICES

Program and Performance

Under the direct supervision of a deputy chief, this function includes the interpretive services, land acquisition, development, and park resources management.

On July 1, 1963 it is proposed to transfer 8 existing positions from the development unit to form the nucleus of a new planning section. As reconstituted this technical services unit will serve as a resource staff to the operations section of the division and will be responsible for expeditious acquisition and development of funded capital outlay projects.

With the reduction of funded acquisition projects, 1 position is deleted in the current year and 4 more positions will be discontinued in the 1963-64 fiscal year. Additional positions will be discontinued as work requirements decrease. This division has virtually completed its land acquisition program funded to a large extent in 1956. In 1962 11.2 positions have been deleted from the appraisal program due to a decrease in this land acquisition activity. These positions, plus an additional 0.8 for a total of 12, have been reduced in 1963-64.

An effort is being made to reduce the amount of time between appropriation of construction funds and the actual start of construction work from approximately 30 months to 18 months. To accomplish this, 7 new positions are proposed in the development unit to provide acceleration of currently funded capital outlay projects. In addition, the division has increased their use of the services of the Division of Architecture. This acceleration is needed if the State is to meet recreational demands as economically as possible.

OPERATIONS

Program and Performance

The operations function is composed of the district headquarters and the field services. For administrative and operational purposes, the State is divided into 6 districts under the general direction of the deputy chief for operations. Each district is directly supervised by a district superintendent who is responsible for the operation and maintenance of state park facilities in his district for the beneficial use of the public. All matters pertaining to the staffing and operations of park units are administered and co-ordinated through the district headquarters. Districts are assisted in the historical and conservation fields and with the planning, acquisition and development of property by division staff headquartered in Sacramento.

Field services includes the park unit supervisors, park ranger and park attendant staffs, and the various specialized technicians needed for continuing operation and maintenance of the State Park System. Types of facilities provided include ocean beaches, lakes and reservoirs, inland and mountain parks, historical monuments, and roadside rests.

Adjustments have been made in staff to meet changing workload requirements. In 1962-63, 3 temporary lifeguards were converted to permanent because of difficulty in employment of seasonal lifeguards at Southern California beaches. A half-time janitor position was abolished at District III headquarters at Stockton in 1962-63 and 0.2 park aid position proposed new in 1963-64 in its place. Three-tenths temporary help was established under executive for concession activities and was reimbursed by the Small Craft Harbor Revolving Fund. Two-tenths seasonal help was established at District III headquarters for ground maintenance which is reimbursed by the Department of Fish and Game. Four-tenths seasonal help was established in 1962-63 for repair of 2 residences at Bodie State Historical Monument. An allocation was made from the Emergency Fund at the time the State assumed responsibility for real and personal property in the town of Bodie to fund this activity.

The Department of Parks and Recreation with assistance from the Division of Organization and Cost Control, Department of Finance, has prepared a staffing guide for the Division of Beaches and Parks field units. In its present form the guide sets forth such factors as acres, attendance, number of campsites and picnic units as major factors in determining man-year staffing requirements in each district. The present guide will undergo further refinement before it can serve as a firm staffing indicator.

The campsite and picnic unit factors set forth in the guide have been applied in arriving at the recommended permanent staff for newly developed beach and park areas as proposed for 1963-64. Temporary help and seasonal aid positions have been proposed on a district-wide basis taking into account growth in attendance and acreage factors.

Staffing for historical monuments, lifeguard services and such unusual parks as Anza-Borrego Desert and Squaw Valley are not included in the staffing guide and will still be justified on an individual basis until standard factors can be obtained for expressing workload requirements in these areas.

Expressed in general terms the staffing guide indicates a need for an additional position when any one of the following factors is satisfied or where a combination of such factors is found to exist: An additional 4,400 acres of land acquired, an increase of 148,000 in annual attendance, an increase of 50 campsites, or an increase of 48 picnic units. Positions not related directly to these factors are justified separately.

Parks at which proposed personnel are tied to staffing guide criteria are: Caswell, Folsom Lake, Plumas-Eureka, San Mateo Beaches, Sunset Beach, Lake Elsinore, McGrath Beach, San Clemente Beach.

Parks requiring independent justification for new personnel are: Kruse Rhododendron Reserve, San Francisco Maritime, Angel Island, San Buenaventura Beach, Bolsa Chica, Doheny, and San Diego Beaches.

Detailed below are additional positions with related operating expenses and equipment proposed for the 1963-64 fiscal year to provide operating personnel necessary to staff new state park facilities:

A. DISTRICT II 0.3

Four man-months of seasonal aid is requested for the district in accordance with the staffing guide. This position will be assigned to Kruse Rhododendron Reserve to staff a museum and display center.

B. DISTRICT III 4.1

Two-tenths of a seasonal aid position, reimbursed from Department of Fish and Game, is being set up for ground maintenance at district headquarters.

Two-tenths of a seasonal aid position is being set up in place of a half-time janitor position at district headquarters.

At Folsom Lake 1 state park attendant and 12 man-months of seasonal aid is requested to staff 100 camp units. These positions are effective May 1, 1964.

At Plumas-Eureka 1 state park attendant and 8 man-months of seasonal aid is requested to staff 84 camp units. These positions are effective May 1, 1964. One man-month is requested for assignment by the district to Caswell State Park.

C. DISTRICT IV 10.1

One state park attendant and 12 man-months of seasonal aid is requested for general development and 50 picnic units at San Mateo beaches, Thornton Beach Unit, effective July 1, 1963.

One state park attendant and 10 man-months of seasonal aid is requested at Sunset Beach for staffing 65 camp units and other general development to be effective May 1, 1964.

The pier restoration at San Francisco Maritime State Historical Monument is estimated to be completed in October, 1963. At that time four ships (C. A. Thayer, Wapoma, Alma and Eureka) will go on display. To prepare for the opening of the pier and for staffing the ships and the Victorian Park located

DEPARTMENT OF PARKS AND RECREATION—Continued

(Formerly Department of Natural Resources)

DIVISION OF BEACHES AND PARKS—Continued

OPERATIONS—Continued

C. DISTRICT IV—Continued

at the monument the following positions are requested: 1 shipwright joiner—repair and restoration, 2 deck hands and 1 groundsman. These positions are to be effective July 1, 1963. Twelve man-months of seasonal aid is requested effective September 1, 1963.

The State assumed control of Angel Island with the exception of some Coast Guard installations in December 1962. A ranger I position is requested to provide supervision for this new park area. Three man-months of seasonal aid is requested for this district to be assigned to Natural Bridges State Park.

D. DISTRICT V -- 4.2

One ranger I and 36 man-months of seasonal aid is requested at San Buenaventura Beach for comfort stations and other general development to be effective February 1, 1964.

Two man-months of seasonal aid is requested for this district to be assigned to McGrath Beach.

E. DISTRICT VI -- 7.3

One state park attendant is requested at Lake Elsinore for 50 camp units to be effective July 1, 1963.

One state park attendant effective March 1, 1964, is requested at San Clemente Beach for operation of 50 camp units.

One life guard supervisor and 1.3 positions of seasonal aid-lifeguard are requested to provide additional protection at Bolsa Chica Beach effective July 1, 1963.

Three existing temporary help positions are being converted to permanent effective July 1, 1963; they are 1 lifeguard at Doheny Beach, 1 lifeguard supervisor and 1 lifeguard at San Diego Beaches.

SALARY SAVINGS

A reduction in salary savings requirement of about $50,000 is proposed in 1963-64. There are several factors which require an adjustment in this figure:

1. Construction production schedules have been established setting a firm opening date for park facilities and staffing requested has been phased to comply with these opening dates. Heretofore these production schedules were not coordinated with staffing requests.
2. The present high savings requirement has necessitated delaying needed staffing for peak rush periods reducing levels of service.

OPERATING EXPENSES

Increase in rent of lands and buildings is caused in major part by the necessity to relocate District 2 headquarters in Santa Rosa to new space because of an expired lease on June 30, 1963. Another relocation at District 4 headquarters in Monterey into space provided in the new Division of Forestry district headquarters office building will also occasion increased expenditure. The Monterey headquarters units were scattered in various widely separated locations. This relocation will provide a single office accommodation with adequate space.

Recurring repairs and maintenance has been restored to an expenditure level consistent with prior year experience. A repair and maintenance schedule is currently being developed for each facility operated by the Division of Beaches and Parks to produce a standard approach to the problem and insure that adequate funds are available to keep all developments in a safe and proper condition. The current year level was lowered to allow the Division of Beaches and Parks to stay within available funds. Service fees and concession charges, which finance the department's program in part, appear to be substantially below estimated level.

SERVICE FEES

In the current year, a more precise method of estimating service fees has been devised. The basis of this new system is a method of reporting park-by-park service fee collections on a monthly basis. This data is then used to estimate a base fee for each unit. This information is adjusted for changing factors such as increased fees, increased facilities, added attractions, and increased access control.

Both the current year re-estimate and the budget year estimate have been derived on the above basis. With only one year's figures available some further adjustment of fee estimates may be required but in general, barring unforeseen adverse circumstances, the State Park System should produce approximately the fees now shown.

DIVISION OF RECREATION

Objectives

The Division of Recreation, **established as the Recreation** Commission in 1947 by the Legislature, became a division of the Department of Natural Resources by legislative act of 1959, and subsequently under the provisions of Chapter 2037, Statutes of 1961, became a division of the newly established Department of Parks and Recreation. The division chief, appointed by the Governor, serves at the pleasure of the director of the department. A 7-member citizen board of recreation commissioners, appointed by the Governor, advises the director and chief on matters of recreation policy. The commissioners serve for staggered 4-year terms.

The Chief of the Division of Recreation is administratively responsible to the Director of Parks and Recreation and has a field staff of 4 recreation specialists working out of a headquarters office in Sacramento and a field office in Los Angeles. This staff provides field services to communities throughout the State.

Program and Performance

The division and commission develop policy and program for assisting and co-ordinating recreation programs of other levels of government and private enterprise. Community recreation agencies call upon the division for advice, co-operation, aid, and encouragement in the use of or development of recreation facilities and programs for public benefit.

The division assists in developing standards for recreation personnel and the promotion of training programs for administrators and volunteer and employed recreation leaders. In addition, the division is authorized to make studies and surveys and long-range plans of recreational facilities and programs necessary to meet recreation needs throughout the State. It participates with federal, state, and local governmental agencies in advance planning with respect to the development and co-ordination of recreation facilities and programs to eliminate gaps and overlaps.

Studies are conducted by the division to collect data on the more than 300 local recreation agencies in California which employ a year-round administrator. An inventory of land and water areas suitable for outdoor recreation as owned, leased or operated by local jurisdictions was prepared by the California Public Outdoor Recreation Plan Committee. A directory of recreation and park officials in federal, state, and local agencies in California is published annually.

In order to give impetus to the Governor's new policy in recreation an initial staff of 7 employees is proposed to develop recreational demand indicators for the State. This advance planning staff will be responsible for the development, consistent with the State Development Plan, of specific areas requiring recreational facilities. In addition it will be the function of this unit to work co-operatively with various segments of government and private enterprise to insure that adequate facilities will be provided to meet the needs of an expanding population.

Specifically the staff provided will initiate work to determine what types of recreation demand are currently unmet and where such shortages exist geographically. An up-dating of demand data presented in the California Public Outdoor Recreation Plan report will reduce the time requirement to arrive at this phase of the work. At the same time the staff will develop an inventory of all types of recreational facilities currently in existence by type of need met. Operating from this data and population trend data, the staff will be able to determine areas of unmet need by type of recreational activity and the general area of geographical need for provision of facilities.

DIVISION OF SMALL CRAFT HARBORS

Objectives

The division was created by Chapter 2362, Statutes of 1957 (Sections 5801 to 5882 of the Public Resources Code), to implement the State's small craft harbors program. The division may prepare plans for and acquire, construct, develop and improve small craft harbors, facilities in connection therewith, and connecting waterways. Contained in these statutes is a directive to conduct studies or surveys to determine needs for harbor or boating facilities. The agency is to assist cities, counties, and harbor districts in small craft harbor and waterway developments. All financial assistance given by the division has been on a loan basis. Chapter 2101, Statutes of 1961 now authorizes the division and commission to make grants to local governmental units for launching facilities.

Chapter 1454, Statutes of 1959 provided for 4 related programs: small craft registration, accident reporting, equipping regulation, and operating regulation. Chapter 2132, Statutes of 1961 provided for the small craft harbor registration program to be accomplished by this division. Formerly the Department of Motor Vehicles had been providing this service.

Program and Performance

The general policies guiding the division are set by the 7-member Small Craft Harbors Commission. The commissioners are appointed by the Governor with the advice and consent of the Senate and they serve staggered 4-year terms.

The general operations of the division, consisting of the administrative staff and the engineering and economic analysis staff are funded from the Small Craft Harbor Revolving Fund.

Increased activity arising from registration renewals in the 1962-63 year necessitated an increase of 1.8 man-years of temporary help to accomplish this temporary workload requirement.

The current level of service is continued in the 1963-64 fiscal year. The general program of granting planning loans to local jurisdictions for small craft harbor construction will continue as will the administration of the loans made for construction from the Investment Fund (California Water Fund) and the Small Craft Harbor Bond Fund. Details of these programs are included in the Local Assistance section of this budget.

GENERAL ANALYSIS

Function

The department has responsibility for planning, constructing, and operating authorized state water projects; co-operates in water projects with federal and local government units; takes responsibility for averting, alleviating, or restoring damaged property during time of emergency resulting from storms and floods, and for declaring of an emergency from such causes; compiles basic data on water resources and water use; compiles data on diversions and stream flows on the Sacramento and San Joaquin Rivers and tributaries, performs maintenance work on the Sacramento River Flood Control Project; approves designs and supervises construction of all dams, except those federally owned, as regards their safety; supervises certain flood and storm damage repairs in which the State participates financially; supervises certain public water districts, reviews federal reports on flood control and water supply projects, administers state filings on water and provides watermaster service; makes investigations of surface and underground water supplies; makes water quality investigation; licenses artificial weather control operations; administers interstate compacts relating to water; administers the reallocation program to reimburse local agencies for their costs incurred by co-operation on federal flood control projects; represents the State on matters pertaining to the Central Valley Project; conducts engineering investigations for the California Districts Securities Commission; supervises construction of hydraulic structures for other state agencies; has responsibility for investigating and correcting beach erosion; and in co-operation with other agencies, forecasts snowmelt and other runoff.

California Water Planning

The primary objective of the Resources Agency is that of assuring the best use of the State's total natural resources as determined by the interests of the people now, and in the future. Within this broad framework, the primary objectives of the Department of Water Resources are:

1. To plan for and guide the development of California's water resources, subject to laws and executive orders, to

---

[a] Nonrevenue funds, receipts and expenditures are excluded from the overall budget totals.

DEPARTMENT OF WATER RESOURCES—Continued

GENERAL ANALYSIS—Continued

California Water Planning—Continued

the end that the water needs of the people of California may be met most effectively, economically, and equitably; and

2. To supervise the construction and operate physical works associated with this development where authorized to do so by the Legislature, and to support, encourage, and guide such construction and operation by other agencies.

To achieve these broad objectives, the planning programs of the department are designed to:

1. Develop and maintain a current inventory of the availability and quality of California's water supplies. This inventory encompasses determinations of total supply, the amount available on a firm basis with existing works, and the amount which can economically be made available on a firm basis through additional projects and by improved management of surface and ground water storage, reclamation of sewage and waste water, watershed management, and other means.
2. Develop and keep abreast of new methods and techniques in the water resources field, through study and support of applied research in sea-water conversion, watershed management, snowpack management, and other areas.
3. Identify and evaluate specific and current water problems, such as sea-water intrusion, ground-water basin management, and water quality maintenance.
4. Develop and maintain a current inventory, by geographic areas and by types of use, of present water requirements and of water requirements at specified dates in the future.
5. Develop and maintain a current inventory of demands for other benefits associated with water projects such as recreation, power, and flood control.
6. Define, on a reconnaissance basis, the costs and benefits of alternative plans for meeting demands for water and other project services, and select the most economical and suitable projects.
7. Maintain a comprehensive water development plan for the State, against which all proposals, federal, state, and local, are evaluated for conformance with optimum development and use of California's water resources.

The specific planning programs to accomplish these objectives are presented in the budget under the 3 program categories of Basic Data, General Investigations and Project Planning. The expenditures for these programs are summarized below.

	1961-62	1962-63	1963-64
Basic data	$2,140,195	$2,553,495	$2,664,745
General investigations	3,464,543	3,405,839	4,214,384
Project planning	1,863,354	2,171,627	2,555,393
Totals, California Water Planning	$7,468,092	$8,130,961	$9,434,522
General Fund	*6,221,482*	*6,644,145*	*6,863,404*
California Water Fund	*1,246,610*	*1,486,816*	*2,571,118*

Budget Format

The state operations budget for the department is presented on a program basis in order to provide information on the department's many projects, investigations, and activities. The programs are divided into 8 major categories, ranging from basic data collection and analysis through project planning investigations to the design, construction, and operation of authorized projects. These categories have been further refined in the 1963-64 Budget to improve understanding of the department's program and facilitate review and evaluation. The categories are:

I. *General Administration*—management of the department's activities.

II. *General Investigations*—water related studies of problems which do not require physical works.

III. *Basic Data*—collection, recording, and analysis of data bearing upon the quantity, quality, and availability of water.

IV. *Project Planning*—investigations having as their objective the formulation of physical works.

V. *Operations*—management of constructed facilities.

VI. *Other Activities*—work requested or required to be performed for other state agencies or local political subdivisions.

VII. *Services*—work requested or required to be performed primarily in support of the departmental program.

VIII. *Design, Right-of-way, Construction Supervision*—development of authorized projects.

The organization budget, which represents the costs of the department in terms of positions, related operating expenses, and equipment, is shown in detail in the Appendix in the Water Resources Revolving Fund. In addition, the department provides service to other agencies including other governmental levels which are reimbursed.

Departmental Costs:	1961-62	1962-63	1963-64
Support	$9,758,473	$9,637,243	$9,903,313
Capital Outlay [a]	14,606,563	21,634,389	27,765,742
	$24,365,036 [b]	$31,271,641	$37,669,055

I. GENERAL ADMINISTRATION

General Administration includes the functions of direction, supervision, and management of all departmental programs, as well as certain staff and specialty costs which are allocated on a pro rata basis. This covers the area of management from the director and his staff, through the division chiefs and district engineer and the branch chiefs. The pro rata charge is based on a rate structure which is designed to allocate management costs to programs based as nearly as possible on the relationship of the management to the program. For instance, the costs of the director and his staff are charged to all programs. The cost of the district engineer in Southern California is charged only to programs managed in Southern California.

Major areas of increases include substantial activity in legal and recruiting responsibilities. The expanding condemnation workload requires additional legal assistance while the recruiting for the positions required to meet the construction schedule imposes unusual recruiting requirements.

The balance of the increases reflect the supervision and support for the accelerated construction program.

PROGRAM EXPENDITURES DETAIL	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Executive	$339,480	$334,625	$365,669
Chief engineer	60,806	88,412	120,141
Policy staff	131,595	146,387	151,916
Program control	86,936	84,596	127,683
Legal	249,371	280,102	487,735
Fiscal	408,557	540,362	581,112

---

[a] Does not include direct construction or right-of-way acquisition payments.

[b] Differs from Revolving Fund budget by $382,226 resulting from portion of 1960-61 retirement and bond issuance expense being charged by Controller against 1961-62.

II. GENERAL INVESTIGATIONS

(See page 636 for expenditure detail.)

General investigations are studies directed to the identification and analysis of one or more water-related problems. General investigations have specific objectives and, usually, foreseeable end points. They are concerned with such matters as the development of more accurate water use data for irrigated crops and urban areas, studies of saline water conversion, planned utilization of ground water basins, watershed management, analyses of water resources and future water requirements, and other aspects of statewide water planning.

INVESTIGATIONS OF SPECIFIC PROBLEMS

Sacramento Valley Seepage Investigation
(Support and Capital Outlay)

The objective of this investigation is to evaluate present and future seepage damage to lands along the Sacramento and Feather Rivers, and to investigate the feasibility of seepage control works to eliminate or reduce such damage. The work involves field surveys of actual seepage occurrence and related river stages, the study of the hydrologic and geological factors affecting seepage, and the development and economic analysis of plans for corrective seepage control works.

By the end of 1962-63, most of the basic data will have been collected and compiled, and detailed analysis will be started. During 1963-64, costs and effectiveness of various methods of seepage control will be investigated, benefit-cost studies will be made, and the economic effect of changes in river regimen from operation of Oroville Dam and other future reservoirs will be studied.

Delta and Suisun Bay Pollution Investigation
(Support and Capital Outlay)

The general objective of the Delta and Suisun Bay Pollution Investigation is to identify present natural and man-made sources of water quality degradation, to determine their effects on beneficial uses, and to evaluate these and future sources of degradation with respect to the design and operation of the Delta Water Facilities, and location of the point of disposal of drainage water from the San Joaquin Valley. The study area includes the Delta, Suisun Bay, and as much of San Pablo Bay as required. Information from past and current basic data programs and special investigations will be evaluated and preliminary water quality studies, including consideration of algae and suspended sediment, will be made in 1962-63. During 1963-64, detailed hydraulic and water quality conditions during critical water supply periods will be determined and evaluated. The investigation and final report are scheduled for completion June 30, 1965.

Investigation of Water Quality Problems

The objective of this program is to determine and evaluate the sources of impairment to the quality of water in particular areas where water quality problems are indicated by water quality monitoring programs.

During 1962-63, studies of ground water problems in the Folsom-East Sacramento area, the Livermore Valley area of Alameda County, and the San Diego area will continue. A report on ground water quality in the Lahontan Region will be published.

In 1963-64, studies of ground water quality problems in the Fresno area and in Orange County will be initiated.

Development of Standards for Water Well Construction

The program objective is to formulate and publish recommendations for minimum standards of water well construction and sealing. Particular areas are selected for study on the basis of requests by interested local agencies where improperly constructed or sealed water wells may be contributing to impairment of the quality of water in ground water reservoirs.

During 1962-63, a preliminary report recommending minimum statewide water well construction standards (Bulletin Number 74, preliminary edition) will be released. Reports recommending standards in Alameda County (Bulletin Number 74-2) and the West Coast Basin of Los Angeles County (Bulletin Number 107) will also be released. Reports for Del Norte and San Joaquin Counties will be prepared, and field and office studies will be initiated leading toward published recommendations for Shasta County, the Central Basin of Los Angeles County, and the Oxnard Plain of Ventura County.

In 1963-64, current work will continue, and studies will be initiated in Kern County and other areas where the need may arise.

Federal-State Co-operative Beach Erosion Investigations

This provides direct matching funds to the Corps of Engineers, United States Army, in accordance with the provisions of Public Law 727, 79th Congress, 2nd Session, for the State's share of the cost of co-operative beach erosion investigations.

These investigations are general investigations for basic data on a matching basis with the Corps of Engineers, and special investigations for specific problems in co-operation with local agencies which are a necessary part of the beach erosion control program and are made prior to the expenditure of funds for beach erosion projects. Funds for the beach erosion control projects are included in the subvention section of the budget.

---

[b] Includes $363,368 transferred from Technical Co-ordination, page 635, line 64, 1961-62 Budget.

DEPARTMENT OF WATER RESOURCES—Continued

II. GENERAL INVESTIGATIONS—Continued

GROUND WATER INVESTIGATIONS

Sea-Water Intrusion Investigations

The objective of this program is to secure essential geologic, hydrologic, and water quality data to enable the evaluation of the extent and rate of intrusion of sea water into the coastal ground water aquifers primarily in Southern California. Reliable information on sea-water intrusion is one of the key factors in the development of plans for remedial action.

This program consists of collection, analysis, and evaluation of ground water level and water quality data, and collection and evaluation of water well drillers' logs and pertinent geologic information. In areas already intruded by saline waters, where producing water wells have been abandoned, it is necessary to acquire and repair existing wells for monitoring, and frequently to construct test holes to explore the characteristics of subsurface aquifers and aquicludes.

In 1963-64, exploratory work in the Bolsa-Sunset Beach area, of Orange County, will be completed. Work in the intruded areas of San Diego County will be continued and investigative work will be initiated in threatened areas of Santa Barbara and San Luis Obispo Counties.

Planned Utilization of Ground Water Basins

The general objective of this investigation is a comprehensive study of major ground water basins, primarily in Southern California, to formulate a plan of operation that will permit the maximum utilization of ground water basins. This investigation is being conducted on a basin-by-basin approach with the Los Angeles County Coastal Plain, San Gabriel Valley, Chino Basin, and San Bernardino Valley undertaken, in that order.

The specific objective of each basin investigation is to delineate the boundaries and geology of the basin; to determine the hydrologic characteristics of the basin, including a re-evaluation of overdraft and the ground water storage available for replenishment with imported water; and to determine the best method for operation of the basin to achieve full conservation of local supplies and also provide for regulation of imported water supplies. Alternative operational plans will be formulated and the optimum plan, including consideration of legal problems, will be recommended.

During 1962-63, a report was prepared on the planned utilization of the ground water basins of the coastal plain of Los Angeles County. A report on the hydrologic phase of the San Gabriel Valley was completed.

During 1963-64, operational studies of the San Gabriel Valley will be completed, and a comprehensive report thereon will be published. Also, a simplified report for widespread public use will be prepared on the planned utilization of the ground water basins in San Gabriel Valley. Geologic studies of Chino Basin and a report of that phase of the investigation will be completed. The hydrologic phase of that investigation will be continued, and the geologic study of San Bernardino Valley will be initiated.

In addition, a preliminary study of planned utilization of ground water will be initiated in the southern San Joaquin Valley.

Mojave River Ground Water Basins Investigation

This is a 3-year investigation of the Mojave River Ground Water Basins, including Coyote, Harper, and Lucerne Valleys, all located in San Bernardino County. The objective of the investigation is to develop complete and detailed data on the areal geology and hydrology of the Mojave River area, including determination of ground water basin boundaries, surface and subsurface geology, hydrologic characteristics including evaluation of hydrologic balance and local safe yield, ground water storage and storage capacity available, and water quality characteristics and evaluation of present and future ground water quality problems.

The investigation was initiated in 1962-63 with a program of data collection and field studies. In addition, a preliminary evaluation of the safe yield of the ground water basins will be made in 1962-63 to be used by the department in studying the amounts of water which should be furnished from the State Water Facilities. The program will continue in 1963-64 with hydrologic studies and analyses of ground water levels and storage and water quality characteristics. The geologic studies of the area will be completed and an interim report on the investigation will be prepared. A final report on the study will be completed in 1964-65.

Ground Water Basin Protection Studies

The Ground Water Basin Protection Studies program is a continuing investigation of specific ground water problem areas, with the objective of evaluating the problems, determining the practicability of their solution, and formulation of projects to protect the ground water basins from further damage, or to prevent damage. Individual investigations will require from 2 to 4 years to complete, depending upon the seriousness of the problem and the justification for formulation of corrective projects. Reports will be published on each specific investigation as the particular investigation is completed.

In 1963-64, the following work will be accomplished:

1. Studies of the project directed toward arresting the increasing salt concentration in ground water basins underlying the Santa Clara River Valley in Ventura County will be completed.
2. Plans for a barrier project to prevent sea water intrusion into the coastal aquifers in Santa Ana Gap of Orange County will be completed.
3. Additional geologic and hydrologic work will be accomplished to better define the extent of the confining clay layers and to evaluate the potential use of gravel pits for percolation in the Livermore Valley of Alameda County.
4. Studies of projects to alleviate adverse salt balance problems in the San Jacinto Valley of Riverside County will be continued.
5. Studies of a project directed toward eliminating the threat of pollution to waters underlying a refuse dump from decomposition products of dumped rubbish will be continued in Los Angeles County.
6. Studies for a barrier project against sea water intrusion into coastal aquifers underlying the Oxnard Plain area of Ventura County will be continued.
7. Studies in problem areas, and development of plans to correct conditons of overdraft and sea water intrusion in the ground waters under and around the southern portion of San Francisco Bay will be continued.
8. Studies of problems related to sea water intrusion in the Sunset Beach area of Orange County will be initiated.
9. Studies of projects or plans necessary to prevent the development of further adverse ground water conditions in the Clayton and Ygnacio Valleys of Contra Costa County under a program of conjunctive operation with the Contra Costa Canal and the proposed Montezuma Aqueduct will be initiated.

WATER RESOURCES PLANNING INVESTIGATIONS

Finalization of Preliminary Reports

The purpose of this program will be to finalize reports which have been, or in the near future will be, released in preliminary form. The program will provide funds for conducting public hearings, if needed, and for accomplishment of necessary, clerical, editorial, and technical work. It is contemplated that the reports will be completed and published during the 1963-64 fiscal year.

Reports to be completed and distributed under this program include: final report on Southern Tuolumne County Investigation, Mariposa Area Investigation, Tuolumne County Water District Number 2 Investigation, Shasta County Investigation, Klamath River Basin Investigation, Upper Pit River Investigation, Shasta Valley Investigation, Branscomb Project Investigation, Northeastern Counties Ground Water Investigation, Mt. Shasta City-Dunsmuir Area Investigation and Colusa Basin Investigation.

Planning Manual Preparation

This program has as its objective the preparation of a comprehensive manual covering all aspects of water project formulation. Such a manual is necessary to ensure that water projects in all of their aspects are formulated on a common basis, in accordance with established standards. This manual will bridge the gap between general departmental planning policy and detailed technical procedures manuals. When completed, it is anticipated that the manual can serve the purposes of guidance to the entire department, and to the planning engineers in particular, on matters associated with water project formulation. Moreover, the manual, supported by detailed technical procedures manuals, will establish uniform, but necessarily flexible guidance and procedures for the conduct of an investigation, including the preparation of reports. Work has been done on this project during 1961-62 and 1962-63.

DEPARTMENT OF WATER RESOURCES—Continued

II. GENERAL INVESTIGATIONS—Continued

WATER RESOURCES PLANNING INVESTIGATIONS—Continued

Planning Manual Preparation—Continued

The work during 1963-64 will consist of compiling and reviewing line and staff comments on the proposed outline for the manual, and completing a draft of the text material.

Water Requirements and Project Staging Investigations

The Water Requirements and Project Staging Program is the central planning activity of the department. The investigations within this general program have as their primary objectives the determination of future requirements for water and of the water-associated functions of flood control, power generation, and recreation throughout the State, and the staging, or formulation of a sequence, of water development facilities to ensure the availability of water when needed and where needed to meet California's rapidly increasing water requirements.

This is a long-range planning program conducted within the broad general framework of the California Water Plan to provide the foundation for a logical, step-by-step progression from the present time into the future based on full consideration of the economic factors of water resource development.

Under this program, information from the basic data programs of the department, as well as the data collected as part of this program, will be brought together to determine the water resources, present water uses, future water requirements, and the resulting surpluses or deficiencies of water supply with due regard to limitations and controls that may be imposed by water quality characteristics to obtain the maximum feasible benefit from the water supplies for each of the watersheds of the State and subdivisions thereof. The results of these studies will then serve as a basis for the General Investigation Programs and the Project Planning Investigations of the department. These will in turn constitute the project development information needed to formulate the most favorable economic sequence and chronology of project development to meet the increasing water needs throughout the State.

The major phases of the overall program are described more fully in the following sections.

a. Land Use Inventories

Planning California's water resources development requires the thorough understanding of changes in the location, amount, and nature of the development and use of water under historical, present, and projected future conditions as an element of the basic data upon which studies of hydrology, water requirements, and project development are based.

Detailed knowledge of the various uses of the land and the suitability of lands for various types of use as indicated by land classification surveys, in combination with the unit values of water requirement associated with land use, provide one of the most accurate and convenient means for establishing the historical and present uses of water; and trends derived therefrom provide a means for projecting future needs. The data collected under this activity will be utilized by Project Planning Programs and General Investigations as well as Water Requirements and Project Staging.

Included in this portion of the overall program is the former Land Use and Water Requirement Surveys program of the Southern District.

During the 1963-64 fiscal year, it is planned to conduct work in the North Coast and Upper Sacramento Valley, Lower Sacramento Valley and Delta, and Southern California areas.

b. Present Land and Water Use Reports

This phase of the overall program constitutes the preparation and publishing of reports to make available to the general public as well as the other programs of the department, the present land and water use and the classification of lands for each of the watersheds of the State. Also included are determinations of the location and place of use of the diversions of surface water, and interviews with the users to obtain history of use, type of use, and an indication of apparent water right under which the use is made.

The result of present land use inventories and evaluation of the suitability of lands for various types of use as indicated by the land classification surveys are presented on a series of plates and tables that will serve as a base upon which future land use projections can be based. Water use information is indicated in detailed tabulations.

Reports have been completed in the following hydrographic units of the State: Tule River, Trinity River, Yuba-Bear, Smith River, Shasta-Scott, and Klamath River.

In addition the following reports are scheduled for completion in the 1962-63 fiscal year: Mad River-Redwood Creek, and Eel River.

It is planned to work in the following areas in 1963-64: Statewide (report printing), North Coast and Upper Sacramento Valley, and Lower Sacramento Valley and Delta.

c. Water Resources and Future Water Requirements

This portion of the overall program utilizes the basic data accumulated under the Land Use Inventory and reported under the Present Land and Water Use Reports portions of the program, as well as other basic data programs of the department, to determine the quantity and quality of the water resources (both surface water and ground water) and the water requirements of each of the watersheds of the State.

Studies under this program will encompass the following major procedures: (1) crop market outlook study to assist in a realistic projection of future crop patterns; (2) projection of future land use; (3) determination of payment capacity or ability to pay for water; (4) formulation of projects to determine costs of water; and (5) projection of a realistic future demand for water with full consideration of the all-important economic factors such as demand-cost relationship, and the probable development of local projects to meet those demands.

Results of these studies are fundamental to the General Investigation Programs and the Project Planning Investigations of the department as well as the Project Staging phase of the overall water requirements and project staging program. The resulting information on water resources and future water requirements should, also, provide material assistance to local agencies in the preparation of application for loans and grants under the program of State Financial Assistance for Local Projects. Reports prepared under this aspect of the program will also fulfill the requirements of Section 232 of the Water Code.

Work on reports will be conducted during the 1963-64 fiscal year on the following areas:

Statewide, North Coast and Upper Sacramento Valley, Lower Sacramento Valley and Delta, Central Coastal, and San Joaquin Valley.

d. Project Staging

This phase of the overall program concerns studies to formulate the most favorable economic sequence and chronology of project development to meet increasing water needs throughout the State. Such studies necessitate comprehensive investigation of the development potential of California and determination of the probable rate of growth of both urban and agricultural development and the associated growth of economic market for water and power in each potential market area of the State. A significant factor of this investigation concerns the effect of future development in the watershed tributary to the Delta on the water supplies available in the Delta. The cumulative effect of the demands in the import areas and the depletions resulting from increased development in the watersheds of origin are integrated in a comprehensive operation study of the entire Central Valley, wherein all projects whether local, state, or federal, must be taken into consideration, as must the operation of the ground water basins in those valleys. This operation study will form the basis for the sizing, justification, and chronology of staging of major projects, and will provide a continuing basis upon which contractual and operational activities may be founded.

The work program during the 1963-64 fiscal year will consist of the development of reservoir operation studies and other basic information to measure the relative merits of various possible water conservation and power development projects of the State Water Resources Development System to form the basis for recommendations for the next project to be constructed to meet the state contractual commitments for water service and offset the depletionary effects of upstream developments to the water supply available in the Delta. The sum of $127,975 has been budgeted to accomplish the proposed work.

DEPARTMENT OF WATER RESOURCES—Continued

II. GENERAL INVESTIGATIONS—Continued

RESEARCH INVESTIGATIONS

Unit Water Use—Vegetative

This program has as its objective the determination of values of unit consumptive use of water by agricultural crops throughout the State. Two programs are being pursued toward the achievement of that objective, namely: (1) determination of unit consumptive use values for selected irrigated and nonirrigated crops in major climatic zones of the State, and correlation of these measurements with agroclimatic data, thereby providing a means of predicting values of unit consumptive use of applied water for crops; and (2) measurement of evaporative indices and other agroclimatic data throughout the State to subdivide the State into agroclimatic zones having similar water use, and provide the basis for estimating consumptive use.

These studies are being carried on in regard to these objectives, primarily in the northeastern part of the State and in the San Joaquin Valley. The 1963-64 program will be a continuation of the present program.

Unit Water Use—Municipal and Industrial

The objective of this program is to determine unit values and trends for various urban and urban-related water uses throughout the State. The study involves the determination of which of several unit values will be most useful to the department and other interested agencies, the definition and delimitation of the major categories of urban water use, the collection of reliable data regarding these categories of water use, the analysis of these data, and the assembly and presentation of the collected data in utilitarian form. These studies in 1963-64 will give first priority to the Los Angeles and San Francisco Bay areas, where activities will involve continuing collection of presently available urban water use data and the continuation of certain studies initiated in previous years.

Nuclear Engineering and Saline Water Conversion Investigation

The purpose of the saline water conversion program is to apply conversion to the development and use of the State's water resources and to advance the techniques and economics of conversion. The purpose of the nuclear engineering program is to develop applications of nuclear energy and of isotopes to water resources requirements. The programs are statewide.

Activities in the conversion program consist of the investigation and analysis of processes, collection and analysis of technical and cost data on conversion plants, co-operation with public and private agencies conducting research and development, and the investigation and planning of the application of conversion plants as alternative sources of water supply for specific areas.

The nuclear engineering program involves the study of application of nuclear energy as a source of power for aqueduct pumping and conversion, and as a heat source for distillation conversion processes. The program also includes the development of application of isotopes to water resources investigations.

Results of the saline water conversion activities are made available in the form of a departmental annual report. Also, results of work in both programs are made available as specific reports to project engineers having responsibility for power, water supply, or drainage investigations.

No significant changes in program scope are anticipated for fiscal year 1963-64.

Federal-State Co-operative Surface Water Investigations

This is a continuing statewide program that provides for surface water investigations in co-operation with the U.S. Geological Survey. Currently, the major investigation under this program, entitled "Floods From Small Drainage Areas in California," treats documentation and analysis of floods from drainage areas of less than 10 square miles. The ultimate objective of the investigation is to obtain sufficient basic hydrologic data to define magnitude and frequency of floods on a regional basis for the entire State, and to obtain sufficient flood hydrograph data, on a statewide basis, for detailed hydrologic studies.

Approximately 300 crest-stage gages and 30 combination streamflow and precipitation recorders are operated throughout the State.

The program was begun on July 1, 1958, to continue for a minimum of 6 years after that date. Below normal precipitation and runoff during the past few years, however, has limited the amount of useful flood information obtained from the investigation, and will make it necessary to extend the investigation for several years.

Federal-State Co-operative Ground Water Investigations

The objective of this program is to develop information on the geology and hydrology of ground water basins of California. This is a co-operative program with the Geological Survey, where the State participates financially on a matching basis and the Geological Survey does the work. Specific studies in this co-operative program include: ground water development studies in specific areas of the San Joaquin Valley, investigation of land subsidence in the San Joaquin Valley caused by withdrawal of ground water from pressure aquifers, collection of basic data on the ground water geology of certain Southern California desert areas, tabulation and analysis of aquifer tests, and investigation of specific yield and permeability of laboratory and field methods. The program will be continued during 1963-64 at its present level.

Federal-State Co-operative Irrigation Research

This program has as its objective the development of knowledge concerning the recharge potential of lands primarily in the San Joaquin Valley. The research is being conducted by the U.S. Department of Agriculture, Agricultural Research Service, under a co-operative agreement, whereby the State participates financially on a 50-50 basis. About 85 percent of the funds support research in physical and quality aspects of ground water recharge in the San Joaquin Valley, with emphasis on artificial recharge techniques and problems. The balance of the funds finance several irrigation, drainage, consumptive use, and related projects in Southern California.

Work will continue at the same level as in the previous year. The recharge studies will include initiation of the preparation of a recharge guide.

Brushland Watershed Management Research

The purpose of this program is to determine the effect of various brushland management practices upon the production of runoff and silt. This is a research program conducted by the University of California at Davis, and partially supported by funds from the Department of Water Resources. The university is carrying on research activities on small watersheds in Mendocino County and Placer County. The several small watersheds at each site are subjected to various treatments, such as burning, removal of trees and brush, planting of grasses, etc., and the runoff and silt content are measured quantitatively for each type of treatment. Results are published annually by the university.

Watershed management offers a potential source of substantial additional water, as there are millions of acres of uneconomic water use by native vegetation in zones of moderate rainfall.

Federal-State Co-operative Forest Management Research

This is a research study of the possibilities of enhancing runoff from commercial timberlands below the snowline. It is being conducted by the U.S. Forest Service, through the Pacific Southwest Forest and Range Experiment Station, and is financed jointly on a 50-50 basis by the State and the Federal Government. This program was initiated in 1961-62, and is expected to continue for 10 years.

The study is aimed at developing methods for best managing forested watersheds below the snowline. These watersheds are largely commercial timberlands, which contribute about 30 percent of the State's streamflow. Forest management for water production in these areas may conflict with management for other purposes. This study will complement a similar co-operative study of forest watershed management in the snow zone which began in 1956.

Federal-State Co-operative Research in Snowpack Management

This is a research study of the possible enhancement of runoff through snowpack management. The program is conducted by the U.S. Forest Service, through the Pacific Southwest Forest and Range Experiment Station, with funds provided on a matching basis by the State and the Federal Government. This co-operative program was initiated in 1956. Information provided by this study will be directed toward developing techniques for increasing and delaying the runoff from Sierra and Cascade snowpacks through selective timber management practices.

DEPARTMENT OF WATER RESOURCES—Continued

II. GENERAL INVESTIGATIONS—Continued

RESEARCH INVESTIGATIONS—Continued

Pilot Levee Maintenance Study

The Pilot Levee Maintenance Study was established in 1962-63 to find ways of preserving the recreational and aesthetic values of the levees of the Sacramento-San Joaquin Delta without impairing the flood control function of the levees. Basic data necessary for analysis of problems and costs related to vegetative control in maintaining the levees will be developed. The work program for 1962-63 includes test site selection and preparation for controlled planting and clearing of vegetation. During 1963-64, test site preparation will continue, and analysis of alternative preservation methods will commence with data collection and cost tabulation. Five years will be required to complete the study because part of the controlling conditions are dependent upon the slow growth of plant species and prolonged effect on wildlife. A report will be published upon completion of the study in June 1967.

Technical Methods Development

The objective of this program is to develop and recommend the introduction of new and improved technical methods for conducting the various activities required throughout the entire field encompassed by water resources planning, and to prepare technical manuals presenting planning procedures in readily usable form. This program supersedes the less comprehensive Engineering Methods Survey Program, and includes within its scope of responsibility such additional technical fields as economics, chemistry, recreation planning, and geology.

Specific areas of planning activities are selected for intensive study, based upon priorities developed from results of general surveys. Detailed technical procedures manuals are prepared for these activities, and any noted weaknesses in existing methods are studied and new or improved technical methods are developed for accomplishing more precise planning. When any newly developed procedure has been accepted for general use, it is presented as an addition to one of the technical procedures manuals.

The major effort during this year will consist of preparing technical manuals for presently utilized procedures. In addition, the following developmental work will be pursued: (1) improved methods for compiling and interpreting surface water quality data, (2) new methods to employ gas chromatography in the analysis of water samples for organic constituents, and (3) an improved method to evaluate recreation benefits.

Salmonidae Fingerling Study

This study has as its objective the study and evaluation of the effect of future devolopment of water projects on the existing fisheries resource of California's rivers and streams; and the recommendation of procedures for maintenance and enhancement of the fisheries. Initially, the study is being concentrated on an evaluation of habits of migratory salmonidae in Shasta Reservoir, and application of these findings to the tentative Iron Canyon Project, as well as to other major projects proposed in the Sacramento Valley and in the North Coastal area.

Progress so far has been limited mostly to perfecting sampling equipment and techniques. Initially, the work was undertaken within the Upper Sacramento River Basin Investigation. However, because of the broad scope and application of the salmonidae fingerlings study to many proposed projects in Northern California, the study has become a separate continuous program.

INVESTIGATIONS OF SPECIFIC PROBLEMS (Capital Outlay)

Feather River Trial Distribution

The purpose of this program is to obtain factual data and formulate reasonable estimates of the entitlement of local water users to the water supply of the Feather River, and to assist in any negotiations between the local water users and the department. The fulfillment of these objectives will protect the interests of both the State and the local water users.

To date, required data have been collected and the first estimates of water entitlement have been made. These estimates will form the basis for the negotiations, and will be subject to modification during the negotiation procedures.

During the 1963-64 fiscal year, it is anticipated that negotiations between the State and local water users will be essentially completed. It is planned to compile a report presenting all data, assumptions, and studies, including, insofar as is possible, the results of the negotiations. Since negotiations will be completed by December 31, 1963, the Feather River Trial Distribution Program will be completed during 1963-64.

Federal-State Cooperative Leveling in Subsidence Areas

This is a cooperative program wherein the U. S. Coast and Geodetic Survey conducts surveys to determine the rate and areal extent of subsidence of the ground surface in areas subject to subsidence. The location and scheduling of operations is mutually decided upon by the cooperating agencies, and costs are shared equally. Data obtained under this program are vital to safe and economic design of canals, aqueducts, and other engineering structures in the State. Several areas of the State are subsiding at rates in excess of one foot per year. Presently known areas of subsidence include the San Joaquin and Santa Clara Valleys, the Delta region, and the Long Beach area. The area to be surveyed in 1963-64 is in the vicinity of the Sacramento-San Joaquin River Delta.

Crustal Strain and Fault Movement Investigation

The objectives of the program are to determine the rate, constancy, and magnitude of ground distortion at sites proposed for engineering structures; to locate active faults where the ground surface may rupture as a result of accumulating crustal strain; to estimate the amount and direction of displacement across active faults which may occur during an earthquake; to develop rational seismic and crustal movement factors for engineering design at each site as related to type of structure; and to coordinate and support the work of other agencies engaged in engineering seismology and general seismological activities. Geology, geodesy, and seismology comprise the three major phases of the investigation of crustal strain and fault movement.

During 1963-64, additional emphasis will be given to the determination of ground motion spectra and rates of horizontal and vertical movement, using instruments and programs recommended by the Consulting Board of Earthquake Analysis. In addition $210,000 is included for the purchase of sensitive seismographic equipment.

Federal-State Cooperative Geodetic Program for Horizontal and Vertical Control

Under this cooperative program, the U. S. Coast and Geodetic Survey conducts surveys to update the accuracy of all old stations and benchmarks in areas where water development facilities are proposed. The objectives of the program are to promote the safety, accuracy, and efficiency of water storage and conveyance and other engineering structures by means of improved geodetic control networks of greater density and accuracy. This program will enable state surveys for engineering and mapping to have the advantage of accurate checkpoints at intervals not to exceed five miles.

Comparisons between the original geodetic positions and elevations with resurveyed positions and elevations of some of the same points will provide valuable information on crustal stability. Location and scheduling of operations will be decided by mutual agreement between the cooperating agencies, after due consideration of the requirements of the State Water Resources Development System. This program is coordinated with other geodetic programs so that there is no duplication of effort.

During 1963-64, complete horizontal and vertical control networks will be established along the alignment of the California Aqueduct in water distribution areas. As old stations and benchmarks are resurveyed, discrepancies will be analyzed in terms of horizontal and vertical movement.

Federal-State Co-operative Seismologic and Geodetic Program for Earthquake Engineering

Under this cooperative program, the U. S. Coast and Geodetic Survey installs, operates, maintains, and interprets records of various seismographic instruments at sites proposed for features of the State Water Facilities. Special geodetic repeat observations and analyses in fault zones are also provided.

The objectives of this program are: (1) to provide instrumental measurements of the damaging, strong-motion characteristics of earthquake vibrations for analysis and application in engineering design of hydraulic structures; and (2) to delimit

zones and measure rates of strain accumulation for analysis and appraisal of earthquake probability and frequency at sites of the various features of the State Water Facilities. This cooperative program is an essential complement to the department's Crustal Strain program. The location and scheduling of operations will be decided by mutual consultation of the cooperating agencies after due consideration of the requirements of the California State Water Facilities.

During 1963-64, strong-motion seismographs and seismoscopes will be installed and operated at Oroville Dam, at major aqueduct pumping plants, and at strategic locations along the aqueduct route. Seismograph records will be analyzed and interpreted. Previously completed field work of special geodetic repeat observations in California fault zones will be completely analyzed. Special geodetic observations in fault zones near or underlying features of the State Water Facilities will be made.

III. BASIC DATA

(See page 638 for expenditure detail.)

The program of collecting, recording, analyzing, and reporting basic data relating to water is essential to the control, protection, conservation, and distribution of the State's water resources. Data are compiled on such things as the quantity and quality of stream flow and ground water, diversion and use of water, precipitation and climate, and topographic mapping.

Basic data related to water are collected by many agencies, both public and private, with a scope established by their particular purposes and resources. The department compiles these data, and also gathers the additional data needed for the State's purposes of administration, planning, design, construction, and operation.

The basic data program is continuous. The water records of 1860 are being used with those of today.

SURFACE WATER

Surface Water Quality Monitoring

The objective of this program is to secure continuous and reliable water quality data from a network of sampling stations representative of all major streams and lakes of the State, to detect changes in water quality and alert the appropriate control agency (regional water pollution control boards, state and local health departments, or State Department of Fish and Game) when adverse quality changes are detected. This involves the study and interpretation of chemical, physical, and radiological information to develop a comprehensive understanding of the factors which make up and alter the water quality at any station, and the assembly and collation of statistics from all sources for areas where water quality conditions are particularly critical.

Samples are collected monthly at approximately 180 monitoring stations. Results of the analyses and an evaluation of changes in chemical water quality are published monthly in reports which are distributed to co-operators and other interested agencies. In addition, a report is published annually setting forth results of analyses and an evaluation of trends in surface water quality.

Waste Water Quality Survey

The objective of this program is to encourage and support the development of waste water reclamation projects in the State by collecting and publishing information on waste water reclamation facilities and operations, and on domestic and industrial waste discharges which form significant potential sources of additional water.

Operational features and costs, problems, and benefits of existing waste water reclamation works are studied and evaluated. Flow data are collected and, in water-deficient areas, waste discharges are sampled to determine the quality of water which is potentially suitable for reclamation. Research in the field of waste water reclamation is evaluated. Reports on the quality and use of waste water are issued biennially.

Surface Water Measurements

The purpose of the program is to provide basic streamflow data from a grid of gaging stations to supplement data gathered by other agencies. To accomplish this objective, the department operates 220 gaging stations, makes measurements of water diverted from major streams, and provides technical assistance to co-operating local agencies in obtaining records of streamflow and diversion. The statewide net comprises approximately 1,600 gaging stations, of which about 1,000 stations are operated and maintained by federal, private, and local groups outside of the department measurement program; 390 stations by the Federal-State Co-operative Surface Water Program; and 220 stations by the department. Basic data obtained in this program are published annually in Bulletin No. 23, "Surface Water Flow."

---

[c] Program completed in 1962-63 fiscal year.
[e] Included in Project Planning for 1963-64 fiscal year.
[f] Included in Basic Data for 1963-64 fiscal year.

DEPARTMENT OF WATER RESOURCES—Continued

III. BASIC DATA—Continued

SURFACE WATER—Continued

Federal-State Co-operative Stream Gaging

This is a continuing, statewide program, in which the State participates financially with the United States Geological Survey on a 50-50 basis, in the operation and maintenance of a network of approximately 390 stream gaging stations. The Geological Survey performs the field and office work. Results are published annually in the United States Geological Survey Water Supply Papers.

Federal-State Co-operative Establishment of Gaging Stations

This is a companion to Federal-State Co-operative Surface Water Measurement Program. This statewide program provides for financial co-operation on a 50-50 basis with the United States Geological Survey in establishing new stream gaging stations and rehabilitating existing stations in the federal-state network. The United States Geological Survey carries out necessary field and office work.

Federal-State Co-operative Sediment Data Collection

The department participates financially on a 50-50 basis with the United States Geological Survey in (1) the operation and maintenance of about 20 daily and 25 periodic stream sediment sampling stations, and (2) surveys of sediment deposited in reservoirs. The Geological Survey carries out the field and office work. The program consists of measurement of both characteristics and quantity of sediment transported by streams. Analysis of sedimentation problems will be made at reservoirs for which adequate historical data are available. Results will be published annually in the United States Geological Survey Water Supply Papers.

GROUND WATER

Ground Water Quality Monitoring

The objective of this program is to secure continuous and reliable information on the quality of ground waters, to detect changes in water quality and alert regulatory agencies when adverse quality changes are detected. This involves the study and interpretation of chemical, physical, and radiological information to develop water quality parameters.

Samples are collected annually from approximately 1,800 wells throughout California, and the analyses and evaluation of changes in ground water quality are published in an annual report which is distributed to interested agencies.

Ground Water Measurement

The purpose of this statewide program is to collect, assemble, evaluate, and publish basic information on ground water levels for all significant ground water basins of the State. The program is carried on through co-operation with federal and local agencies. Information is made available through the preparation of ground water contour maps, monthly water level reports, and annual data reports. Efforts to extend areas of local co-operation and to improve the monthly measurement grid will continue during 1963-64.

Federal-State Co-operative Ground Water Measurements

This is a continuing statewide program in which the State participates financially on a 50-50 basis with the United States Geological Survey in the monthly measurement of 200 wells in the North Coast, North San Francisco Bay, and portions of the San Joaquin Valley. The program is co-ordinated with the department's Ground Water Measurement Program, and results are reported under that program.

CLIMATOLOGY

Climatologic Data

The objective of the statewide climatologic data program is to gather, correlate, and maintain reliable weather records for use by the department and other agencies. The program consists of: (1) evaluation of the adequacy of current climatologic data collection programs in California; (2) promotion of increased weather data collection in record-deficient areas through co-operating agencies and individuals; (3) preparation of current indexes to all climatological stations in and adjacent to California; and (4) compilation and interpretation of weather information. As part of the program, the State assists the United States Weather Bureau in its California data collection activities.

MAPPING

Federal-State Co-operative Mapping

The objective of this program is to cover the State with topographic maps at scales suitable for the purposes of the many using agencies.

The program which is authorized by Chapter 1424, Statutes of 1945, is performed by the United States Geological Survey on a co-operative basis wherein the State and Federal Government each contribute one-half of the costs. Areas to be mapped, scales of mapping, and priority schedules are mutually decided upon by both participants. Prior to publication, the department reviews the maps and indicates approval of each sheet or suggests desired revisions. Periodic reports are published by the department setting forth the current status of topographic mapping throughout the State.

Federal-State Co-operative Mapping Administration

The purpose of this activity is to provide the review of completed topographic mapping under the continuing Federal-State Co-operative Mapping Program, to maintain records of production planning and map completions under the program, and to provide information on availability of manuscripts of maps. The State Index of Topographic Mapping is prepared under this program.

REPORTS

Preparation of Statewide Data Reports

The objectives of this program are to compile and evaluate the basic data collected on surface water flows, ground water conditions, surface and ground water quality, and water use, and to compile and publish statewide data reports.

IV. PROJECT PLANNING

(See page 642 for expenditure detail.)

Project planning investigations have as their objective the formulation or review of plans for physical works for the solution of water-related problems. These may range in scope from reconnaissance investigations, aimed at comparing possible physical solutions, to feasibility investigations, aimed at determining the financial and engineering feasibility of a particular water project. Project planning investigations also include refining and updating of project plans subsequent to project authorization, but prior to actual project construction.

The majority of the individual planning programs of the department do not function as single units. They utilize results of many other departmental studies, either completed or in progress, as well as studies and data from the other public agencies concerned in the development and use of the water resources of the State. Because of the close relationship between the many programs currently underway within the department, the planning program should be viewed in its entirety, and any individual program should be considered with respect not only to the other programs, but also to its relationship to the overall statewide planning program for the orderly development of the water resources of California.

RECONNAISSANCE

North Coastal Area Investigation

The objective of this reconnaissance investigation is to formulate plans for the optimum staged development of the water resources of the North Coastal area to satisfy projected demands for water and associated project services in both local and water-deficient areas of the State. The investigational area encompasses the drainage basins of the Eel, Mad, Klamath, and Smith Rivers, including all of their tributaries; portions of the Russian River basin; and selected minor coastal streams which may afford opportunity for development of replacement fisheries. Studies include consideration of protection against recurring floods, development of the hydroelectric power potential, water-associated recreation, preservation and possible enhancement of anadromous fisheries, and the application of water-oriented land management.

By the end of fiscal year 1962-63, it is anticipated that the general features of the most favorable initial export project will be defined. The 1963-64 work program will conclude all studies pertaining to the current area-wide reconnaissance phase of the long-range water development investigation. A final report on this initial reconnaissance phase of the investigation, together with supporting appendixes, is scheduled for publication in June 1964. Subsequently, feasibility level studies will be undertaken for the recommended first-stage development project, and the second phase of the area-wide reconnaissance investigation will be undertaken, directed toward the identification and staging of subsequent projects.

Upper Sacramento River Basin Development Investigation

This is a comprehensive investigation of the water resources development possibilities within the 2,600 square-mile portion of the Sacramento River watershed between Shasta Dam and Red Bluff. The investigation includes long-range planning to outline the possibilities for economical future development of the presently uncontrolled water resources of the area to meet local and export requirements. Project planning studies are co-ordinated with other existing and proposed developments, including possible importation of water from the North Coastal area. The investigation encompasses virtually all aspects of water development, control, and utilization.

Completion of the investigation, which began July, 1958, has been extended to June, 1964, to provide for enlargement in scope of economic analysis and refinement of fish and wildlife aspects. A progress report was published in May, 1961. The major investigational phases will be completed during fiscal year 1962-63. The work program for fiscal year 1963-64 includes final project formulation, economic analyses of selected projects, and preparation of the report on the results of the investigation. The report will be of value to future water project staging studies and as a guide to local water project development.

Sacramento Valley East Side Investigation

This investigation comprises a comprehensive study of the water resources and water requirements of the 2,200 square-mile area east of the Sacramento River between the Feather River and Battle Creek. It will report on water projects for local and export needs. Projects having possibilities for near-future construction will be studied in detail. Consideration will be given to development of local irrigation and domestic water, hydroelectric power generation, and recreation and fish and wildlife enhancement, with emphasis on improving the anadromous fishery.

Work to be completed in 1962-63 includes all hydrology studies, land classification and land use surveys, mapping of several project sites, and preliminary project planning. The work program for fiscal year 1963-64 will include continued planning; geologic mapping and subsurface explorations of project sites

---

[a] Included in General Investigations for 1961-62 and 1962-63 fiscal years.

[b] Included with surface water quality monitoring and ground water quality monitoring in 1962-63 and 1963-64 fiscal years.

[c] Program completed in 1961-62 fiscal year.

[d] Included in ground water measurement, surface water measurement and climatologic data in 1962-63 and 1963-64 fiscal years.

DEPARTMENT OF WATER RESOURCES—Continued

IV. PROJECT PLANNING—Continued

RECONNAISSANCE—Continued

Sacramento Valley East Side Investigation—Continued

and borrow areas; and continued studies of the fish and recreation potential. Cost estimates of initial project features, and estimated benefits to be derived from power, fishery enhancement, recreation, and irrigation developments will be continued.

A report of progress will be prepared in December, 1963. The investigation will terminate in June, 1966. A final report will then be published to guide local development and contribute to studies of statewide water project staging.

Madera Area Investigation

The purpose of this investigation is to formulate a comprehensive plan for development of the water resources of the area to provide a basis for federal, state and local co-operation in developing the economy of Madera County. The investigation is being conducted under authorization of Division 6, Part 6, Chapter 1 of the Water Code.

During the current fiscal year (1962-63), a progress report presenting results of studies to date and recommending plans for future studies required for the final report will be prepared. A limited number of copies of the progress report will be prepared and distributed to concerned interests.

The work program for fiscal year 1963-64 will include completion of compilation of hydrologic data, evaluation of various plans for alternative water resources development, studies of recreation development possibilities and fish and wildlife enhancement opportunities, analysis of the economic aspects of various proposed projects, geologic investigations of proposed dam sites, and initiation of the final report which is scheduled for completion during 1964-65.

Supplemental Delta Offstream Storage

The purpose of this investigation is to determine whether more detailed studies of additional offstream storage capacity, supplemental to that available in authorized San Luis Reservoir, would be warranted. The study will include a reconnaissance evaluation of possible storage facilities on Los Banos Creek in Merced County and at other potential offstream storage sites near the alignment of the California Aqueduct. The study will be co-ordinated with similar studies being conducted by the United States Bureau of Reclamation.

This investigation is to be conducted and completed during fiscal year 1963-64.

FEASIBILITY

Upper Putah Creek Investigation

The objectives of this investigation are to determine the engineering, economic, and financial feasibility of a specific water development project for which there is a definite local interest and need. A hearing on this investigation was held in July 1962. As a result of this hearing and subsequent expressions from Napa County interests, the scope of the investigation has been reduced. The area of study is located in the Upper Putah Creek Basin in Lake County. Although there are a number of potential service areas within the upper basin, a previous reconnaissance study and local interest has shown that consideration should be given to serving Collayomi and Long Valleys near Middletown. A feasibility study of the Dry Creek Project to serve this area is, therefore, being undertaken.

1962-63 was the first year of the feasibility study of the Dry Creek Project in Lake County. During the second and final year of the investigation the detailed feasibility study of the Dry Creek Project will be completed and a report prepared thereon.

Coastal San Mateo County Investigation

This is a 3-year investigation to (1) formulate a comprehensive water resource development plan for coastal San Mateo County, and (2) identify an initial feature, determine its economic justification, and study alternative means of financing its construction. During 1962-63, basic data is being collected and analyzed, and land use, land classification, water requirements, and water resources will be determined.

During 1963-64, the investigation will consist largely of detailed study of selected project proposals. Drilling and mapping will be done at selected dam sites. Preliminary engineering design and cost estimates will be prepared and comparative economic analysis of alternatives will be made. Studies of potential recreation use and fish and wildlife enhancement will be made. Liaison with the Corps of Engineers in regard to flood control studies will be maintained. The final report will be published in 1965.

Fish Slough Dam and Reservoir Feasibility Investigation

The objective of the investigation is to determine the engineering feasibility and economic justification of the construction of a dam and reservoir, to be used exclusively for recreational purposes, on Fish Slough in Inyo and Mono Counties. This investigation was initiated in fiscal year 1961-62 and continued in 1962-63.

In 1962-63, the following work will be accomplished: geologic investigation of the dam and reservoir site, investigation of borrow areas for construction materials, engineering studies of the diversion of flows to the reservoir, preliminary dam and conduit design, studies of potential recreational uses, and analyses of benefits and costs to determine economic feasibility. The final report on this study will be published in 1963-64.

Feasibility of Waste Water Reclamation

The purpose of this program is to evaluate data on quality and quantity of waste discharges and to conduct studies determining the feasibility of reclaiming water by beneficial uses from such sources.

In many sewered metropolitan areas, water is wasted to the ocean or interior saline lakes after one use. Some of this waste water is subject to reclamation and reuse. The department has completed a comprehensive and detailed survey of the potential reclamation of waste water in the Los Angeles metropolitan area and is conducting a similar survey in the coastal San Diego County area. This survey includes a study of potential markets for reclaimed water, facilities for reclamation and distribution of water, and preliminary estimates of the cost of water reclaimed.

During 1963-64, work on the feasibility study in San Diego County will be concluded on the differentiation of sewage and industrial wastes in the upper Santa Ana River Valley that can be reclaimed and those which should be exported and wasted to the ocean. A feasibility study of waste water reclamation in the Antelope Valley area will be initiated during this fiscal year.

Recreation and Fish and Wildlife Enhancement, State Water Facilities, Post Land Acquisition Phase

This continuing program provides for: (1) developing recommendations for construction and operation of features of the State Water Facilities which will be necessary for the enhancement of fisheries and wildlife resources, and for recreation; and (2) preparation of plans for the development of recreation lands, and for fisheries and wildlife enhancement at the State Water Facilities. Plans for acquisition of lands for recreation, fisheries, and wildlife enhancement purposes are submitted in report form to the Legislature as justification for budget requests for funds to construct such initial onshore recreation and/or fish and wildlife enhancement facilities at the State Water Facilities.

Co-ordination of recreation development plans for Del Valle and Airpoint Reservoirs with appropriate agencies will be completed.

Reports on development plans will be completed for Grizzly Valley Reservoir and prepared in final draft form for Dixie Refuge Reservoir. Preparation of plans and cost estimates which will lead to finalization of Oroville Reservoir recreation development plan in 1966 will be continued. Emphasis this year will be placed upon the dredger tailings and areas downstream from Oroville Reservoir.

Reports on recreation development plans will be prepared in draft form for San Luis Reservoir and Forebay. Recreation and fish and wildlife studies on the California Aqueduct which will result in a development plan report in 1965 will be continued.

This work will be accomplished by the Departments of Parks and Recreation and Fish and Game under contract with the Department of Water Resources.

Marysville Reservoir Operation Studies

The purpose of this investigation is to examine the possibilities for inclusion of the prospective Marysville Reservoir on the lower Yuba River as a feature of the State Water Resources

DEPARTMENT OF WATER RESOURCES—Continued

IV. PROJECT PLANNING—Continued

FEASIBILITY—Continued

Marysville Reservoir Operation Studies—Continued

Development System. Prior studies have indicated that Marysville Reservoir has considerable potential for flood control, water conservation, and recreational development. There is need also, pursuant to statewide project staging studies, to determine the effects of Marysville Reservoir on the Delta water supply. The operational studies for Marysville Reservoir will be conducted during fiscal year 1963-64. A report covering the results of these studies will be submitted by the end of the year.

Recreation and Fish and Wildlife Enhancement, State Water Facilities, Pre Land Acquisition Phase

This continuing program provides for: (1) studies and reports on the use of the State Water Facilities for enhancement of fisheries and wildlife resources and for recreation; (2) preparation of plans for the acquisition and use of recreation lands, and of lands for fisheries and wildlife enhancement purposes at the State Water Facilities; and (3) co-ordination with the staffs of other agencies statutorily responsible for the design, construction, operation, and maintenance of recreation facilities at State Water Projects. Plans for acquisition and use of lands for recreation, fisheries, and wildlife enhancement purposes are submitted in report form to the Director of Water Resources for approval.

Reports on land use and acquisition plans will be prepared for recreational features and developments in conjunction with portions of the California Aqueduct in San Joaquin, Stanislaus, Merced, Fresno, Kings, Kern, San Bernardino, Los Angeles, and Riverside Counties, for reservoirs in conjunction with the North Bay Aqueduct, and for Bethany Forebay.

ADVANCED PLANNING (Capital Outlay)

Delta Water Project General Planning

The Delta Water Planning program is the core study, basic to the formulation of a final plan for the portion of the State Water Facilities required to transfer water across the Delta. Plans for the Delta will be formulated with the objective of providing specific facilities to supply local water needs, diminish flood and seepage damage, improve transportation, and serve the recreational demands.

The work program for 1962-63 is directed toward: (1) more adequately defining existing physical conditions; (2) confirming and refining design and operational criteria; (3) developing data necessary for formulation of multiple purpose facilities and for mitigating possible detrimental effects on fish and wildlife resources and recreation; and (4) determining and evaluating the nature and extent of interest and responsibility of local, federal, and other state agencies in the Delta. Technical studies included: (a) continuation of collection, reduction, and analysis of data and preparation of an office report on the levee test program initiated under the Delta Levees Investigation; (b) continuation of the continuous flow measurement study of Threemile Slough; (c) initiation of mathematical procedures for refining the salinity intrusion-Delta outflow relationship; (d) continuation of the subsidence surveillance program initiated in 1959; (e) reconstruction and refinement of the electronic analog of the Delta; (f) collection and compilation of data on recreation use; (g) a continuation of operation studies to define operating criteria for the Delta Water Facilities in conjunction with the companion features of the State Water Facilities and the Central Valley Project; and (h) participation in limited dye-tracer studies from instrumented boats to confirm assumptions of the distribution of flow in Delta channels.

The 1963-64 program will include continuation of uncompleted studies conducted during 1962-63. In addition, a direct, continuous outflow measurement at Chipps Island will be attempted. A soil moisture depletion study in the Delta will be conducted to provide the necessary data for an independent check on this measurement. The results of these studies will be used to further refine the salinity intrusion-Delta outflow relationship.

Specifications for the structures in the Sacramento River system will be prepared under this program and the Division of Design and Construction will participate in preparing preliminary designs and cost estimates. Subsurface exploration and soil testing will be done as necessary. These structures must be capable of passing flood flows and controlled releases; fish; and/or boats and barges on each of the following channels: Sacramento River, Steamboat Slough, and Miner Slough. Work will begin on July 1, 1963, and will be completed and an office report compiled thereon by June 30, 1964.

It is currently planned that ample progress will have been made in the advanced planning studies by the end of the 1963-64 fiscal year to select the final project for the Delta Water Facilities and that a report thereon will be prepared during the 1964-65 fiscal year. Following the final planning report, work will be continued for at least one year to prepare criteria and specifications for final design of the project so that the data developed over a 10-year period may be properly utilized in final designs of the project.

San Joaquin Valley Drainage Investigation

The purpose of this program is to select a specific drainage disposal plan from the alternatives presented in the interim report on the San Joaquin Valley Drainage Investigation, and thereafter to develop the selected plan to a pre-design level, as an authorized feature of the State Water Facilities.

The work during 1963-64 will include collection and interpretation of data relating to the physical characteristics of alternative facility sites; determination of the views of local interests regarding repayment methods and location of the facilities; and the location, establishment, and operation of a pilot algae stripping plant for the purpose of determining the feasibility or removing objectionable constituents from the drainage water.

The overall program will be co-ordinated with work of other agencies, particularly the University of California and the United States Bureau of Reclamation, including the development of co-operative work arrangements and cost sharing.

Feather River Basin Advanced Planning

The objective of the advanced planning program is to develop information for preparation of construction designs and specifications of the State Water Facilities in the Feather River basin. Advance planning studies have been completed for the Antelope Valley and Frenchman Dams and Reservoirs. During the 1962-63 fiscal year, reformulation studies of the Grizzley Valley Dam and Reservoir will be completed. Advance planning studies involve a reveiw of hydrologic data; sizing of reservoir, spillway and outlet facilities; evaluation of potential service area including irrigation, domestic, and recreational uses; and development of operational criteria to maximize net benefits. On the lower Feather River, operating schedules for Thermalito Forebay and Afterbay will be evaluated for their effect on the maintenance and preservation of the fisheries resources. Studies will be made to determine the measures necessary to prevent a loss to both warmwater species and salmon spawning in the river channel below Oroville Dam.

During 1963-64, advance planning studies of the Abbey Bridge Dam and Reservoir will be conducted and an advance planning report prepared thereon. Fisheries preservation studies on the Lower Feather River will be continued. Final completion date for the program is scheduled for June 30, 1965.

Delta Water Project—Fish and Wildlife Protection

The purpose of the Delta Fish and Wildlife Protection study is to determine the effects of alternative Delta water facilities on the fish and wildlife resources of the Sacramento-San Joaquin Delta, and to formulate means for mitigating any detrimental effects. The nature of the study is to determine the existing relationship of fish and wildlife to their environment by an extensive sampling program. This relationship will be used to estimate the effect of fish and wildlife due to future environmental change.

The Delta Fish and Wildlife Protection Study will be about 35 percent completed by the end of the 1962-63 fiscal year. Design and testing of fish facilities will be initiated during the 1963-64 fiscal year. A progress report will be produced each year, with a final report at the conclusion of the study. The completion date for the study is June 30, 1966.

The portion of the investigation dealing with the biological aspects of fish and wildlife will be conducted by the Department of Fish and Game, and all engineering assistance and design work will be provided by the Department of Water Resources. Necessary funds to support the portion of the study conducted by the Department of Fish and Game will be provided by the Department of Water Resources by contract.

V. OPERATIONS

(See page 645 for expenditure detail.)

The operations program includes activities related to the management, and physical operation and maintenance of the State Water Facilities. This comprises both the operations activities necessary for project formulation and the activities directly applicable to operation of the system and the delivery of water to customers from completed facilities. The program also includes flood control project maintenance, flood operations, watermaster service, and other related activities.

Operation and maintenance of Frenchman Dam and Reservoir and a portion of the South Bay Aqueduct Project began in 1962-63. Another portion of the South Bay Aqueduct will begin operation in 1963-64. Work will continue with the Bureau of Reclamation on operation of the joint-use San Luis Facilit to co-ordinate operational requirements. Negotiations for t sale of Oroville power will be in progress. Work will contin to develop operating criteria and technical standards for t storage, release, pumping, and diversion of water to be deliver by the State Water Facilities. Criteria also will be develop for the control system for the State Water Facilities. The ne tiation of initial water service contracts will be continued. T Snow Surveys, Flood Operations, Flood Control Project Ma tenance, and Watermaster Service programs will continue approximately the 1962-63 level.

---

[a] Program completed 1961-62 fiscal year.

[b] Program completed 1962-63 fiscal year.

DEPARTMENT OF WATER RESOURCES—Continued

V. OPERATIONS—Continued

SACRAMENTO RIVER FLOOD CONTROL PROJECT MAINTENANCE

The department operates and maintains on a continuing basis approximately 200 miles of levee, ditches and canals, weirs, pumping plants, and related facilities in the Sacramento Valley. Levees are patrolled during high water conditions and during dry seasons the crews work in continuous clearing of several thousand acres of overflow channels and bypass areas. These activities will continue at the same level during 1963-64.

FLOOD OPERATIONS PROGRAM

The purpose of the Flood Operations Program is to provide a nucleus of personnel and equipment to operate the Flood Operations Center, to provide flood training for departmental personnel and local flood control agencies, and to co-ordinate operation of flood control projects. This program provides a focal point for co-ordination of flood fight efforts to local, state, and federal agencies. During 1963-64 a new flood operations manual will be prepared as in other alternate years. No significant change in program is proposed.

FLOOD CONTROL PROJECT INSPECTION

This continuing program includes making semiannual inspections of federally constructed flood control projects in the Central Valley and Truckee River Basin and the preparation of the report entitled "Status of Project Levee Maintenance." This report sets forth the condition of a levee system aggregating 1,120 miles in length, situated in 93 public districts and areas. Also included in the program is co-operative work with the United States Army Corps of Engineers in the latter's planning for repair and construction of flood control works. Technical assistance is also rendered local districts in assisting them with their maintenance programs. This work will continue on a uniform level during 1963-64.

This program includes the engineering review, and preparation of letter reports on application to the Reclamation Board for encroachment on the physical works of the Sacramento-San Joaquin River Flood Control Projects. Following approval, inspection of work is made for compliance. This work will continue on a uniform level during 1963-64.

WATERMASTER SERVICE

Watermaster service was created by statutes of the Water Code in 1913, with actual service beginning in 1924. The purpose of this service is to distribute available water supplies, both surface water and ground water, on an equitable basis, in areas where such supplies are inadequate to meet all demands. Water right owners who have had their rights defined by court decree or agreement may petition the department for watermaster service. At present there are 16 service areas, involving surface water adjudication, under the administration of 9 field watermasters in the northern portion of the State and 3 basins, involving ground water adjudication, under watermaster service in the Southern California District. Activities in the presently adjudicated areas will remain at the same level as those of the 1962-63 fiscal year. The Tijuana Basin Watermaster Area was abolished in April 1962, and the Central Basin Watermaster Area was included in the program on October 1, 1962.

FLOOD CONTROL MAINTENANCE AREAS

Features of the Sacramento River Flood Control Project are maintained by local agencies. If they desire, these agencies can request the State to perform the maintenance function for them, reimbursing the State for the entire cost of work done. There are provisions in the Water Code which also enable the State to form a maintenance area if it is found that the local agency is failing to provide maintenance in accord with federal regulations. During 1963-64, the department will perform maintenance work for 13 maintenance areas with an estimated 167 miles of levees in addition to two pumping plants.

FEDERAL-STATE CO-OPERATIVE YUBA RIVER DEBRIS CONTROL

The Yuba River Debris Control Project is a continuing program that provides for the storage of over 300,000,000 cubic yards of mining debris in the Yuba River overflow area upstream from Marysville, which would otherwise pass into the navigable channels of the Feather and Sacramento Rivers.

Plans for the work are prepared by the Corps of Engineers for the California Debris Commission and submitted to the Department of Water Resources for approval. Over $1,000,000 of state funds have been appropriated for debris control to date. A budget request for $50,000 is being made for the 1963-64 fiscal year to match an equal amount proposed to be appropriated by the Federal Government for the continuation of this work.

RIVER FORECASTING AND FLOOD HYDROLOGY

This continuing program provides data and services on river forecasting and flood hydrology to the State Flood Operations Center. In co-operation with the United States Weather Bureau, this program provides river forecasts to public and other operating agencies and also provides the engineering studies necessary for the efficient operation of the flood control projects.

The program includes the development of criteria for forecasting techniques and hydrologic studies of stream basins, studies of channel capacities, flow-stage relations, methods of estimating probable maximum precipitation, and related items. It also includes responsibility for the river and rainfall hydrologic reporting network necessary for the operation of the Flood Operations Center. No significant change in the program is proposed in 1963-64.

CO-OPERATIVE SNOW SURVEYS

The California snow survey program is an activity which, with field and financial assistance from co-operators, gathers and correlates snow data and allied information for the purpose of forecasting California water supplies in general, and stream flow in particular. The program is statewide in scope. As part of this program, regularly scheduled measurements are made at about 300 snow courses in the mountainous areas of the State. Additional snow data are obtained from general area photographs, radio-active snow gages, and aerial snow depth markers. Allied data on precipitation, stream flow, reservoir storage, and other water conditions factors are gathered, compiled, and correlated, and reported on as part of the program. Reports titled "Water Conditions in California" are published on the tenth of the months of February, March, April, and May of each year. An abbreviated report summarizing water conditions in California at the end of the water year is published in October. About 80 percent of the field work is performed by program co-operators. The State, as co-ordinating agency for this program, plans, directs, and co-ordinates the activities of the State and the co-operators wherein snow survey and allied activities are concerned. Additional allied activities include investigation of various phases of snow hydrology, supplying specialized snow information, and providing consulting services relative to snow occurrence, accumulation, melt, snow-load design factors, etc. This activity will remain at the same level as in 1962-63.

DEPARTMENT OF WATER RESOURCES—Continued

V. OPERATIONS—Continued

COMMUNICATIONS SYSTEMS ENGINEERING (Support and Capital Outlay)

This continuing program includes those activities which are of a communications nature such as the mobile radio system, the radio telemetering network for reporting hydrologic data used in flood forecasting, and the co-ordinated control and communications system for operating the State Water Facilities. The mobile radio system consisting of 135 mobile units, 31 fixed stations, and 34 portable units provides 2-way voice communications for statewide operational and construction activities of the department. The radio telemetering network provides up-to-the-minute data on river stages and precipitation from 29 k locations in the Sacramento, San Joaquin, and Eel Riv Basins. The program also provides for the planning of the ope ational control, telemetering, and communication links of t State Water Facilities. During 1963-64, it is planned to au ment the communications system by the addition of 50 mobi radio units, 4 mobile radio system base stations, and 4 tel metering stations, primarily to handle the growing constru tion program.

ENGINEERING STUDIES FOR ATTORNEY GENERAL'S OFFICE

The Attorney General's Office relies upon the department as its engineering staff in matters pertaining to flood damage where legal action is taken against the State. In 1963-64, the department will assist the Attorney General's Office in preparing their case in defense of the $13 million Feather River Flood damage suit which is a result of severe flooding in Sutt and Yuba Counties during the December 1955 flood. It is antic pated that this case will be tried in the State Superior Cou during 1963-64.

STATE PARTICIPATION IN FEDERAL CO-OPERATIVE PROJECTS

The State assumed an interest in Black Butte and New Hogan projects of the Corps of Engineers by underwriting the repayment of the costs allocated to water conservation. This program of review of the Federal Government construction program, accrual of capital costs, plan of operation, sale of water, and other factors, is conducted because of the State's financial interest and to prepare for possible future sale of Black Butte and/or New Hogan water by the State.

The dams are scheduled for completion in 1963 and will begin storing water during the 1963-64 year. The program for this year will be limited to co-ordination with the Corps of Eng neers and Bureau of Reclamation and attendance at meetings determine the current status of probable state responsibility.

This is a continuing project authorized by Water Code Se tions 11252 and 11276 and will be terminated if the project integrated into the Central Valley Project or if the Bureau Reclamation obtains contracts for sale of the entire water yiel within 7 years after the projects are ready to begin the stora of water.

WATER CONTRACTS NEGOTIATION AND ADMINISTRATION (Capital Outlay)

The purposes of this program are the negotiation and administration of contracts for delivery of water supplies from the State Water Facilities. The locations of agencies with whom contracts are being negotiated range from Plumas County in the north to Imperial County in the south. Negotiations are accomplished through a series of meetings with the interested agency, explaining the standard contract provisions and working out special provisions. Precontact reports are prepared during the negotiation phase to ascertain the agency's need for water and its capacity to pay charges under the contract. Contract administration involves overseeing the flow of information fro the agency to the department and vice versa pursuant to t water supply contract. It also includes co-ordinating the prep ration of data for statements of charges and the negotiation contract amendments as necessary. Most of the contract negot ations will be completed by the contract option date of D cember 31, 1963, and amendments to the contracts allowi additional supplies will be negotiated through the remainder the budget year 1963-64. Administration of contracts will i crease in tempo with the number of executed contracts.

CO-ORDINATED POWER AND WATER OPERATION (Capital Outlay)

The purpose of this continuing program is the development of programs for optimizing operation of the State Water Facilities with respect to water and power production. This involves the making of operation studies and economic comparisions of alternative methods of operation. This program also involves co-operation with other agencies to develop plans for co-ordinated interagency water and power operations, including operation of the joint federal-state San Luis facilities and investigation further co-ordination of the Central Valley Project and Sta Water Facilities. During 1963-64 the details of the operatic programs will be perfected and extended to weekly and dai dispatching. Studies will also be prepared for use in contra negotiations for power sale and purchase.

POWER CONTRACT NEGOTIATIONS AND ANALYSIS (Capital Outlay)

This program includes analysis and negotiation of contracts for the purchase, sale, interchange, and transmission of power as required for the state power plants and pumping plants. Also included in this program are the management, administration, and servicing of existing power contracts.

Work will be in progress during 1963-64 on the sale a interchange of Oroville-Thermalito power. Studies and negoti tions will be continued for the purchase of power from t various available sources for pumping project water.

PROJECT POWER DEVELOPMENT (Capital Outlay)

This program consists of technical and economic studies of alternative sources of power required by the project, markets for project power, and the cost and value of power. The program provides a continuing analysis of power production facilities, power requirements and load characteristics of the State Water Facilities and of power systems affecting operation of the State Water Facilities. The proposed program in 1963-64 i cludes studies of alternative arrangements for the supply a transmission of power, provision of steam support, interconne tion, integration and co-ordination with utility systems and t Central Valley Project.

POWER OPERATION AND MAINTENANCE (Capital Outlay)

The purpose of this continuing program is to establish criteria and procedures for operation and maintenance of project power facilities, to provide operating criteria for design, and to provide staff direction and guidance in initiating and continuing programs of operation and maintenance of project power facilities. It also involves setting forth appropriate operation and maintenance instructions and procedures by means of manuals or directives for use by the operating units. During 1963-64, pre aration of operating orders for system dispatching will be init ated; the results of tests of electrical equipment will be an lyzed; development of a standardized maintenance program w begin; and initial policy will be formulated as to the type, nu ber, and control of spare parts for electrical equipment.

DEPARTMENT OF WATER RESOURCES—Continued

V. OPERATIONS—Continued

WATER OPERATIONS CRITERIA AND TECHNICAL STANDARDS (Capital Outlay)

This continuing program will provide operating criteria, technical standards, and a control system for the storage, release, diversion, pumping, transportation, and quality of water in the State Water Facilities. The necessary operation and maintenance manuals for the State Water Facilities will be prepared as state-operated projects are constructed.

During 1963-64, operating criteria for Del Valle Dam and Reservoir and Airpoint Reservoir will be developed. Studies on operating criteria for Oroville Dam and Reservoir and the California Aqueduct will continue.

PROJECT REPAYMENT AND FINANCIAL ANALYSES (Capital Outlay)

The purposes of this program are to furnish information on repayment obligations of water customers for contract negotiation and administration and to compile the data upon which financial management of the State Water Facilities is based. Analyses and allocations of construction and operation costs are made, project revenues from sale of water and power are computed, and financial aspects are analyzed. During contract negotiations and for purposes of submitting statements of charges to the contractors, tables are prepared showing the various components of estimated payments by the agency year by year during the project repayment period. During the budget year, 1963-64, the work will involve furnishing repayment data for contract negotiations and preparing analyses of costs of the physical project required to serve agencies having executed water supply contracts, the project revenues resulting from such contracts and from the anticipated power contracts.

STATEWIDE POWER AND WATER OPERATIONS CENTER (Capital Outlay)

The objectives of this program are to provide an operations center for the Power and Water Operations of the State Water Facilities staffed with the personnel necessary to make final decisions required in the operations of the State Water Facilities. The operations center may be staffed at a future time jointly by the Department of Water Resources and personnel from other agencies. Direct liaison with all water and power operating agencies will be maintained in order that the maximum benefits may be obtained from the operation of water resources developments in the State.

Work during 1963-64 will be directed toward continued planning for the development and activation of the operations center.

STATE WATER FACILITIES MAINTENANCE CO-ORDINATION (Capital Outlay)

Under this continuing program, maintenance standards and criteria for the State Water Facilities are being prepared.

The work consists of the sizing, locating, and layout of maintenance facilities in order to meet the schedule for acquisition of necessary property in conjunction with regular property acquisition schedules; the development of maintenance standards for all works, including canals, control structures, dams, reservoirs, roads, bridges, and fences; the establishment of maintenance programs for completed project units; and staff inspection of those units. This program will increase as the State Water Facilities are constructed.

STATE WATER FACILITIES OPERATION CO-ORDINATION (Capital Outlay)

This continuing program provides the field co-ordination and supervision of field operations of the State Water Facilities on a statewide basis.

Work under this program includes review of drawings and specifications, periodic field inspection of project operations and adherence to operation procedures, and review of co-ordination, schedules, and reporting on project operations. Under this program records are compiled and project operation reports are prepared. This activity will increase in scope as more project units begin operation.

ESTABLISHMENT OF FEATHER RIVER CHANNEL CHARACTERISTICS (Capital Outlay)

This new program will establish present channel characteristics of the Feather River and tributaries from Oroville Dam to its junction with the Sacramento River. Field work will be along the main course of the river in Sutter, Yuba, and Butte Counties. Most of this year's program will consist of field surveying, river soundings, and aerial photographing. At the present time it is expected the program will cover a period of 2 years with the 1963-64 year beginning the program. The results of the program will be in the form of large-scale maps showing topography and other pertinent data.

PROJECT OPERATIONS AND MAINTENANCE (Capital Outlay)

This program provides for the operation and maintenance of the South Bay Aqueduct Project, Frenchman Dam, and Antelope Dam. The projects will be operated and maintained in accordance with prescribed operation and maintenance procedures. Water releases will be made in conformance with contracts and agreements. The structures will be maintained in a suitable operating condition.

PROGRAM EXPENDITURES DETAIL	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

VI. OTHER ACTIVITIES

(See page 648 for expenditure detail.)

Certain statutory and regulatory activities and projects otherwise differentiated from the Basic Data, General Investigation Project Planning, and Operations programs are grouped herein.

ADVISORY SERVICES TO WATER POLLUTION CONTROL BOARDS

The objective of this program is to furnish technical information and advice to the water pollution control boards regarding municipal and industrial waste discharges in support of the board's regulatory activities in establishing waste discharge requirements. The department submits comments and recommendations regarding specific municipal and industrial waste discharges. In addition, it notifies water pollution control board regarding applications to this department for construction an enlargement of dams, and forwards information on water qual ity, water rights, beneficial water uses, and known or suspecte pollution hazards.

REVIEW OF REPORTS OF OTHER AGENCIES

The objective of this continuing activity is to review and prepare the views and recommendations for the State of California on proposed federal projects, and local projects for which federal financial assistance is requested. In its review, the State makes recommendations with respect to such aspects as project service areas, upstream development and protection, capacities of project facilities, water rights, sequence of construction, and other matters, all with the objective of encouraging the optimum, timely, and co-ordinated development of the State's water resources. The California Water Plan, together with subsequent studies of all agencies, is utilized as a principal guide to thi objective.

A flood plain information program is included under this ac tivity. The program consists of co-ordinating activities of fed eral, state, and local agencies engaged in flood control matters receiving local requests for flood plain information studies to b conducted by the Corps of Engineers, determining need for suc studies and assigning priorities to requests received; reviewin of study after completion; and assisting local agencies in utili ing the information obtained from the study for future plannin purposes.

DEPARTMENT OF WATER RESOURCES—Continued

VI. OTHER ACTIVITIES—Continued

FORMATION AND SUPERVISION OF PUBLIC WATER DISTRICTS

This continuing activity protects and furthers the public interest in the formation of public water districts by prior determination of the overall feasibility and propriety of district organizations, as well as by supervision of operating districts, to the extent required by law. The department provides statewide assistance on the formation and supervision of irrigation and water storage districts.

ADMINISTRATION OF FLOOD CONTROL FUNDS

The State Water Resources Act of 1945 and the Flood Control Law of 1946 established the policy of financial assistance by the State on federally authorized flood control projects.

As provided by this legislation, the State reimburses local agencies for the costs of rights-of-way and the relocation of affected facilities and utilities on projects approved by the Legislature. Under this continuing activity, projects are reviewed and estimates of state costs are prepared. After project approval, the department receives and reviews claims submitted by the local agencies and makes eligibility findings thereon.

A biennial report of expenditures by the department is prepared for each regular session of the Legislature.

ADMINISTRATION OF BEACH EROSION CONTROL FUNDS

The objective of this continuing program is to provide for the administration of the State's share of funds disbursed to other agencies for planning, designing, and constructing beach erosion works. In addition, this program provides for staff study of beach erosion problems and proposed solutions.

MANAGEMENT OF STATE WATER RIGHTS FILINGS

The objectives of this continuing program are (1) preparation and filing state water rights applications with the State Water Rights Board in accordance with the provisions of Section 10500 of the Water Code, (2) review and preparation of comments by the department on requests by various agencies for assignments or releases from priority of state applications, (3) review and preparation of comments on water rights attaching to water development projects by various agencies, (4) prepare water rights analyses for reports on area investigations made to other units in the department, and (5) administer the licensing of rainmakers engaged in weather modification operations in California.

The projects on which state applications are involved are generally located in Sacramento-San Joaquin Valley and the north coastal area. Licensed rainmakers may operate throughout the entire State.

Statements are prepared and presented to the California Water Commission in co-ordination with the legal staff and area branches setting forth the department's views and recommendations on water rights attaching to various water development projects. Also a report is prepared on the annual activities of licensed rainmakers.

CALIFORNIA-NEVADA INTERSTATE COMPACT COMMISSION

The department provides the California-Nevada Interstate Compact Commission of California with such technical and administrative services as the commission may require in formulating an interstate compact between the States of California and Nevada.

During 1963-64, the department will continue to provide supporting services requested by the commission. These services may include preparation of engineering reports to accompany the compact, preparation of technical information required for meetings of the commission, assembly of data for transmittal to the agency which will administer the compact, and necessary administrative, fiscal, and stenographic services.

The compact is expected to be finalized and ratified in 1963-64.

The cost of these services is reimbursed by the commission under provisions of an interagency agreement executed each fiscal year.

KLAMATH RIVER COMPACT COMMISSION

The Klamath River Compact Commission is a permanent commission established in 1957 to administer the terms of the Klamath River Compact between the States of Oregon and California. The State of California is represented on this commission by the Department of Water Resources. The commission does not have a regular staff and its work is contracted out. The Department of Water Resources provides the administrative and clerical services which the commission requires under terms of a service agreement. These services are fully reimbursed.

GOOSE LAKE COMPACT COMMISSION

The Goose Lake Compact Commission was created in 1961 for the purpose of negotiating with its counterpart from the State of Oregon an interstate compact relative to the waters of Goose Lake. Administrative, fiscal, and clerical services required by the commission are supplied by the Department of Water Resources under terms of a service agreement. The cost of this work is fully reimbursed by the commission.

INVESTIGATIONS FOR OTHER STATE AGENCIES

State agencies frequently request the Department of Water Resources to provide engineering information and advice on questions of water resources and related matters. The agencies most frequently involved are the Districts Securities Commission, Department of Finance, Division of Forestry, Division of Architecture, Division of Beaches and Parks, Wildlife Conservation Board, and the Division of Highways. Costs of these investigations are reimbursed by the requesting agency.

DEPARTMENT OF WATER RESOURCES—Continued

VI. OTHER ACTIVITIES—Continued

SPECIAL INVESTIGATIONS FOR WATER POLLUTION CONTROL BOARDS

The objective of this program is to furnish information to the water pollution control boards which they need for evaluation and establishment of requirements for specific waste discharges, and for formulation of long-range plans and policies. These investigations are conducted under specifications prepared by the boards, normally after consultation with personnel of this department. Any of the following items may be included in these investigations: collection, evaluation, and reporting of basic data on ground and surface water quality; geolog ground water hydrology; surface water flow; waste dischar practices; quantities and quality of water; and other wat quality data as required.

The cost of these investigations is reimbursed by the Sta Water Pollution Control Board under provisions of an int agency agreement executed each fiscal year.

SUPERVISION OF SAFETY OF DAMS

This statutory function is a regulatory activity. Its primary duty is that of supervision of the safety of design, construction, maintenance, repairs, alterations, and operation of all dams the State, except those controlled by the Federal Governme

SALINITY MEASUREMENTS IN THE DELTA

In the operation of the Central Valley Project, the United States Bureau of Reclamation requires certain information regarding salinity content for various locations in and around the Sacramento-San Joaquin Delta. The Bureau has requested the Department of Water Resources to undertake the data collection phase of this program and has provided funds in th amount of $4,500 per year for this work. The department mak arrangements with private individuals to collect samples f chloride analyses at 28 stations on 4-day intervals througho the Delta. A monthly report is transmitted to the bureau.

MAP INFORMATION OFFICE

The purpose of this function is to maintain an office to collect, review, and disseminate information on mapping and surveying activities throughout the State. It facilitates the reutilization of survey data of federal, state, county, and private agencies to minimize duplication of mapping and surveying work. A complete set of United States Geological Surv quadrangle sheets and a complete record of United States Coa and Geodetic Survey and United States Geological Survey hor zontal and vertical control data are maintained for statewi use.

ADMINISTRATION OF STATE FINANCIAL ASSISTANCE FOR LOCAL PROJECTS (Capital Outlay)

The objective of this continuing program is to administer the program of state financial assistance to public agencies for development of needed and economically justified local water projects. This program also provides for administration of state financial participation in the construction of local projects where the objectives of the California Water Plan indicate th a project should be constructed to a capacity beyond the nee of the public agency, and for administration of state gran for costs allocated to incidental recreational and fish and wil life benefits of local projects.

WATER RIGHTS FOR STATE WATER FACILITIES (Capital Outlay)

The objectives of this program are to acquire water rights for the State Water Facilities and to insure that applications for these facilities are protected to the maximum extent consistent with the Water Code.

The Department of Water Resources must appear at hearings before the Water Rights Board and the California Water Commission, and will be required to meet with parties who have protested a water right application. Hearings and meetings will require that information be prepared on the operation of the State Water Facilities and that such data be presented a necessary in the acquisition of water rights by the State.

Department representatives must also appear at hearings t insure that new developments will not encroach on new wat made available by the State Water Facilities.

It is anticipated that during the fiscal year 1963-64 the de partment will participate in hearings before the State Wat Rights Board and the California Water Commission as we as meet with protestants.

VII. SERVICES

These technical services are provided by specialty units to all division, branches, and offices, for the programs of the department. These services are totally reimbursed by charges to the programs, and include:

1. Engineering laboratories—statewide laboratory standards, and testing in concrete, soils, chemical, fluid mechanics, and corrosion.
2. Electronic data processing and programming—machine programming and electronic computer and data processing services.
3. Drafting services.
4. Subsurface explorations—drilling and geophysical surveys.
5. Mapping and surveying—statewide mapping co-ordination, aerial photo control, special instrument crews, photogrammetry, and planimetry services.
6. Automotive pool—management of automotive equipment below the three-quarter ton truck category.
7. Heavy equipment pool—management of mobile equipment of all types, including three-quarter ton trucks and above.

Chemical laboratory	$146,425	$201,563	$232,309
Concrete laboratory	124,707	114,798	121,476

---

[b] Program suspended in 1962-63 fiscal year.

[e] Previously in Basic Data in the surface water measurement program.

[f] Program suspended in 1963-64 fiscal year.

[g] Included in Services in 1962-63 fiscal year.

[h] Program completed in 1961-62 fiscal year.

[j] Charges for these services were accounted directly to programs without a record of total charges through a service account. Changes have been made in accounting for these services in 1962-63 to correct this problem.

DEPARTMENT OF WATER RESOURCES—Continued

VIII. DESIGN, RIGHT-OF-WAY AND CONSTRUCTION SUPERVISION

The departmental costs associated with the California Water Development Program and Other Construction Activities are shown in detail starting on page 663 immediately following the graphic presentation of the California Water Development Program and Other Construction Activities.

CALIFORNIA WATER DEVELOPMENT PROGRAM

The California Water Development Program consists of the detailed design and implementation of the State Water Facilities as defined in Chapter 1762, Statutes of 1959 (Water Code Section 12934(d)). The facilities, which are the initial features of the California Water Resources Development System, are incorporated in the following projects:

Feather River Facilities
Delta Facilities
South Bay Aqueduct
California Aqueduct

This part of the budget includes the staff and related expenses for the design, acquisition, and construction supervision activities necessary for the implementation of the California Water Development Program. The staff costs of these functions are financed in the Capital Outlay budget and reimbursed to the State Operations budget to provide specific staff and related expenses.

The proposed schedule of accomplishment of the 3 major work categories, design, right-of-way acquisition and construction for the current California Water Development Program is presented for fiscal years 1962-63 through 1968-69 as part of the explanation of each project. These schedules are based on the best current estimates of project emphasis and production potential. The following definitions of the work categories that are used to present the California Water Development Program in the budget are provided to give a general understanding of the significant elements of the program.

Design:

The design category is made up of 2 phases, preliminary design and final design.

Preliminary Design—Preliminary design is the initial step in the design activity—the purpose being to perform detailed surveys and explorations to finalize hydraulic design, established structure location and alignment, and define the limits of right-of-way requirements.

Final Design—Upon completion of preliminary design, the project moves to the final design phase, which includes:

1. Detailed design, which is the engineering studies and computations necessary for the proper selection and precise delineation of each element of the project;
2. Construction plans, which are the detailed engineering drawings of each element of the project from which the works are constructed;
3. Specifications, which are the required legal and technical provisions necessary for the definition of the type and quality of materials to be incorporated in the work, and the workmanship required to provide the finished structure as delineated in the plans;
4. Construction cost estimate, which is the engineering cost estimate for the project and is the basis upon which the director authorizes advertisement for bids and award of a construction contract.

Right-of-way Acquisition:

The phases of the right-of-way function to be performed by the Department of Water Resources' personnel include right-of-way engineering, utility relocations, permits from public agencies, management of acquired properties, and clearance of improvements prior to construction. The appraisal and negotiation for purchase of private property, except condemnation judgments, are being handled by the Division of Highways on a contract basis subject to the review and approval of the Department of Water Resources.

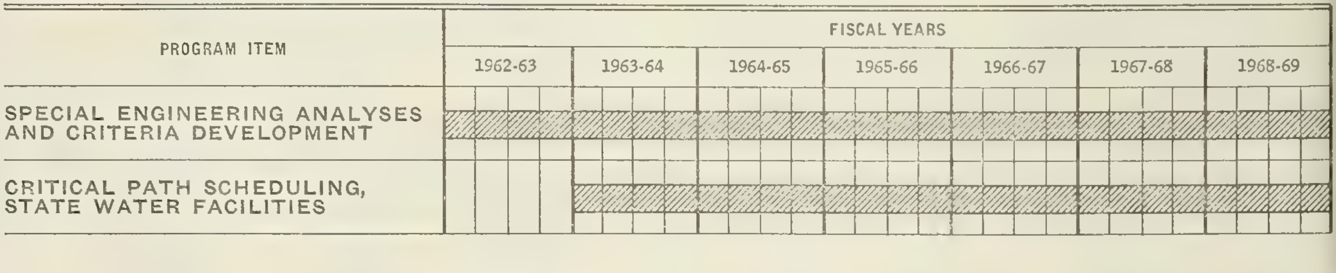
The co-ordination and liaison of the right-of-way activities between the Division of Highways, the Department of Water Resources and, in eminent domain proceedings, the Attorney General's office, will be handled by the right-of-way liaison personnel of the Department of Water Resources. The Department of Water Resources liaison personnel will review and approve appraisals and settlements, and schedule payments. They will also certify that rights-of-way are available prior to calling for construction bids.

The right-of-way engineering section will prepare maps, legal descriptions, and acquisition documents. Relocations of public and private utility facilities will be done by the relocation section.

Construction Supervision:

Construction supervision involves contract administration, the necessary field surveying, interpretation of plans and specifications, and enforcement of specifications and contract provisions through inspection of the construction work to insure that the work performed by the contractor is in accordance with the plans and specifications.

STATE WATER FACILITIES



FEATHER RIVER FACILITIES

The Feather River Facilities embrace the entire Feather River Basin and consist of five reservoirs in the upper basin designated the "Upper Feather Division" and Oroville Dam and Reservoir and associated facilities designated the "Oroville Division."

The Upper Feather Division consists of the Frenchman, Grizzly Valley, Antelope Valley, Dixie Refuge, and Abbey Bridge Dams and Reservoirs. The main features of the Frenchman unit, a 128-foot high earthfill dam and 51,000 acre-foot regulatory reservoir, were completed in October 1961. The contract for completion of United States Forest Service road relocations around the Frenchman Reservoir was awarded in June 1962, and is scheduled for completion during the current year. Construction of the Antelope Valley unit, a 105-foot high dam and 21,000 acre-foot storage reservoir, was begun during the current fiscal year, the contract having been awarded in August. Construction of this unit should be completed in the budget year.

Geological exploration work for the Grizzly Valley unit was begun at the end of the 1961-62 fiscal year and should be complete by the end of the current fiscal year. Design is scheduled to be completed in 1963-64, following reformulation studies.

Right-of-way acquisition in this division will continue for the Grizzly Valley and Antelope Valley units through the current year into the budget year.

One hundred ninety-one thousand dollars is included in the 1963-64 Budget to complete the access roads to the Frenchman Dam and Reservoir recreation area and $300,000 is included for recreation development at Antelope Valley Dam and Reservoir.

PROGRAM SUMMARY	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	

The Oroville Division can be described in 2 parts:

1. Oroville Dam and Reservoir, including spillway, power plant, fish hatchery, and relocations of Western Pacific Railroad, U.S. Highway 40A, and 2 county roads in the reservoir area.
2. Thermalito features consisting of diversion dam, power canal, forebay, power plant, afterbay, and miscellaneous relocations necessitated by these features.

Oroville Dam will be an earth and graded-gravel fill structure about 735 feet high, and the reservoir impounded will store 3,484,000 acre-feet of water. The Thermalito features provide river reregulation after power generation at Oroville and added power generation utilizing the remaining head available before return of the flow to the river. Storage in the Thermalito Afterbay provides water for pump-back through the system to the Oroville Reservoir.

Construction of Tunnels Numbers 1, 2, and 3, the West Branch Bridge, and grading of the roadbed between Oroville and the West Branch Bridge on the Western Pacific Railroad relocation were completed during 1961-62, and track laying and installation of signal facilities by the railroad crews were begun. At the close of the 1961-62 fiscal year, design and preparation of plans and specifications had been completed for the Feather River Fish Hatchery interim facilities, and for the balance of Western Pacific Railroad relocation. Construction contracts awarded during this period included the U.S. Highway 40A relocation between Oroville and Wicks Corner, Diversion Tunnel Number 1 of the Oroville Dam, the Palermo Outlet Works, and the interim facilities of the Feather River Fish Hatchery.

During the current year design of the construction headquarters and site, Department of Water Resources personnel housing units, Middle Fork Bridge, and the initial stage of the Oroville Power Plant will be completed and design of the Thermalito features will begin. Design of the Oroville to Quincy and Oroville to Feather Falls County Roads relocations and the major Oroville facilities will continue. A contract was

---

[a] Expenditures reflected in Capital Outlay budget for this department.

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

FEATHER RIVER FACILITIES—Continued

awarded for construction of Oroville Dam, Diversion Tunnel Number 2 and Thermalito Diversion Dam. Construction will begin on the first stage of the Oroville Power Plant, a portion of the Oroville to Quincy County Road relocation, the Middle Fork suspension bridge, the construction headquarters and site development, and the first group of housing units for Department of Water Resources employees. The first procurement contract for power generating equipment for the Oroville Power Plant will be let. Construction contracts to be completed during 1962-63 are the Oroville Dam Seismograph Station, the Palermo Outlet Works, the access road to the Oroville Dam's left abutment, the interim facilities of the Feather River Hatchery, and the U.S. 40A realignment between Oroville and Wicks Corner. The Western Pacific Railroad shifted its operations to the relocated alignment in January.

During the budget year design of the major Oroville facilities and the Thermalito features will continue, design of the Oroville to Quincy and Oroville to Feather Falls County Roads relocations is expected to be completed, and design of the Oroville Dam spillway will be completed. Construction will continue on the Oroville Dam, the Oroville Power Plant, the Middle Fork Bridge, and the Oroville to Quincy County Road relocation. Construction will begin on a second group of Department of Water Resources employee housing units, the Oroville Dam spillway, and the Oroville to Feather Falls County Road relocation.

PROGRAM SUMMARY	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	

DELTA WATER FACILITIES

The Delta Water Facilities consist of master levees, control structures, channel improvements and appurtenant facilities in the Sacramento-San Joaquin Delta for water conservation, water supply in the Delta, transfer of water across the Delta, flood and salinity control, and related functions. Experimental testing of levee construction procedures is in progress in 1962-63.

Design activity has not started on these facilities. In 1963-64 experimental testing will continue and development of design criteria for levee construction will begin.

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

SOUTH BAY AQUEDUCT

The South Bay Aqueduct will convey water from the California Aqueduct to serve the Livermore Valley portions of Alameda and Contra Costa Counties, the southern "Bayside" portion of Alameda County, and northern Santa Clara County.

The main conduit will extend some 38 miles from Bethany Forebay on the California Aqueduct approximately 10 miles northwest of Tracy in Alameda County, to Airpoint Reservoir approximately four miles northeast of Milpitas, Santa Clara County. The South Bay Pumping Plant, already in operation, lifts water from Bethany Forebay to an elevation where it flows by gravity to the service areas. An interim canal two miles long and an interim pumping plant will supply water to Bethany Forebay from the U.S. Bureau of Reclamation's Delta-Mendota Canal until water becomes available from the California Aqueduct.

Regulatory storage for Livermore Valley and for the Alameda-Bayside and the Santa Clara service areas will be provided by Del Valle Reservoir located on Arroyo Del Valle six miles south of Livermore. Del Valle Reservoir will be connected to the main aqueduct by a short branch pipeline in which a pumping plant will be included. The plant will pump water between the main aqueduct and the reservoir with the direction of pumping depending on the reservoir water surface elevation and the water demands. Del Valle Reservoir will also provide flood protection for the Livermore Valley and for the downstream portion of the Alameda Creek Basin. Airpoint Reservoir will provide terminal reservoir storage for the Santa Clara service area.

The interim facilities consisting of the Interim Canal and the Interim Pumping Plant and Bethany Forebay Dam and Reservoir were completed in June 1962. The construction of South Bay Pumping Plant and the aqueduct to Patterson Reservoir, a distance of approximately nine miles, was virtually complete. First water deliveries were made to Livermore Valley on May 10, 1962. The Fourth Contract, Alameda Division Canal, was awarded in June and will extend the aqueduct eight miles beyond Patterson Reservoir.

During 1962-63 construction will start on the Mission and La Costa Tunnels, the pipeline from the Alameda Division Canal to Airpoint Reservoir, and the Alameda County Road relocation in the Del Valle Reservoir area. Design will be completed in 1962-63 for the entire aqueduct, except for the Del Valle Division.

During 1963-64 construction will start on the second stage of the South Bay Pumping Plant, the second Brushy Creek Pipeline, and the Del Valle Division features, including the dam and reservoir, the pumping plant, and the branch pipeline. The Alameda Division Canal and the Del Valle Road relocation will be completed and the other construction contracts started in 1962-63 will continue. All design work for the South Bay Aqueduct will be completed during 1963-64. Initial water deliveries at Airpoint Reservoir are scheduled for December 1964.

One hundred thousand dollars is included for the first stage of recreation development at Airpoint Dam and Reservoir and $50,000 is provided for the same purpose at Del Valle Dam and Reservoir.

CALIFORNIA AQUEDUCT

The California Aqueduct comprises all of the State Water Facilities south of the Delta necessary to convey water to the state service areas in the San Joaquin Valley and southern California.

This project is comprised of the following divisions: North San Joaquin, San Luis, South San Joaquin, Tehachapi, Antelope, East Branch, and West Branch.

The North San Joaquin Division includes the intake channel from the Delta to the Delta Pumping Plant and the necessary fish protection works; Delta Pumping Plant, discharge lines and appurtenant features; the extension of Bethany Forebay dikes; and concrete lined canal which extends from Bethany Forebay to San Luis Forebay, a distance of approximately 70 miles. These facilities will be located along the west side of the San Joaquin Valley, in Contra Costa, Alameda, San Joaquin, Stanislaus, and Merced Counties.

At the end of 1961-62, all preliminary design had been completed and final design had been initiated on most features in this division. During the 1962-63 fiscal year, construction of the aqueduct will begin with the excavation for the intake channel and for the Delta Pumping Plant. The first consolidation embankment contract will be awarded in 1962-63. During 1963-64, contracts will be awarded for the reach of aqueduct from Del Puerto Canyon Road to Orestimba Creek and for the second group of consolidation embankments. Final design and right-of-way activities will continue in order to meet the construction schedule.

The San Luis Division (joint state-federal facilities) includes the San Luis Forebay; the forebay intake canal; San Luis Pumping-Generating Plant, discharge lines and appurtenant features; San Luis Dam and Reservoir and appurtenances; a canal of varying capacity which will extend from San Luis Reservoir approximately 107 miles south to Kettleman City; and the Mile 18 Pumping Plant located about 18 miles southerly of San Luis Dam. These facilities will be located along the west side of San Joaquin Valley in Merced, Fresno, and Kings Counties and are parts of the state-federal joint facilities of the San Luis unit of Central Valley Project. The U.S. Bureau of Reclamation under a contract with the State has the prime responsibility for design and construction of these facilities. This contract provides for 55 percent of the cost to be met with advances of state funds. The Department of Water Resources will be responsible for the part of the right-of-way acquisition program connected with the main reservoir.

During 1962-63, the U.S. Bureau of Reclamation will start the construction of San Luis Dam including the highway detour, San Luis Forebay Dam, San Luis Pumping-Generating Plant, Mile 18 Pumping Plant and the first reach of the canal extending to Mile 18 Pumping Plant. The Division of Highways will begin the relocation of State Highway Route 152. Right-of-way for the San Luis Dam and Reservoir area will be acquired by the State during 1962-63. During 1963-64, construction will begin on Forebay Pumping Plant and the second reach of aqueduct.

$45,000 is included in the 1963-64 Capital Outlay Budget to initiate a tree planting program at the San Luis Dam and Reservoir recreation areas.

The South San Joaquin Division includes a canal of varying capacity which will extend from Kettleman City approximately 110 miles southerly to the Tehachapi Pumping Plant; the Buena Vista Pumping Plant approximately 67 miles south of Kettleman City; and the Wheeler Ridge Pumping Plants I and II which are about two miles apart and approximately 28 miles south of Buena Vista Pumping Plant. These aqueduct features will be located along the west and southwesterly side of the San Joaquin Valley in Kings and Kern Counties passing west of Buena Vista Lake to Wheeler Ridge. From Wheeler Ridge the aqueduct will extend generally eastward to the vicinity of Pastoria Creek.

By the end of 1962-63 most of the preliminary design will have been completed between Kettleman City and the Tehachapi Pumping Plant, and final design will be in progress from Kettleman City to Lost Hills. In 1963-64 all preliminary design will be completed and final design and preparation of drawings will be in progress. Construction is scheduled to begin in fiscal year 1964-65.

The Tehachapi Division is comprised of two units: The Tehachapi Pumping Plant which includes the plant and appurtenant features, including discharge lines; and the Tehachapi Crossing Unit, consisting of tunnels, siphons, and open channel, which will extend from the Tehachapi Pumping Plant through the Tehachapi Mountains to the South Portal of the Tehachapi Tunnels.

By the end of fiscal year 1962-63, all preliminary design will have been completed and final design will be in progress on the Tehachapi Tunnels. Construction will have been started on the access road systems.

During fiscal year 1963-64, construction of the road systems will be continued. Final design of the Tehachapi Crossing will be virtually completed except for the final design of Siphons Numbers 1 and 2, which will be initiated during fiscal year 1964-65.

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

CALIFORNIA AQUEDUCT—Continued

The Antelope Division, located in Kern and Los Angeles Counties, includes all of the California Aqueduct facilities required to convey water from the south portal of Tehachapi Tunnel Number 4 to the junction of the West Branch and East Branch Divisions. This division is subdivided into 2 units: the Cottonwood Unit encompassing the Cottonwood Power Plant, surge tank, penstocks and other appurtenant facilities; and the Fairmont Unit which consists of 19 miles of concrete lined canal and pipeline.

Preliminary design work was initiated for both units during fiscal year 1961-62 and will be completed in 1962-63. During 1962-63, construction of the access road in the Cottonwood Unit will be initiated and completed in 1963-64. During 1963-64, final design of both units of the Antelope Division will be initiated and will be completed by the end of fiscal year 1964-65.

The West Branch Division includes all of the California Aqueduct facilities required to convey water from the junction of the West and East Branch Divisions to Castaic Reservoir. These facilities will be located in Los Angeles County and will terminate at Castaic Reservoir, in the vicinity of the community of Castaic. The division is comprised of two units: the Angeles Unit which includes a pumping plant, power recovery plants, tunnels, and siphons; and the Castaic Unit which includes Castaic Dam and Reservoir.

Preliminary design work was initiated during fiscal year 1961-62. At the end of fiscal year 1962-63, it is estimated that all preliminary design in the division, except for the power plants in the Angeles Unit, will be completed.

During fiscal year 1963-64, the preliminary design of the power plants in the Angeles Unit will be completed. During 1963-64 final design will be underway, with design of these features continuing on to completion in fiscal year 1965-66.

The East Branch Division consists of those portions of the California Aqueduct from the junction of the West and East Branch Divisions to Perris Reservoir, the terminus of the East Branch Aqueduct. This division is comprised of eight units: the Palmdale Unit consisting of concrete lined canal and pipeline from the junction to the forebay of the Pearblossom Pumping Plant, a distance of approximately 34 miles; the Pearblossom Unit including the Pearblossom Pumping Plant, discharge lines and appurtenant features; the Mojave Unit which encompasses concrete lined canal and pipeline extending from the Pearblossom Pumping Plant to Cedar Springs Reservoir, a distance of approximately 47 miles; the Cedar Springs Unit consisting of Cedar Springs Dam and Reservoir; the San Bernardino Crossing Unit involving approximately four miles of tunnel extending from Cedar Springs Reservoir to the Devil Canyon Power Development; the Devil Canyon Unit, including two power plants together with penstocks and appurtenant features; the Santa Ana Unit consisting of pipeline extending from the Devil Canyon Power Development to Perris Reservoir, a distance of about 27 miles; the Perris Unit which consists of Perris Dam and Reservoir. These features will be located in Los Angeles, San Bernardino, and Riverside Counties.

Preliminary design work was initiated on all features in this division of the California Aqueduct during fiscal year 1961-62. Preliminary design of the Palmdale, Pearblossom, and Cedar Springs Units will be concluded during fiscal year 1962-63 with preliminary design of all other units of the East Branch, exclusive of the Devil Canyon Unit, to be completed during fiscal year 1963-64.

During fiscal year 1963-64, final design will be initiated on three units: Palmdale, Pearblossom, and Cedar Springs. In the Palmdale Unit, final design will be initiated on the aqueduct from Fairmont to Leona Valley, near Palmdale, as well as the Antelope Valley Freeway crossing. An interagency agreement with the State Division of Highways is contemplated for that agency to design this latter feature. In the Pearblossom Unit, the design of all features will be initiated. In the Cedar Springs Unit, the design of relocations of State Legislative Routes 59 and 188, initiated during fiscal year 1962-63 under an interagency agreement with the State Division of Highways, will be continued.

COASTAL AQUEDUCT

The Coastal Aqueduct consists of those portions of the aqueduct system from Los Perillas Forebay at the California Aqueduct near Avenal Gap in Kings County to a terminus at the Santa Maria River and includes all aqueduct facilities required to make water deliveries to San Luis Obispo and Santa Barbara Counties. Design activity has not started on this aqueduct and no program has been scheduled for fiscal year 1963-64.

OTHER CONSTRUCTION ACTIVITIES

LOWER SAN JOAQUIN RIVER FLOOD CONTROL PROJECT

The Lower San Joaquin River Flood Control Project extends from Friant Dam to the mouth of the Merced River. It consists of improvements to approximately 110 miles of natural river channel and construction of approximately 48 miles of leveed bypass channels to supplement the channel capacity of the San Joaquin River. The Department of Water Resources provides planning, design, right-of-way and construction engineering services to the Reclamation Board in conformance with service agreements between the 2 agencies. Funds for this project are budgeted by the Reclamation Board and periodic transfers made to the Department of Water Resources, as required, to accomplish the engineering work on the project.

Four contracts were complete as of June 30, 1962, and 2 were under construction. New levees along the San Joaquin River from the Merced River to Sand Slough and repair of existing levees were complete. The construction of the Mariposa Bypass was also complete. Levee work on the Eastside Bypass was under way from the San Joaquin River to the interchange.

Design work was completed during 1961-62 on the contract for the Eastside Bypass from the San Joaquin River to the interchange and well started on the remaining contracts in the Eastside Bypass. On the San Joaquin River channel improvement design was completed for the contract from the interchange to head of Mariposa Slough.

In 1962-63 the channel clearing will be complete to Mendota Dam on the San Joaquin River. The levee work on the Eastside Bypass will be complete from the San Joaquin River to the interchange and work will start on the Eastside Bypass in the reach from the San Joaquin River to the Chowchilla Canal. Two contracts will be awarded and completed for channel improvement on the San Joaquin River from the interchange to Mariposa Slough and revetment protection in the Mariposa Bypass.

In 1962-63 design work will be complete on the 3 remaining contracts in the Eastside Bypass and started on the contracts for the Chowchilla Canal Bypass and the remaining San Joaquin River channel improvement from Mendota Dam to Gravelly Ford Canal.

In 1963-64 the Eastside Bypass will be completed to Chowchilla Canal.

In 1963-64 design work will be completed for all of the contracts in the present program of the Lower San Joaquin River Flood Control Project.

GENERAL ANALYSIS

Objectives

The State Water Rights Board is in charge of maintaining orderly procedure in the administration of the following programs outlined in Division 2 of the Water Code, State of California:

1. Administration of appropriation of unappropriated water through the application, permit and license procedure and to maintain records and make observations to verify compliance with the law in putting the appropriated water to beneficial use.
2. Investigation of physical facts and assistance to the courts in water rights controversies, and implement statutory procedures whereby an administrative determination of water rights can be made prior to court action.
3. Administration of the act requiring the recordation of data relating to the extraction of ground water in the counties of Riverside, San Bernardino, Los Angeles and Ventura.
4. Administration of the act authorizing the retention of ground water rights when extractions are reduced by use of water from an alternate source, which applies to 8 counties of Southern California, and consists of recording statements filed by water users.

Program and Performance

The board is composed of 3 members appointed by the Governor for 4-year terms.

During the 1961-62 fiscal year the board held 77 days of hearing including a 23-day rehearing on applications of the United Water Conservation District and the Calleguas Municipal Water District on the Santa Clara River by order of the Superior Court, Ventura County. The matter had originally been decided by the board in 1958. Hearings were also held on major irrigation and hydroelectric projects of Nevada Irrigation District on the Yuba River; Placer County Water Agency on the Middle Fork of the American River; Calaveras County Water District; Calaveras County Water District, Tuolumne County Water District No. 2 and Oakdale and South San Joaquin Irrigation Districts on the Stanislaus River; and United States Bureau of Reclamation on Stony Creek. The board issued 72 decisions for various projects.

A total of 551 new applications to appropriate unappropriated waters were filed during the 1961-62 fiscal year. While less than the number filed during the previous fiscal year the workload has remained high. Since there is less water available for appropriation additional information is now required by the board concerning each application to determine that unappropriated water is available.

Orders were issued allowing extensions of time under 488 permits and changes in points of diversion, place of use or character of use under 120 applications, permits or licenses. One hundred eighty-two applications were canceled and 147 permits and licenses were revoked.

Inspections were made of water development projects under 597 permits throughout the State in connection with the license processing. The complex nature of projects now being developed caused some reduction in the number of permits inspected as compared to the preceding year. Some projects inspected have encompassed up to 28 storage reservoirs under a single permit.

Adjudication activities of the board proceeded in 4 court references. The most important and largest involves ground water in the San Fernando Valley, Los Angeles County, which has progressed to the point of receiving objections to the draft report of referee and preparation of the Report of Referee for filing with the court. The remaining 3 references are in Northern California and involve surface streams in Mariposa, Santa Clara and Butte Counties. Work on these references is approaching completion. An order of reference which would require additional work in the West Coast Basin in Southern California was received, but work under the order has been held in abeyance with approval of the court to allow the parties time to negotiate. Inquiries have been received concerning adjudications which may be initiated this fiscal year requesting information on procedure and costs.

Filings of notices pertaining to recordation of water extractions and diversions in four Southern California counties continued, with 111 first notices and 4,827 annual notices filed in the 1961-62 fiscal year. Two requests for verifications were received and investigations were made and reports on these will be made at an early date.

During the 1962-63 fiscal year the board intends to initiate major hearings on applications of Richvale Irrigation District on the Middle Fork of the Feather River; United States Bureau of Reclamation, Calaveras County Water District and Stockton and East San Joaquin Water Conservation District concerning the New Hogan development on the Calaveras River, and possibly others. Also applications involving minor projects will be heard.

During the 1963-64 fiscal year, hearings of a major nature should be initiated on applications to appropriate water from the Kings, Kern and Stanislaus Rivers. Other protested applications not identifiable at this time which will have advanced to the hearing stage also will be scheduled for hearing. These may include hearings on the Yuba River and on the Feater River project of the State Department of Water Resources.

Provision is made in the 1963-64 Budget for 2 additional engineering positions and a one-halftime clerical position to meet increases in the number and complexity of inspections required prior to issuance of a water rights license. Permits are issued originally and inspection of diversion facilities by the Water Rights Board is required prior to the issuance of a permanent license.

GENERAL ANALYSIS

Objectives

This board co-operates with the Corps of Engineers, United States Army, in construction of flood control projects through the acquisition of rights-of-way for such projects; acts as governing body for the Sacramento and San Joaquin Drainage District; approves construction of levee systems and flood channels; and fulfills such construction obligations as have been assumed by the State in agreements with the Federal Government.

Program and Performance

The agency program involves work on a number of flood control projects in the Sacramento and San Joaquin Valleys. The major presently active projects of the board are the Sacramento River Flood Control Project, the Lower San Joaquin River Flood Control Project, the Calaveras River and Littlejohn Creek and Tributaries Project, and the Sacramento River Bank Protection Project.

Construction work on all of these projects is done by the Corps of Engineers with the exception of the portion of the San Joaquin Project lying above the mouth of the Merced River. The construction work on this project is being accomplished by the Department of Water Resources under an agreement with the Reclamation Board.

The primary function of this agency is the acquisition of the necessary lands, easements, and rights-of-way for these projects and the relocation of roads, bridges, and utilities as may be necessary in conjunction with their construction. In addition the board also is responsible for the control of encroachments upon the works of these various flood control projects and is responsible for the enforcement of sound maintenance standards.

Five new positions, 4 of which are primarily financed through charges to local assistance projects, are proposed for the budget year. A junior counsel position, established in the current year in recognition of a growing backlog of condemnation cases, is proposed for continuation into 1963-64. Two engineering positions are proposed as a result of construction supervision and description writing needs and 1 land agent is included for land acquisition requirements. One additional position is proposed to meet clerical workload which results from the accelerated construction and land acquisition activity. In order to maintain time schedules, $3,000 in overtime payments has been authorized for 1962-63.

GENERAL ANALYSIS

Objectives

The Colorado River Board has the continuing and basic duty and responsibility under State Law (Statutes of 1937, now Part 5 of Division 6 of the Water Code) of protecting the rights and interests of the State of California, its agencies and citizens in and to the waters of the Colorado River System.

Under its basic responsibilities the board must protect California's water rights against encroachment from any cause or source, by engaging in interstate conferences, appearing at hearings before legislative committees and negotiating with the executive departments of the Federal Government; and must assist the State Attorney General in preparation for eventualities if interstate conferences must yield to litigation.

COLORADO RIVER BOARD—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

GENERAL ANALYSIS—Continued

Program and Performance

The board comprises 6 members appointed by the Governor, each representing 1 of the 6 agencies having rights to the use of water or power from the Colorado River. These agencies are: The Metropolitan Water District of Southern California; Department of Water and Power, City of Los Angeles; San Diego County Water Authority; Imperial Irrigation District; Coachella Valley County Water District; and Palo Verde Irrigation District.

Major phases of the board's work program as anticipated for the current fiscal year and the fiscal year 1963-64 are summarized as follows:

1. Preparation of engineering and legal material for appearances before congressional committees, other bodies, and for conferences with interested federal agencies, senators and congressmen regarding pending legislation or licenses affecting California's rights and interests on the Colorado River.
2. Representation of the board in technical and policy conferences and in legislative, court and commission proceedings; co-ordination of work with the work of the attorney general's staff, other California agencies including those represented on the board, special consultants, other states and the Federal Government; and co-operative efforts with representatives of other states and the Federal Government in seeking to resolve problems inherent in the operation of river facilities and the administration of the law of the river.
3. Exhaustive study of reports on proposed projects for development, control and utilization of water and power of the Colorado River System including analysis of engineering, financial and legal aspects of the proposals as required, and preparation of formal views and recommendations to be transmitted to appropriate Federal authorities and the Congress.
4. Detailed analysis of the operations of existing and proposed developments on the Colorado River System to determine their effects upon the quantity and quality of the water supply available to the lower basin and in particular to California projects, including effects on power generation.
5. Collection, compilation and analysis of basic information on the water supply of the Colorado River to the extent that the interests of the member agencies are concerned.
6. Engineering studies and research needed in connection with the suit, Arizona v. California et al., still pending before the United States Supreme Court.
7. Legal and engineering studies including analysis and if necessary recommendation for board action to insure that the operation of the Colorado River System is in accordance with the provisions of the Colorado River Compact, the Upper Colorado River Compact, the Mexican Water Treaty, Colorado River Storage Project Act, the Boulder Canyon Project Act, and other relevant statutes, regulations and court decrees.

GENERAL ANALYSIS

Objectives

The commission was created by Chapter 1693, Statutes of 1953, to confer with a similar commission established by the State of Arizona to define a common boundary between the states along the Colorado River. Membership in the commission consists of the Attorney General, Director of Water Resources, and the Executive Officer of the State Lands Commission. One member of the Senate, appointed by the Senate Rules Committee, and one member of the Assembly, appointed by the Speaker, are advisors to the commission.

Program and Performance

The ultimate goal in the work of this agency is the adoption by the Legislatures of California and of Arizona of a compact between these states defining the common boundary along the Colorado River. This compact would be based on recommendations made by the Boundary Commissions of the two states.

An apparent impasse concerning the adoption of the boundary by the commissions of the two states was resolved at a joint commission meeting held early in 1961. A compromise was reached with respect to the proposed location of the boundary in the "Yuma Island Area," where the location of the line had previously been the subject of political disputes.

The California Commission reported this agreement to the 1961 session of the Legislature. Senate Concurrent Resolution No. 34 and Assembly Concurrent Resolution No. 71, both indicating legislative concurrence with the findings of the joint boundary commissions, were introduced in the Legislature. Both of these resolutions were referred to the Assembly Rules Committee which appointed a subcommittee to study, in the field, the "Yuma Island" problem, the only portion of the recommended boundary on which objections had been specifically voiced. In consideration of the report by the Assembly Sub committee, the Rules Committee felt the problem required addi tional study and evaluation, and referred the matter to th Assembly Committee on Interstate Co-operation, with a require ment for study and a report to the Legislature. This committe is to render a report of its findings to the 1963 session of th Legislature.

California's counterpart, the Colorado River Boundary Com mission of Arizona, proposes to present its recommendations t the 1963 session of the Arizona Legislature.

The California Commission's future program envisions:

1. The drafting of a form of compact, to be submitted to an adopted by the Legislatures of both states.
2. The physical location and fixing of the boundary along th river from Nevada southward to the Mexican Border. Thi will require the location and fixing of at least 34 majo points by ground survey along the reach of the river. Th Joint Commissions propose to enter into an agreement witl the United States Coast and Geodetic Survey to accom plish this work. The costs are to be borne equally amon the United States, California, and Arizona. An estimat furnished by the United States Coast and Geodetic Surve places the cost of this survey at approximately $100,00 The proposed budget provides $33,333 in the 1963-64 fisca year for the State's share of the cost of this survey, whicl will take place after the compact is adopted by both th California and Arizona Legislatures.
3. The compact, when adopted, must be approved by the Con gress of the United States.
4. The boundary line must be monumented along its entir course.

GENERAL ANALYSIS

Objectives

The major purposes of this compact, with respect to the water resources of the Klamath River Basin, are:

A. To facilitate and promote the orderly, integrated and comprehensive development, use, conservation, and control thereof for various purposes, including, among others: the use of water for domestic purposes; the development of lands by irrigation and other means; the protection and enhancement of fish, wildlife, and recreational resources; the use of water for industrial purposes and hydroelectric power production; and the use and control of water for navigation and flood prevention.

B. To further intergovernmental co-operation with respect to these resources and programs for their use and development and to remove causes of present and future controversies by providing (1) for equitable distribution and use of water among the 2 states and the Federal Government, (2) for preferential rights to the use of water after the effective date of this compact for the anticipated ultimate requirements for domestic and irrigation purposes in the Upper Klamath River Basin in Oregon and California, and (3) for prescribed relationships between beneficial uses of water as a practicable means of accomplishing such distribution and use.

Program and Performance

The commission was created effective September 11, 1957, with the passage of an act of the Congress of the United States consenting to the provisions of that certain compact designated as the "Klamath River Basin Compact Between the States of Oregon and California." The Legislature of the State of California ratified and approved the compact by Chapter 113, Statutes of 1957.

The compact provides that the commission consist of 3 members. The Director of the Department of Water Resources represents the State of California. The representative of the State of Oregon is the State Engineer. The federal representative is appointed by the President. The representative of the United States serves as chairman of the commission without vote.

California's share of the expense of the commission together with the State of Oregon's share is deposited in a trust account from which all expenses are paid.

During 1963-64, the work program of the commission will continue on about the same level as last year. The land use study of the Upper Klamath River Basin in Oregon will continue.

Fieldwork for the area outside the Klamath Indian Reservation will be completed and the preparation of a map to indicate land use as of 1957, the effective date of the compact, will be initiated.

A program initiated in 1961-62 for determining a solution of the algae problem in the Klamath River will continue.

Provision has been made in the budget for expenses related to hearings and investigations required to transact the terms of the compact. The routine administrative work will be continued.

It will be necessary for the commission to complete its initial inventory of land and water use in the Upper Klamath River Basin to insure compliance with compact terms providing for a limit on the amount of land which can be developed with water distributed to the 2 states under provisions of the compact. Provision is therefore made for continuation of the work in this category which was initiated during the 1959-60 fiscal year.

The commission has previously concluded that a base map should be prepared delineating the land under irrigation as of 1957. Provision has been made in the budget to have this map prepared.

California appropriations for this commission are as follows:

Chapter 113, Statutes of 1957	$12,000
Budget Act of 1959, Item 265	2,343
Budget Act of 1960, Item 260	572
Budget Act of 1961, Item 270	5,698
Budget Act of 1962, Item 267	5,697

GENERAL ANALYSIS

Objectives

The California-Nevada Interstate Compact Commission of California was created by Chapter 1810, Statutes of 1955. Its function is "to co-operate with a similar commission representing the State of Nevada in formulating and submitting to the legislatures of both states for their approval an interstate compact relating to distribution and use of the waters of Lake Tahoe and the Truckee, Carson, and Walker Rivers."

Program and Performance

The commission consists of the Director of the Department of Water Resources and 6 other members, appointed by the Governor, from electors residing, owning property, or engaged in business in the areas comprising the basins of the Truckee, Carson, and Walker Rivers, and Lake Tahoe. The chairman of the commission is selected by the members.

The work of the California Commission during 1962-63 will be aimed toward completion of the negotiations and a report will be prepared by the joint California-Nevada Commission on the current status of the compact negotiations to be submitted to the legislatures of California and Nevada in early February 1963.

During 1963-64 the commission will:

1. Negotiate with federal, state, and local agencies on final provisions of the compact;
2. Hold public hearings in Sacramento and Carson City and the county seats of 5 counties in California and 6 counties in Nevada which are directly affected by the compact terms;
3. Present the completed compact to the state legislatures of California and Nevada for their approval during the period January through March 1964.
4. Introduce consent legislation in Congress to obtain federal approval of the compact by both houses during the period April to June 1964.

The executive director will continue to serve as secretary to the Klamath River Compact Commission and a reimbursement from that commission is included.

GENERAL ANALYSIS

Objectives

The principal objective of the state water pollution control program is to regulate the disposal of domestic sewage and industrial waste so as to preserve and protect the recognized beneficial uses of the waters of the State. Another objective is to prevent nuisances resulting from unreasonable waste disposal practices. The regulation of waste discharges is the primary responsibility of the 9 regional water pollution control boards. Prescribed waste discharge requirements must, in the final analysis, be reasonable and must be promulgated after balancing the interests of both the water users and the waste dischargers. For this reason, the regional boards are composed of local people appointed by the Governor and associated with 7 specified fields of interest.

In addition to the major task of prescribing, checking, and enforcing waste discharge requirements, the regional boards have the following other statutory duties and responsibilities:

1. To formulate and adopt long-range plans and policies for control of water pollution.
2. To co-ordinate the actions of the various state and local agencies in the control of water pollution.
3. To investigate conditions of pollution or nuisance.
4. To report cases of suspected contamination (actual hazard to the public health).
5. To recommend water pollution control projects needing financial assistance.
6. To request enforcement of water pollution control laws by appropriate federal, state or local agencies.

The 14-member State Water Pollution Control Board has the following principal responsibilities:

1. To formulate and adopt statewide policy for control of water pollution.
2. To review actions of any regional board which may fail to take or obtain appropriate action to correct conditions of pollution or nuisance.
3. To refer cases of uncorrected contamination (hazard to public health) to any state agency having jurisdiction.
4. To administer statewide programs of financial assistance for sewerage construction.
5. To administer statewide programs of research in the technical phases of water pollution control.

Program and Performance

The program of the state and regional boards for the 1963-64 fiscal year is essentially a continuation of the current program with some expansion to take care of increasing workload made possible by federal program grant funds. Much of the expansion is reflected in implementation of the engineering and clerical positions authorized during 1962-63 fiscal year, and additional temporary stenographic help for the Santa Ana and San Diego regional boards in 1963-64. The federal (Public Law 660, 84th Congress) program grants are made available for use in extending or improving state water pollution control programs. In California, grant funds have been used primarily to augment the state board's research program.

An additional position of associate water pollution control engineer for the state board staff is included in 1963-64 to work on planning of statewide policy and programs, and on problems of co-ordination between the state and regional boards.

The boards are delegated the responsibility of administering the federal (Public Law 84-660) construction grant program. This program was expanded in the 87th Congress by Public Law 88. California's allocation, formerly approximately $2 million annually, was increased to about $4 million in 1961-62, $4½ million in 1962-63, and $5 million anticipated for 1963-64. Eligible communities may receive grants for construction of waste treatment works up to 30 percent of the project cost with a maximum of $600,000 per applicant or $2,400,000 total for a joint project. Each year since the start of the program in 1956, requested grants have totaled several times the available funds. Priorities are based on water pollution control needs determined by the regional boards and on financial needs found by the state board. Actual grants are made by the United States Public Health Service upon certification by the state board.

P.L. 84-660 CONSTRUCTION GRANT PROGRAM

Year	Total appropriation	Number of applicants receiving grants

WATER POLLUTION CONTROL BOARD—Continued

RESEARCH IN TECHNICAL PHASES OF WATER POLLUTION CONTROL

Objectives

The program of applied research in the field of water pollution control is conducted to provide technical data to aid the boards in properly discharging their statutory responsibilities.

Program and Performance

The research program sponsored by the state board is carried out by contracting special projects with organizations or individuals competent in the particular field of research. A basic program has been supported since 1950 at a state level of approximately $80,000. In 1956-57 the research studies were expanded using federal (Public Law 660, 84th Congress) program grant funds in an amount of approximately $113,000 annually. The federal grants were scheduled to terminate in the 1960-61 fiscal year. However, Public Law 87-88 reinstated the program grants and, as a result, the state board expanded the 1961-62 research program to conduct investigations in a number of fields in which technical knowledge is urgently needed by water pollution control authorities. The expanded program is continuing in the 1962-63 and 1963-64 fiscal years through the use of grant funds to supplement basic amounts of $65,000 annually of State funds.

FIELD AND LABORATORY SERVICES BY OTHER AGENCIES

Program and Performance

This category covers the cost of contracting with other agencies for field and laboratory services. Such services consist of technical investigations, inspection of waste discharges, sampling and analysis of wastes and receiving waters, and financing the bacteriological and radiological aspects of the statewide stream sampling program. These services are contracted with state or other agencies best qualified to perform the required technical work. The physical and chemical aspects of the stream sampling program are performed by the Department of Water Resources.

For 10 months of each year, the Department of Water Resources makes partial analyses and physical examinations of all samples collected in the statewide stream sampling program. The samples collected during the remaining 2 months are subjected by the department to a more complete mineral analysis, and, in addition, heavy metals determinations are made. These data are utilized to determine existing water quality conditions in the surface waters of the State; to evaluate trends and changes in water quality and ascertain causes; to advise appropriate regulatory agencies regarding existing and potential water quality problems; and to assemble, collate, and publish water quality data.

For the 1963-64 fiscal year, all funds are deleted for the stream sampling program from the field and laboratory services budget and are transferred to the Department of Water Resources for maximum coordination and economy.

The comprehensive study of San Francisco Bay, started in 1959-60 under Chapter 1909, Statutes of 1959, is being continued in 1963-64 under contract with the University of California.

GOOSE LAKE COMPACT COMMISSION

Headquarters at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
SUMMARY			
TOTAL EXPENDITURES			
Support *(General Fund)*	$2,356	$5,000	$5,000

GENERAL ANALYSIS

Objectives

The major function of this commission is to co-operate with a similar commission representing the State of Oregon in formulating and submitting to the legislatures of California and Oregon for their approval an interstate compact relative to the waters of Goose Lake. The Federal Government will be represented and will participate in the compact negotiations.

Program and Performance

This commission was established by Chapter 1389, Statutes of 1961. The commission consists of 5 members, including the Director of Water Resources or his representative, the Director of Fish and Game and 3 members appointed by the Governor from persons residing in Modoc County. The members shall be appointed from qualified persons engaged in the following fields: (a) agriculture, (b) fishing, and (c) other industries.

The compact has been drafted and approved by both California and Oregon commissions and will be presented to the Federal Bureau of the Budget for review and approval. Following federal administrative approval, the compact will be presented to the Legislatures of California and Oregon for approval during the 1963 sessions.

During 1963-64, consent legislation will be introduced in Congress to obtain federal approval of the compact. The 1963-64 proposed budget includes funds for this purpose. It is expected that 1963-64 will be the final year in which funds for the support of this commission will be required.

GENERAL ANALYSIS

Objectives

The Department of Veterans Affairs administers the State's program of veterans benefits and provides a claims and rights service to assist veterans in obtaining benefits to which they are entitled from the Federal Government.

Program and Performance

Programs administered by the department include the financing of farm and home purchases, educational assistance for veterans and veterans' dependents, and determination of eligibility for state benefits as well as preferences granted under civil service. The department also operates the Veterans Home and Woman's Relief Corps Home.

In addition, the department administers the subventions for county service officers through which certain counties are reimbursed for a portion of the cost incurred by these counties in providing services to veterans.

DIVISION OF ADMINISTRATION

GENERAL ANALYSIS

The administration division provides the functions of policy formulation and administrative direction to the other divisions of the department. The California Veterans Board, a policy-making body composed of 7 members appointed to 4-year terms by the Governor; the administrative head of the department; his deputies; and functions common to all divisions, such as personnel; are included in this division.

DIVISION OF EDUCATIONAL ASSISTANCE

GENERAL ANALYSIS

This division administers a program of educational assistance for California veterans, and dependents of veterans who died or were totally disabled as a result of service. The division provides educational counseling and assistance in securing admission to suitable institutions of learning. After acceptance into the program, the students' grades are reviewed periodically and only those making satisfactory progress are continued. Only candidates whose federal benefits are no longer available and who have a legitimate need for further training are eligible for this program. Acceptance of non-disabled World War II applicants was discontinued July 25, 1959.

Improvement in procedures and a decrease in workload has resulted in a 5 position reduction in authorized positions.

For costs of this program and more detailed information, see Educational Assistance to Veterans and Dependents, page 684.

DIVISION OF SERVICE AND CO-ORDINATION

GENERAL ANALYSIS

The function of this division is to assist veterans and dependents of veterans in establishing rights to any privilege, preference, care, or compensation provided for by the laws of the United States or the State of California.

The headquarters and field service function provides for the determination of the eligibility of veterans to state benefits, including preference in civil service examinations. This function also provides advisory service to county service officers and performs a quarterly review of the service officers' activities. As of August 31, 1962, a total of 580,919 applications to establish California veterans' eligibility had been approved, and 157,383 veterans had established their eligibility for preference in civil service examinations.

A major function of this division is to provide assistance to veterans in presenting and pursuing claims which the veteran may have against the United States as a result of war service.

EDUCATIONAL ASSISTANCE TO VETERANS AND DEPENDENTS

This program, administered by the Educational Assistance Division pursuant to the provisions of Section 981 to 981.8 and Sections 890 to 900 of the Military and Veterans Code provides the opportunity for California veterans and dependents of deceased or totally disabled veterans to continue their education. The total assistance is limited to $1,000 per veteran, and includes subsistence of up to $40 per month based on actual school attendance, plus necessary books and supplies up to a total cost of $50 per month. The educational aid to dependent widows and children is not limited as to total amount, but cannot exceed $900 per school year. Subsistence payments are limited to $50 per month for dependents attending college, and $20 per month for high school students. Assistance to widows is limited to not more than 4 years duration, or its equivalent in part-time training. Other eligibles may file for and receive assistance when they are between the age of 14 and 21. Assistance may continue until the course is completed, or through age 26. The maximum age is increased through age 30, if the dependent's education is interrupted by military service. This is of particular importance to medical students, and others who seek to complete long-term professional studies.

The Educational Assistance program encourages training, which might otherwise be beyond the applicant's financial means. While the low subsistence paid covers only a part of the present-day cost of school attendance, it does serve as an incentive to continue in school and divert other resources toward an educational goal.

There is no duplication with federal educational programs as only applicants whose federal benefits are no longer available are accepted. Veterans must show a legitimate need for further training and demonstrate ability to successfully pursue the educational course requested. Once in training, the student's grades are reviewed periodically and only those making satisfactory progress are continued. Division representatives also insure that the selected educational plans are financially sound, and entitlement is budgeted as necessary. As a result of these policies, substantial savings are realized and the full $1,000 veterans entitlement is seldom used. The average expenditure being approximately $500.

The 1963-64 fiscal year is based on an estimated average enrollment of 10,500; 7,000 veterans and 3,500 dependents which continues the downward trend in total numbers aided and a shift from veterans to veterans' dependents.

GENERAL ANALYSIS

Objectives

The Veterans' Home of California was established to provide a home for qualified California veterans who have physical disabilities and need hospital, chronic, or domiciliary care when they are unable to provide for themselves.

Program and Performance

The home was founded in 1883 by the Grand Army of the Republic and the Associated Veterans of the Mexican War and was taken over by the State in 1897. As of July 31, 1962, there were 1878 resident members, including 60 women veterans. The Federal Government acknowledges its responsibility for the veterans cared for by contributing $912.50 per year for the support of each member.

To be eligible for admission, a veteran must have been a resident of California for at least 10 years immediately prior to making application, and have honorable wartime service in the armed forces of the United States. He must have temporary or permanent disability to the extent that he is unable to follow a gainful occupation and be financially unable to provide for his hospitalization or domiciliary care. The home has no facilities for and does not accept veterans who are mentally ill, tubercular, chronically alcoholic, or addicted to narcotics or other drugs. Chapter 1825, Statutes 1959, authorizes the Department of Veterans Affairs to investigate the financial status of applicants and members to determine if the veteran is able to finance hospital or dimiciliary care outside the home.

To carry out its medical program, the home's facilities include a fully accredited modern medical and surgical hospital of 449 beds and a 26-bed receiving ward. The home includes 1 domiciliary unit of 55 beds for women veterans, a recreation center, and various specialized buildings, including some employee housing. The hospital staff has 20 full-time physicians, 103 registered nurses, and 182 hospital aids.

Convalescent hospital cases and most chronic ambulatory patients are assigned to the convalescent barracks near the main hospital. Members placed here are normally able to take care of themselves and go to meals in their own dining room.

Approximately 57 percent of the present membership live in the 7 domiciliary barracks on the reservation. Of these barracks, 6 are for male veterans, and 1 is for women veterans.

The veterans home offers possibilities for the rehabilitation of members along physical, occupational, vocational, social, and spiritual lines. Unless employed at the home or excused by the chief of medical services, all domiciliary members are required to perform work therapy duties.

The 1963-64 Budget proposes 4 new positions based on existing requirements within the present level of service. A full-time pathologist is provided in lieu of the existing method of contracting for pathological services. One additional janitor is required for the new medical treatment center, and a second supervising janitor for the night shift. One additional laundress is needed to handle the increased volume per member in the laundry.

Seven food service assistant positions have been eliminated in anticipation of the completion of alterations and improvements in the main culinary unit. Other workload and administrative adjustments reflect changes from member help to civil service employees. The reductions are on the basis of two member positions for each civil service employee. One and four-tenths buglers, 1 intermediate account clerk, 1 groundsman and 2 food service assistants are abolished to reflect the changeover and adjust the authorized position count. Three-tenths position of temporary help in custodial and personal care was added in 1962-63 for workload in this area.

GENERAL ANALYSIS

Objectives

The home provides custodial, medical, and nursing care for widows and dependent destitute unmarried daughters of Union Veterans who served honorably in the Civil War.

Program and Performance

Admissions to the home were closed in 1947 and effective May 1, 1954 the facilities were leased to private persons for the purpose of conducting a nursing home for the aged. On August 31, 1962 the home was closed and the one remaining member is receiving care in a nursing home under a contractual arrangement in accordance with standards of care and service prescribed by the Department of Veterans Affairs. Chapter 337, Statutes of 1951 provides that the home property may be transferred to the University of California for agricultural research by the Director of Finance.

Objectives

The objectives of this commission are to promote and provide for the welfare of Spanish War veterans, and to assist in the maintenance of the headquarters of the Department of California, United Spanish War Veterans.

Program and Performance

This 5-member nonsalaried commission, created by Chapter 430, Statutes of 1957, is appointed by the Governor. The program provides for the traveling expenses of the commission and for contractual services with the Department of California United Spanish War Veterans.

Special funds	–	–	*8,920,000*

GENERAL ANALYSIS

In addition to existing salary schedules budgeted under the various departments of state government, a special salary increase fund is provided during years when the State Personnel Board or other salary-fixing authorities find that salaries of state employees are sufficiently out of line with comparable employment elsewhere to justify such an increase.

This budget contains funds sufficient to give salary adjustments of 5 percent to civil service employees only in those areas most seriously out of line with comparable employment, and where management difficulties are occurring as a result of such deficiency. Comparable amounts are provided for similar nonacademic positions at the University and State Colleges.

Funds are also provided equivalent to an overall 5 percent increase for all academic positions in the State's University and College structure, to be allocated by the salary fixing boards of these institutions.

For several years, statutory salaries for state officers have not been re-evaluated in terms of responsibility of duties and capabilities required for the complex operations of today's government. Though such salaries have partially kept pace with general increases granted civil service positions, they were excluded from the last salary adjustment, thereby compounding existing compaction with lower level positions. Also, recognition of comparability with similar administrative salaries in government and private industry has been largely ignored. The consequences of these circumstances has created an imbalance within the statutory pay structure which can only be corrected by a complete salary revision program through legislative action. Funds are provided in this budget for such revision.

Judicial salaries are also in need of general adjustment, not only internally, but in comparison with other jurisdictions. The last general salary increase omitted judges as well as statutory administrators, and by doing so widened the gap between California and other comparable court systems. Sufficient funds are therefore included to permit legislative action to bring judicial salaries into reasonable comparison with like salaries in other areas.

As of July 1, 1961, salary increases were provided for the psychiatric technician classes of the Department of Mental Hygiene. As of April 1, 1962, funds were provided for a 6 percent salary increase for most state employees. However, these funds were not available for increases for judges nor for classes whose annual salaries were in excess of $19,800. An additional 5 percent above this 6 percent base was included for uniformed personnel of the Highway Patrol effective July 1, 1962, and for nursing classes (including psychiatric technician) effective January 1, 1963.

Unallocated balance *(General Fund)*	–	$491,251	$1,000,000

GENERAL ANALYSIS

Objectives

To provide funds for various state agencies for unseen contingencies for which no appropriation or insufficient appropriation has been made by law. Amounts as necessary are allocated to agencies by the Department of Finance upon finding of need.

Program and Performance

Unanticipated demands during the 1961-62 fiscal year required major allocations for unusually high emergency fire suppression needs, Department of Conservation ($1,680,000); Old Age and Survivors Insurance co-ordination, health and welfare payroll deduction workload and electronic data processing conversion, State Controller's office ($360,835); unrealized reimbursements, Department of Justice ($112,290); unrealized service fees, Department of Parks and Recreation ($585,000); increased adoption cases, Department of Social Welfare ($322,476); for increased workload in licensing and inspection of homes and agencies caring for aged and children ($97,676); and Capital Outlay project planning ($110,000).

Major allocations during the 1962-63 fiscal year were for increased size of election pamphlets, Secretary of State ($143,803); additional costs related to processing OASDI, health and welfare payroll deductions and screening of safe deposit boxes, State Controller ($354,201); replacement of fire loss, Camarillo State Hospital ($78,400); additional costs in United States versus Anchor Oil Company case, Department of Justice ($100,000); emergency fire suppression, Department of Conservation ($580,000).

It is proposed that an additional appropriation be made available in the 1962-63 fiscal year to finance required allocations in the amount of $1,500,000. It is also proposed that $1,000,000 be appropriated for the 1963-64 fiscal year. This is a minimum amount as indicated by past requirements.

In the detail of the allocations below, there is included allocations from the Emergency Fund and Salary Increase Fund made in the past and current fiscal years. All these allocations are shown as available funds in each agency budget. The unallocated balance of the Emergency Fund shows as an expenditure in this section of the budget.

GENERAL ANALYSIS

Subject to enactment of enabling legislation the budget provides $1,000,000 for an improved benefit program for annuitants of the State Employees' Retirement System who have retired and whose retirement income was fixed. The proposal would raise the minimum allowances for those receiving low annuities.

Expenditures for retirement and health and welfare benefits for state employees in 1963-64 are included in the Budget Act appropriations from which salaries and wages are paid. Health and welfare benefits for annuitants of retirement systems and employees' retirement contributions that are not included in other budget programs are reported here as miscellaneous personal services.

The State pays $5 per month plus 5 percent of the cost of premiums for annuitants of the various retirement systems in accordance with the provisions of the Meyers-Geddes State Employees' Medical and Hospital Care Act.

The State's contribution for the Old Age and Survivors Disability Insurance program has been paid from the State Employees' Retirement Fund, since the programs were integrated. Starting July 1, 1963, the State's contribution will be paid from the appropriation from which salaries and wages are paid. Because the previous payments were not identified with an appropriation there is not sufficient experience to determine the amounts to be included in the appropriations for the budget year. A lump-sum appropriation is reported here, which will be allocated in augmentation of each appropriation as the necessary amount becomes known. It is estimated that approximately 50,000 employees will be covered in the integrated program by the end of the budget year.

GENERAL ANALYSIS

Objectives

The San Francisco World Trade Center Authority is established under the provisions of Chapter 1508, Statutes of 1947, to foster and develop domestic and international trade for the benefit of the entire State.

Program and Performance

The authority is composed of 11 members, including the Director of Public Works, the Director of Finance, and the President of the San Francisco Port Authority, and 8 persons appointed by the Governor for 4-year terms. The chairman is selected by the authority from its membership.

The authority may obtain land, buildings, works, and property and operate and maintain them to foster and develop domestic and international trade for the benefit of the entire State. The authority operates the World Trade Center in the Ferry Building in San Francisco, and carries on various activities designed to foster and develop this State's participation in world trade.

Rental management of office space, exhibit and display space in the World Trade Center is performed by authority personnel. Rentals in the center have been averaging in excess of 90 percent capacity, with approximately 110 tenants, including 4 consulates and 7 Chambers of Commerce representing foreign countries, several travel agencies, numerous import-export firms, a branch office of an international bank, freight forwarders, and customs brokers. In addition, employees of the authority carry out the responsibilities of the basic legislation by promoting domestic and international commerce. The World Trade Center Libraries, composed of over 8,000 publications, is operated on the premises by authority personnel.

Tourism Development Program—On June 1st, 1962, the Chairman of the Authority was appointed by the Governor as Liaison Representative for the State with the United States Travel Services, the newly established tourist promotion agency of the Federal Government. Tourism is California's third largest industry, yet California has had no statewide tourist promotion agency. To fill this gap in our world trade picture the authority chairman and staff have been working in an effort to keep the United States Travel Service currently informed on California tourism and act as the co-ordinator for the State to ensure that California tourist attractions are adequately represented by the United States Travel Service in foreign countries. Included in 1963-64 is a pilot program of $100,000 to foster and develop tourism for the benefit of the State.

World Trade Development Program—Included in 1963-64 is a new program of $50,238 to expand the nature and operations of the authority for the purpose of developing the total economy of the State in relation to the economies of various foreign countries.

California Exhibit at United States World Trade Fair—Included in 1963-64 is $10,000 to prepare a state exhibit for the 1964 United States World Trade Fair to be held in San Francisco.

San Francisco World Trade Center Program—Included in 1963-64 is the support of the operations of this program at the level authorized for 1962-63.

WORLD TRADE DEVELOPMENT PROGRAM

Program and Performance

In 1963-64 funds are included for a World Trade Development Program. This would permit the authority to employ persons in foreign countries to represent the State's business and agricultural interests in seeking markets and to keep this State's interests informed of current export opportunities in certain countries. These employees would help promote California products and California tourism. These funds provide for a pilot program in certain marketing areas to help bring about a better climate for expansion of the State's exports in international trade and for increased foreign tourism to the State.

---

[a] The expenditure of these funds is not included in overall budget totals.

[b] Composed of savings in General Fund, $191; special funds, $487; and nonrevenue funds, $4.

[c] Special Deposit Fund not included in budget totals.

TOURISM DEVELOPMENT PROGRAM

Objectives

To foster and develop tourism for the benefit of the State.

Program and Performance

In 1963-64 funds are included to provide a pilot program to develop an effective tourism promotion program. Enabling legislation will be requested by the administration in the 1963 Session of the Legislature to provide the necessary framework for this work.

Included in this budget are funds to adapt existing agricultural inspection stations into visitor welcome stations with appropriate brochures and information to make visitors who drive to California aware of the many tourist delights in this State. Also other ports of entry—airports and ports—will be equipped to welcome international visitors.

Provision is made for some basic research in order to gather much-needed data for more effective tourism promotion. As a result a statewide brochure and advertising campaign can be developed during 1963-64 for the benefit of the entire State.

The commercial liaison attachés proposed in the world trade development budget would be very helpful in the promotion of California tourism. Combining of the world trade and tourist promotion function in the offices of these attachés in foreign capitals throughout the world would provide the most efficient and economical international promotion. The majority of international tourists combine business and tourism.

Development of the tourism phase of trade will bring about a more adequate and more thorough promotional effort for the benefit of the economy of the whole State.

CALIFORNIA EXHIBIT AT UNITED STATES WORLD TRADE FAIR

Objectives

Provide for the San Francisco World Trade Center Authority to prepare a state exhibit in the proposed 1964 United States World Trade Fair to be held in San Francisco.

Program and Performance

The United States World Trade Fair Corporation, a private organization in New York City, proposes to hold its eighth annual fair in San Francisco in the late spring of 1964 because the World's Fair will be held in New York at that time.

CONTRIBUTIONS, CLAIMS AND OTHER EXPENSES, NOT ELSEWHERE CLASSIFIED—Continued

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 61-62 (Filled)	62-63 (Auth.)	63-64 (Auth.)	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64	CHANGE FROM 1962-63

San Francisco World Trade Center Authority—Continued

CALIFORNIA EXHIBIT AT UNITED STATES WORLD TRADE FAIR—Continued

Program and Performance—Continued

This group has numerous firms in various foreign countries prepared to provide displays for this fair.

Preliminary discussions have been held with this organization. They have agreed, upon the insistence of the San Francisco World Trade Center Authority, that exports of California products can be emphasized in this fair.

California, as the nation's leading State in world trade, should have an exhibit in keeping with California's importance in the world economy. A display, using charts, graphs, three-dimensional exhibits, films and film clips is proposed. The importance of the export of California agricultural, semifinished and finished products will be emphasized. The importance of international tourism on the State's economy will be shown.

The role of the various state agencies which assist persons and firms in world trade, and the state facilities which are available, will be stressed.

It is proposed that this display be composed so that data and information can be kept current without the need of building a new display as information changes.

San Francisco is the international banking, financing, insurance and shipping headquarters of the western United States and it is appropriate that this fair be proposed for this city. Expanding markets and expanding growth of state exports will be the theme of this display.

Included in the proposed budget of $10,000 is development of the display, i.e., research, construction, art work, and transportation. Also included is staffing and space rental for the 10-day fair period as well as development and printing of handout brochures and pamphlets.

SAN FRANCISCO WORLD TRADE CENTER PROGRAM

Program and Performance

The San Francisco World Trade Center Authority furnishes import-export opportunity information to both local and foreign businessmen and serves as a liaison for the State with foreign government officials who come on trade missions.

The San Francisco Port Authority is overall landlord of the Ferry Building wherein the World Trade Center is located. The Port Authority performs physical operation of the plant by providing janitorial service, maintenance and collection of rent.

Funds provided for the operation of the World Trade Center are to be provided from the San Francisco Harbor Improvement Fund and may be considered as an allocation of a portion of the rent receipts to pay for the costs of the operation of the World Trade Center. Funds for the operations of this program are included at the level authorized for 1962-63.

Motor Vehicle Fuel Fund	$750,000	750,000	750,000
Totals	$750,000	$857,259	$893,208

GENERAL ANALYSIS

The expenditure of state funds to increase or decrease the Service Revolving Fund, the Correctional Industries Revolving Fund and the Small Craft Harber Revolving Fund are consolidated in this section of the budget. Program and performance within previously authorized funds are separately reported elsewhere in this budget under the respective revolving fund activity.

The Service Revolving Fund (see Appendix) provides a variety of services to state agencies which include operation of an automotive pool, printing, supply, office machine and radio maintenance. Additional General Fund capitalization in the amount $1,173,208 is required for activities of the Service Revolving Fund. A schedule of "Augmentations to Net Current Assets" explaining the financing appears in the Service Revolving Fund budget. This amount represents the cost of fixed assets that cannot be financed within operations or from other reserves that become excess to current needs during the fiscal year.

The Correctional Industries Revolving Fund (see Appendix) is authorized to meet the necessary expenses in the administration and operation of the industrial work programs of the various institutions under the jurisdiction of the Department of Corrections. The legal basis for this fund is found in Section 2714 of the Penal Code. A cash balance has accrued which is greater than necessary to carry out the current purposes of this section. It is anticipated that $1,030,000 will revert to the appropriations from which they came. Of this amount $530,000 will offset a proposed 1963-64 General Fund appropriation for construction of new industries facilities in the Department of Corrections. Details of this construction project will be found in the Capital Outlay section.

Section 8352(g) of the Revenue and Taxation Code appropriates $750,000 annually from the Motor Vehicle Fuel Fund to the Small Craft Harbor Revolving Fund (see Local Assistance). This sum represents money attributable to taxes imposed on motor vehicle fuel used in propelling vessels.

Advisory Commission on Indian Affairs

SUMMARY

TOTAL EXPENDITURES *(General Fund)*	–	$10,000	$12,000	$2,000 (20%)

GENERAL ANALYSIS

Objectives

The commission was created by Chapter 2139, Statutes of 1961, to study the problems of the American Indians residing in California, and to propose needed revision of any and all state laws pertaining to the Indians and the 3 relocation centers in California.

Program and Performance

The commission consists of 9 members: the Director of Social Welfare, the Director of Public Health, the Director of Education, 3 members of the Senate, and 3 members of the Assembly. The commission is required to report its findings, together with any suggested legislation, to the Governor and the Legislature. The commission terminates on September 15, 1964.

Payments for Additional Workmen's Compensation for Subsequent Injuries

TOTAL EXPENDITURES *(General Fund)*	$687,198	$800,000	$900,000	$100,000 (12.5%)

GENERAL ANALYSIS

This fund provides benefits for permanent disabilities which arise from industrial injury suffered by an employee who has suffered from a previous specific permanent disability. Expenditures since enactment of the Subsequent Injury Law in 1945, Section 4750 of the Labor Code, have been as follows:

	Payments	State Compensation Insurance Fund service charge	Attorney General costs	Total expenditures
1947-48	$4,355	$218	–	$4,573
1948-49	16,707	835	–	17,542
1949-50	39,922	1,996	–	41,918
1950-51	45,056	2,253	$450	47,759

Interest Payments on Loans to General Fund

TOTAL EXPENDITURES *(General Fund)*	$8,904	$100,000	$385,000

GENERAL ANALYSIS

The flow of cash through the General Fund is dependent on the timing of the revenue receipts and the disbursement pattern. During the months of October to January, the disbursements exceed the receipts. At this time the General Fund will borrow money from special funds. These loans are normally repaid in March, April and May.

Totals	$16,512,058	$23,678,825	$27,008,608	$3,329,783 (14.1%)

GENERAL ANALYSIS

Objectives

The programs and projects that are financed from bond funds are not included in the budget as cost of government at the time that expenditure is made from the various bond funds. The cost is applied at the time it is necessary to pay the interest and redemption charges on the bonds. Expenditures from bond funds are shown in the detailed budget programs; however, the items are footnoted to indicate they are not included in the over-all budget totals.

Program and Performance

The debt service reported here is principally for interest and redemption payments on bonds issued for the State Construction Program. Debt service for School Building Bonds is reported under the section for local assistance for education. Debt service for public service enterprises is paid from revenues of the activity and is reported under the programs of the Veterans Far and Home Building Fund, San Francisco Harbor Improvemen Fund, the Small Craft Harbor Improvement Fund and the California Water Resources Development Bond Fund.

State construction program bonds are sold as cash is needed

State Construction Bond Act	*Total authorized*	*Issued*	*Unissued*
1955	$200,000,000	$200,000,000	
1958	200,000,000	150,000,000	$50,000,00
1962	270,000,000	–	270,000,00

It is proposed that $50,000,000 of the unissued bonds will b sold in May 1963, $50,000,000 in July 1963 and $50,000,000 i January 1964.

DEPARTMENT OF AGRICULTURE

GENERAL ANALYSIS

The work of this department is of a regulatory and service nature. It is headquartered in Sacramento and has offices, field crews, advisors, and consultants operating throughout the State. A major portion of the departmental responsibility is accomplished in co-operation with the offices of the county agriculture commissioners and consists of protection of plants and animals from infectious diseases, pest animals, weeds and injurious insects and the prevention of the introduction and spread of crop and livestock pests and diseases.

In 1963-64 one major construction project is included to construct and equip a laboratory unit specializing in the diagnosis of virus diseases at the Fresno Livestock and Poultry Pathology Laboratory. This laboratory has been designated by the Department as the laboratory specializing in virology. With the introduction of tissue culture as a diagnostic technique in this field, the volume of specimens has tripled in the last two years requiring this additional capacity.

A total of $59,600 is included for 3 minor construction projects in 1963-64 involved in replacement of the air conditioning system, and construction of a virus isolation control unit at the Fresno Livestock and Poultry Pathology Laboratory; and conversion of a room in the 1220 N Street Building to a germinator facility for the seed laboratory.

POULTRY IMPROVEMENT COMMISSION

GENERAL ANALYSIS

This commission provides California's poultry industry with accurate production data on the various types and strains of chickens and turkeys. The work is divided into 2 distinct areas, the chicken project which is located near Modesto and the turkey project which is located near Keyes.

No expenditures are proposed for the 1962-63 or 1963-64 fisc years.

GENERAL ANALYSIS

The building program of this department is designed to provide facilities which will meet the anticipated population growth and ultimately permit housing of inmates in accordance with the following standards:

For cell buildings—1 bed and 1 prisoner per cell.

For a dormitory—1 bed per 50 square feet.

The 1963-64 major construction program is directed primarily toward an expansion of capacity to meet the needs of an increasing inmate population and to progress toward the goals set forth above. The 1963-64 major program includes site preparation for a new institution at Tehachapi and equipment to make usable new facilities at the Southern Branch Conservation Center at Chino and the adjustment center at the Institution for Women.

Auxiliary buildings and utilities are proposed to meet the operating requirements of various institutions to better handle the existing and increasing inmate populations. These include construction of a firehouse at the Rehabilitation Center, alterations and construction to provide adequate food service facilities at the Institution for Women, a correctional industries warehouse and remodeling at Folsom and sewage facilities at the Medical Facility.

The 1963-64 minor construction program proposes essential projects at older institutions, as well as projects to correct deficiencies and provide improvement of the physical plants of most institutions.

---

[c] Expenditures from bond funds not included in overall budget totals.

[1] Operated during 1961-62 and 1962-63 as a branch of the Institution for Men. Expenditures are included under that institution.

Conservation Program

The Conservation Center, located on 1,120 acres in Lassen County, about 7 miles east of Susanville, will be activated in February 1963. This institution was authorized by Chapter 1583, Statutes of 1959 and is a permanent facility, constructed of reinforced concrete and brick, with a rated capacity of 1,200 inmates. Custodial security is provided for 600 minimum and 600 medium custody inmates. This institution will serve as a material and inmate manpower support center for 11 conservation camps in 1963-64.

The Southern Branch Conservation Center at Chino, completed in 1962, with a rated capacity of 640 inmates, will serve 8 conservation camps in 1963-64.

The Sierra Branch Conservation Center, located in Tuolumne County, is to be activated in 1964-65 with a capacity of 1,200 inmates.

The North Coast Branch Conservation Center is scheduled to be constructed when warranted by increased population.

This budget provides funds for equipping the Southern Branch Conservation Center and for a minor project to correct a storage space deficiency.

Correctional Institution at Tehachapi

This institution is located approximately 10 miles northwest of Tehachapi, Kern County, on approximately 1,680 acres of land. The present institution, with a rated capacity of 380 inmates, has been operated as a branch of the Institution for Men. On July 1, 1963 it will become a separate institution. A permanent medium security facility for 1,200 inmates is planned for construction contiguous to the present institution. This budget provides funds for site preparation for the new institution and for minor construction projects to correct deficiencies and improve the physical plant.

Correctional Training Facility

This is a medium security institution with agricultural, industrial, academic and vocational training programs. It is located on 907 acres of land in the Salinas Valley, about 4 miles north of Soledad.

The central facility is of permanent reinforced concrete construction and was completed in December 1951 with a rated capacity of 1,575. The north unit, also of permanent construction, has a rated capacity of 1,224. A temporary barracks facility with a rated capacity of 272 but a resident population of 630, operates as a farm unit. Five camps with a capacity of 320 are administered from the central institution.

Included in this budget are funds for minor projects to correct deficiencies and improve the physical plant.

Deuel Vocational Institution

This medium-security institution is located on 783 acres of land in San Joaquin County, 4 miles east of Tracy, and 15 miles south of Stockton. It is primarily an academic and vocational training institution for younger offenders with some industrial and farming activities also available.

The institution has a rated capacity of 1,515 including a reception-guidance center of 300 capacity where Youth Authority wards committed by the criminal courts are processed. The institution also operates an adjustment center unit where behavior problem cases in the younger age group are housed.

The $50,000 appropriation made in 1962-63 for minor projects for a temporary operation at Vernalis is being reverted to surplus. The Vernalis site, a surplus federal installation, is not available to the State.

Minor construction projects are included to correct deficiencies and to improve the physical plant.

State Prison at Folsom

The original construction of Folsom State Prison was completed in 1858 on 1,700 acres of land about 2 miles northeast of the City of Folsom. This is a maximum security prison with emphasis upon industrial and work programs. The total rated capacity of the institution is 2,019 inmates. The budget provides funds for the construction of an industries warehouse in which industries warehousing, storage, shipping, packaging, and crating functions can be consolidated. In addition this project includes the remodeling of an existing warehouse for a new metal fabrication factory. Funds equal to the cost of this project will be transferred to the General Fund from the Correctional Industries Revolving Fund surplus. A minor construction project is also included to correct a deficiency and improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES

Construct industries warehouse	–	–	$530,000
General Fund			
This project is provided to construct a new warehouse in which industries warehousing, storage, shipping, packaging, and crating functions can be consolidated. Also included in this project is the remodeling of an existing warehouse into a new metal fabrication factory.			
Minor Projects: [b]			
Reroof building No. 2	–	–	$27,300

Institution for Men

The Institution for Men is located in San Bernardino County about 2 miles south of Chino on 2,435 acres of land. This is primarily a minimum security prison with an extensive agricultural and industrial program. It was opened in 1941 and consists of reinforced concrete permanent main buildings, semipermanent steel industrial buildings, frame farm buildings, and temporary barracks. The institution has a rated permanent-type capacity of 818 with a capacity of 217 in the temporary barracks. The state conservation camps which have been operated from this institution will be transferred to the jurisdiction of the Conservation Program in 1963-64. The southern reception-guidance center is located on a 15-acre portion of the Chino site, and is reinforced concrete construction with a capacity of 550 inmates.

The budget provides for minor construction projects to correct deficiencies and improve the physical plant.

DEPARTMENT OF CORRECTIONS—Continued

Medical Facility

The Medical Facility is located in Solano County, about 2 miles south of Vacaville, and consists of 903 acres of land, of which approximately 100 acres are used for inmate and employee building areas.

This institution, with a total rated capacity of 1,935; includes the central facility with a capacity of 1,342 and a reception-guidance center unit with a capacity of 593. The central facility provides medical and psychiatric treatment and special custodial care for inmates suffering from mental illness, chronic physical illness, sexual deviation, severe emotional disturbances, and tuberculosis. Due to the types of inmates, emphasis is placed on the psychiatric and medical program areas rather than tl vocational, academic, industrial and farming programs carrie on in other institutions in the department.

The only major item provides for the participation by tl State with the City of Vacaville in the construction of a sewe trunkline to the city sewage disposal plant. This will provide fc future connection of the Medical Facility's sewer system wit that of the city. A minor project previously appropriated for tl same purpose will revert to the General Fund June 30, 196

Minor projects are proposed to correct deficiencies and in prove the physical plant.

Rehabilitation Center

The Rehabilitation Center is located at Norco, Riverside County, approximately 5 miles north of Corona. The center was authorized by Section 6550 of Chapter 12 of the Penal Code for the purpose of treating and housing nonfelon narcotic addicts. The facility is a former Naval Hospital which was acquired from the Federal Government without cost. Alterations made to the plant provide housing and auxiliary services necessary to care for and treat 2,300 inmates. The first addicts will be received in January 1963. Included in this budget is a projec to construct a new firehouse to replace the Navy firehouse whic was deeded to the State. The United States Navy maintains base adjacent to the Center, but it was not feasible for th Navy to retain the firehouse because of its location in relatio to the detention facilities. It is necessary, therefore, to replac the Navy firehouse.

State Prison at San Quentin

This is a close-medium security prison with extensive industrial, educational and treatment programs. The institution is located on 404 acres adjacent to San Francisco Bay in Marin County about 3 miles southeast of San Rafael. The activation of the Konocti and Black Mountain conservation camps in the 1963-64 year will bring the total capacity of San Quentin, including camps, to 3,621 in 1963-64. Minor projects are proposed to correct deficiencies and improve the physical plant.

California Institution for Women

This institution is located in San Bernardino County, 7 miles northwest of the City of Corona on 120 acres, 62 of which are within the custodial enclosure.

All female felons committed to the Department of Corrections are confined in this institution, which must be able to handle all types of security, serve as a reception center, and provide necessary medical attention. The medical program has been stressed, as well as the academic, vocational and industrial program. The capacity of the institution will be 976 beds with the completion of the new reception-guidance center and the adjustment center now under construction.

Included in this budget are funds for alterations and construction to provide adequate feeding facilities and to equip the adjustment center.

GENERAL ANALYSIS

The Capital Outlay program for the Department of the Youth Authority is planned to meet the capacity requirements resulting from the increasing California juvenile population.

Completion of the financing for the construction of the first 400-bed institution, the central service facilities and construction of the second 400-bed institution at the Northern California Youth Center are proposed in the 1963-64 fiscal year. The central facilities will service three 400-bed institutions and expansion of the unit in the future will eventually provide services for twelve 400-bed institutions planned over the next 20-25 years.

Two 50-bed living units to expand capacity are proposed for the Fred C. Nelles School for Boys in 1963-64. Equipment for 2 other living units to be completed and occupied during the 1963-64 fiscal year is also included in the Capital Outlay program.

Equipment for one 50-girl living unit, additional classrooms and offices at the new Ventura School for Girls is proposed in 1963-64. Construction of these projects was financed in the 1962-63 Budget. Equipment for a single employees living unit at Fricot Ranch School for Boys is proposed for 1963-64.

Equipment for vocational shops and academic classrooms is proposed for the Youth Training School. Completion of and equipment for these units will provide the last phase of the necessary academic and vocational facilities for the institution's educational program.

Minor construction projects are proposed for all institutions with the exception of the Southern California Reception Center and Clinic and the Los Guilucos School for Girls. Minor projects will provide for necessary alterations and improvements and small additions which will improve efficiency.

* Shortage of capacity applies only to net capacity, exclusive of hospital and detention beds.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Northern California Reception Center and Clinic

This institution, located on a 17-acre site approximately 7 miles east of Sacramento, near Perkins, has a capacity of 315 dormitory beds plus 32 hospital and detention beds. This facility receives all boys and girls committed from Northern California. The major purpose is to centralize intake and to make diagnostic studies and training recommendations on each case. Intensive medical, dental, psychological and psychiatric treatment is given. Serious medical and psychiatric cases developing in the Youth Authority's Northern California institutions are sent here for treatment.

The budget includes a minor project to correct a deficiency which will improve the physical plant.

Youth Authority Conservation Camps for Boys

Four conservation camps are operated in co-operation with the Division of Forestry. The camps are located at Pine Grove in Amador County, Mt. Bullion in Mariposa County, Ben Lomond in Santa Cruz County, and the new Washington Ridge Camp, opened in September 1961, in Nevada County. In addition to the 4 main camps, 3 spike camps are operated as branches of the main camps on a year-round basis. Total capacity of these conservation camps is 360.

Projects proposed for 1963-64 are to correct deficiencies and improve the physical plant at the Washington Ridge Camp.

Fred C. Nelles School for Boys

This institution was originally constructed at Whittier in 1890. Remodeling and rebuilding of this institution began in the 1959-60 fiscal year and upon completion of the projects presently funded and proposed in 1963-64, there will be a capacity of 570 plus 37 hospital and detention beds. The projects proposed for the 1963-64 fiscal year provide for the construction of 2 50-b living units to provide an additional 100 capacity, equipment 2 previously funded living units, and a minor item to impr the physical plant. The ultimate planned capacity of this in tution is 620 by June 30, 1966.

Northern California Youth Center

The Northern California Youth Center, to be located in Northern California, is the first of 2 such centers planned for California. With the possible exception of additions to the northern reception center, it is proposed that all of the departments' capacity requirements for Northern California in the next 20-25 years will be provided here. It is anticipated that twelve 400-ward institutions served by 1 central administrative and business services unit will be constructed on a large site in San Joaquin County. While each 400-ward institution's treatment program will be complete and self-contained, the overall supervision, business services, maintenance, feeding, hospital car and communications will be provided by the central unit. Thu the operational economies of a large institution are expecte with the program benefits of small 400-ward units.

The 1963-64 proposal provides for the completion of Unit construction of phase II of central service facilities and th construction of Unit II. The 1963-64 program does not includ a central administration building which will be proposed a phase III in a future budget.

STATE BUILDING PROGRAM	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
PROPOSED 1963-64 EXPENDITURES [a]			
Construct first 400-capacity institution—Phase II This project provides for the completion of the first 400-bed institution to be constructed at the Youth Center. The 400-bed total includes a 20-bed detention unit.	–	–	$680,100
Construct central administrative and service facilities—Phase II This portion of the central facilities includes kitchen, warehouse, maintenance shops and a 33-bed hospital.	–	–	3,162,600
Construct 400-capacity institution—Unit II This project will provide for the construction of the second institution at the Youth Center. The rated capacity for this institution is 400 plus 16 detention beds.	–	–	5,800,000
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES [a]			
Construct central administrative and service facilities	–	$1,602,000	–
Equip central administrative and service facilities (partial)	–	10,000	–
Construct first 400-bed institution	–	5,048,000	–

Paso Robles School for Boys

The Paso Robles School for Boys is located near Paso Robles in San Luis Obispo County. The school site covers 203 acres and the institution occupies an area of approximately 40 acres. The facility has a capacity of 455 plus hospital and detention capacity of 39. All buildings are of single-story reinforced brick construction with radiant heating. Each cottage houses 50 boys and contains both single rooms and a dormitory.

The projects proposed in 1963-64 are to correct deficiencies and to improve the physical plant.

GENERAL ANALYSIS

The Department of Education administers 3 production centers for the blind, an Orientation Center for the Adult Blind, and 5 special schools for physically handicapped children, including 1 for education of the blind, 2 for the education of the deaf and 2 for the diagnosis and educational evaluation of cerebral palsied children.

The School for Cerebral Palsied Children, Southern California, now occupies rented quarters in Altadena and will be moved to new facilities adjacent to Los Angeles State College in January, 1964.

Orientation Center for the Blind

This school, located in Oakland, trains newly blinded adults to overcome their handicap and to resume as normal a life as possible. The old facility was vacated in September, 1962, due to freeway construction through the site. Leased facilities will continue to be used until the completion of the new facilit in December, 1963. Funds for leasing of temporary facilities i the 1963-64 fiscal year are provided in the support appropriatio for the Center.

UNIVERSITY OF CALIFORNIA

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

The University of California is a statewide institution of higher learning operating on 7 major campuses and on a number of experiment stations. Major campuses include Berkeley, San Francisco, and Davis in Northern California, and Los Angeles, Riverside, San Diego (La Jolla), and Santa Barbara in Southern California. New campuses are planned for Santa Cruz, Irvine in Orange County, and San Diego.

The 1963-64 Capital Outlay program totals $69,459,900 from state funds. A summary of proposed expenditures by campus is, as follows:

Campus:	*Major*	*Minor*	*Total*
Statewide	$3,123,300	$166,300	$3,289,600
Berkeley	10,221,900	398,200	10,620,100
Davis	9,123,900	260,500	9,384,400
Irvine	10,914,000	–	10,914,000
Los Angeles	5,155,400	240,900	5,396,300
Los Angeles—Medical	6,758,600	90,000	6,848,600
Riverside	$4,977,800	$178,700	$5,156,500
San Diego	4,650,500	135,000	4,785,500
San Diego—Medical	150,000	–	150,000
San Francisco	2,200,500	135,800	2,336,300
Santa Barbara	4,401,500	208,200	4,609,700
Santa Cruz	5,828,900	140,000	5,968,900
Totals	$67,506,300	$1,953,600	$69,459,900

Projects requested will provide for the following:

Classrooms and facilities for operation of such classrooms, which are required to accommodate student enrollment at time of completion of the projects; research facilities related to the teaching staff and postgraduate students; and auxiliary facilities required for the operation of campuses.

Enrollment projections upon which this budget is based, are as follows:

SUMMARY OF FULL-TIME EQUIVALENT STUDENTS[1]

Campus	Actual Fall 1961	Estimated Fall 1962	Estimated Fall 1963	Estimated Fall 1964	Estimated Fall 1965	Estimated Fall 1966

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

STATEWIDE			
General planning studies, preliminary plans and programming	–	–	$789,200
To provide for (1) the preparation of preliminary plans for projects to be proposed for funding of working drawings in 1964-65, (2) programming of projects scheduled for funding of working drawings in 1965-66, and (3) general planning studies not related to specific projects.			
Equip intercampus library facility at Richmond	–	–	149,500
To complete funding of equipment (steel shelving) for intercampus library facility portion of the Richmond service and storage building.			
Acquisition of books for new campuses—step 2	–	–	600,000
To continue acquisition of books for initial library collections for three new campuses.			
Acquisition of land for Sierra Foothill Range Agricultural Field Station	–	–	100,000
To purchase 800 acres of privately owned land which now divides the two existing parcels, one 1,625 acres and one, 3,375 acres, which constitute this field station located in Yuba County.			
Construct and equip Kearney Horticultural Field Station	–	–	357,800
To prepare working drawings for, construct, and equip the second step of improvements, including land development and office, laboratory, shop, storage and housing facilities at this station located in Fresno County.			
Construct South Coast Agricultural Field Station—step 2	–	–	176,100
To prepare working drawings for, and construct, an office-laboratory building and glasshouse addition to this Orange County station for agricultural research on crops of importance to the southern coastal areas of the State.

STATE BUILDING PROGRAM—Continued			
PROPOSED 1963-64 EXPENDITURES[a]—Continued			
STATEWIDE			
Acquisition of television equipment	–	–	$200,700
To equip campuses to extend and improve instructional activities by means of television.			
Land acquisition-engineering field station-south	–	–	750,000
To purchase land for an engineering field station to serve campuses in the southern part of the state and to accommodate experimental activities not feasibly done on campus.			
Minor Projects:[b]			
Lindcove Field Station—install irrigation, drainage, frost protection systems, and weather station	–	–	49,500
Imperial Valley Field Station—construct cattle barn and handling facilities	–	–	49,500
Imperial Valley Field Station—construct 30,000-gallon domestic water storage tank	–	–	7,000
Hopland Field Station—construct farm machinery equipment storage building	–	–	14,300
Mount Hamilton—Construct addition to laboratory-measuring building	–	–	46,000
BERKELEY CAMPUS			
Equip Stephens Union alterations, step 1	–	–	93,000
To complete funding of equipment for the first step of Stephens Union alterations. Construction and a first increment of equipment were funded in the Budget Act of 1962.			
Equip physical sciences lecture hall	–	–	47,000
To complete equipping of the physical sciences lecture hall by providing television facilities. Construction and part of the equipment were funded in the Budget Act of 1962.			
Equip Le Conte Annex	–	–	457,000
To equip Le Conte Annex (physics) funded in the Budget Act of 1960.			
Equip Barrows Hall	–	–	300,000
To equip Barrows Hall (business administration and social sciences) funded in the Budget Act of 1958.			
Equip Etcheverry Hall	–	–	900,000
To equip Etcheverry Hall (engineering) funded in the Budget Act of 1960. One-third of the total equipment need will be obtained from non-State funds.			
Equip environmental design building	–	–	300,000
To provide a first increment of equipment for the environmental design building funded in the Budget Act of 1961.			
Land acquisition—Anna Head School property	–	–	75,000
To provide the final payment on the purchase of the 1.9 acre Anna Head School property. Previous payments were funded in the Budget Acts of 1959, 1961 and 1962.			
Construct chemistry unit 2	–	–	5,397,000
To construct a building with laboratories, offices, branch library and specialized service and supporting facilities for teaching and research in chemistry.			
Construct and equip alterations to Stephens Union, step 2	–	–	233,000
To prepare working drawings for, construct, and equip the second step of alterations to Stephens Union to complete remodeling of the building for use by the social science departments and associated research activities.			
Construct law building addition	–	–	980,700
To prepare working drawings for and construct an addition to (and alterations to) the law building with classrooms, offices, library study and stack facilities and other ancillary facilities for teaching and research in law.			
Working drawings for alterations to South Hall, step 1	–	–	19,000
To prepare working drawings for the rehabilitation, modernization, and alteration of South Hall for social science activities.			
Construct and equip alterations to the main library, project A	–	–	325,400
To prepare working drawings for, construct, and equip the first step of a sequential group of alterations to the main library (including the library annex) designed to achieve its optimum utilization as the research library center for the humanities.

PROPOSED 1963-64 EXPENDITURES[a]—Continued			
BERKELEY CAMPUS—Continued			
Construct and equip a large-testing-machine facility at the Richmond Field Station	–	–	$379,700
To prepare working drawings for, construct, and equip a building at the Richmond Field Station to house the 4,000,000-pound and other smaller testing machines, (now located in the engineering materials laboratory on the Berkeley campus) with related laboratory, service and office facilities for research and teaching on large structural components and systems. This relocation will clear space and site for a major addition to the engineering materials laboratory.			
Working drawings for addition to engineering materials laboratory	–	–	129,000
To prepare working drawings for an addition to (and alterations to) the engineering materials laboratory with specialized laboratories and supporting service facilities, offices, and shops for teaching and research in structural engineering and mechanics, hydraulics, sanitary engineering, and transportation engineering.			
Construct and equip facilities at the Richmond Field Station	–	–	305,100
To prepare working drawings for, construct, and equip various facilities and improvements at the Richmond Field Station; work includes a weatherproof shelter over the existing model basin, a receiving and stores warehouse building and a cafeteria, alterations to the mineral research laboratory, acquisition of fill materials for reclamation of tidelands, utility improvements, and additions to the naval architecture and mobile test laboratory buildings.			
Land acquisition—general	–	–	200,000
To purchase, on the basis of opportunity or necessity, parcels of land within the area designated for expansion in the long-range development plan.			
Construct general campus improvements	–	–	81,000
To complete construction of general campus site improvements partially funded in the Budget Act of 1962.			
Minor Projects:[b]			
Construct instructional television distribution system from Dwinelle Hall to life sciences building and Wheeler Hall	–	–	21,000
Dwinelle Hall—construct television studio and control room in rooms 128 and 130	–	–	46,000
Richmond service and storage facility—provide lighting between library stacks for reading of book titles	–	–	33,000
Richmond service and storage facility—enclose open area to provide office space for the billing department, U.C. Press	–	–	18,800
Life sciences building—alter lab room 3007 to provide graduate instruction and research facilities for department of botany	–	–	26,800
Optometry building—install forced-air system in clinical examination darkrooms for department of optometry	–	–	23,100
Kroeber Hall—construct museum-collection study area in undeveloped basement space by installation of lights, automatic sprinkler and ventilation system for department of anthropology	–	–	50,000
Provide heating and ventilating improvements in Harmon, Giannini and LeConte Hall	–	–	50,000
Botanical garden—extend irrigation system to provide additional growing areas for departments of biology and botany	–	–	24,000
Richmond Field Station—construct 2,000 square-foot building and paved work area for the cement manufacturing and fire test facilities for the department of civil engineering	–	–	35,000
Greek Theater—alter rooms 121, 122, and 123 by providing electrical stage lighting units, dressing tables, portable screens, acoustic tile and floor coverings for the department of dramatic art	–	–	22,500
Construct sidewalks, loading bays, widen streets and relocate utilities on parts of Bancroft Way, Dana and Oxford Streets and Hearst Avenue	–	–	48,000
DAVIS CAMPUS			
Equip library expansion	–	–	181,800
To equip library expansion funded in the Budget Act of 1961. of 1961.			

---

[a] From State Construction Program Fund unless otherwise indicated.

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM—Continued			
PROPOSED 1963-64 EXPENDITURES[a]—Continued			
DAVIS CAMPUS—Continued			
Equip classroom and office unit 2	–	–	$282,000
To equip classroom and office unit 2 funded in the Budget Act of 1961.			
Equip vegetable crops controlled temperature storage facilities	–	–	30,000
To equip vegetable crops controlled temperature storage facilities funded in the Budget Act of 1962.			
Equip residence hall unit 6	–	–	222,600
To equip residence hall unit 6 funded in the Budget Act of 1962.			
Construct utilities	–	–	392,200
To prepare working drawings for and construct utility improvements and extensions required by campus expansion; included is provisions for a new steam boiler, expansion of the electrical substation, and extension of utilities to the sites of new buildings.			
Construct Agricultural Toxicology and Residue Research Laboratory	–	–	150,000
To provide matching funds for nonstate funds to prepare working drawings for and construct a building to replace and expand the present pesticide residue research facility in order to clear the site of the existing facility for construction of the humanities building.			
Construct humanities building	–	–	2,965,800
To construct a complex of buildings with laboratories and supporting service facilities, offices, classrooms, and a little theater facility for teaching and research in art, dramatic art, speech, and music.			
Construct physicial sciences unit 2	–	–	3,910,300
To construct a building with laboratories and supporting service facilities, offices, classrooms, and a branch library for teaching and research in chemistry.			
Working drawings and site clearance for engineering building	–	–	228,000
To prepare working drawings and clear site for a building with laboratories and supporting service facilities, classrooms, and offices for teaching and research in engineering.			
Construct and equip plant growth research laboratories, step 1	–	–	333,000
To prepare working drawings for, construct, and equip greenhouses and associated headhouse facilities for teaching and research in the plant sciences, bacteriology, entomology, and genetics.			
Construct and equip ecological research laboratory	–	–	117,700
To provide matching funds for nonstate funds to prepare working drawings for, construct, and equip a building with animal quarters, laboratories, and supporting service facilities and outdoor wire pens for research in the ecology and population dynamics of wild animals.			
Construct campus entrance road developments	–	–	310,500
To prepare working drawings for and construct a new south campus entrance road and an improved east campus entrance road; work includes bridges over Putah Creek, new pavement, sidewalks, street lighting, and drainage.			
Minor Projects:[b]			
Haring Hall—construct instructional television studio and control room by alterations to storage area	–	–	49,500
Hunt Hall—convert 9,450 square feet of released space to an instructional lab, research lab, and departmental office space for the departments of agronomy and vegetable crops	–	–	48,000
Walker Hall—convert released space to graduate engineering student lab, chemical lab, upper division instrumentation and measurement lab, and staff offices for department of engineering	–	–	40,000
Convert 10,700 square feet of space in Aggie Villa apartments into administrative and faculty offices for the accounting, business, cashiers, purchasing, inventory, and personnel offices and music department	–	–	48,000
Biological sciences building—alter area in basement for use as a computer center by providing sprinkler system, extension of ventilation system, installation of electrical circuits, lighting, and partitions	–	–	50,000
Modify hazardous wiring systems in older buildings to comply with electrical wiring code	–	–	25,000

---

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM—Continued			
PROPOSED 1963-64 EXPENDITURES [a]—Continued			
IRVINE CAMPUS			
Construct library unit 1	–	–	$2,081,600
To construct a building with reading rooms, book stacks, offices, and supporting service facilities to accommodate the campus library and, on a temporary basis, campus administrative activities.			
Construct social sciences and humanities unit 1	–	–	2,680,000
To construct a building with classrooms, laboratories, offices, and other facilities for teaching and research in the social sciences and humanities.			
Construct natural sciences unit 1	–	–	3,964,800
To construct a building with classrooms, laboratories, offices, and other facilities for teaching and research in the biological and physical sciences, and engineering.			
Construct cafeteria	–	–	787,600
To construct a cafeteria building with dining room, kitchen, and food preparation, service, and storage facilities to accommodate general campus population.			
Construct utilities and site development	–	–	1,400,000
To prepare working drawings for and construct a central steam plant, utility tunnels, and sewer, water, gas, communication, irrigation and drainage systems, plus site improvements incident to establishment of the new campus.			
LOS ANGELES CAMPUS			
Equip social sciences unit 1	–	–	407,000
To equip social sciences unit 1 funded in the Budget Act of 1958.			
Equip chemistry-geology building addition	–	–	500,000
To provide a second increment of equipment for the addition to the chemistry-geology building. Construction was funded in the Budget Act of 1960 and a first increment of equipment was funded in the Budget Act of 1962.			
Equip physics unit 2	–	–	650,000
To equip physics unit 2 funded in the Budget Act of 1961.			
Equip north campus library unit 1	–	–	387,200
To complete funding of equipment for the north campus library unit 1. Construction and a first increment of equipment were funded in the Budget Act of 1961.			
Equip life sciences graduate instruction and research unit 2	–	–	231,500
To equip life sciences graduate instruction and research unit 2 funded in the Budget Act of 1961.			
Construct central campus utilities and site development	–	–	106,000
To prepare working drawings for, and construct a utility tunnel and utilities and site improvements in the central campus area.			
Construct main library alterations, step 1	–	–	788,000
To prepare working drawings for, and construct alterations and improvements to the existing main library building to accommodate undergraduate library and other activities remaining after move of central research collections and their library services to north campus library unit 1.			
Construct administration building addition	–	–	2,085,700
To prepare working drawings for, and construct an addition to the administration building with offices and supporting service facilities to provide for campus administrative departments.			
Minor Projects: [b]			
Music Building—convert practice rooms to dressing room facilities for theatrical activities in Schoenberg Hall	–	–	7,500
Install new 6-inch water main service to men's gymnasium and provide a cement lining to the existing lines	–	–	20,000
Haines Hall—convert room 56 to 32-station language laboratory for the departments of Near Eastern and African, and Oriental languages	–	–	47,900
Chemistry-geology building—modify 23 elevator door openings by providing improved hoistway door linkage and overhead control panels	–	–	27,500

---

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM—Continued			
PROPOSED 1963-64 EXPENDITURES [a]—Continued			
LOS ANGELES CAMPUS—Continued			
Minor Projects—Continued			
Mathematical sciences building—convert research laboratory room 7138 to an instrument-instruction laboratory for department of meteorology	–	–	$10,000
Mira Hershey Hall—construct necessary underpinning and correct effects of settling of building at southwest corner	–	–	32,000
Law building—alter room 234 to provide 36 student typing stations for the department of law	–	–	6,000
Mathematical sciences building—alter room 8142 to provide 6 faculty offices for department of astronomy	–	–	5,000
University elementary school—enlarge U.E.S. library to provide additional space for instructional materials, services, and reading room—classroom area	–	–	35,000
Plant physiology building—construct environmental temperature control system in room 25 for the department of botany	–	–	40,000
Improve street lighting on University Drive from bus station to front of administration building as a public safety measure	–	–	10,000
LOS ANGELES MEDICAL CENTER			
Construct school of dentistry unit 1	–	–	4,924,100
To construct an addition to the medical center structure with teaching and research laboratories, outpatient clinics, supporting service facilities, and offices for the new school of dentistry.			
Construct student health service expansion	–	–	838,300
To construct portions of the "A" and "B" levels of the school of dentistry building with outpatient clinic, treatment, supporting service and office facilities to accommodate expansion and partial relocation of the student health service.			
Working drawings for hospital and clinics unit 2B, Step 2	–	–	196,200
To prepare working drawings for an addition to the hospital and clinics unit 1 building with teaching beds, hospital service and support facilities, including radiology, outpatient clinics, surgeries, and clinical department laboratories and offices to provide for an increase in each medical class size from 72 to 128 students, with corollary increases in interns, residents and postdoctoral trainees.			
Construct ophthalmology clinic	–	–	800,000
To provide funds in addition to nonstate funds to prepare working drawings for and construct an addition to the medical center structure to accommodate the medical school's division of ophthalmology and its related outpatient clinics, inpatient care facilities, surgeries and supporting service facilities; and to provide specialized laboratories and facilities for research in the sciences related to vision.			
Minor Projects: [b]			
Medical sciences center—construct microwave link to connect the medical center with off-campus teaching hospitals	–	–	20,000
Medical sciences center—construct audio and video cable distribution system for television instruction to eight classrooms	–	–	20,000
U. C. Hospital—alter outpatient clinic areas to provide expanded patient interviewing and waiting room facilities and related clerical space, treatment rooms, and pneumatic tube service	–	–	15,000
U. C. Hospital (Marion Davies Unit)—construct 100-station classroom in unfinished basement area for department of pediatrics	–	–	35,000
RIVERSIDE CAMPUS			
Equip library addition, step 1	–	–	177,700
To equip library addition step 1 funded in the Budget Act of 1961.			
Equip agrichemicals and produce quality laboratory	–	–	142,300
To equip the agrichemicals and produce quality laboratory funded in the Budget Act of 1962.			

---

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM—Continued			
PROPOSED 1963-64 EXPENDITURES[a]**—Continued**			
RIVERSIDE CAMPUS—Continued			
Construct utilities and site development in glasshouse area	–	–	$189,000
To provide working drawings for and construct extensions of basic utilities and site improvements in the glasshouse area of the campus.			
Construct site development	–	–	183,600
To prepare working drawings for and construct general campus site improvements, including roads, walks, plantings, drainage, lighting and the relocation of the arroyo warehouse to the farm group area.			
Working drawings for agricultural sciences building	–	–	99,000
To prepare working drawings for a building with laboratories and supporting service facilities, offices, and a branch library to accommodate agricultural activities being moved to Riverside from the Los Angeles campus.			
Construct physical sciences unit 4	–	–	3,119,500
To prepare working drawings for and construct a building with classrooms, laboratories and supporting service facilities, and offices for teaching and research in chemistry.			
Construct central cafeteria	–	–	749,300
To prepare working drawings for and construct the central cafeteria portion of the cafeteria and bookstore building with dining room, kitchen, service, and storage facilities to accommodate general campus population.			
Construct and equip agricultural extension facility	–	–	317,400
To prepare working drawings for, construct, and equip a building with offices, a classroom-conference room, laboratory and related service facilities, and a visual aids center to accommodate regional agricultural extension activities.			
Minor Projects:[b]			
Construct aluminum lathhouse and mist chamber for citrus experiment station departments	–	–	45,000
Physical sciences building—construct concrete floor for storage space in basement and construct additional student lockers in room 2265	–	–	44,700
Administration building—alter the business, finance, placement, education, deans of graduate division, and of students office areas to provide for relocation and expansion of these activities	–	–	19,000
Social sciences-humanities building—alter existing psychology laboratory for use as laboratory for sociology	–	–	10,000
Moreno Ranch improvements—construct small office house, 10 acre-foot sealed reservoir, equipment storage shed and install 1,350 lineal feet of transite irrigation pipe	–	–	50,000
Life sciences building—increase laboratory station capacity from 64 to 92 student stations by constructing additions to existing lab work benches	–	–	10,000
SAN DIEGO CAMPUS			
Equip building B—school of science and engineering	–	–	500,000
To complete funding of equipment for building B of the school of science and engineering. Construction and initial increments of equipment were funded in the Budget Acts of 1960, 1961, and 1962.			
Equip building C—school of science and engineering	–	–	270,000
To provide funds in addition to nonstate funds to equip building C of the school of science and engineering funded in the Budget Act of 1961.			
Construct building E—school of science and engineering	–	–	2,969,800
To construct a building with library seating and stacks, classrooms, offices, and other space of a general-assignment nature to serve initially as the main library for the new general campus and to accommodate the instructional and research programs in the social sciences and humanities.			
Working drawings for building F—school of science and engineering	–	–	106,000
To prepare working drawings for a building with classrooms, laboratories and supporting service facilities, and offices to accommodate the expansion of undergraduate programs in mathematics, life sciences, physical sciences, and applied sciences.

[b] Minor projects from General Fund unless otherwise indicated.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM—Continued			
PROPOSED 1963-64 EXPENDITURES [a]**—Continued**			
SAN DIEGO CAMPUS—Continued			
Construct cafeteria and student health facility	–	–	$804,700
To prepare working drawings for and construct the central cafeteria and student health service portions of the general services and cafeteria building, step 1, with dining room, kitchen, service and storage facilities, and student health service facilities to accommodate general campus population.			
Minor Projects: [b]			
Marine biology—construct second floor experimental aquarium addition including holding tanks and controlled environment rooms	–	–	50,000
Scripps library building—complete remodeling of building by installing elevator cab and library equipment	–	–	35,000
Construct equipment compound and warehouse building including radioactive materials storage vault	–	–	50,000
SAN DIEGO MEDICAL CENTER			
Acquisition of books	–	–	150,000
To acquire books for initial library collection for new medical school.			
SAN FRANCISCO CAMPUS			
Construct additional teaching facilities	–	–	1,597,500
To provide matching funds for nonstate funds to prepare working drawings for and construct (1) an addition to, and completion of unfinished areas in the health sciences instruction and research building with classrooms, laboratories, supporting service facilities, offices, vivarium and library stacks and reading rooms, and (2) alterations to San Francisco General Hospital with laboratories and offices to accommodate expansion of medical school class to 128 students.			
Construct and equip alterations to laundry-storehouse building	–	–	147,000
To prepare working drawings for, construct, and equip conversion of area in laundry-storehouse building to accommodate the pharmacy processing laboratory, and the culture media unit, both of which are presently located in buildings scheduled for demolition.			
Construct and equip surge research unit 1	–	–	140,000
To provide matching funds for nonstate funds to prepare working drawings for, construct, and equip a building with general use research laboratories and offices for interim accommodation of new faculty and of various school of medicine research activities awaiting permanent quarters.			
Construct and equip clinics building addition for school of dentistry postgraduate program	–	–	116,000
To provide matching funds for nonstate funds to prepare working drawings for, construct, and equip an addition to the clinics building with lecture, seminar, television-demonstration, clinic, research laboratory, and office facilities for postgraduate program in dentistry.			
Land acquisition	–	–	200,000
To provide for an orderly program of acquisition of sites required by projects scheduled in the University's 1963-68 capital outlay program.			
Minor Projects: [b]			
Medical sciences building—provide exhaust fans and ductwork in two lower division dentistry laboratory rooms to carry off heat from bunsen burners	–	–	8,400
Provide additional distribution transformer to service Moffit Hospital and the Medical Sciences Building	–	–	25,200
Construct a refuse storage structure adjacent to incinerator building	–	–	25,700
Medical sciences building—alter toilet rooms on third and ninth floors to provide facilities for women employees	–	–	17,000
Medical sciences building—enclose basement areaway to provide working area for eight stenographers	–	–	14,500
Richmond service and storage facility—complete off-campus storage facility for storage of equipment and medical records	–	–	45,000

---

STATE BUILDING PROGRAM—Continued			
PROPOSED 1963-64 EXPENDITURES[a]—Continued			
SANTA BARBARA CAMPUS			
Equip speech and drama building	–	–	$198,000
To equip the speech and drama building funded in the Budget Act of 1962.			
Equip psychology building	–	–	330,000
To equip the psychology building funded in the Budget Act of 1962.			
Land acquisition	–	–	476,000
To complete payment for the 111-acre site for general campus expansion. Previous payments were funded in the Budget Acts of 1961 and 1962.			
Acquisition of engineering laboratory equipment	–	–	100,000
To acquire first increment of equipment for use in teaching laboratories of the School of Engineering.			
Construct and equip marine biology laboratory	–	–	480,400
To provide funds in addition to nonstate funds to construct and provide the first increment of equipment for a building with specialized seawater laboratories and supporting and service facilities for teaching and research in the marine sciences.			
Construct utilities and site development	–	–	99,100
To prepare working drawings for, and construct utility trunk lines for the water, gas, sanitary sewer, electrical, and telephone underground systems; utility extensions to new building sites; and general campus site improvements.			
Construct chemistry building	–	–	2,618,000
To prepare working drawings for, and construct a building with laboratories, supporting service and shop facilities, and offices for teaching and research in chemistry; and joint-use lecture-demonstration classrooms for the physical and biological sciences.			
Working drawings for engineering building	–	–	100,000
To prepare working drawings for a building with classrooms, laboratories, supporting specialized equipment, services, and shop facilities, and offices for teaching and research in engineering; and joint-use lecture-demonstration classrooms for the physical and biological sciences.			
Minor Projects:[b]			
Alter industrial arts space in arts building for engineering	–	–	50,000
Fire protection—install pressure reduction valves on 51 buildings and provide 28 fire hydrants in new building area	–	–	35,000
Install 70 electric power poles to service the general campus area	–	–	49,000
Install underground, 1,500 feet of six 4-inch transite telephone ducts to service the newly acquired southwest campus area	–	–	18,000
Relocate and alter temporary building 428 to provide a 24-station inorganic chemistry lab and two 45-station classrooms for the department of chemistry	–	–	37,700
Alter temporary building 431 to provide an observation-demonstration room and an elmentary and secondary sciences procedures lab for the department of education	–	–	18,500
SANTA CRUZ CAMPUS			
Construct academic areas and dining facilities of residential college number 1	–	–	1,005,000
To prepare working drawings for and construct the academic areas and dining facilities of residential college number 1 with (1) classrooms, seminar rooms and faculty offices to accommodate instructional activities, and (2) dining facilities to serve the college residents and general campus population.			
Construct and equip corporation yard buildings	–	–	659,900
To prepare working drawings for, construct, and equip corporation yard facilities with offices, shops, and receiving and storage facilities to accommodate campus maintenance, repair, service, and security departments and, on an interim basis, campus administrative departments and faculty offices.			
Construct physical sciences unit 1	–	–	3,347,000
To prepare working drawings for and construct a building with classrooms, laboratories, supporting service and shop facilities, and offices for teaching, and research in the natural sciences.			

---

STATE BUILDING PROGRAM—Continued			
PROPOSED 1963-64 EXPENDITURES[a]**—Continued**			
SANTA CRUZ CAMPUS—Continued			
Working drawings for library unit 1	–	–	$92,500
To prepare working drawings for a building with reading rooms, book stacks, library service facilities, and offices to accommodate the general campus library, and on an interim basis, other academic and administrative activities.			
Construct and equip utilities and site development	–	–	724,500
To prepare working drawings for, construct, and equip basic underground utility systems, roadways, drainage, walks, lighting, bridges, and related site improvements to serve the campus in the early stages of its development.			
Minor Projects:[b]			
Rehabilitate building A (former counting house) for security and control office	–	–	10,000
Forest fire prevention—provide fire breaks and access roads to eliminate fire hazards	–	–	30,000
Poison oak eradication—apply weed-killing spray to 1,200 acres	–	–	20,000
Rehabilitate building B (former granary) for receiving and storage	–	–	10,000
Rehabilitate building C (former cook house) for planning office	–	–	20,000
Rehabilitate building D (former coach house) for administration and storage	–	–	50,000
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES[a]			
STATEWIDE			
Preliminary plans	$127,200	$600,000	–
Construct and equip San Joaquin Valley westside field station development, step 2	–	250,000	–
Provide television facilities and equipment	–	200,000	–
Acquisition of books for new campuses	–	300,000	–
Construct and equip addition to Hastings College of Law building, step 1	–	282,300	–
Residence halls	3,000,000	–	–
Minor Projects:[b]			
Imperial Valley Field Station—alter existing laboratory to provide additional research stations and chemical fume hood	–	18,000	–
Antelope Valley Field Station—provide addition to existing personnel housing	–	6,000	–
South Coast Field Station—construct irrigation sprinkler system for avocado experiment plots	–	16,000	–
Hopland Field Station—construct bridge and crossing over creek	–	24,000	–
Sierra Foothill Range Field Station—develop ranch by construction of fences, water storage facilities, firebreaks, roads, etc.	–	50,000	–
Imperial Valley Field Station—provide surfacing for ranch roads	–	5,500	–
Imperial Valley Field Station—improve surface drainage system	48,500	–	–
Hopland Field Station—construct supply building, glasshouse and potting shed	32,500	–	–
Imperial Valley Field Station—construct feed preparation building, glasshouse, lathhouse and potting shed	28,000	–	–
Mt. Hamilton:			
Provide dome for 24-inch photometric telescope	–	15,000	–
Construct and install 5-mirror coudé system for 120-inch telescope	–	30,000	–
Fire protection program—install sprinkler system in administration and shop buildings	–	37,500	–
Provide 24-inch photometric telescope	20,000	–	–
Rehabilitate and modify 36-inch telescope	22,300	–	–
Make a topographic and utility map of Mt. Hamilton	9,800	–	–

BERKELEY CAMPUS			
Equip education-psychology building	$457,400	$300,000	–
Construct and equip alterations to Hearst Mining Building	570,200	220,000	–
Equip chemistry unit 1	–	570,000	–
Construct and equip alterations to life sciences building	593,100	50,000	–
Land acquisition—Anna Head School property	200,000	200,000	–
Construct alterations to Stephens Union, step 1	–	566,500	–
Construct and equip alterations to LeConte Hall	–	139,400	–
Construct utility improvements on campus	365,100	552,000	–
Construct utility improvements at Gill Tract	–	75,000	–
Construct and equip physical sciences lecture hall	21,900	647,500	–
Construct and equip facilities and improvements at the Richmond Field Station	–	334,300	–
Construct and equip alterations to Gilman Hall	–	266,000	–
Construct general campus improvements	–	74,000	–
Site development for chemistry unit 2	–	40,000	–
Land acquisition—Newman Hall property	–	400,000	–
Equip agricultural greenhouses	49,500	–	–
Construct environmental design building	5,612,900	–	–
Construct photosynthesis laboratory	387,200	–	–
Construct and equip sanitary engineering building	220,900	–	–
Construct and equip alterations to Haviland Hall	326,700	–	–
Construct alterations to home economics building	202,300	–	–
Construct biochemistry building	2,631,700	–	–
Working drawings for chemistry unit 2	186,500	–	–
Land acquisition	480,000	–	–
Minor Projects: [b]			
Life sciences building—alter room 1560 to provide specialized teaching laboratory	–	45,400	–
Harmon Gymnasium—alter rooms 111 and 175 to provide faculty offices, seminar room, faculty research laboratory and workshop	–	15,500	–
Alter space in Cowell Annex, Dwinelle Annex and South Hall Annex to provide faculty offices	–	40,000	–
Life sciences building—alter laboratory rooms 3525 and 3551 to provide for 4 additional graduate students	–	19,500	–
Kroeber Hall—provide furniture and exhibit equipment to complete Lowie Museum of Anthropology	–	21,600	–
Forest products laboratory—install automatic sprinkler system in sawmill shed	–	6,000	–
Install back-siphoning-prevention devices on various buildings	–	21,000	–
Hesse Hall—provide sound insulation in rooms 30 and 130	–	15,000	–
Gill Tract—construct 2 hot frames for tree seedling research	–	10,000	–
Life sciences building—rehabilitate room 5093 and add mezzanine	–	50,000	–
Heating plant—modify heating plant	–	27,300	–
Cory Hall—provide wooden deck over north half of roof for research on a radiometer and broad-bend antennas	–	8,800	–
Kroeber Hall—provide a laboratory in undeveloped basement area	–	21,000	–
Forest products laboratory—provide wet-storage tank for research on logs and other wood materials	–	8,500	–
Improve lighting in several older permanent campus buildings	–	25,000	–
Gill Tract—construct two cold storage rooms in east end of insectary	–	17,000	–
Doe Library—install fire detection system above book stacks in main library	–	12,700	–
Gill Tract—remodel greenhouse No. 5	–	23,000	–
Oxford Tract—construct 324 tables for new greenhouses	–	17,000	–
Life sciences building—construct constant temperature facilities in room 1595	–	6,900	–
Wheeler Hall—improve ventilation system in auditorium to prevent reverse flow of air	–	10,000	–
Install telephone ducts in various campus areas	–	27,000	–
Install sanitary sewer line to Strawberry Canyon area	–	10,800	–
Extend utility line to site of student office building	–	25,100	–
Building T-6—alter building to provide space for student and alumni placement center	12,000	–	–
Campbell Hall—install second elevator car in existing shaft	36,000	–	–
Optometry building—alter room 121 for use as a contact lens clinic	4,700	–	–
Life sciences building—alter rooms 2051 and 2059 to provide graduate instruction and research facilities	16,300	–	–
Environmental design—70 Rincon Drive—construct headhouse and fence	23,900	–	–
Life sciences building—alter room 5559 to provide 4 faculty offices	13,100	–	–

---

[a] From State Construction Program Fund unless otherwise indicated.

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES [a]—Continued			
BERKELEY CAMPUS—Continued			
Minor Projects [b]—Continued			
Engineering building—alter rooms for use as civil engineering design instruction facilities	$23,700	–	–
Strawberry Canyon storm damage prevention, step 2	50,000	–	–
2227 College Avenue—rehabilitate building for faculty office use	13,000	–	–
Mulford Hall—expansion of laboratory equipment and facilities in room 26	28,500	–	–
Life sciences building—rehabilitate animal room 5507 and add mezzanine	50,000	–	–
Lewis Hall—improve ventilation in basement rooms	16,600	–	–
Life sciences building and Wheeler Hall—improve lighting and public address system in large classrooms	14,500	–	–
Forest products laboratory—construct sawmill shed and convert shop area to laboratories and offices	50,000	–	–
Morrison Hall—complete library bookstacks	6,900	–	–
Cowell Hospital—complete replacement of steam lines	22,000	–	–
Kleeburger Field—install lighting	34,500	–	–
DAVIS CAMPUS			
Equip physical sciences unit 1	50,000	$244,000	–
Construct and equip veterinary science laboratory animal housing unit 2	141,500	29,000	–
Equip biological sciences unit 2	–	652,200	–
Provide air conditioning for classroom and office unit 2	–	89,400	–
Construct utilities	–	420,000	–
Construct west central campus road improvement and drainage, step 1	–	161,500	–
Construct low energy nuclear research laboratory	–	401,400	–
Working drawings for humanities buildings	–	98,200	–
Working drawings for physical sciences unit 2	–	124,100	–
Construct and equip veterinary medicine isolation housing for large animal research	–	447,400	–
Construct and equip animal husbandry beef cattle feeding facility	–	161,500	–
Construct vegetable crops controlled temperature storage facilities	–	559,700	–
Construct administration building	–	2,174,100	–
Relocate and construct pomology field headquarters facilities	–	161,500	–
Construct residence hall unit 6	–	627,400	–
Construct and equip addition to physical education building	633,600	–	–
Construct office section of classroom and office building unit 2	1,096,600	–	–
Construct library addition and make alterations to library-administration building	1,678,600	–	–
Construct and equip poultry husbandry building for experimental birds	144,200	–	–
Minor Projects: [b]			
Home economics building—convert classroom and service room to chemical laboratory, fadeometer room and constant temperature room	–	30,000	–
Veterinary medicine—construct feed storage and milling facilities, disposal facility, and sheep barn	–	40,000	–
Construct outdoor wall for teaching of mural art courses	–	3,000	–
Construct industrial-type building for housing farm machinery and convert released space in Walker Engineering Building	–	30,000	–
Construct building to house laboratory animals	–	49,000	–
Enology building—construct screened addition to house grape crushing press	–	13,500	–
Physics cyclotron building—construct annex to cyclotron building	–	8,000	–
Hunt Hall—alter and improve rooms 107, 110, and 112	–	15,000	–
Old horticulture building—rehabilitate substandard laboratories and other facilities	–	50,000	–
Install irrigation sprinkler system in main quadrangle area	–	19,000	–
Purchase fire department pumper	30,000	–	–
Construct storage compound building	25,000	–	–
Provide distilled water system for Hunt Hall, horticulture and landscape horticulture greenhouse ranges	32,000	–	–
Landscape horticulture field headquarters buildings—convert rooms 103 and 108 into offices and small laboratories	20,000	–	–
Chemistry building—provide air cooling equipment to eliminate fumes and contaminated air from laboratories	19,000	–	–
Veterinary medicine—construct sheep barn, hay storage building and livestock facilities	40,000	–	–
Demolish old viticulture building	7,000	–	–
Augment library expansion project	26,000	–	–

---

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES [a]—Continued			
IRVINE CAMPUS			
Construct utilities and site development	–	$1,008,000	–
Working drawings for academic buildings, step 1	–	494,500	–
LOS ANGELES CAMPUS			
Equip theater arts unit 1	–	185,600	–
Complete and equip addition to chemistry-geology building, step 1	$255,572	400,000	–
Construct west campus utilities and site development	–	480,000	–
Construct steam plant expansion	–	625,300	–
Construct extension of utilities, roads, and walks to north campus, steps 2 and 3	181,900	528,900	–
Construct art unit 2	123,100	3,329,600	–
Construct university activities memorial center	152,000	1,821,000	–
Equip graduate school of business administration building	257,300	–	–
Equip engineering unit 3	335,000	–	–
Construct north campus library unit 1	4,609,700	–	–
Construct physics unit 2	5,043,800	–	–
Construct life sciences graduate instruction and research unit 2	1,209,600	–	–
Minor Projects: [b]			
Engineering building—alter rooms 3286 and 3292 for installation of IBM 7090 computer	–	43,000	–
Law building—alter rooms 376 and 376-B for use as faculty offices and Seminar room	–	20,000	–
Building E—install desmogification equipment on ornamental horticulture greenhouses	–	20,000	–
Life sciences building—construct exhaust system for exhausting live steam from 11 rooms	-	8,600	–
University elementary school—alter and improve heating system for control of temperature in rooms 1245 and 1256	–	7,700	–
Home economics building—convert room 3221 into a research laboratory	–	4,900	–
Life sciences building—alter rooms 5318, 5318-A, 5322, 5326 and 5328 for storeroom and cleaning purposes	–	25,000	–
Install aisle lights in Royce Hall auditorium and in Schoenberg Hall	–	6,000	–
Royce Hall—convert classroom 170 to a 30-station language laboratory	–	49,500	–
Home economics building—provide water still and system for research areas in second floor of building	–	11,000	–
Moore Hall—room 100—improve 500-seat lecture hall	25,000	–	–
University elementary school—provide ventilating system for rooms 1028, 1046, 1056 and 1068	11,000	–	–
Mechanics building—reconstruct roof trusses and other areas	50,000	–	–
Install 30-inch storm drain between Westwood Boulevard and Gayley Avenue	30,700	–	–
Royce Hall—replace old electrical wiring in stage and auditorium	7,800	–	–
Haines Hall—renovate old lecture hall—room 39	50,000	–	–
Home economics building—convert room B-113 into vivarium	40,000	–	–
Royce Hall—replace hazardous stage counterweight system	49,500	–	–
Royce Hall—convert classroom 240 to language laboratory	27,300	–	–
Art building—install exterior metal louvers on south wing of second floor	5,000	–	–
University elementary school—provide storage space in basement area of administration building	15,000	–	–
Music building—equip organ instruction rooms with 3 practice organs	30,000	–	–
LOS ANGELES MEDICAL CENTER			
Construct basic sciences unit 2A	–	11,373,400	–
Construct west medical campus utilities and site development	–	466,600	–
Working drawings for school of dentistry unit and expansion of student health service facilities	–	237,600	–
Construct physical rehabilitation unit	3,311,500	–	–
Minor Projects: [b]			
Medical center vivarium—modify tile base and walls in animal rooms	–	47,000	–
U.C. Hospital—improve lighting in all patient rooms	–	49,000	–
Medical center vivarium—modify research areas in Brain Research Institute	–	45,000	–
U.C. Hospital—dietary—alter and add to kitchen facilities	33,000	–	–
Medical Center—Cancer Research Institute—replace exhaust fans for 14 fume hoods	7,000	–	–
Construct air conditioning for medical center building to provide for Cancer Research Institute	15,000	–	–
U.C. Hospital—nursing—alter patient nursing areas	13,500	–	–
U.C. Hospital—medical records—alter medical records area	10,000	–	–

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES [a]—Continued			
RIVERSIDE CAMPUS			
Construct and equip humanities building	3,059,128	350,000	–
Construct boiler addition	–	182,000	–
Construct electrical improvements—citrus experiment station area	–	96,100	–
Construct and equip custodial and grounds department headquarters	–	170,000	–
Construct physical sciences unit 3	–	2,601,000	–
Construct site development	–	115,000	–
Construct agrichemicals and produce quality laboratory and environmental pollution laboratory	–	323,000	–
Construct improvements to citrus experiment station irrigation, runoff, and salvage systems	–	323,000	–
Construct and equip purchasing department facilities	–	58,000	–
Construct addition to the library building	1,582,000	–	–
Land acquisition	650,000	–	–
Construct improvements to field 9	56,200	–	–
Construct protective filters and coolers for glasshouses, step 1	229,900	–	–
Minor Projects: [b]			
Library building—alter building and convert office area and workroom to student study room	–	50,000	–
Social sciences—humanities building—alter vacated areas to serve laboratory	–	50,000	–
Entomology building—convert second-floor open-deck area to 40-station biological-control teaching laboratory	–	50,000	–
Physical sciences building—double capacity of lockers in rooms 2227, 2223 and 2265 by constructing partitions	–	3,200	–
Life sciences building—provide electrical service and wiring to 300-station classroom for television installation	–	20,000	–
Alter and improve glasshouses and headhouses 1 to 5	–	35,000	–
Life sciences building—alter room 2121 to increase laboratory student capacity	–	6,000	–
Construct concrete pads in asphalt highway	–	6,000	–
Life sciences building—construct an observation room and 6 concrete bin cages for reptiles and other animals	–	10,000	–
Webber Hall—convert rooms 2101, 2314, and 2338 to chemical laboratory—offices	–	43,000	–
Webber Hall—install 3 cold storage boxes	–	15,000	–
Physical sciences building—alter stockroom to provide 2 offices	–	6,000	–
Make site improvements on newly acquired 9-acre area adjacent to new administration building	26,000	–	–
Construct glasshouse and screenhouse for virus indexing of foreign citrus importations	50,000	–	–
Social sciences-humanities building—modify 2 classrooms to provide 8 small offices and 2 special-use laboratory rooms	50,000	–	–
Soils and plant nutrition building—rewire building to correct electrical overload	22,300	–	–
Develop experimental area for life sciences, step 1	43,500	–	–
SAN DIEGO CAMPUS			
Construct and equip building B—school of science and engineering	520,000	475,300	–
Construct and equip building C—school of science and engineering	2,298,800	500,000	–
Construct utilities and site development—school of science and engineering	233,100	107,400	–
Construct building D—school of science and engineering	–	1,842,400	–
Construct and equip institute of geophysics and planetary physics building—school of science and engineering	–	468,000	–
Working drawing for building E	–	98,200	–
Minor Projects: [b]			
Scripps library building—complete remodeling of building	–	50,000	–
Construct storage building for scientific equipment	–	50,000	–
Provide alternate electrical supply system for Scripps campus	–	10,000	–
Ritter Hall—rehabilitate substandard laboratories	–	15,000	–
Make repairs and improvements to pier and sea water system	38,000	–	–
Service building—remodel building for expansion of purchasing, storehouse and receiving operations	15,000	–	–
Marine geology—construct underground storage facility	50,000	–	–
SAN FRANCISCO CAMPUS			
Construct addition to clinics building	162,300	3,923,700	–
Construct and equip storehouse facility relocated to Richmond	–	63,300	–
Land acquisition	–	250,000	–
Carry out demolition and site clearance for additional campus research facilities	–	73,400	–

---

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES[a]**—Continued**			
SAN FRANCISCO CAMPUS—Continued			
Construct primary electrical system expansion	$275-600	–	–
Construct health sciences instruction and research unit 1 *(General Fund)*	–	$1,583,000	–
Minor projects:[b]			
Department of pediatrics—provide laboratories in former dormitory	–	27,500	–
Provide slide control measures on cross-campus road	–	10,400	–
Alter dental casting laboratory room 637-C to provide for increased student enrollment	–	8,200	–
Relocate telephone switchboard and equipment rooms from Moffitt Hospital and the medical sciences building	–	29,000	–
Alter space in TOB-4 to provide experimental surgery laboratories	–	24,300	–
Moffitt Hospital—alter emergency patient-receiving area	–	32,500	–
Moffitt Hospital—design and construct corrosion-resisting air-filter banks	–	38,000	–
Medical sciences building—construct greenhouse for school of pharmacy	21,300	–	–
Medical sciences building—alter room S-214 for bedpatient lecture—demonstration room	5,000	–	–
Medical sciences building—convert part of the nursing arts laboratory to 6 faculty offices	26,000	–	–
Clinics building—alter room C-645 for dental clinic laboratory use	4,200	–	–
Medical sciences building—modify ventilation system to reduce noise level and maintenance work	8,600	–	–
Medical sciences building—alter and improve physiology and biochemistry chemical laboratories	44,000	–	–
Moffitt Hospital—modify ventilation system in dietary department	5,700	–	–
Moffitt Hospital—alter radioactive isotope handling rooms for use as office-patient radioactivity measurement room	7,500	–	–
SANTA BARBARA CAMPUS			
Construct and equip classroom and office, unit 2—classroom unit	1,002,200	104,000	–
Construct and equip central laboratory for radioactive materials	597,800	255,000	–
Land acquisition	596,700	516,100	–
Construct speech and drama building	–	1,944,200	–
Construct psychology building	–	1,641,400	–
Construct administration building	–	1,936,600	–
Working drawings for marine biology laboratory	–	21,300	–
Equip library unit 2	191,000	–	–
Construct utilities and site development	156,500	–	–
Minor projects:[b]			
Physical education—prepare site for and construct two tennis courts and bangboards	–	50,000	–
Building 528—alter phonetics laboratories to provide 24 additional listening booths	–	38,000	–
Student health service—convert wing of temporary building 478 for outpatient department	–	25,200	–
Arts building—convert unfinished storage area to locker room, and use present locker room for a seminar room	–	9,500	–
Construct two aviaries for student instruction and staff research	–	7,600	–
Science unit 1—complete equipping of unit 1	27,000	–	–
Auditorium—alter and improve seating area, stage and lighting	42,300	–	–
Provide environment control for animal house	12,000	–	–
Relocate and alter upper half of temporary building 422	38,000	–	–
SANTA CRUZ CAMPUS			
Construct initial improvements	–	500,000	–
BERKELEY CAMPUS			
Alterations to Richmond service and storage building to house space sciences laboratory *University Overhead Funds*	50,000	–	–
Construct quarantine research facilities at Gill Tract *University Overhead Funds*	152,000	–	–
Construct E. O. Lawrence Memorial Hall of Science *University Overhead Funds*	3,000,000	–	–
Develop property in Santa Cruz Mountains *University Overhead Funds*	65,000	–	–

Enrollments

The construction programs for the 17 state colleges are based on a projected enrollment of 112,065 regular students (FTE) in 1966-67. This enrollment estimate is an increase of 27,705 over the regular students (FTE) anticipated in 1963-64. This differs from enrollment estimates for support budget purposes where full-time equivalents of all students are considered. In California, enrollments in the state colleges during the next several years are estimated to increase at a rate many times that of the growth of the population as a whole.

These enrollments have been estimated from statistics based on prior experience of the progression of students from high schools to the colleges and through the various collegiate levels. The state college data includes a compilation of the numbers of students by county of origin in order to allow a reasonably accurate distribution of students by college or university age. The projections also assume a continual increase in the percentage of population attending college in tax-supported institutions.

The following table outlines actual enrollments of regular students in the state colleges for 1960-61 and 1961-62 and estimated enrollments from 1962-63 through 1966-67.

---

[c] Expenditures from bond funds not included in budget totals.

STATE COLLEGES—Continued

SUMMARY—Continued

Full-time Equivalent Enrollments of Regular Students[1]—1960-66

	Actual		Estimated				
State Colleges:	1960-61	1961-62	1962-63	1963-64	1964-65	1965-66	1966-67

Totals	60,966	67,367	76,440	84,360	92,640	102,115	112,065

Capacity

The basic unit measuring classroom student capacity is the student station. The stations are weighted depending upon whether they are in lecture rooms, activity rooms, or laboratories. A room is categorized by its primary use. A student station count is assigned the room based on accepted measurements, and weighting, based upon the time of required attendance per unit of student credit in each type of classroom.

The weighting is predicated on utilization standards which fix minimum utilization at 30 hours per week for lecture rooms, 25 hours per week for activity rooms and 20 hours per week for laboratories. Lecture rooms are programmed to be occupied an average of 75 percent of student station capacity each hour of use, while activity rooms and laboratories are programmed to be occupied an average of 85 percent of student station capacity each hour of use.

The categorization of a room as lecture, laboratory, or activity can shift from year to year depending on its planned use. For example, a large enrollment in art courses will result in the shifting of lecture classrooms to art activity classrooms. These shifts can result in changes in the measured capacity of any given college plant from one school year to the next.

A fourth categorization is that of earned capacity. This is the capacity that results from actual enrollments in courses that use facilities which cannot be measured in terms of student stations. The best example of this type of capacity is the gymnasium.

The total of the presently existing and funded capacity for the fall of 1966 is programmed at 92,415 FTE. Enrollments for the fall of 1966 are estimated at 112,065 FTE; this would indicate a deficiency of 19,650 FTE to meet capacity needs in September of 1966. The construction projects proposed in this budget will provide a capacity for 6,419 FTE, and projects for working drawing funds are requested to provide capacity for 4,634 FTE, raising the total capacity to 103,468 FTE. The difference between the total programmed capacity of 103,468 FTE and projected enrollments of 112,065 FTE is 8,597 FTE.

The capacity deficiency of 8,597 FTE will be partially provided for by 2 buildings for which working drawing funds have previously been appropriated (Classroom Building No. 2 at Los Angeles and the Language Arts Building at Long Beach). Construction of the initial buildings at San Bernardino-Riverside and South Bay in addition to other classroom projects that will be budgeted and completed prior to 1966-67 also will reduce the deficiency.

Status of Presently Authorized Capacity and 1963-64 Budget Provisions

	Enrollment	Capacity
1966-67 enrollment of regular students (FTE)	112,065	–
1966 existing and funded capacity	–	92,415
1963-64 proposed projects (construction)	–	6,419
1963-64 proposed projects (working drawings)	–	4,634
Totals	112,065	103,468

The existing and funded capacity of the various college plants based on planned 1966 use is shown in the following Table.

---

[1] Includes FTE of physical education and production activities (earned FTE).

[2] In rented facilities.

Master Plan Maximum Enrollments for State Colleges

Regular Students (FTE)

In accordance with results of studies of campus master plans conducted by the trustees since their organization in 1961, the following maximum enrollments are set up for purposes of master planning. Since studies are still in progress at San Diego, Sacramento, San Francisco, and San Jose State Colleges, maximum enrollment figures for these campuses as listed below may change following completion of the studies.

State College for Alameda County	15,000
Chico State College	12,000
Fresno State College	20,000
Humboldt State College	12,000
Long Beach State College	20,000
Los Angeles State College	16,800
Orange State College	20,000
Sacramento State College	20,000
San Bernardino-Riverside State College	20,000
San Diego State College	20,000
San Fernando Valley State College	20,000
San Francisco State College	12,000
San Jose State College	20,000
Sonoma State College	12,000
South Bay State College	20,000
Stanislaus State College	12,000
State Polytechnic College:	
Kellogg-Voorhis Campus	20,000
San Luis Obispo Campus	12,000
	303,800

PROJECTS PROPOSED FOR FINANCING IN 1963-64

The total Capital Outlay program for the state college system is $58,710,314. $57,609,100 is financed from the State Construction Program Fund and $1,101,214 from the General Fund for minor capital outlay. Expenditures for construction projects including designs totals $50,047,514, or 88.3 percent of the total program. The balance of $8,662,800 includes equipment, library books, land acquisition, master planning and minor construction.

Science and Engineering Facilities

The importance of science and engineering programs has resulted in an expanded enrollment in these areas, necessitating a continuing expansion of existing facilities. Included in this budget to meet these expanded enrollments are 7 projects (Chico, Humboldt, Los Angeles, Sacramento, San Jose, Sonoma, and Cal Poly at San Luis Obispo) totaling $18,377,100 which is 31.3 percent of the Capital Outlay program.

Physical Education Facilities

There are 6 projects for construction or working drawings in this budget to provide physical education facilities. These projects total $12,878,400 and are located at Alameda, Long Beach, Orange, Sonoma, Stanislaus, and Kellogg-Voorhis.

Music, Speech, and Drama Facilities

Six projects are included for music, speech and drama facilities in the amount of $8,978,000 which is 15.3 percent of the total Capital Outlay program. These projects are for Alameda, Chico, Sacramento, San Francisco, Sonoma and Stanislaus State Colleges.

Other Instructional Facilities

A total of $4,284,000 or 7.3 percent of the Capital Outlay expenditures is proposed for other instructional facilities. These 3 projects located on 3 campuses are classroom buildings to provide lecture activity and laboratory capacity required to serve increasing enrollments.

Site Development

Four projects totaling $2,185,300 for site development are included. These projects provide for utilities at San Luis Obispo, utilities and landscaping at Orange, utilities and grading at Sonoma and utilities, grading and relocation of drainage ditches at Stanislaus State College.

Land Acquisition

Three projects totaling $1,275,700 are included to purchase land for future construction at Humboldt, Los Angeles, and San Fernando Valley State Colleges.

STATE COLLEGES—Continued

SUMMARY—Continued

PROJECTS PROPOSED FOR FINANCING IN 1963-64—Continued

Other

The balance of construction projects total $2,433,500 which includes working drawings for cafeterias at Alameda and Sonoma State Colleges, construction of a library addition at Fresno State College and working drawings for a library building at Orange State College, working drawings for an addition to the administration building at Los Angeles State College, and construction of a boiler plant at Sonoma State College.

Equipment

A total of $5,665,600 is included in this budget for initial complements of equipment and equipment for buildings and facilities which are scheduled for completion in 1963-64. The total cost of this equipment is 9.7 percent of the total Capital Outlay program.

Library Books

This budget includes $421,500 to purchase initial complements of library books for the libraries at the following new colleges: San Bernardino-Riverside, Sonoma, South Bay, and Stanislaus. Processing is provided for in the support budgets of the colleges. See page 245 for the summary of the state college library book purchasing program.

Parking

This budget includes an additional 1,800 parking spaces for students and employees. Parking fees are paid by users and after deducting operating expenses, the net reimbursement reduces General Fund expenditures for support. This Capital Outlay program includes $1,000,000 for additional land and construction of 800 spaces for Los Angeles State College and 750 spaces for Sonoma State College and 250 spaces for Stanislaus State College.

Master Planning

Campus master planning is included in the support budgets of the state colleges with the exception of the 2 new colleges of San Bernardino-Riverside and South Bay State Colleges. The initial master plan and site development is budgeted in the amount of $100,000 for San Bernardino-Riverside State College and $200,000 for South Bay State College.

Minor Capital Outlay

The final portion of the Capital Outlay program is a total of $1,101,214 which is included in this budget for projects for minor capital outlay including a number of equipment projects.

FUND CONDITION	ACTUAL 1961-62	ESTIMATED 1962-63	ESTIMATED 1963-64
STATE COLLEGE FUND[a]			
Accumulated surplus, July 1	$146,892	–	–
Prior year adjustments	5,735	–	–
Accumulated Surplus, Adjusted	$152,627	–	–
Less transfer to the General Fund[b]	152,627	–	–
Accumulated Surplus, June 30	–	–	–

---

[a] Chapter 1291, Statutes of 1961, abolished the State College Fund and made all appropriations thereof payable from the General Fund. Upon the effective date of this chapter the accumulated surplus assumed the nature of unencumbered balance, continuing appropriation. It was transferred to the General Fund during 1961-62.

[b] Transfer to the General Fund reported as General Fund revenue.

Trustees of the California State Colleges

The Board of Trustees of the California State Colleges was established by Chapter 49, Statutes of 1960, First Extraordinary Session. The board is charged with the responsibility of governing the state college system including the capital outlay program. This budget includes the funds for planning the construction projects on the various state college campuses. Funds for preliminary plans in the 1961-62 and 1962-63 budgets were appropriated by the Legislature and allocated for state college projects by the Department of Finance. In 1961-62 $513,698 was expended for project planning; of this amount $196,698 was allocated for projects designed by private architects and $317,000 was transferred to the Division of Architecture for State College projects. The amount of $425,000 for 1962-63 represents that portion of the total amount made available to the Trustees that was or is to be transferred directly to the Trustees' projects designed by private architects and the division of architecture. An additional amount of $260,000 was transferred directly to the Division of Architecture for 1962-63 and earlier State College projects. Total expenditures for 1962-63 are $685,000.

This budget includes $810,000 which will be appropriated to the Trustees. The Trustees select the architectural firm to design the college project. The $810,000 is for all preliminary plans including those projects designed by the Division of Architecture and by private architects.

State College for Alameda County

The State College for Alameda County was established by Chapter 1681, Statutes of 1957. This college offers courses in teacher education, occupational and preprofessional curricula, and liberal arts leading to a bachelor's degree in various fields. This college will operate on its permanent site in the fall semester of 1963. The site of 354 acres provides 173 net usable acres for buildings, parking and athletic fields.

A regular student enrollment of 3,125 regular students (FTE) is estimated for 1966-67. Existing and funded capacity totals 1,686 regular students (FTE).

This budget provides for the construction of a music classroom building and a gymnasium; equipment for the science building, fine arts building, physical education facilities, corporation yard and boiler plant; and working drawings for a cafeteria.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Equip science building—phase I	–	–	$550,000
This project will provide the first complement of equipment for the science building financed by the Budget Act of 1961.			
Equip fine arts building—phase I	–	–	300,000
This project will provide the first complement of equipment for the fine arts building financed by the Budget Act of 1961.			
Equip fieldhouse and outdoor physical education facilities	–	–	45,000
This project will provide the equipment for the fieldhouse and outdoor physical education facilities financed by the Budget Act of 1962.			
Construct music classroom building	–	–	2,335,000
This project will provide for the construction of a music classroom building. This building will house 458 students (FTE) and will provide office space for 39 faculty members.			
Construct gymnasium	–	–	3,644,400
This project will provide for the construction of the campus gymnasium. In addition, this building will provide for faculty and administrative offices.			
Equip corporation yard and boiler plant	–	–	75,000
This project will provide the equipment to operate the corporation yard and the boiler plant financed by the Budget Act of 1962.			
Working drawings for cafeteria	–	–	60,000
This project will provide working drawings for a campus cafeteria.

Chico State College

Chico State College, established in 1887, offers courses in teacher education, general education, arts and sciences, and certain occupational fields including engineering and agriculture.

The college is located on a site totaling 90 acres in the city of Chico, and there is an additional 644 acre college farm. Additional land is being acquired for future classroom buildings.

An enrollment of 4,000 regular students (FTE) is anticipated for 1966-67. Existing and funded capacity totals 3,281 regular students (FTE).

This budget includes equipment for the education psychology building, construction of an engineering building and music drama building.

STATE COLLEGES—Continued

Fresno State College

Fresno State College is a 5-year institution offering programs in teacher training, agriculture, and general education. The college is located on a site of 1,787 acres northeast of the City of Fresno.

An enrollment of 6,300 regular students (FTE) is anticipated in 1966-67. Existing and funded capacity totals 6,568 regular students (FTE).

This budget provides for the construction of a library addition and the equipment for biology classrooms.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Construct library addition	–	–	$1,319,000
This project will provide for a library addition which will also house the audio-visual center.			
Equip biology classroom—phase II	–	–	40,000
This project will provide the second increment of equipment for this facility financed by the Budget Act of 1962.			
Minor Projects: [b]			
Provide farm wells and pumps—phase II	–	–	7,500
Construct farm fencing—phase II	–	–	10,000
Construct farm drainage system	–	–	15,000
Provide water supply improvements	–	–	16,600
Alteration and improvement projects of $5,000 or less	–	–	4,300

ESTIMATED 1961-62 AND 1962-63 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Land acquisition	$371,562	$87,212	–
Construct men's gymnasium addition *General Fund*	27,500	—10,000 [d]	–
Construct surface parking *General Fund*	–	—2,415 [d]	–
Equip women's gymnasium addition *General Fund*	9,009	3,391	–
Equip speech-drama building *General Fund*	12,056	37,531	–
Equip Cafeteria Addition:

STATE COLLEGES—Continued

Humboldt State College

Humboldt State College is a 5-year institution offering programs—both graduate and undergraduate—in liberal arts, teacher education, and vocational training. The latter includes curriculums in forestry management, fisheries, and game management. Humboldt State College is located on a site of approximately 70 acres in the City of Arcata. An enrollment of 2,240 regular students (FTE) is anticipated for 1966-67. Existing and funded capacity totals 2,155 regular students (FTE).

This budget includes equipment for a marine fisheries facility, land acquisition, and the remodeling for a biological science facility.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM			
PROPOSED 1963-64 EXPENDITURES [a]			
Equip marine fisheries facility	–	–	$49,500
This project will provide the equipment for the marine fisheries facility financed by the Budget Act of 1962			
Remodel for biological science facility	–	–	249,000
This project will provide for the remodeling of the existing corporation yard building for science and will provide for 9 FTE.			
Land acquisition	–	–	80,000
This project will provide funds for the acquisition of additional land in accordance with the campus master plan.			
Minor Projects: [b]			
Construct auto mechanics laboratory	–	–	50,000
Construct sidewalks and retaining walls	–	–	6,775
Provide lighting modifications in Jenkins Hall and science building	–	–	12,000
Alteration and improvement projects of $5,000 or less	–	–	8,705
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES [a]			
Construct physical education facilities	$202,628	$176,150	–
Remodel gymnasium	–	85,550	–
Construct marine fisheries facilities	–	584,600	–
Construct child development laboratory	–	83,818	–

Long Beach State College

This college was established in 1949 as an upper division liberal arts college, and beginning in the fall of 1953, the college was authorized to offer lower division courses. In the fall of 1951 it was moved to a permanent 320-acre site donated by the City of Long Beach.

An enrollment of 10,800 regular students (FTE) is anticipated in 1966-67. Existing and funded capacity totals 10,530 regular students (FTE).

This budget provides equipment for the health services building, construction of a gymnasium addition and working drawings for an industrial arts building.

PROPOSED 1963-64 EXPENDITURES[a]			
Equip health service building	–	–	$64,700
This project will provide the equipment for this project financed by the Budget Act of 1962.			
Construct gymnasium additions	–	–	3,310,000
This project will provide for additions to the existing gymnasium and will house classrooms, faculty offices, activity rooms, and additional locker and shower facilities. This project will provide for 717 students (FTE) and faculty offices.			
Working drawings for industrial arts building	–	–	27,000
This project will provide for the industrial arts program and will contain laboratories, general classrooms and faculty offices. It will house a total of 294 students (FTE).			
Minor Projects:[b]			
Provide standby boiler for cafeteria	–	–	10,000
Construct new sidewalks	–	–	20,000
Equip duplicating center	–	–	25,000
Construct outdoor dining area	–	–	10,000
Alterations and improvement projects of $5,000 or less	–	–	1,600
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES[a]			
Construct science building addition	–	—$8,194 [d]	–
General Fund			
Construct swimming pool	–	—1,294 [d]	–
General Fund			
Construct library addition	–	—2,854 [d]	–

STATE COLLEGES—Continued

Los Angeles State College of Applied Arts and Sciences

Los Angeles State College, established in 1947, offers courses in business, economics, education, fine arts, applied arts, music, social sciences, natural science, biological sciences, technical sciences, physical education, and special education. The college is located at the intersection of Eastern Avenue and the San Bernardino Freeway and moved to its present 97-acre site in 1956.

An enrollment of 11,900 regular students (FTE) is anticipated for 1966-67. This enrollment is based on a master planning enrollment figure of 16,800 regular students (FTE), which has been approved by the Board of Trustees. Existing and funded capacity totals 7,849 students (FTE). The deficiency is programmed to be met in part by the provision of an additional classroom building in a subsequent fiscal year.

This budget provides equipment for classroom building No. 1 and the science building, construction of an engineering building addition, working drawings for an administration building addition, and land acquisition and improvements for parking for students and employees.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Equip classroom building No. 1—phase II	–	–	$354,500
This project will provide the second increment of equipment for this building financed by the Budget Act of 1960.			
Equip science building—phase III	–	–	332,000
This project will provide the third and final increment of equipment for this facilitiy.			
Construct engineering building addition	–	–	3,595,600
This project will provide an addition to the engineering building and will provide additional engineering facilities for 258 students (FTE).			
Working drawings for administration building addition (partial)	–	–	60,000
This project provides the working drawing funds for the expansion of administrative facilities for an ultimate enrollment of 16,800 FTE. Initially classrooms for 297 FTE will be provided which will be phased out as the administrative requirements increase. This amount will augment a project financed by the Budget Act of 1962.			
Land acquisition and construction—parking (partial)	–	–	1,000,000
This project will provide for additional land and development of this land for parking. This amount will augment a project financed by the Budget Act of 1961. This portion of the total project will provide for 800 additional parking spaces.			
Minor Projects:[b]			
Provide additional electrical capacity—science building—phase II	–	–	45,000
Relocate fume hoods in science building—phase II	–	–	25,000
Provide volatile chemical storage room	–	–	10,000
Construct storage building	–	–	28,000
Provide alterations—library	–	–	6,500
Alteration and improvement projects of $5,000 or less	–	–	13,000

STATE COLLEGES—Continued

Orange State College

Orange State College is located on a site of 226 acres in the City of Fullerton. The college is currently offering instruction in temporary facilities on the permanent site. Funds for construction of the first permanent building were appropriated in 1961. This facility, a six-story science building which will be completed in the fall of 1963 and will house all of the programs of the college except the art facilities until other permanent facilities are completed.

A regular student enrollment of 3,825 regular students (FTE) is estimated for 1966-67. Existing and funded capacity totals 2,919 regular students (FTE).

This budget provides for equipment for the science building and outdoor physical education facilities, the construction of a gymnasium, working drawings for a library building and site development.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM			
PROPOSED 1963-64 EXPENDITURES[a]			
Equip science building—phase II	–	–	$750,000
This project will provide the second increment of equipment for this facility financed by the Budget Act of 1961.			
Equip outdoor physical education facilities	–	–	20,000
This project will provide for equipment for the outdoor physical education facilities financed by the Budget Act of 1962.			
Construct gymnasium	–	–	3,220,000
This project will provide for a gymnasium including auxiliary rooms, and lecture capacity for 120 students (FTE).			
Working drawings for library building	–	–	170,000
This project will provide the working drawings for a multistory structure to ultimately house the library and audio-visual facilities for 10,000 students (FTE). Initially this facility will provide classroom capacity for 3,000 students (FTE).			
Working drawings for site development—phase II	–	–	12,300
This project will provide the working drawing funds for utilities and landscaping for the gymnasium and music-drama buildings.			
Minor Projects:[b]			
Remodel temporary buildings for art facilities	–	–	50,000
Equip art curricula	–	–	148,000
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES[a]			
Construct music, speech and drama building	–	$3,770,200	–
Working drawings for gymnasium	–	82,000	–

Sacramento State College

Sacramento State College, established in 1947, offers courses in teacher training, liberal arts and general education and occupational curriculum leading to a bachelor's degree in various fields. The college moved to its present 268-acre site in 1953.

An enrollment of 5,350 regular students (FTE) is anticipated in 1966-67. Existing and funded capacity totals 4,300 regular students (FTE).

This budget provides for the construction of a science building and a music building.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Construct science building	–	–	$4,750,000
This project will provide facilities for natural science, nursing, and natural resources. Initially, space will be devoted to the teacher education and library functions which will be phased out. This building will house 524 students (FTE).			
Construct music building	–	–	3,135,000
This project will provide facilities for the music program and will have a capacity of 165 students (FTE).			
Minor Projects:[b]			
Construct pistol range safety backstop and shelter shed	–	–	7,500
Construct storage building	–	–	22,000
Alteration and improvement projects of $5,000 or less	–	–	15,500

STATE COLLEGES—Continued

San Bernardino-Riverside State College

San Bernardino-Riverside State College was authorized by the Legislature by Chapter 64, Statutes of 1960, First Extraordinary Session. It is scheduled to be a fully accredited 5-year state college with programs designed to meet the needs of the area which it will serve. One million dollars has been appropriated for the purchase of a permanent site.

It is now planned that this college will open in the fall of 1965 in temporary facilities on the permanent site. An enrollment for 1965-66 of 300 regular students (FTE) and for 1966-67 of 500 regular students (FTE) is anticipated.

This budget provides for master plans and initial site development and the acquisition of an initial complement of library books.

See page 245 for the summary of the state college library book program.

STATE BUILDING PROGRAM

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
PROPOSED 1963-64 EXPENDITURES[a]			
Master plans and site development—phase I	–	–	$100,000
This project will provide for the development of the campus master plan and the initial site development requirements.			
Initial complement of library books—first increment	–	–	150,000
This project will provide for the acquisition of a basic complement of library books.			
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES[a]			
Land acquisition	–	$1,000,000	–
TOTAL EXPENDITURES, CAPITAL OUTLAY *(State Construction Program Fund)*[c]	–	$1,000,000	$250,000

San Diego State College

This college is located on a 275-acre site within the City of San Diego. San Diego State College offers 57 approved undergraduate majors and 34 master's degree curricula. Major growth during recent years has occurred in the sciences, including mathematics, and in business administration, both at the graduate and undergraduate levels.

An enrollment of 12,600 regular students (FTE) is anticipated for 1966-67. Presently existing and funded capacity totals 10,380 regular students (FTE).

This budget includes equipment for the life sciences building and the business administration-mathematics building.

STATE BUILDING PROGRAM

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
PROPOSED 1963-64 EXPENDITURES[a]			
Equip business-administration and mathematics building—phase I	–	–	$200,000
This project will provide the first increment of equipment for this facility financed by the Budget Act of 1962.			
Equip life science building—phase III	–	–	324,000
This project will provide the final phase of equipment for this facility financed by the Budget Act of 1960.			
Minor Projects:[b]			
Provide utility engineering study	–	–	10,000
Replace sewer lines	–	–	10,000
Remodel and equip photography laboratory	–	–	40,000
Remodel room 115, chemistry-geology building	–	–	9,000
Remodel room 114, geology department	–	–	15,000
Provide sun control, industrial arts building	–	–	16,000
Equip and install chemistry equipment	–	–	15,000
Alteration and improvement projects of $5,000 or less	–	–	6,300

San Fernando Valley State College

San Fernando Valley State College became a separate state college July 1, 1958, by authority of Chapter 2265, Statutes of 1957. This college offers programs in teacher training, liberal arts, science and engineering. The campus, located in Northridge, currently comprises 222 acres, with additional property in the process of acquisition.

An enrollment of 9,000 regular students (FTE) is anticipated for 1966-67. Existing and funded capacity totals 9,791 regular students (FTE).

This budget provides for equipment for classroom building No. 1 and the engineering program, and land acquisition.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Equip classroom building No. 1—phase I	–	–	$434,000
This project will provide for the first increment of equipment for this facility financed by the Budget Act of 1961.			
Initial complement of equipment—engineering—phase III	–	–	112,500
This project will provide for equipment to serve the engineering program housed temporarily in the science building. This equipment will be transferred to the engineering building upon its completion.			
Land acquisition	–	–	195,700
This project will augment the amount appropriated by the Budget Act of 1961.			
Minor Projects:[b]			
Alteration and improvement projects of $5,000 or less	–	–	7,000

San Francisco State College

San Francisco State College, first established in 1899, now occupies a site of 93 acres between 19th Avenue and Lake Merced Boulevard in San Francisco. This college is a 5-year fully accredited college with programs in liberal arts, occupational and preprofessional curricula and teacher education.

An enrollment of 11,500 regular students (FTE) is anticipated in 1966-67. Existing and funded capacity totals 7,462 regular students (FTE).

This budget provides equipment for the psychology-air science building, construction of a classroom building and construction of a music facility.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM			
PROPOSED 1963-64 EXPENDITURES[a]			
Equip psychology-air science building	–	–	$212,200
This project will provide equipment for the psychology-air science building financed by the Budget Act of 1962.			
Construct classroom building No. 3 addition	–	–	1,427,000
This project provides a general classroom addition with a capacity of 1,069 students (FTE).			
Construct music facility	–	–	200,000
This project will provide for a music classroom for 600 students (FTE) in an interior court of the existing music building.			
Minor Projects:[b]			
Equip language laboratory	–	–	5,500
Provide alterations for bio-chemistry laboratory	–	–	9,100
Remodel arts and industries building for storage	–	–	24,300
Improve handball courts	–	–	22,000
Alteration and improvement projects of $5,000 or less	–	–	9,700
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES[a]			
Working drawings for psychology and air science building	$60,000	–	–
Working drawings for music speech building addition	90,000	–	–

San Jose State College

The San Jose campus was established in 1870 and is a 5-year fully accredited college with programs in teacher education, occupational and preprofessional curricula. The college is located on a 127-acre site in the City of San Jose. An enrollment of 15,100 regular students (FTE) is anticipated for 1966-67. Presently existing and funded capacity totals 12,768 regular students (FTE).

This budget includes equipment for the engineering building and the construction of a science building.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Equip engineering building—phase II	–	–	$750,000
This project will provide the second increment of equipment for this facility financed by the Budget Act of 1958.			
Construct science building No. 2	–	–	5,240,000
This project will provide for a multistory building to furnish the laboratory and specialized facilities in science. This building will house a total of 410 students (FTE).			
Minor Projects:[b]			
Construct volatile chemical storage area	–	–	9,000
Construct steam line addition	–	–	10,000
Improve lighting in reading room of library	–	–	24,000
Provide addition to program clock system	–	–	40,200
Alteration and improvement projects of $5,000 or less	–	–	8,000

ESTIMATED 1961-62 AND 1962-63 EXPENDITURES[a]

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Construct classroom building No. 1	–	$2,400,000	–
Working drawings for residence hall cafeteria	–	42,800	–
Remodel tower hall	–	188,798	–
Provide campus street lighting	–	94,200	–
Equip education building	–	150,000	–
Equip women's gymnasium addition	–	38,000	–
Equip multi-story garage	–	30,000	–
Equip engineering building—phase I	$803,217	1,196,783	–
Equip aeronautics building	69,079	131,211	–

Sonoma State College

Sonoma State College was established by Chapter 66, Statutes of 1960, First Extraordinary Session. It opened in the summer of 1961 in rented quarters near Cotati, in Sonoma County.

The offerings in the fall of 1962 included teacher training, liberal arts and general education with curriculums leading to the bachelor of arts degree in several fields. Lower division students will be admitted in the fall of 1963.

Planning is going forward for the first buildings on the permanent campus which was acquired in 1960 and is located 2 miles east of Cotati.

An enrollment on 1,475 regular students (FTE) is anticipated in 1966-67. The projects in this budget will provide the initial capacity. This budget provides for initial equipment for physical education, construction of a classroom building, science building, boiler plant, an initial complement of library books, site development and working drawings for a music classroom building, gymnasium and cafeteria. See page 245 for a summary of the library book program.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Initial complement of equipment—phase II This project will provide for the initial complement of equipment for the expansion of programs being offered in temporary facilities. This equipment will be moved to the permanent buildings when they are completed.	–	–	$160,200
Equip outdoor physical education facilities and fieldhouse This project will provide the equipment for the construction projects financed by the Budget Act of 1962.	–	–	43,800
Construct classroom building number 1 This project will provide for a general classroom building housing 1,121 students (FTE) and offices for 52 faculty members. Initially the college library and administrative offices will will also be provided in this building.	–	–	2,830,000
Construct boiler plant This project will provide for the central heating unit for this campus.	–	–	776,000
Construct science building number 1 This project will provide for a science building housing 510 students (FTE) and offices for 30 faculty members. This building will include facilities for both physical and biological sciences with associated auxiliary areas.	–	–	2,828,000

South Bay State College

South Bay State College was authorized by the Legislature by Chapter 65, Statutes of 1960, First Extraordinary Session. It is scheduled be become a fully accredited 5-year state college with programs designed to meet the needs of the area which it will serve. Five million dollars has been appropriated for the purchase of a permanent site. This budget will provide for master planning and initial site development and an initial complement of library books. See page 245 for the summary of the state college library book program.

It is now planned to open this college in the fall of 1965 in temporary facilities on the permanent site. An enrollment of 500 regular students (FTE) is estimated in 1965-66 and 750 regular students (FTE) in 1966-67.

Stanislaus State College

Funds for site acquisition for a new state college in Stanislaus County were appropriated by Chapter 1681, Statutes of 1957. On December 9, 1959, the State Public Works Board selected a site of 220 acres 1 mile north of the City of Turlock and the property has been acquired.

Stanislaus State College opened classes on September 10, 1960 in rented facilities on the Stanislaus County Fairgrounds. Site development projects are now under way on the permanent site of 220 acres. An enrollment of 1,400 regular students (FTE) is anticipated for 1966-67. Existing and funded capacity totals 945 regular students (FTE).

This budget includes site development, working drawings for a music classroom building, working drawings for a gymnasium, equipment for a classroom building and a library building and an initial complement of library books. See page 244 for the summary of the state college library program.

STATE BUILDING PROGRAM

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
PROPOSED 1963-64 EXPENDITURES [a]			
Equip classroom building No. 1—phase I	–	–	$100,000
This project will provide the equipment for the various instructional areas now being taught in temporaries and will eventually be utilized in classroom building No. 1 financed by the Budget Act of 1962.			
Equip library building—phase I	–	–	50,000
This project will provide furniture and shelving necessary to the library program now being housed in temporaries and will be transferred to the library building financed by the Budget Act of 1962.			
Site development—phase II	–	–	1,003,000
This project will provide for additional portions of the utility distribution system, parking for 250 spaces, roadways, walkways, landscaping, and campus lighting necessary for the initial complement of buildings.

California State Polytechnic College

State Polytechnic College provides accredited educational programs at the collegiate level in agriculture, engineering, and the arts and sciences.

The campus at San Luis Obispo is located on a site of 2,838 acres which includes agricultural land. An enrollment of 6,900 regular students (FTE) is anticipated for 1966-67. Existing and funded capacity totals 6,073 regular students (FTE). This budget includes working drawings for an addition to the science building and participation with the City of San Luis Obispo in the construction of water treatment facilities.

The Kellogg-Voorhis campus of 1,068 acres is located near Pomona. An enrollment of 5,300 regular students (FTE) is anticipated for 1966-67. Existing and funded capacity totals 5,708 regular students (FTE). This budget provides for the construction of a gymnasium and equipment for the music, speech, drama building, engineering addition and swimming pools.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
San Luis Obispo Campus:			
Working drawings for biological science addition	–	–	$33,500
This project will provide laboratories, lecture rooms, and faculty offices related to the science program with capacity for 525 students (FTE).			
Site development	–	–	420,000
This project will provide funds for participation in the city water expansion program.			
Minor Projects:[b]			
Provide metal-working equipment	–	–	10,300
Remodel mechanical engineering laboratory	–	–	7,100
Provide electrical capacity—mechanical engineering laboratory	–	–	7,800
Replace power supply—air conditioning building	–	–	9,650
Provide sun control—science building	–	–	16,000
Construct storage building—physical science	–	–	6,000
Construct restroom—agriculture area	–	–	5,756
Alteration and improvement projects of $5,000 or less	–	–	15,308
Kellogg-Voorhis Campus:			
Equip music-speech-drama building	–	–	200,000
This project will provide the equipment for the music-speech-drama building financed by the Budget Act of 1960.			
Equip engineering addition—phase I	–	–	400,000
This project will provide the initial complement of equipment for the engineering addition financed by the Budget Act of 1962.			
Construct gymnasium	–	–	2,604,000
This project will provide for the construction of the men's gymnasium with an ultimate seating capacity of 5,000. In addition, this building will house lecture rooms with capacity for 225 students (FTE) and faculty offices.			
Equip pools	–	–	10,800
This project will provide equipment to operate the swimming pools financed by the Budget Act of 1962.			
Minor Projects:[b]			
Construct storm drain	–	–	8,250
Construct weanling barn	–	–	12,000
Construct storage building	–	–	6,000
Construct lambing barn	–	–	5,300
Construct corporation yard addition	–	–	30,000
Alteration and improvement projects of $5,000 or less	–	–	6,650

MARITIME ACADEMY

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

This school is located at Vallejo and will have an average enrollment of 250 students in 1963-64. Permanent facilities consist of two classroom buildings, engineering building, administration building, messhall, residence hall, and a gymnasium with pool.

The construction program proposed for 1963-64 consists of equipment for the engineering building and construction funds for a corporation yard. Funds have been previously provided for the equipment, but it was inadvertently not acquired prior to the termination of the appropriation.

Forty-nine thousand dollars was appropriated in 1962-63 for the 1st phase of a corporation yard at the academy. It was anticipated that this amount would be sufficient if a used prefabricated building were obtained at a reasonable cost. Further study has shown that the savings anticipated by this procedure will not materialize, therefore, the 1963-64 program includes $95,000 for the construction of the 1st phase of a corporation yard. The funds available from the 1962-63 fiscal year are being reverted.

DEPARTMENT OF EMPLOYMENT

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

There is a continuing need for alterations and additions to existing buildings essential to provide space needs for program operations and to protect the investment of the State in the existing land and structures. Buildings previously constructed were built wth the expectation that they would be adequate for 10 years. This has been correct in a number of locations, however, accelerated growth in other communities has made other buildings inadequate in less than a 10-year period. In the light of these developments and the forecasts of the future, construction of additional buildings and additions to existing buildings is imperative. The program also provides for the acquisition of land for future expansion and the construction of adequate off-street parking facilities for the public.

Within the scope of this need, an appropriation of $633,380 is proposed from the Department of Employment Contingent Fund for the fiscal 1963-64 for the following projects:

1. Construction, Building Addition—Stockton
2. Construction, Building Addition—Bakersfield
3. Alterations, Employment Building—Sacramento
4. Preliminary Plans, 1964-65 Projects and 2 minor projects

In the 1961-62 Capital Outlay Program funds were appropriated for the acquisition of a building site and the construction of an office building at Berkeley. Reorganization of the San Francisco Bay Area Metropolitan offices made it necessary to delete Berkeley as a location for a Department of Employment State Building as there is a good possibility that the operations of this office will be decreased at a future dat through the transfer of a portion of the workload to another location. It was decided that it is in the best interest of the State to continue to lease premises at Berkeley.

In the 1962-63 Capital Outlay Program funds were provided to construct a new office building in San Francisco. Since then a nationwide reorganization of metropolitan area offices has been taking place, and pending completion of this change, construction of this office has been deferred.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES [1]

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Construct building addition—Stockton	–	–	$280,560
The existing building was planned to provide for space needs during the 10-year period 1952-1962. Growth has occurred as projected and now an additional 7,830 net square feet are required in order to provide for space needs through 1974.			
Construct building addition—Bakersfield	–	–	192,720
The existing building was planned to provide for space needs during the 10-year period 1952-1962. Growth has occurred as projected and now an additional 5,710 net square feet are required to provide for space needs through 1974.			
Alter Employment Building—Sacramento	–	–	100,000
The Departments of Social Welfare and Fish and Game are scheduled to move from the Sacramento Employment Building. Social Welfare will move upon completion of the new Motor Vehicle Building and Fish and Game upon completion of the Retirement Building. Upon the removal of these agencies, major changes will be made in space assignments of Department of Employment operations.			
Preliminary Plans	–	–	20,000
For cost estimates of projects anticipated for 1964-65 Fiscal Year.			
Minor Projects: [1]			
Alter existing building—Employment Building—Sacramento	–	–	20,000
Remodel Dishwashing Room in Employment Building, Sacramento	–	–	20,100

General Activities

The 1963-64 Capital Outlay program contemplates the development of working drawings for a new office building in Sacramento, designated as number 8 on the Capitol Building and Development Plan. Provision is also made for the relocation of the Supreme Court headquarters in Sacramento, in keeping with the overall development plan. These programs will be ultimately financed from the Public Building Construction Fund. In the interim, funds will be advanced from the General Fund for working drawings to be recovered from construction funds.

The Capital Outlay program for 1963-64 also provides for an augmentation of funds available for the construction of the Governor's Mansion in light of most recent project estimates. Added cost of site acquisition for parking and office building construction needs is anticipated in both Sacramento and Stockton.

Alterations to existing state buildings are contemplated in Sacramento and Los Angeles to allow for expanding office space needs and updating of buildings.

With the opening of the new Retirement Building in Sacramento, provision is made for the initial equipment complement.

One minor Capital Outlay project is also included to paint the exterior of the State Garage in Sacramento.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

State Fair and Exposition

The major consideration in the Capital Outlay program of the State Fair is the proposal to relocate the physical plant to a new site in the north area of Sacramento. Chaper 1071, Statutes of 1957, appropriated $3,747,843 in 1957-58 and a like amount was appropriated in 1958-59 from the General Fund. Together with the proceeds from the sale of present facilities, this money was to be available for the new fair site program. In addition, Chapter 1072, Statutes of 1957, authorized the State Public Works Board to issue either certificates or revenue bonds in the amount of $6,500,000 annually for a period of 2 years, to finance further construction of buildings and facilities for a new State Fair. This initial authorization has been extended by subsequent action. Item 323.1, Budget Act of 1960, extended the availability of Chapter 1071, Statutes of 1957. Availability of the funds was further extended by Section 19.7 of the Budget Act of 1961. This budget does not anticipate expenditures of the major portion of the funds from these sources on the new fair site in the 1962-63 or the 1963-64 fiscal year. At this time a major study of the overall program is being finalized so the current budget makes provision for continuing availability of the authority.

California Museum of Science and Industry

The California Museum of Science and Industry is located in Exposition Park, in Los Angeles, and contains permanent and special short-term audio-visual educational exhibits dedicated to the purpose of educating, informing, inspiring and enriching visitors by demonstrating the industrial and scientific progress of the State of California, and to illustrate and communicate the importance of industries, industrial enterprises, resources and products of every kind and nature as a vital factor in the economy of the State of California.

The preliminary research and design of the Hall of Health is now completed. Scheduled to be opened to the public are permanent exhibits on electricity, mechanical science, electronic communications and physics and chemistry. Commitments are being received from private industry to sponsor these exhibits. In September 1962 the museum received the exhibit of the Federal Aviation Agency from the United States government. This was the first public display of the exhibit in the United States.

Phase I, remodeling of the museum-owned National Guard Armory, which will house the new Space Museum, was completed in 1962. The museum was authorized by the Legislature in 1959 and is being developed with major participation from leaders in aerospace industries. Phase II funds for replacing roof is included in this budget. The roof has been condemned by the State Division of Architecture and must be replaced to properly house exhibit gifts from aerospace industries and United States government, as well as exhibits constructed from private funds contributed to the museum.

Remodeling of the second floor, east wing of the main museum to house the permanent exhibit on the Science of Aviation was completed in 1962. A major portion of this exhibit was opened to the public. The final portion will be completed early in 1963. This exhibit demonstrated through "storytelling-public participation" the importance of aviation as part of the community and economy of the State of California. This exhibit was financed jointly by the State and private industry on a matching fund basis and is the first of its kind in the United States.

The alterations and improvements to the exterior of the museum main entrance were completed in 1962. This improvement conforms the old museum structure to the developments within the museum complex in accordance with the approved master plan for the "Cultural Area" within Exposition Park. Improvements to fire protection facilities serving the Los Angeles County Museum and California Museum of Science and Industry were completed in early 1962. This project was financed jointly by the State (60 percent) and county (40 percent).

This budget anticipates a reappropriation of funds presently available for land acquisition. Negotiations are progressing satisfactorily to acquire the last parcel of land originally contained in the approved Santa Barbara parking lot program. Because of the complex negotiations involved it appears unlikely that the land will be acquired and subsequently improved in the 1962-63 fiscal year. The balance of funds will finance the acquisition and improvement necessary.

District Agricultural Associations

DISTRICT FAIR CONSTRUCTION PROGRAM

The detailed expenditure of funds available for Capital Outlay at district and county agricultural fairs and citrus fruit fairs are included in this statement for the purpose of showing the total program for capital improvements at fairs in one place. The amount budgeted for Capital Outlay at county agricultural fairs and citrus fairs is reported in Local Assistance for Other Purposes. The Capital Outlay Programs of the State Fair and Exposition and the California Museum of Science and Industry are not included in this section but are shown immediately preceding this section.

Expenditures for Capital Outlay at district and county agricultural fairs and citrus fruit fairs are met from the continuing appropriation made by Business and Professions Code Section 19630, the allocation of which is approved by the Public Works Board. Provision is made to transfer the unused balances appropriated by Business and Professions Code Section 19627 for encouragement of agricultural fairs to meet increased needs for capital expenditures at fairs during 1963-64.

The projects shown for each fair are those included in the recommended 5-year program for fairs.

ACTUAL 1961-62, ESTIMATED 1962-63 AND PROPOSED 1963-64 EXPENDITURES[1]

GENERAL ANALYSIS

The Department of Mental Hygiene currently operates 8 hospitals for mentally ill patients, 4 hospitals for mentally retarded patients, 2 hospitals housing both mentally ill and mentally retarded patients, and 2 training and research institutes in conjunction with the University of California. These facilities are distributed throughout the State.

The Langley Porter Neuropsychiatric Institute which was established for teaching and research, and the necessary clinical provisions connected with these functions is operated by the department in conjunction with the University of California Medical School at San Francisco. A similar facility, the Neuropsychiatric Institute, a part of the Los Angeles Medical School of the University of California, was activated in December 1960, and will operate at a rated bed capacity of 188. With the 117-bed capacity of the Langley Porter Institute, a total institute capacity of 305 beds is available.

During the 1961-62 fiscal year, available beds for mentally ill continued to exceed population. On June 30, 1962, 35,523 beds for mentally ill were available which exceeded by 604 the actual population of 34,919. It had been estimated that capacity would continue to be greater than population. This factor coupled with the increasing need of additional beds for mentally retarded patients resulted in the 1962 Legislature's authorizing the department to convert 1,100 beds for the mentally ill to beds for mentally retarded at DeWitt and Patton. As a result of the above conversion, it is estimated that the mentally ill population will exceed capacity by 60 on June 30, 1963. On June 30, 1964 a favorable balance will again be attained whereby capacity will exceed population by 398 beds. This estimate is based on the anticipated continuing reduction in the hospitalization rate for mentally ill which was 303.2 per 100,000 population in 1950. It is estimated that the rate will be 198 on June 30, 1963 and further reduced to 181 by June 30, 1965. On June 30, 1963, 34,340 beds will be available for an estimated population of 34,400. The loss in bed capacity between June 30, 1962 and June 30, 1964 is 1,225 beds of which 1,100 is attributed to conversion to mentally retarded beds. The balance of 125 is due to remodeling and modernization projects now in

GENERAL ANALYSIS—Continued

progress or funded, and scheduled deactivation projects. During the 1964-65 fiscal year 300 beds will be replaced at Modesto State Hospital. Along with the replacement of beds, facilities for day care and after-care treatment will be included. The tables that follow set forth in detail actual and estimated populations and indicate the latest estimates of capacity resulting from presently funded projects.

Additional mentally retarded patients are admitted as bed capacity and related treatment facilities become available, and a moderate amount of overcrowding occurs in order to fully utilize available resources. As of June 30, 1962, 11,356 beds were available. With the conversion of capacity for mentally ill to that for the mentally retarded in the current year, capacity will reach 12,440 by June 30, 1963. During the 1963-64 fiscal year 786 currently financed additional beds will be activated bringing total capacity to 13,226 on June 30, 1964. A currently financed severely handicapped treatment unit will provide an additional 200 beds in the 1964-65 fiscal year. The tables that follow include population and capacity estimates for the mentally retarded.

A number of major projects are proposed in this budget, chief of which are the 300 bed replacement project at Modesto State Hospital, and provision for new laundry facilities at Camarillo. Other projects provide for necessary remodeling, service facilities ward, air conditioning and equipment for projects nearing completion. These projects are explained in greater detail in the budgets of the various hospitals. Essential minor construction projects are included to correct deficiencies and to improve the physical plant. These projects are also detailed in the individual budgets.

[4] Construction needs in 1965 and 1966 include overcrowding and waiting lists.

DEPARTMENT OF MENTAL HYGIENE—Continued

Langley Porter Neuropsychiatric Institute

This institute, in conjunction with The University of California School of Medicine in San Francisco, operates a research, training, and treatment center in Northern California. It has a rated bed capacity of 117, and in addition operates a large outpatient clinic. Site acquisition funds were appropriated in 1962 for the partial cost of a site on which a replacement of this institute will be constructed. Funds for the second phase of a site acquisition project are proposed to allow the project to proceed in an efficient manner. Minor projects totaling $18,000 are included to correct deficiencies and to improve the physical plant.

DEPARTMENT OF MENTAL HYGIENE—Continued

Mendocino State Hospital

This hospital for the mentally ill had a rated bed capacity of 2,293 on June 30, 1962. Financed remodeling and modernization of wards 7 and F, Phase II, will reduce the rated capacity by 135. The proposed remodeling of ward 15 will result in a further decrease of 10 beds, leaving a capacity of 2,148 in the hospital by June 30, 1965. The major construction program proposed for the 1963-64 fiscal year provides for the alteration of nursing and treatment areas on wards 7 and F. Minor construction projects totaling $53,700 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Remodel and modernize ward 15	–	–	$152,410
Equip remodeled and modernized ward 15	–	–	7,000
This project consists of alterations and additions to a relatively old two-story building together with the necessary equipment items to provide facilities which more nearly conform to present hospital standards.			
Additional alterations, wards 7 and F, phase III	–	–	105,000
Project consists of phase III of alterations and additions to nursing and treatment areas on wards 7 and F to more closely conform to present hospital standards.			
Minor Projects:[b]			
Replace main kitchen roast oven	–	–	24,000
Install ventilation blowers	–	–	8,000
Alteration and improvement projects of $5,000 or less	–	–	21,700

Modesto State Hospital

This hospital for the mentally ill, a former temporary military hospital, had a rated capacity of 2,420 on June 30, 1962. No additional capacity is funded or under construction.

The replacement of 300 existing beds and the addition of a day care and after care treatment facilities are proposed for this institution. The 300 beds will replace existing beds utilized for the psychiatric treatment of those who require short- or long-term hospitalization. Also included are facilities which will provide day care treatment for patients in the early stages of mental disorders and after care treatment for those patients released from the hospital. Working drawings for this unit were appropriated in the Budget Act of 1962. Minor projects totaling $76,650 are included to correct deficiencies and to improve physical plant.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Mental Health Center—phase I	–	–	$3,000,000
This project would provide for the replacement of 300 existing beds for patients housed in temporary military structures and the construction of a day treatment center and an after care facility. Working drawing funds were appropriated in 1962 for the receiving and treatment unit.			
Minor Projects: [b]			
Improvements to medical surgical wards	–	–	8,700
Replace roasting oven—main kitchen	–	–	15,000
Improve pot washing section and scullery—main kitchen	–	–	12,000
Improve patients' toilets and showers	–	–	10,000
Improve dining room floor C-6	–	–	5,500
Alteration and improvement projects of $5,000 or less	–	–	25,450

Sonoma State Hospital

This hospital for the mentally retarded had a rated bed capacity of 3,487 on June 30, 1962. Presently authorized projects will not provide additional capacity until the 1964-65 fiscal year.

Major projects proposed in the 1963-64 fiscal year include the equipment for previously authorized wards and treatment unit for the severely handicapped patients, the replacement of a boiler, alterations and additions and new X-ray equipment for the radiology unit, air conditioning of Tallman Nursery and Powers Cottage and the improvement of electrical services. Minor construction projects totaling $36,450 are included to correct deficiences and to improve the physical plant.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM			
PROPOSED 1963-64 EXPENDITURES [a]			
Equip wards and treatment unit for severely handicapped	–	–	$166,000
To provide equipment for this previously authorized addition.			
Replace boilers	–	–	99,585
This project is to provide for the replacement of two existing boilers, one 30 years old with a 12,000 lbs. capacity and one 34 years old with an 11,500 lbs. capacity, with one 30,000 pounds per hour boiler in order to meet the present hospital demands and the future demand of new facilities authorized.			
Air conditioning of Tallman Nursery and Powers Cottage	–	–	167,750
This project is to air condition two ward buildings, one housing extremely handicapped infants and the other housing young, hyperactive children of both sexes. The project will provide refrigerated air circulation, ventilation, air cleaning, and maintenance of humidity control for the health and comfort of the patients.			
Alterations and additions to radiology (Chamberlain Hospital)	–	–	135,000
Equip radiology with new X-ray equipment	–	–	50,000
To provide alterations and additions to the present radiology section for the installation of a 500 milliampere x-ray machine and allied units to adequately meet the needs of the hospital's radiology requirements. Funds for purchase and installation of new X-ray equipment also are included.			
Additional electrical services, phase II	–	–	75,000
This project is the second phase in work required to increase and improve electrical services to meet the needs of the hospital.			
Minor Projects: [b]			
Install water heater—laundry	–	–	6,500
Install dishwashers	–	–	9,350
Alteration and improvement projects of $5,000 or less	–	–	20,600

---

[a] From State Construction Program Fund unless otherwise indicated.

[b] Minor projects from General Fund unless otherwise indicated.

DEPARTMENT OF MENTAL HYGIENE—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

Multipurpose Psychiatric Centers

A total of $4,750,000 was appropriated in the Budget Act of 1962 for planning, land acquisition, and construction of three multipurpose psychiatric centers, contingent upon participation by local governmental units in the construction and/or operation and/or land acquisition of the centers. These multipurpose centers will offer a community-based alternative to state hospitalization of the mentally retarded in the areas where they are located and thus provide a measure of relief to those on the waiting lists for admission to state hospitals for the mentally retarded. The centers will provide for a minimum of the following five services: 24-hour hospital diagnosis and care; day treatment; outpatient diagnosis and treatment; parent counselling; and 24-hour crisis assistance. Twenty-four hour care will be primarily for those cases whose condition is improvable or for those patients for whom a short period of hospital care is required until the patient can be transferred to a long-term facility.

Proposals for participation in the program are now being worked out in cooperation with interested local governmental units.

DEPARTMENT OF PUBLIC HEALTH

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

The Department of Public Health, in co-operation with local health departments, is responsible for the prevention of disease and the provision of a healthful environment for the people of California.

Additional space is required to provide for present needs, normal expansion, and special project research. Of primary need, is expansion of the Division of Laboratories facilities; it provides laboratory services to the department and local health departments without laboratories; and also more advanced services to local areas with laboratories.

A cancer research facility, financed entirely out of federal funds, is being planned for construction in Berkeley during 1962-63.

The need for additional office space in Berkeley will be alleviated by the projected moving of the administrative offices of this department together with the other departments of the Health and Welfare Agency to an office building to be constructed in Sacramento.

A review of the total space needs of the Department of Public Health in Berkeley is being made with the intention of providing for any necessary alterations or additions in the 1964-65 budget year.

DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL

GENERAL ANALYSIS

This statewide law enforcement agency functions through a Sacramento headquarters, with field offices strategically located throughout the State. Its jurisdiction is principally limited to streets and highways outside incorporated areas.

This budget provides for the construction of an annex to the headquarters building in Sacramento, together with the necessary alterations to the existing building. Funds are also provided for the construction of an area office building at Truckee. An additional $52,910 is proposed for 1963-64 to augment a previous appropriation for the construction of an office building at Merced. Site acquisition funds are provided for an office at Bishop. Also proposed for 1963-64 is an additional $15,000 to augment a 1962-63 appropriation for the purchase of a site at Truckee.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
STATE BUILDING PROGRAM			
PROPOSED 1962-63 EXPENDITURES [1]			
Purchase of site—Bishop	–	–	$50,000
The present leased facility at Bishop is not satisfactory due to space deficiencies. Construction of an area office building is required to meet these deficiencies and future requirements. This construction will also provide office space for the Department of Motor Vehicles in this area.			
Purchase of site—Truckee	–	–	15,000
It is necessary to augment a 1962-63 appropriation for the purchase of a site for this area office.			
Construct annex and alterations to Sacramento headquarters office building	–	–	1,990,000
To provide for the construction of an annex and alterations to the existing Sacramento headquarters office building which is required to meet existing space deficiencies and to permit orderly expansion.			
Construct area office building—Merced	–	–	200,910
To provide for the construction of an office building at Merced. Of this amount $148,000 was appropriated in 1961-62, requiring an additional appropriation of $52,910 in the 1963-64 fiscal year.			
Construct area office building—Truckee	–	–	234,075
The present leased facilities at Truckee are no longer adequate to serve this area due to the increased number of assigned traffic officers. This construction will also provide office space for the Department of Motor Vehicles in this area.			
Minor Projects:			
Motorcycle accident investigation training area—Academy	–	–	36,500
Roadway and curbs—Academy	–	–	17,425
Storm drainage—Academy	–	–	12,500
Alterations and improvements of $5,000 or less	–	–	12,440
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES [1]			
Purchase of site, Truckee office building	–	$10,000	–
Working drawing—Truckee office	–	8,000	–
Construction of Alta Substation	–	99,500	–
Construct office building—Fresno—phase II	–	99,000	–
Incorporation with Sacramento City drainage system—Academy	–	211,000	–
Repair skidpan—emergency vehicle operation course	–	15,000	–
Perimeter landscaping—Academy	–	24,320	–
Road improvement—Academy	–	7,500	–
Sewage tie-in—Academy	–	10,450	–
Fresno building	$240,000	–	–
Purchase of site for Fresno office	491	30,404	–
Alta substation site	4,556	5,444	–
Working drawings—Alta substation	6,000	–	–
Working drawings—Merced	–	8,000	–
Working drawings—Fresno	10,000	–	–
Minor projects	—1,770 [d]	–	–
TOTAL EXPENDITURES, CAPITAL OUTLAY *(Motor Vehicle Fund)*	$259,277	$528,618	$2,568,850

DEPARTMENT OF MOTOR VEHICLES

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

This service and tax collection agency, headquartered in Sacramento, functions through a network of field offices located in population centers throughout the State. During the budget year, the department will register and collect taxes and fees on 10,077,000 vehicles and issue new renewal drivers licenses to about 2,887,000 applicants.

This department's capital outlay program provides for state-owned buildings where it has been determined that adequate privately owned leased facilities at reasonable cost are not available for the department to provide satisfactory services to the people in the area. This budget provides for purchase of sites for state-owned office buildings and parking facilities near Berkeley, Montebello, and Palo Alto and for the construction of buildings near San Rafael and Bakersfield. Funds for acquisition of sites for construction items have been provided in prior budgets. The budget also includes funds for working drawings for a building near Palo Alto, to blacktop parking area for the new Sacramento headquarters building and for sidewalk work at the Los Angeles office.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[1]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Purchase of site for office building and parking facilities—Berkeley	–	–	$275,000
The present facilities have become inadequate in office space and parking area. The parking lot is too small to handle the volume of traffic and does not permit an orderly flow of traffic.			
Purchase of site for office building and parking facilities—Montebello	–	–	300,000
The present leased facilities have become inadequate to handle the workload of this office. Because of the crowded conditions, additional office space away from the building was rented in October, 1959, to house driver improvement analysts and registration investigators.			
Purchase of site for office building and parking area—Palo Alto	–	–	250,000
The present leased facilities have become inadequate to handle the workload of this office.			
Construct office building—San Rafael	–	–	251,000
The present leased facilities have become inadequate in office space and parking area. Site acquisition funds were appropriated in the 1962-63 fiscal year. This building will serve an area originally planned to be served by a second office, thereby precluding the necessity of an office at the second location.			
Construct office building—Bakersfield	–	–	347,500
The present leased facilities have become inadequate to handle the workload of this office. Acquisition of a site from previously appropriated funds is expected to be accomplished in the 1962-63 fiscal year.			
Working drawings—Palo Alto	–	–	15,000
Blacktop parking area for new Sacramento Headquarters Building	–	–	55,300
Minor Projects:			
Replace pitted sidewalk adjacent to buildings and parking lot—Los Angeles	–	–	13,852
Alterations and improvement projects of $5,000 or less	–	–	1,000

GENERAL ANALYSIS

The proposed expenditure program for highways is related to allocations of Federal Aid subventions and increased rates and fees for motor vehicle fuel and diesel fuel tax and motor vehicle registration and weight fees, which expired in the 1959-60 fiscal year, but were extended by the 1959 Legislature.

Recapitulation of Proposed Expenditures and Obligations for Construction of State Highways for 1963-64 Fiscal Year, Showing Allocation of Construction Funds by County Group, Pursuant to Section 188, Streets and Highways Code

EXPENDITURE CATEGORY	NORTHERN COUNTY GROUP	SOUTHERN COUNTY GROUP	TOTAL	
Major construction and improvement projects	$143,748,000	$166,012,000	$309,760,000	
Thin blanket program and deferred seal coat	3,000,000	2,000,000	5,000,000	
Traffic stripe, pavement markings and signs	900,000	1,100,000	2,000,000	
Construction engineering	17,300,000	17,800,000	35,100,000	
Minor improvement and betterment	550,000	450,000	1,000,000	
Rights-of-Way	59,798,913	96,218,171	156,017,084	
Preliminary engineering and design	19,800,000	20,000,000	39,800,000	
Bank protection and damage repair—Eel River	100,000	–	100,000	
Contingencies	2,900,000	3,000,000	5,900,000	
Highway planning	1,530,000	1,870,000	3,400,000	
Totals, Reconditioning, Resurfacing and Construction of State Highways [a]	$249,626,913	$308,450,171	$558,077,084	
Building, plants and equipment	4,050,000	4,950,000	9,000,000	
State aid county highways, federal and matching funds [b]	3,000,000	1,350,000	4,350,000	
Federal aid secondary urban extensions [c]	938,000	112,500	1,050,500	
Railroad grade separations [d]	2,250,000	2,750,000	5,000,000	
Totals, Expenditures Subject to Allocations Under Section 188, Streets and Highways Code	$259,864,913 (45%)	$317,612,671 (55%)	$577,477,584 (100%)	

---

[a] Excludes honor camp construction which is not subject to allocations by county group pursuant to Section 188.7, Streets and Highways Code.

[b] Included in county group allocation pursuant to Section 2210.5, Streets and Highways Code.

[c] Included in county group allocation pursuant to Section 143.3, Streets and Highways Code.

[d] Railroad grade separations allocation to cities and counties pursuant to Section 190, Streets and Highways Code.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
RECONCILIATION WITH APPROPRIATIONS			
State Highway Fund			
APPROPRIATIONS			
Continuing appropriation prescribed by Section 183, Streets and Highways Code (Expenditures)	$219,496,306	$340,954,084	$270,130,834
Bank Protection and Damage Repair Along the Eel River:			
Budget Act appropriation	–	100,000	–
Prior Year Balance Available:			
Budget Act of 1961, Item 340.1	–	–	100,000
Balance available in subsequent year	–	—100,000	–
Total Expenditures, Eel River	–	–	$100,000
San Diego-Coronado Crossing Engineering and Design Studies:			
Budget Act appropriation, 1962—Item 346.1	–	$3,075,000	–
Prior Year Balance Available:			
Budget Act of 1961, Item 402.2	$300,000	174,036	$2,075,000
Balance available in subsequent year	—174,036	—2,075,000	—1,000,000
Total Expenditures, San Diego-Coronado Crossing	$125,964	$1,174,036	$1,075,000
Tiburon Crossing Engineering Studies:			
Budget Act appropriation 1961, Chap. 2142	$200,000	–	–
Prior Year Balance Available:			
Budget Act of 1961, Chap. 2142	–	$60,736	–
Balance available in subsequent year	—60,736	–	–
Subtotal	$139,264	$60,736	–
Unexpended balance, savings	–	—39,566	–
Total Expenditures, Tiburon Crossing	$139,264	$21,170	–
Highway Safety Research:			
Budget Act appropriation	–	–	$150,000
Chapter 2110, Statutes of 1961	$100,000	–	–
Prior year balance available, Chapter 2110, Statutes of 1961	–	$90,025	–
Balance available in subsequent year	—90,025	–	–
Total Expenditures, Highway Safety Research	$9,975	$90,025	$150,000
TOTAL EXPENDITURES *(State funds)*	$219,771,509	$342,239,315	$271,455,834
Note:			
In addition to the amounts expended for state highways the following amounts are expended for or on behalf of local streets and highways and other agencies:			
Local Streets and Highways:			
State Funds:			
City streets construction and maintenance (Sections 194 and 2107, Streets and Highways Code)	$33,465,157	$36,616,548	$38,142,708
City streets, engineering administration (Section 2107.5, Streets and Highways Code)	1,199,612	1,500,000	1,350,000
Grade crossing protection, Chapter 1739, Statutes of 1953, Budget Acts of 1956 and 1958, and Chapter 2042, Statutes of 1959, Budget Act of 1960	230,850	300,000	270,705
Railroad grade separation, Chapter 2091, Statutes of 1957	3,303,419	4,286,056	5,000,000
Aid to counties, federal aid matching (Section 22105, Streets and Highways Code)	3,612,763	4,215,828	4,350,000
Federal aid secondary urban extensions (Section 143.3 of Streets and Highways Code)	1,356,143	1,414,500	1,050,500
Totals, State Funds	$43,167,944	$48,332,932	$50,163,913
Other Funds:			
County Highway Construction—Federal Aid Secondary:			
Federal funds	$8,428,072	$14,154,313	$8,884,750
Contributions—FAS project (counties)	3,130,087	1,667,889	–
Contributions—FAS urban extension (cities)	152,916	1,600	–
Total County Highway Construction—FAS	$11,711,075	$15,823,802	$8,884,750
Emergency Damage Repairs—County and Other Agencies:			
Federal funds	$322,123	$153,124	–
Contributions	—34,419	72,413	–
Total Emergency Damage Repairs	$287,704	$225,537	–
Totals, Other Funds	$11,998,779	$16,049,339	$8,884,750
TOTALS, LOCAL STREETS AND HIGHWAYS	$55,166,723	$64,382,271	$59,048,663
Work for other agencies	1,177,148	550,222	–
TOTALS, LOCAL STREETS AND HIGHWAYS AND OTHER AGENCIES	$56,343,871	$64,932,493	$59,048,663

Detail of Major Project Allocations for Construction of Highways and Bridges as Recommended by the California Highway Commission for the 1963-64 Fiscal Year

COUNTY	ROUTE	DESCRIPTION	APPROXIMATE MILEAGE	ESTIMATED COST
		NORTHERN GROUP OF COUNTIES		
Alameda	5	Park Boulevard to Buell Street; landscape	2.9	$360,000
Alameda	5, 75, 226	Route 5 to 0.1 mile east of Route 206-227 (portions)—portion of Route 5, 75, 226 Interchange	0.6	6,235,000
Alameda	75, 206, 227	West of Route 227 to Caldecott Tunnel (portions); Temescal Interchange (portion)	1.5	3,750,000
Alameda, Contra Costa	107, 5	0.4 mile south of Route 5 to 1 mile north of Alameda/Contra Costa County Line; 6-lane freeway	3.0	7,500,000
Alameda	227	0.2 mile south to 0.3 mile north of Moraga Avenue. (Moraga Avenue Interchange); landscape	0.5	45,000
Alpine	34	Amador County Line to 0.1 mile east of Carson Pass Summit; 2-lane, 28-foot section	5.3	180,000
Amador	65	Calaveras County Line to 1.3 miles north; 2-lane, 32-foot section	1.3	850,000
Butte	3	East Ninth Street to East First Avenue; landscape and tree planting	1.1	95,000
Butte	21, 87	South of South Oroville Separation to Wicks Corner; tree planting	6.5	10,000
Calaveras	24	Ganns Meadow to 5.5 miles east; 2-lane, 32-foot section	5.5	1,050,000
Calaveras	65	Route 24 to Mokelumne Hill; 2-lane, 32-foot section	6.5	600,000
El Dorado	11	0.2 mile west of Fairgrounds Interchange to 0.2 mile east of the west city limits of Placerville; tree planting	1.9	5,000
El Dorado	11	1.6 miles east of Placerville to 0.3 mile west of Five Mile Terrace; 4-lane, 56-foot section	1.7	420,000
El Dorado	11	0.3 mile east of Camino to 1.1 miles east of Sly Park Road; 4-lane freeway	6.6	4,590,000
El Dorado	65	0.8 mile south of Greenwood Creek to 0.4 mile north of South Fork American River; 2-lane, 28-foot section	1.5	170,000
Glenn	45	1 mile to 0.5 mile west of Butte Creek; 2-lane, 28-foot section	0.5	200,000
Humboldt, Del Norte	1	0.9 mile south of Del Norte County Line to 1.1 miles south of Klamath; clear and grade for ultimate 4-lane freeway	5.0	4,100,000
Humboldt	1	0.3 mile south to 0.2 mile north of Bear Gulch Bridge; widen bridge and realign approaches	0.4	75,000
Humboldt	1	Eureka to Arcata; tree planting and functional planting	6.0	25,000
Humboldt	1	Mad River to 0.2 mile north of Little River; 4-lane freeway	7.9	4,950,000
Humboldt	1	3.2 to 6.4 miles north of Arcata; widen to 28 feet and resurface	2.7	65,000
Humboldt	35	1.1 miles east of Hydesville to 0.5 mile west of Carlotta; 2-lane, 32-foot all paved section	0.7	220,000
Humboldt	35	1.3 to 10.0 miles east of Bridgeville (portions); widen and ease curves on existing alignment (casual labor)	1.0	100,000
Humboldt	56	Van Ness Avenue in Ferndale to 0.5 mile south of Fernbridge; initial 2-lane in 4-lane Right of Way	3.3	850,000
Kings	10	0.3 mile west of Route 125 to 10th Avenue, and connection on 10th Avenue to existing Route 10; 4-lane freeway and expressway	10.4	4,650,000
Kings, Fresno	125	North Fork of Kings River to 0.1 mile north of Elkhorn Avenue; 2-lane expressway and 4-lane freeway at county line	7.2	2,050,000
Lake	89	Anderson Creek Bridge; relocate bridge and approaches	0.6	200,000
Lake	89	Bridges No. 14-24, No. 14-25, and No. 14-26; replace 3 bridges and extend 8 culverts	–	150,000
Lake	243	Seigler Creek Bridge; replace bridge	–	25,000
Lassen	29, 73	Mesa Street to 1.0 mile southeast of Johnstonville; 2-lane expressway	4.8	1,030,000
Madera	126	0.4 mile north to 4.0 miles north of Fresno County Line (portions); reconstruct to raise grade	3.6	60,000
Marin	1	Golden Gate Bridge to Waldo (portions); lane adjustment, resurfacing and signs	3.5	300,000
Marin	1	Atherton Avenue to Sonoma County Line (portions); shoulders and underdrains	–	140,000
Marin	1	North end of San Rafael Viaduct to 0.2 mile north of Willow Avenue; median barrier	1.9	120,000
Marin	1	0.6 mile south to 0.4 mile north of Freitas Parkway; landscape	1.0	100,000
Mendocino	1	Robinson Creek to 0.2 mile north of State Street; structures and approaches for 4-lane freeway	3.8	2,200,000
Mendocino	1	0.3 mile south of Willits to California Western Railroad and Navigation Company Crossing; widen to 4-lane city street (State's share) (city's share $37,000)	1.4	410,000
Mendocino	1	1.0 to 3.5 miles north of Laytonville; 2-lane, 32-foot all paved section with truck lane	2.3	500,000
Mendocino	56	1.3 miles south of Big River to Russian Gulch; 2-lane, 32-foot all paved section on 4-lane right of way	2.8	775,000
Mendocino	56	DeHaven Creek Bridge No. 10-138; replace bridge and approaches, 2-lane, on ultimate alignment	1.1	350,000
Mendocino	56	Millbank Creek; replace bridge with culvert and fill	0.2	35,000
Merced	18	At Kibby Road; drainage and improve intersection	0.2	50,000
Merced, Santa Clara	32	1.0 mile west of Merced County Line to 1.8 miles west of Route 121; 4-lane expressway (State's share) ($100,000 included in 1962-63 fiscal year budget)	12.4	5,000,000
Merced	32	Ortigalita Road to Nickel Street (portions); 4-lane city street section	1.5	400,000
Merced	238, 32	0.3 mile south to 1.3 miles north of Route 32 (portions); structures for freeway over San Luis Canal (State's share)	1.6	960,000
Modoc	28	4.5 miles to 8.0 miles east of Adin; 2-lane expressway	3.3	665,000

Detail of Major Project Allocations for Construction of Highways and Bridges as Recommended by the California Highway Commission for the 1963-64 Fiscal Year—Continued

COUNTY	ROUTE	DESCRIPTION	APPROXIMATE MILEAGE	ESTIMATED COST
		NORTHERN GROUP OF COUNTIES—Continued		
Monterey	2	San Luis Obispo County Line to 1.6 miles north of Gate 1 of Camp Roberts; 4-lane freeway	2.4	$1,270,000
Monterey	2	0.2 mile south of North Main Street to 0.5 mile north of Espinosa Road; 4-lane freeway	4.5	2,850,000
Monterey	56	Vicente Creek Bridge No. 44-57; replace 2-lane bridge and approaches	0.4	445,000
Monterey	56	1.2 miles south of Pajaro River to Santa Cruz County Line; grade for 4-lane freeway	1.2	600,000
Monterey	118	Main Street to 0.1 mile west of west city limits; widen and resurface city street section	1.2	220,000
Napa	49	Old Sonoma Road to 0.2 mile south of Trancas Street; 4-lane freeway to Napa Creek and resurface existing 2-lanes, Napa Creek to Trancas Street	2.2	980,000
Nevada	25	1.5 miles north of the South Fork of the Yuba River to North San Juan (portions); 2-lane, 28-foot section (casual labor)	–	50,000
Nevada	37	Soda Springs to 1.0 miles west of junction Routes 37 and 38; pave 4-lane freeway	10.6	5,455,000
Nevada, Placer	38	3.6 miles south to Donner Creek Underpass; 2-lane resurface and drainage	3.6	190,000
Plumas	83	1.7 miles to 5.4 miles north of Sierra County Line (portions); 26-foot section (casual labor)	0.7	50,000
Plumas	83	0.4 to 2.0 miles north of Canyon Dam; 2-lane expressway	1.3	570,000
Sacramento	4	Stevenson Avenue to Sacramento Boulevard; functional planting, landscape and tree planting	4.9	315,000
San Benito	22	0.3 mile west of west city limits of San Juan Bautista to 0.3 mile west of San Benito River (portions); tree planting	3.2	3,000
San Francisco	2	0.1 mile east of Milton Street to Route 68 Interchange; landscape	1.1	110,000
San Francisco	224	Howard Street to Vallejo Street; Clay-Washington ramps	0.4	1,350,000
San Joaquin	5	Kasson Road to San Joaquin River; resurface existing pavement	3.3	70,000
San Joaquin	66	Route 5 to 0.3 mile east of west city limits of Manteca; shoulders	3.9	100,000
San Joaquin	66	Through Escalon; 40-foot city street section and channelize (State's share)	1.2	75,000
San Mateo	56	Gateway Drive Undercrossing; undercrossing and approaches	–	270,000
San Mateo	68	Whipple Avenue Overcrossing to 5th Avenue (portions); levelling and resurfacing freeway lanes	–	850,000
San Mateo	105	North of West Hillsdale Boulevard Extension to South Delaware Street; landscape	1.8	225,000
San Mateo	214	Route 214; Cypress Avenue (south of Route 2) to Route 68; 4-lane expressway—Route 239; 0.15 mile east of Woodside Road (existing Route 107) to Woodside Road; grading only (co-operative project—total cost $2,250,000) State's share	1.4	1,250,000
San Mateo	239	Bridge over Stanford 2-mile accelerator; freeway bridge	–	500,000
San Mateo, San Francisco	239, 56, 225	Route 239/225—0.4 mile south of Eastmoor Avenue in Daly City to 0.3 mile east of Orizaba Avenue in San Francisco; 8- and 10-lane freeway on Route 239, and 6-lane freeway on Route 225. Route 56—St. Francis Boulevard to Route 239; rough grading, frontage road and drainage structures for freeway	3.9	10,100,000
Santa Clara	2	North end Llagas Creek Bridge to El Toro Avenue in Morgan Hill; resurfacing	3.6	200,000
Santa Clara, Santa Cruz	5	Summit Road (Route 55) Intersection; channelization, widening and resurfacing	0.3	55,000
Santa Clara	32	2.9 miles west to 2.9 miles east of Bells Station; shoulders and resurface	5.9	350,000
Santa Clara	68	Agnew Road to 0.3 mile west of Morse Avenue; functional and tree planting	2.2	100,000
Santa Clara	114	0.1 mile south of Homestead Road to Route 68; 4-lane freeway (co-operative project; total cost $6,600,000) (State's share)	5.5	6,560,000
Santa Clara	239	0.6 mile east of Saratoga Avenue to Stelling Road; 6-lane freeway from 0.6 mile east of Saratoga Avenue to Saratoga-Sunnyvale Road and grading from Saratoga-Sunnyvale Road to Stelling Road (co-operative project; total cost $4,600,000) (State's share)	4.6	4,465,000
Santa Cruz	56, 67	Route 56-Monterey County Line to 1.5 miles northwest of Buena Vista Drive (portions); grade and structures for 4-lane freeway; Route 67—Route 56 to Main Street (portion); grade for 4-lane conventional road	3.8	2,100,000
Shasta	3, 20	Riverside Avenue to 2.0 miles north of Redding and Market Street to Hilltop Road; grade and structures for 4-lane freeway on Route 3 and 4-lane freeway on Route 20	14.1	7,700,000
Shasta	20	Airport Road to Cow Creek; 2-lane expressway	4.5	950,000
Sierra	25	North Yuba River Bridge No. 13-2; replace 2-lane bridge and approaches on new alignment	0.4	365,000
Sierra	25	Bassetts to Yuba Pass (portions); 24-foot section (casual labor)	–	100,000
Siskiyou	3	4.6 miles south to 1.5 miles north of Mount Shasta; 4-lane freeway	6.8	4,800,000
Solano	7	At Cordelia Scale and Brake Inspection Station; truck shelter and tool house	–	155,000
Solano	7	0.2 mile north of Travis Boulevard to 1.0 mile southwest of Vacaville; convert 4-lane expressway to 6-lane freeway	7.0	5,300,000

Accumulated Surplus, June 30	$2,384,040	$100,000	$100,000

HIGHWAY PROPERTIES RENTAL FUND

Chapter 2157, Statutes of 1959 as amended by Chapter 1260, Statutes of 1961 (Section 104.6 of Streets and Highways Code). The department is authorized to lease any lands which are held for state highway purposes and to maintain and care for such property in order to secure rent therefrom. Rents required under the California Toll Bridge Authority Act, or any bond indenture under such act, to be deposited in a particular fund are deposited in the fund designated and rents received from property acquired for the National System of Interstate Highways are deposited in the State Highway Fund. Under the original act, all other rents were deposited in the Highway Properties Rental Fund for distribution in the ratio of 76 percent to the State Highway Fund and 24 percent to counties. The amendment to the act provided that 100 percent of rents deposited in the Highway Properties Rental Fund prior to the 1960-61 fiscal year and 76 percent of rents so deposited after the 1959-60 fiscal year to the effective date of the act were to be transferred to the State Highway Fund and the balance paid to the counties. After the effective date of the amendment, only 24 percent of the subject rents are deposited in the Highway Properties Rental Fund for disbursement to counties.

FUND CONDITION	ACTUAL 1961-62	ESTIMATED 1962-63	ESTIMATED 1963-64

Additional Statements of Expenditures and Obligations and Revenues for 1961-62 and 1962-63 Fiscal Years, Submitted Pursuant to Section 143.2, Streets and Highways Code

Statement 1—Comparison of proposed expenditures and obligations to be incurred for the 1962-63 fiscal year in the current budget with proposed expenditures and obligations to be incurred for the 1962-63 fiscal year as shown in the budget submitted to the 1962 Session of the Legislature.

Statement 2—Expenditures and obligations incurred for the 1961-62 fiscal year, compared to budget allocations presented to the 1961 and 1962 Sessions of the Legislature.

Statement 3—Detail of major project allocations for construction of highways and bridges for the 1962-63 fiscal year, compared to budget allocations.

Statement 4—Detail of major project allocations for construction of highways and bridges for the 1961-62 fiscal year, as revised to June 30, 1962, compared to budget allocations.

Statement 5—Expenditures for maintenance by routes for the 1961-62 fiscal year.

Statement 6—Comparison of revised revenue estimates for the 1962-63 fiscal year with budget estimates submitted to the 1962 Session of the Legislature.

tatement No. 1—Comparison of Proposed Expenditures and Obligations to Be Incurred for the 1962-63 Fiscal Year in the Current Budget With Proposed Expenditures and Obligations to Be Incurred for the 1962-63 Fiscal Year as Shown in the Budget Submitted to the 1962 Session of the Legislature.

PROPOSED EXPENDITURES AND OBLIGATIONS TO BE INCURRED	PRINTED BUDGET 1962 SESSION	CURRENT BUDGET	DIFFERENCE
Current Expenses:			
Administration:			
Headquarters Office	$5,038,064	$5,546,367	$508,303
District Offices	3,702,466	4,525,820	823,354
Contracts and rights-of-way	880,531	1,000,000	119,469
Public Works Administration	466,622	406,797	—59,825
Pro rata charges for services of general administration agencies	1,612,317	1,821,016	208,699
Totals, Administration	$11,700,000	$13,300,000	$1,600,000
Maintenance of state highways	44,700,000	47,264,225	$2,564,225
Maintenance of toll bridges	3,500,000	3,500,000	–
Highway planning	3,000,000	4,310,985	1,310,985
Supervision of outdoor advertising	129,906	127,436	—2,470
Totals	$63,029,906	$68,502,646	$5,472,740
Claim of Secretary, State Board of Control	6,083	8,256	2,173
San Francisco Bay Toll Crossing	300,000	–	—300,000
Totals, Current Expenses	$63,335,989	$68,510,902	$5,174,913
Capital Outlay:			
Major construction and improvement projects	$309,973,500	$365,894,164	$55,920,664
Thin blanket program and deferred seal coat	4,992,100	5,018,100	26,000
Traffic stripe, pavement markings and signs	2,000,000	2,000,000	–
Construction engineering	31,00,000	31,104,275	104,275
Minor Improvement and Betterment:			
Northern group of counties	550,000	550,900	900
Southern group of counties	450,000	453,651	3,651
Rights-of-Way:			
Northern group of counties	50,805,238	67,030,988	16,225,750
Southern group of counties	85,022,079	96,022,079	11,000,000
Preliminary engineering and design	35,000,000	35,028,350	28,350
San Diego-Coronado crossing engineering and design studies	–	174,036	174,036
Honor camp construction	1,100,000	1,100,000	–
Contingencies	7,383,452	8,027,135	643,683
Buildings, plants, and equipment	9,000,000	10,500,000	1,500,000
Tiburon crossing engineering studies	–	60,736	60,736
Bank protection and drainage repair—Eel River	100,000	100,000	–
Totals, Capital Outlay	$537,376,369	$623,064,414	$85,688,045
GRAND TOTALS, PROPOSED EXPENDITURES	$600,712,358	$691,575,316	$90,862,958

Statement No. 3—Detail of Major Project Allocations for Construction of Highways and Bridges for the 1962-63 Fiscal Year, Compared to Budget Allocations

COUNTY	ROUTE	DESCRIPTION	APPROX. MILEAGE	ESTIMATED COST ORIGINAL	ESTIMATED COST REVISED AS OF 9-1-62	DIFFERENCE
		NORTHERN GROUP OF COUNTIES				
Alameda	5	MacArthur Boulevard—West city limits of Emeryville to Broadway in Oakland; surface	1.3	–	$48,808	$48,808 [9]
		(Contributed funds)	–	–	26,000	26,000
Alameda	5	At the intersection of Mission Boulevard, with Highland Boulevard—Sycamore Avenue; signals, lighting and channel	–	–	9,300	9,300 [13]
Alameda	5	Broadway to Grand Avenue (portions); grade, surface, reconstruct curbs and sidewalks	–	–	21,000	21,000 [9]
Alameda	5	0.3 mile west of Grand Avenue to Park Boulevard; landscape	1.2	$195,000	195,000	–
Alameda	5	Distribution structure to 0.3 mile west of Grand Avenue; landscape	2.3	170,000	170,000	–
Alameda	5	East city limits of Oakland near Durant Avenue to 0.5 mile east of Sybil Avenue; grade and structures	1.9	4,500,000	5,540,000	1,040,000 [6]
Alameda	5, 107	At intersection of Mission Boulevard with Peralta Boulevard in Fremont; signals and channel	–	–	14,400	14,400 [13]
		(Contributed funds)	–	–	1,170	1,170
Alameda	5, 227	On Route 5, 0.25 mile west of Buell Street to east city limits of Oakland near Durant Avenue and on Route 227, Carson Street to new Route 5 near Calaveras Avenue; grade, pave and structures	5.2	4,800,000	12,000,000	7,200,000 [8]
		(Contributed funds)	–	–	150,000	150,000
Alameda	7, 69	El Cerrito Overhead in Albany; nonskid treatment of deck	–	–	16,500	16,500 [13]
Alameda	69	First Avenue Interchange; structure and approaches	–	400,000	512,154	112,154 [7]
Alameda	69	Nimitz Freeway—Jackson Street in Hayward to Washington Street in San Leandro; median barrier	4.3	–	72,781	72,781 [14]
Alameda, Contra Costa	69, 7	North of El Cerrito Overhead to San Pablo Dam Road; median barrier	4.7	115,000	89,125	—25,875 [1]
Alameda	69, 228	On Route 69 south of Washington Avenue and on Route 228 east of East 14th Street and east of Hesperian Boulevard in vicinity of San Lorenzo; guard railing	–	–	9,500	9,500 [14]
Alameda	75, 206, 227	West of Route 227 to Caldecott Tunnel (portion); grade and pave and structure	1.5	2,715,000	2,715,000	–
Alameda	107	At intersection of Thornton Avenue with Jarvis Avenue; channel	–	–	23,100	23,100 [13]
Alameda	108	Route 5 north of Mission San Jose to Route 107 at Scotts Corner; grade, pave and structures	–	–	5,901,917	5,901,917 [10]
Alameda	108	On First Street, Q Street to Maple Street; improve drainage	–	–	27,100	27,100 [10]
Alameda	108	Alden Lane to El Caminito; grade and pave	0.9	95,000	56,534	—38,466 [1]
Alameda	110	Route 5 west of Tracy to Route 110-B 6 miles west of Vernalis; grade, pave and structures	11.5	6,080,000	6,080,000	–
Alameda	226	Posey Tube; entrance revisions, lighting, ventilation, and tiling	–	1,100,000	1,100,000	–
Alpine	23, 24	0.3 mile east of Woodfords to 2.6 miles east of Picketts; grade, pave and structures	3.8	1,070,000	1,256,374	186,374 [7]
Alpine	24	Approximately 20 miles northeast of Lake Alpine; widen and resurface	–	–	12,500	12,500 [9]
Alpine	24	Raymond Meadow Creek No. 31-10; bridge and approaches	–	65,000	75,321	10,321 [7]
Amador	34	2.5 miles east of Corral Flat to 2.5 miles west of Alpine County Line; grade and pave	8.7	1,180,000	1,605,782	425,782 [7]
Butte	3	Little Chico Creek to East First Avenue; grade, pave and structures	1.3	1,700,000	1,686,403	—13,597 [1]
Butte	21	West Branch Feather River Bridge No. 12-134; bridge and approaches	–	615,000	615,000	–
		(Contributed funds)	–	–	215,000	215,000

		TOTALS, MAJOR PROJECT ALLOCATIONS		$309,973,500	$365,894,164	$55,920,664

REASONS FOR REVISIONS

[1] Savings—funds in excess of project requirements.
[2] Project deferred.
[3] Decrease due to change in scope of work.
[4] Decrease, project or portion of project financed from other funds.
[5] Additional funds to cover increases in project costs.
[6] Additional funds required because of revision of design standards or scope of work.
[7] Additional funds required because of low budget estimate or higher construction costs.
[8] Additional project transfer from prior budget.
[9] Additional project to improve deficient roadway or structure.
[10] Additional project to improve drainage.
[11] Additional project to improve traffic service.
[12] Additional project to relieve traffic congestion.
[13] Additional project to improve traffic safety.
[14] Additional project to install or revise traffic regulatory or safety devices.
[15] Additional project to replace a deteriorated or destroyed structure.
[16] Additional project to repair a deteriorated roadway or structure.
[17] Additional project to provide for roadway delineation.
[18] Additional project to restore or reconstruct roadway at slipout.
[19] Additional project for freeway or expressway construction.
[20] Additional project for erosion control and/or restoration.
[21] Additional project to stabilize slide area or remove underground water.
[22] Additional project to place roadway in acceptable condition for relinquishment.
[23] Additional project to construct weighing facilities or loadometer stations.
[24] Additional project to acquire material site for use on construction.
[25] Additional project for landscaping.
[26] Additional project to comply with fish and game requirements.
[27] Additional project for archaeological salvage.

		Totals, Northern Group of Counties		$131,004,000	$155,993,563	$113,099,241	—$42,894,322
		Totals, Southern Group of Counties		$154,068,000	$158,394,691	$148,402,210	—$9,992,481
		TOTALS, MAJOR PROJECT ALLOCATIONS		$285,072,000	$314,388,254	$261,501,451	—$52,886,803

REASONS FOR REVISIONS

[1] Savings—funds in excess of project requirements.
[2] Project deferred.
[3] Decrease due to change in scope of work.
[4] Decrease, project or portion of project financed from other funds.
[5] Additional funds to cover increases in project costs.
[6] Additional funds required because of revision of design standards or scope of work.
[7] Additional funds required because of low budget estimate or higher construction costs.
[8] Additional project transfer from prior budget.
[9] Additional project to improve deficient roadway or structure.
[10] Additional project to improve drainage.
[11] Additional project to improve traffic service.
[12] Additional project to relieve traffic congestion.
[13] Additional project to improve traffic safety.
[14] Additional project to install or revise traffic regulatory or safety devices.
[15] Additional project to replace a deteriorated or destroyed structure.
[16] Additional project to repair a deteriorated roadway or structure.
[17] Additional project to provide for roadway delineation.
[18] Additional project to restore or reconstruct roadway at slipout.
[19] Additional project for freeway or expressway construction.
[20] Additional project for erosion control and/or restoration.
[21] Additional project to stabilize slide area or remove underground water.
[22] Additional project to place roadway in acceptable condition for relinquishment.
[23] Additional project to construct weighing facilities or loadometer stations.
[24] Additional project to acquire material site for use on construction.
[25] Additional project for landscaping.
[26] Additional project to comply with fish and game requirements.
[27] Additional project for archaeological salvage.

Statement No. 5—Expenditures for Maintenance by Routes for the Fiscal Year July 1, 1961 to June 30, 1962

(Includes Maintenance to Toll Bridges Under Section 188.3 of Streets and Highways Code)

ROUTE	AMOUNT
1. Golden Gate Bridge to Oregon line via Crescent City and Smith River	$1,907,902
2. Route 56 in San Francisco to the Mexican line near Tiajuana via San Diego and National City; Orcutt to Route 2 north of Santa Maria; Harrison to Route 2 near Los Alamos	3,115,572
3. Sacramento Oregon line via Yreka	1,091,691
4. Sacramento to Los Angeles	2,037,999
5. Route 56 near Santa Cruz to Route 68 near Story Road; Route 68 near San Jose to Route 4 near Stockton via Hayward; Route 68 near Oakland to Route 68 near San Jose to Route 4 near Stockton via Hayward; Route 4 near Stockton to Route 65 near Mokelumne Hill	728,311
6. Route 7 to Sacramento; Route 49 near Napa to Route 7 near Davis	215,071
7. Route 69 in Albany to Route 3 near Red Bluff	986,169
8. Route 1 near Novato to Route 7 near Cordelia via the vicinity of Napa	70,623
9. Route 79 near Saticoy to Route 4 near San Fernando; near San Fernando to San Bernardino	380,881
10. Route 2 near San Lucas to Sequoia National Park line via Coalinga, Hanford, and Visalia	261,328
11. Route 75 near Antioch to Nevada line near Lake Tahoe via Sacramento and Placerville	789,153
12. Point Loma to El Centro via San Diego	351,460
13. Route 4 at Salida to Route 23 via Sonora and Long Barn	247,714
14. Oakland to Route 7 in Richmond at Cutting Boulevard	43,284
15. Route 56 near Fort Bragg to Route 37 near Emigrant Gap via Willits, Williams, and Colusa	554,235
16. Route 1 to Route 89 near Lakeport	40,139
17. Route 3 south of Roseville to Nevada City	116,110
18. Merced to Yosemite National Park near El Portal via Mariposa	90,143
19. Route 9 west of Claremont to Beaumont via Riverside; Pomona to Route 2 near Santa Ana	215,371
20. Route 1 near Arcata to Lassen National Park via Weaverville and Redding; Route 83 near Old Station to Route 29 west of Susanville; Route 29 near Susanville to Route 73 near Ravendale	640,585
21. Route 3 near Richvale to Route 29 near Chats via Quincy and Beckwourth Pass	434,241
22. Route 32 to Route 2 near The Rocks via Hollister and San Juan Bautista; Route 56 near Castroville to Route 2 near Prunedale	38,090
23. Los Angeles to Route 11 near Meyers Station via Antelope Valley, Independence, Bridgeport, and Markleeville	972,285
24. Route 4 near Lodi to San Andreas; Route 65 near Angels Camp to Route 23 near Mount Bullion via Murphys, Calaveras Big Trees, and Dorrington; Route 23 near Woodfords to the Nevada State line	184,739
25. Route 37 near Colfax to Route 17 near Grass Valley; Nevada City to Route 83 near Sattley via Downieville	303,686
26. Route 2 in Los Angeles to Calexico via the vicinity of Monterey Park, Pomona, Colton, Brawley and El Centro; a point on the highway of Route 2 in Los Angeles to Calexico, approximately two and one-half miles southwest of Brawley	1,050,271
27. El Centro to Yuma	101,888
28. Redding to Nevada line via Alturas and Cedarville	367,078
29. Red Bluff to the Nevada line via Susanville; Route 35 to Route 3 near Red Bluff	622,941
31. San Bernardino to Nevada line near Calada, via Barstow	368,280
32. Route 56 near Watsonville to Route 249 near Sharon via Hecker Pass and Pacheco Pass	158,037
33. Route 4 near Bakersfield to Route 2 in San Luis Obispo County via Cholame Pass; Route 56 near Cambria to Route 2 near Paso Robles	143,665
34. Route 4 near Arno to Route 23 near Picketts in Hope Valley via Jackson, Irishtown, Pine Grove, Silver Lake, and Kirkwood	198,934
35. Route 1 near Alton to Route 20 near Douglas City, passing near Kuntz and Peanut	312,004
36. Mount Pleasant Ranch to Downieville	361
37. Auburn to Route 38 via Emigrant Gap	696,458
38. Route 11 near May's Junction to Nevada line near Verdi, Nevada, via Tallac, Emerald Bay, McKinney's, Tahoe City, the Truckee River, Trukee, and the Truckee River Canyon	364,648
39. Tahoe City to Nevada line at Crystal Bay	41,619
40. Route 13 to Route 23 near Mono Lake via Big Oak Flat and Buck Meadows; Route 23 near Mono Lake to Route 76 near Benton Station; Route 23 north of Mono Lake to the Nevada line, in the vicinity of the Pole Line Road	200,975
41. Route 5 near Tracy to Route 4 near Fresno; Route 4 near Fresno to General Grant National Park; General Grant National Park to Kings River Canyon	289,892
42. Route 5 near Los Gatos to Governor's Camp in California Redwood Park via Saratoga Gap	71,019
43. Newport Beach to Route 31 near Victorville, via Santa Ana Canyon, San Bernardino, Waterman Canyon, Big Bear Lake and Baldwin Lake. Route 43 includes a highway around Big Bear Lake	878,738
44. Route 116 near Boulder Creek to Route 42 at Governor's Camp in California Redwood Park	11,581
45. Route 3 near Biggs to Route 7 near Willows	53,145
46. Route 3 near Klamath River Bridge to Route 1	358,965
47. Route 7 near Orland to Chico; Route 3 near Chico to Route 29 near Deer Creek Meadows	143,971
48. Route 1 near Cloverdale via McDonald's to Route 56 at mouth of Navarro River	167,850
49. Route 8 near Napa to Route 15 via Calistoga and Lower Lake	131,927
50. Route 15 to Sacramento via Rumsey and Woodland	136,233
51. Route 56 near Valley Ford to Route 8 near Sonoma via Santa Rosa	56,345
52. Route 1 to Tiburon	10,962
53. Route 7 near Fairfield to Route 4 near Lodi via Rio Vista	170,109
54. Route 11 near Perkins to Route 65 near Drytown	44,952
55. Skyline Boulevard from San Francisco to Route 5	150,079
56. Route 2 near Las Cruces via the vicinity of Lompoc and Guadalupe to Route 2 near Pismo; San Luis Obispo to San Francisco along the coast via Cambria, San Simeon, and Santa Cruz; Route 1 near southerly end of Marin Peninsula to Route 1 near Fernbridge via the coast route through Jenner, Westport, and Ferndale, including lateral connection with Route 1 near Leggett Valley	1,514,301
57. Route 2 near Santa Maria to Route 23 near Freeman via Bakersfield and Walker Pass	257,559
58. Route 2 near Santa Margarita to the Arizona line near Topok, Arizona via Bakersfield, Mojave, Barstow, and Needles with a connection from near Needles to Arizona line	577,996
59. Route 4 near Gorman to Route 31 near Cajon Pass; Route 31 near Cajon Pass to Route 43 via Lake Arrowhead	213,218
60. Route 2 near El Rio to Route 2 south of San Juan Capistrano	523,269

MILITARY DEPARTMENT

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

GENERAL ANALYSIS

The Capital Outlay program of the Military Department comprises the construction of armories, warehouses, rifle ranges, and other facilities essential to the organization, training, and morale of the California National Guard and the California Air National Guard.

Since the 1951-52 fiscal year the Federal Government under Public Law 783, Eighty-first Congress, has participated in the construction of armories on a cost-sharing basis. Federal funds have been made available on the basis of up to 75 percent of qualifying phases of the construction.

In addition to federal participation in the construction of armories, certain facilities such as motor vehicle storage buildings, warehouses, airplane hangars, and shop buildings primarily for the care and maintenance of federal equipment issued for State use are financed entirely from federal funds except for the cost of planning and supervision of construction which is provided by the State. The plans and working drawings for the construction of federal and state financed projects at Santa Monica, Van Nuys, and Porterville are being prepared.

The preparation of plans and supervision of construction of federally financed projects ($50,000) comprises the major capital outlay program for 1963-64. Minor projects totaling $127,715 are proposed for repairs and necessary improvements to various existing armories.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Preparation of plans and supervision of construction of federally financed projects *General Fund*	–	–	$50,000
Minor Projects:[b]			
Roof repair to various armories	–	–	37,215
Grading and paving—Torrance	–	–	15,000
Overhaul boiler and heating system—Long Beach	–	–	5,000
Paving, various locations	–	–	54,000
Rehabilitation at Stockton	–	–	16,500

ESTIMATED 1961-62 AND 1962-63 EXPENDITURES[a]

DEPARTMENT OF CONSERVATION

Division of Forestry

The expenditure program for capital outlay in the 1963-64 fiscal year contemplates the continuation of the conservation camp program at the level of 2 camps opening per year. To accomplish this, funds are proposed for 2 new sites, first and second phase construction and equipment for 2 camps. Funds are also requested for purchasing the land underlying the Ben Lomond Conservation Camp. This camp accommodates Youth Authority wards and is located in Santa Cruz County. The site to be purchased will permit rehabilitation of the camp, allow for construction of a reservoir to assure an adequate, reliable water supply for the camp, and assure the continuation of the operation of the branch nursery.

Funds are requested to provide the final equipment complement for Sierra Branch Center Conservation Camp plus a small amount in construction to build a powder magazine not provided in the Department of Corrections budget for this camp. Final equipment complement funds are also included for Chino Conservation Camp. The construction funds are to provide a powder magazine and equipment storage facilities.

In addition the 1963-64 capital outlay program proposes purchase of a site for relocation of the Tulare County Ranger Unit Headquarters in Visalia. The contemplated site will provide for future expansion in an area more centrally located with respect to fire responsibility. It is also proposed to purchase a buffer strip adjacent to the Tuolumne County Ranger Unit Headquarters to permit future expansion.

In the 1962-63 fiscal year, an augmentation of $35,000 is proposed for the Placer County Ranger Unit Headquarters (Auburn) site acquisition. The Budget Act of 1961 provided $35,000 for such acquisition. New appraisals on the parcel under consideration indicate the need for augmentation.

Funds are also requested for acquiring sites for strategically located fire control stations and lookouts.

Projects proposed for major construction constitute the bond fund proposal for the Division of Forestry. These projects are: providing permanent facilities for the Arnold Forest Fire Station (Calaveras County), providing permanent facilities for the Cayucos Forest Fire Station (San Luis Obispo County), providing adequate facilities for a 10-man crew at Groveland Forest Fire Station (Tuolumne County), replacing tent camp facilities at Leggett Valley Forest Fire Station (Mendocino County), relocating Alderpoint Forest Fire Station (Humboldt County) to a new site, relocating Porterville Forest Fire Station (Tulare County) to a new site, and replacing inadequate facilities at Shingletown Forest Fire Station (Shasta County).

Minor construction provides $300,244 for forest fire station and lookout projects. The larger projects (over $20,000) provide for a combination barracks and messhall at Covelo Forest Fire Station, a lookout tower at Two Rock Lookout, a fire station at Lucerne, and a fire station at Miller Forest Fire Station. The 30 smaller projects are detailed under the minor construction section.

Another large portion of the minor construction program proposed consists of conservation camp projects. This portion amounts to $200,303. Most of the funds included are for roads and firebreak construction for fire control purposes and for the construction and improvement of utilities, water and sewage developments.

Another portion of minor construction is $70,430 to provide repeater vault facilities and to house emergency generators at present vaults.

STATE BUILDING PROGRAM

PROPOSED 1963-64 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Site acquisition for conservation camps:			
Two New Camps:			
Purchase of sites for the continuation of the camp program	–	–	$50,000
Ben Lomond Conservation Camp:			
This existing camp is located on leased property. It is proposed that this property be purchased	–	–	85,000
Site Acquisition for County Headquarters:			
Tulare County Ranger Unit Headquarters	–	–	25,000
General Fund			
Present headquarters has been surrounded by the urban development of Visalia. It is proposed that 7 acres be purchased out of town to provide a site for relocation of present facility and allow for future expansion.			
Tuolumne County Ranger Unit Headquarters	–	–	5,000
General Fund			
Four acres are proposed to provide a buffer strip adjacent to present site to exclude possible encroachment by subdivision interests. This additional acreage will allow for future expansion.			
Site Acquisition for Lookouts and Forest Fire Stations:			
Pilot Peak Lookout	–	–	6,000
General Fund			
Two acres are required before reconstruction of the lookout tower can take place. Present tower is a surplus building in extreme need of repair.			
Copperopolis Forest Fire Station	–	–	2,500
General Fund			
Additional acreage required at present site to provide adequate leach field.			
Smartsville Forest Fire Station and Spike Conservation Camp	–	–	8,000
General Fund			
Sewage disposal has become a problem at the present overcrowded site. Currently the 1.86 acre site is shared by the fire station and the spike camp. It is proposed that 4 acres be added to this site.			
Miscellaneous sites, statewide	–	–	5,000
General Fund			
For opportunity purchases of lookout sites, repeater sites and/or fire station sites.			

---

Division of Forestry—Continued			
STATE BUILDING PROGRAM—Continued			
PROPOSED 1963-64 EXPENDITURES—Continued			
Engineering, planning and inspection services	–	–	$113,151
General Fund			
To provide 8 technical positions, a survey crew, 1 clerical position, and operating expenses required in connection with the division's Capital Outlay program.			
Construct Arnold Forest Fire Station	–	–	89,070
Equip Arnold Forest Fire Station	–	–	2,450
To provide permanent facilities for this Assistant Ranger unit headquarters. Site has been acquired and site development funds provided in 1962-63			
Construct Cayucos Forest Fire Station	–	–	62,750
Equip Cayucos Forest Fire Station	–	–	3,265
To provide permanent facilities. Temporary makeshift quarters presently being utilized. A site has been located and is now in process of acquisition.			
Construct Groveland Forest Fire Station	–	–	81,885
Equip Groveland Forest Fire Station	–	–	2,625
To provide adequate facilities to house a Number 3 crew. Present facilities are not of sufficient value to warrant remodeling.			
Construct Leggett Valley Forest Fire Station	–	–	104,606
Equip Leggett Valley Forest Fire Station	–	–	1,165
To replace tent camp facilities with permanent structures.			
Construct Alderpoint Forest Fire Station	–	–	120,714
Equip Alderpoint Forest Fire Station	–	–	2,130
To relocate station on new acquired site. Present facilities are temporary surplus metal buildings located on property on which the lease is being terminated.			
Construct Porterville Forest Fire Station	–	–	81,600
Equip Porterville Forest Fire Station	–	–	1,475
To relocate station on newly acquired site. Present facilities are extremely overcrowded and located on a residential lot.			
Construct Shingletown Forest Fire Station	–	–	70,020
Equip Shingletown Forest Fire Station	–	–	1,685
To replace inadequate facilities erected in 1942 using tent platforms placed on wooden piers.			
Construct Sierra Branch Center Conservation Camp	–	–	5,500
Equip Sierra Branch Center Conservation Camp	–	–	155,868
To provide funds for facilities not provided in Department of Corrections budget and the second phase of normal camp equipment.			
Construct 2 conservation camps—second phase	–	–	870,000
Equip 2 conservation camps—second phase	–	–	400,389
To provide funds for the construction phase of 80-man conservation camps and equipment necessary to complete normal complement.			
Construct 2 conservation camps—first phase	–	–	243,396
Equip 2 conservation camps—first phase	–	–	160,582
To provide working drawings and site development for 2—80-man conservation camps to house Department of Corrections inmates. Inmates will be used for conservation projects and firefighting will be given first priority.			
Construct Chino Conservation Camp	–	–	20,000
Equip Chino Conservation Camp	–	–	174,987
To provide for equipment and storage facilities for equipment for a 100-man force out of the Chino Conservation Center.			
Minor Projects:[b]			
Inmate Labor Projects:			
Construct and repair roads and bridges	–	–	62,448
Construct and improve sewer, water and utilities development	–	–	69,245
Construct and improve telephone lines	–	–	39,550
Construct power lines	–	–	9,600
Mobile campsite development	–	–	11,660
Miscellaneous projects	–	–	7,800

DEPARTMENT OF FISH AND GAME

GENERAL ANALYSIS

The proposed 1963-64 Capital Outlay budget provides for the construction of a water supply system for Kern River Hatchery. Two minor projects are proposed. One of these is the relocation of the domestic water system at Mojave River Hatchery. The second project is the purchase of the research vessel "Alaska" from the United States Government.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
WILDLIFE CONSERVATION PROGRAM [1]			
PROPOSED 1963-64 EXPENDITURES			
Region IV—Inland Fisheries:			
Kern River Hatchery—Water supply system	–	–	$65,000
This project would provide a dependable flood-safe water supply at the proper temperature for trout propagation.			
Minor Projects:			
Marine Resources Operation:			
Purchase of research vessel "Alaska"	–	–	13,000
Alterations and improvement projects of $5,000 or less	–	–	3,600
ESTIMATED 1961-62 AND 1962-63 EXPENDITURES			
Region IV—Inland Fisheries:			
Construct additional rearing facilities—San Joaquin Hatchery	—$22 [d]	–	–
Region V—Inland Fisheries:			
Rehabilitate Hot Creek Hatchery	312,500	$149,000	–
Minor Projects:			
Region I—Headquarters:			
Construct storage building—Devil's garden unit	2	–	–
Region I—Inland Fisheries:			
Red Bluff Screen Shop:			
Antelope Creek, Tehama County (West Ditch)	244	–	–
Antelope Creek, Tehama County (East Ditch)	244	–	–
Battle Creek, Shasta County	159	–	–
Dixon Ditch, Thomes Creek	713	1,325	–
Yreka Screen Shop:			
Fish Screens, Perforated Plate:			
East Fork Scott River No. 1 and No. 2, Bogue Ditch, Etna Creek and Pack Ditch, Grider Creek	1,212	–	–
Scott River, Siskiyou County (Farmer's Co-op No. 1)	234	–	–
Repair ladder—Ward Dam diversion Mill Creek	1,252	–	–
Cedar Creek spawning house	1,981	–	–
Fish ladder on east fork of Elk Creek	–	3,725	–
Region I—Game Management:			
Construct Dakin Unit check station	—49 [d]	–	–
Region II—Inland Fisheries:			
Construct Wheeler Lake saddle dam, Alpine County	—15 [d]	–	–
Construct Winnemucca Lake saddle dam, Alpine County	—15 [d]	–	–
Region II—Game Management:			
Gray Lodge Waterfowl Management Area:			
Enclose equipment shelter for shop	—23 [d]	–	–
Region III—Inland Fisheries:			
Snow Mountain Egg Collecting Station:			
Improve fishway and traps	10,644	19,356	–
Newell Creek fish planting base	5,022	–	–
Region IV—Inland Fisheries:			
Moccasin Creek Hatchery:			
Ponds repair	–	14,164	–
Region V—Water Pollution:			
Pollution testing facility	6,248	–	–
Hot Creek Hatchery—stationary screens	–	6,500	–
Mt. Whitney—Black Rock Hatchery:			
Replacement water supply line	–	10,000	–
Construct employee-public restroom	5,091	–	–
Fish Springs Hatchery—domestic well	800	–	–
Region V—Game Management:			
Chino Game Farm:			
Construct shop, incubation, and brooding facilities	1,918	–	–
Region V—Wildlife Protection:			
Architectural fees to design patrol boat	–	10,000	–
Marine Resources Operations:			
Terminal Island Biostatistics:			
Remodel office space and conference room	9,336	–	–
Staff Operations:			
Field Station located at Sacramento State College:			
Electric transformers—field station	2,671	–	–

Wildlife Conservation Board

GENERAL ANALYSIS

Continuation of the acquisition, construction and improvements of wildlife conservation projects is planned. The $9,000,000 appropriated by Chapter 1327, Statutes of 1947, the $3,000,000 in revenue provided by Chapter 1401, Statutes of 1951, and the revenue of $750,000 each fiscal year provided by subsequent legislation such as Chapter 1313, Statutes of 1955, and Chapter 1828, Statutes of 1959, has been or will be allocated to projects by the Wildlife Conservation Board. The budget reflects the actual and estimated expenditures of funds allocated by Wildlife Conservation Board action previous to June 30, 1962, and reflects expenditures based on anticipated allocations by the Wildlife Conservation Board for fiscal years 1962-63 and 1963-64.

WILDLIFE CONSERVATION PROGRAM

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
PROPOSED 1963-64 EXPENDITURES[1]			
Fish hatchery and stocking projects	–	–	$50,000
For construction and equipping of facilities for fish hatching and stocking.			
Fish habitat development and improvement projects	–	–	150,000
For acquisition and development of warm water lakes for reservoir construction or improvement; stream clearance and improvements; stream flow maintenance dams; marine habitat; fish screen and ladder projects.			
Angling access projects	–	–	468,771
For the preservation and restoration for coastal access; river, stream and bay access; lake, reservoir and Salton Sea access; piers.			
Game habitat and development projects	–	–	50,000
For the preservation and restoration of waterfowl management areas and other game areas.			
Hunting access projects	–	–	100,000
To provide access roads to hunting areas.			
Special projects	–	–	10,000
For projects evaluation, land acquisition, and engineering studies of potential projects by the Wildlife Conservation Board staff.			
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES[1]			
Fish hatchery and stocking projects	$38,230	$25,000	–
For construction and equipping of facilities for fish hatching and stocking.			
Fish habitat development and improvement projects	3,998	152,000	–
For acquisition and development of warm water lakes for reservoir construction or improvement; stream clearance and improvements; stream flow maintenance dams; marine habitat; fish screen and ladder projects.			
Angling access projects	417,064	502,819	–
For the preservation and restoration for coastal access; river, stream and bay access; lake, reservoir and Salton Sea access; piers.			
Game farm projects	–	40,000	–
To modernize game propagation facilities.			
Game habitat and development projects	25,729	90,000	–
For the preservation and restoration of waterfowl management areas and other game areas.			
Hunting access projects	3	75,000	–
To provide access roads to popular hunting areas.			
Special projects	—435[d]	10,000	–
For projects evaluation, land acquisition, and engineering studies of potential projects by the Wildlife Conservation Board staff.			
TOTAL EXPENDITURES, CAPITAL OUTLAY *(Wildlife Restoration Fund)*	$484,589	$894,819	$828,771
Unexpended project allocations	1,829,995	–	–

Division of Beaches and Parks

GENERAL ANALYSIS

The Division of Beaches and Parks Capital Outlay program for the 1963-64 fiscal year consists of both construction and acquisition projects. In acquisition the opportunity purchase program has been continued at the same level as last year with $500,000 as the proposed appropriation. This sum is to provide a means whereby potential recreational sites which become available may be purchased for future park development. The expenditure of these opportunity purchase funds would be made only after review and consideration by the State Public Works Board.

New construction funds are proposed in the amount of $5,114,416 for both major and minor capital outlay projects at 50 locations. An additional $686,000 is proposed in the Water Resources Capital Outlay program under the terms of the Davis-Dolwig Act. These funds will provide for recreational facilities and related adjuncts at state water projects.

The major construction program consists of 20 projects which will provide 733 new campsites and 175 new picnic units. These new facilities needed to meet increased public demand are proposed at Anza-Borrego, Clear Lake, El Capitan Beach, Henry Cowell Redwoods, Henry W. Coe, Joshua Trees, La Costa Beach, Millerton Lake, Picacho, San Mateo Beaches and Sonoma Coast. To meet increasing needs along the Colorado River, boating facilities are proposed at Picacho Recreational Area. Continuing historic building restoration is proposed for Columbia Historic State Park.

Funds are proposed for Salton Sea State Park to provide an ample supply of potable water to the recreational development. Lack of adequate water supply has held back the development program at this park. This project would provide funds for participation with the Salton Sea Water District to bring such a water supply to the area.

The proposed project at Benbow Lake State Park would provide funds for the final phase of the repair and restoration of the dam. Additionally, two major projects are proposed for beach erosion control at Bolsa Chica Beach State Park and San Buenaventura Beach State Park.

Continuing park development is proposed at Del Norte Coast Redwoods. Area restoration and protection is proposed for Humboldt Redwoods State Park, Bull Creek unit.

General development planning funds are proposed for Squaw Valley State Park to do master planning for the park and corrective engineering for Blythe Arena. The planning is the first phase for developing a long-range program for converting Squaw Valley into an effective operating unit of the State Park System. Minor projects are proposed for removing the existing speed skating rink and remodeling and repairing other structures in the park.

A number of other minor projects are proposed generally for the improvement, maintenance and repair of existing park facilities. These include a $13,500 erosion control project at Doheny Beach to protect the present beach. Also shown is $25,000 for Twin Lakes Beach State Park which is a carry-over of a project funded in 1961-62 for beach erosion control. Present scheduling of the project anticipates expending the funds during the 1963-64 fiscal year. Channel erosion and bank protection is also proposed at Emma K. Wood Beach State Park. Other items of work consist of roads and parking, utility and shop buildings, utility services, bridge repairs and historic building restoration. Water system repairs are proposed at Angel Island, Big Basin, Portola and Sonoma Coast State Parks.

REAL PROPERTY ACQUISITION

PROPOSED 1963-64 EXPENDITURES

New Appropriation

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Opportunity purchases of park lands	–	–	$500,000

Throughout the year valuable lands with prime recreational potential become available to the State at favorable prices. This item is proposed in order to take advantage of these opportunities. Purchases from this item would be subject to review and approval of the State Public Works Board as to use proposed and price.

---

[1] A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals.

PROPOSED 1963-64 EXPENDITURES

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Anza-Borrego Desert State Park:			
Culp Valley—campground development	–	–	$213,100

Anza-Borrego Desert State Park, an area of nearly one-half million acres, is the largest park in the State Park system. At present, there are but 96 campsites in the park, all of which are located on the desert floor. This development of 100 camp units would be located at an elevation of 3,400 feet and would be the division's first high desert campground. The area is ideal for hiking and possesses magnificent vistas of the surrounding mountains and Salton Sea. Development of this area will serve an urgent and increasing need for camping space for the rapidly increasing population centers of Los Angeles and San Diego.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Benbow Lake State Park:			
Repairs to dam	–	–	84,105

The existing structure is badly cracked. During the construction seasons of 1960 and 1961 approximately $196,000 was spent in making major repairs. Failure of the fishway, which is intimately tied to the dam, could result in further serious damage. Also, failure of the fishway could result in the loss of a season's run of salmon and steelhead. This project proposes the repair of the existing fishway.

---

[d] Unexpended balance reported as expended in prior year.

[42] Chapter 287, Statutes of 1959, redefined areas to be acquired at Mount Tamalpais. Augmented from Section 16409 of the Government Code $80,500.

[43] Expenditures for Riders' and Hikers' Trails are shown in a separate section.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Division of Beaches and Parks—Continued			
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
PROPOSED 1963-64 EXPENDITURES—Continued			
Bolsa Chica Beach State Park:			
Beach erosion control	–	–	$154,000
The beaches along this section of shore have eroded extensively to a point where corrective measures should be taken as soon as possible. If corrective action is not taken, a highly desirable recreational area will be completely lost. The 3,000,000 cu. yd. of sand to be placed on a participating basis at the Surfside-Sunset Beach area will move downcoast and keep Huntington and Bolsa Chica Beaches replenished with sand for a period of time.			
Clear Lake State Park:			
Continuing development	–	–	144,400
This is a continuation of development budgeted in past years where reclaimed lakefront is being turned into land suitable for campsites. In 1961 approximately 3,500 cars were turned away from this park because of the lack of an adequate number of campsites. Development of this reclaimed lake frontage will provide an additional 65 campsites and 25 picnic units to help to relieve the shortage.			
Columbia Historic State Park:			
Historic building restoration	–	–	121,500
The 1948 master plan of Columbia Historic State Park approved by the State Park Commission calls for the restoration of existing structures which have historic interest in order that they may be made safe for public use or visitation.			
Del Norte Coast Redwoods State Park:			
Initial development	–	–	416,200
The proposed program is the basic step for future development of overnight camping facilities for this park. The need for such development is apparent in view of the overcrowding and estimated 19,960 turnaways experienced last year by the two state parks in the area, Jedediah Smith Redwoods and Prairie Creek Redwoods. A later project will be necessary for construction of camp units, sanitary structures and other facilities to complete an operational 146-unit campground. Relatively high costs are anticipated due to the necessity to construct the proposed roads, water system and electric utilities through steep and heavily timbered country.			
El Capitan Beach State Park:			
Continuing development	–	–	52,400
This project would provide additional campsites and picnic units to help meet the increasing pressures for these facilities along the Southern California coast. The 20 camps and 25 picnic units are to be constructed along with slope protection and retaining walls to preserve the park from wave erosion. These improvements will replace in part existing temporary facilities.			
Fort Ross Historical Monument:			
General development	–	–	54,700
Recent acquisition at this unit makes possible the development of needed parking area adjacent to the fort. This proposal is the first phase of development for this newly acquired land. Also included would be water system improvements to adequately serve this unit.			
Henry Cowell Redwoods State Park:			
Continuing development	–	–	107,300
Funds were provided in the Budget Act of 1962 for 85 camp units as the first phase in developing a 400-unit campground at the Graham Hill area of this park. This proposal provides for continuing development with the construction of 50 camp units, one combination building, one comfort station and parking facilities.			
Henry W. Coe State Park:			
Initial development	–	–	174,700
Very little development has taken place in this park, aside from operational necessities, due to the limited vehicular access. Recent improvement of a county road to the park boundary now makes the initial stage of development possible and will make 50 camp units available to visitors with an ultimate of 175 more in the Manzanita Point area. This will be the only park area from Pismo Beach to Mount Tamalpais where camping is available from Highway 101.			

DEPARTMENT OF PARKS AND RECREATION—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Division of Beaches and Parks—Continued			
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
PROPOSED 1963-64 EXPENDITURES—Continued			
Humboldt Redwoods State Park:			
Restoration, erosion control and bank protection	–	–	$139,350
This proposal is one phase of a long range plan for the restoration of the Bull Creek watershed and the protection of Rockefeller Forest. Plans call for grading and shaping 6 miles of the Bull Creek channel and moving gravel deposits in accordance with a plan for erosion prevention. The removal of various old residences and accumulated debris is essential preparation for the building of flood control structures in Bull Creek Basin.			
Joshua Trees State Park:			
Initial development	–	–	255,800
The park is located within 2½ hours drive of nearly 7 million people (Los Angeles) and this population is estimated to increase to 10 million by 1975. The park has an outstanding display of Joshua Trees and desert scenery which will attract visitors much of the year. Almost no camping is provided in Los Angeles County, and the demand for this type of facility is constantly increasing. This project will provide 50 campsites and 25 picnic units. A utility area and building is necessary to service proposed and future development. The presence of a residence in this wilderness scene would allow 24-hour control of the park and be an emergency center when the staff is off duty.			
La Costa Beach State Park:			
General development	–	–	730,100
This project represents the final phase in the development for La Costa Beach State Park. It utilizes facilities requested in the 1962-63 fiscal year budget and completes the park's ultimate development of 300 campsites. The development of these 248 campsites will serve an urgent and increasing need for overnight beach camping along the Southern California coast.			
Millerton Lake State Park:			
Continuing development	–	–	232,200
This proposal provides for construction of a safe swimming area which can be efficiently guarded, parking space for the picnic area, replacement of old stoves and tables.			
Picacho Recreational Area:			
Boating facilities and campground development	–	–	71,800
At the present time there are no state facilities providing camping or boating opportunities for the entire length of the California side of the Colorado River. Along this 220-mile length, the Picacho area is the only state-controlled recreational land. This 50-campsite unit is the first phase of a public facilities development planned for this newly acquired area. The Colorado River offers an unlimited variety of recreational potential for the entire Southern California region on a year-round basis.			
Salton Sea State Park:			
Water system development	–	–	749,512
An ample supply of potable water is the primary physical factor holding back the recreational development of state park lands at Salton Sea State Park. The present source of water for the park comes from the Coachella Valley Branch of the All-American Canal. It is subject to termination on very short notice. The quality of the water is just fair as it contains high quantities of silt. The supply from the proposed system will be from wells and is of satisfactory quality after defluoridation treatment. This request for a water system entails a participating cost payment to the Salton Sea Water District, in exchange for which the Salton Sea Water District will make water available in quantity of 1,080,000 gallons per day at Salton Sea State Park from its system (to be constructed shortly).			
San Buenaventura Beach State Park:			
Beach erosion control	–	–	143,100
The Ventura shoreline at San Buenaventura Beach State Park alternately recedes and advances due to irregularity of the supply of sand by the Ventura and Santa Clara Rivers. This instability limits the development of the shore area. Construction of the groins and placement of sand fill will stabilize the beach so that permanent developments can be made. This work is a continuation of the beach erosion control project.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Division of Beaches and Parks—Continued			
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
PROPOSED 1963-64 EXPENDITURES—Continued			
San Mateo Beaches State Park:			
Continuing development	–	–	$102,500
The 1961-62 fiscal year capital outlay budget provided funds for the initial development of this unit. This is part of a continuing development program in accordance with an approved master plan. The visitor use at San Mateo Beaches has increased from about 600,000 in 1959 to about a million in 1961. An attendance of a million per year at Half Moon Bay Beaches alone can be anticipated within the next five years. Severe erosion exists on the slope above the development at San Gregorio. Stabilization of this slope will protect the development from mud slides and will improve the general appearance of the area.			
Sonoma Coast State Park:			
Continuing development	–	–	345,900
Recently completed acquisition makes possible the development of 100 campsites in the Bodega Bay Area of this park, and connects this area with the already heavily used Salmon Creek Picnic Area. Fifty additional picnic units along the beach from Salmon Creek south will be added along with improved sanitary facilities. Only 30 campsites presently exist in this park, which extends from Bodega Bay to the Russian River in noncontiguous strip-type ownerships. In 1961, 1,000 camping families were turned away from the park for lack of camping space and existing campsites were filled to capacity every day during the months of July and August of 1961.			
Squaw Valley State Park:			
General development planning	–	–	10,000
In order to establish Squaw Valley State Park as an effective operating state park unit, certain modifications to existing facilities and additions of new facilities are required. These include the development of picnic areas, hiking trails, scenic panoramas, historical and natural locations together with engineering determination of possible conversion of mechanical installations at Blythe Arena for more economical, safe and effective operation. A long-term priority program of improvements and corrections will be based on these technical studies and estimates.

ACQUISITION AND RESTORATION OF HISTORIC SHIPS

Analysis

Because of the part played by the early day sailing and steam schooners in the development of California, this project was established to create a fitting monument. The expenditures are for restoration and rehabilitation to make them ready for exhibit purposes.

ACQUISITION, DEVELOPMENT AND IMPROVEMENT OF STATE PARK IN SAN FRANCISCO

Analysis

This project includes the acquisition and development of a site for a state park to be located in the City of San Francisco. Budget Act of 1956, Item 400.2, appropriated $2,000,000 for this purpose. Budget Act of 1958, Item 417, transferred $276,000 from this appropriation to augment an appropriation made for the acquisition and restoration of historic ships. Budget Act of 1962, Section 10, extends the appropriation to June 30, 1963.

RIDERS' AND HIKERS' TRAILS

Analysis

The Riding and Hiking Trail, authorized by Chapter 112, Statutes of 1946, was to be a 3,000-mile statewide loop. Chapter 1536, Statutes of 1955, authorized lateral trails concurrently with the statewide loop to accelerate the program and provide more effective use. Chapter 2169, Statutes of 1957 appropriated $200,000 for continuation of this program. Budget Act of 1962, Section 10, extends the appropriation to June 30, 1963.

Division of Small Craft Harbors

DEVELOPMENT LOAN TO DIVISION OF BEACHES AND PARKS

Chapter 2056, Statutes of 1961, authorizes a loan to the Division of Beaches and Parks for purchasing water for filling and replenishment of water and for the construction of necessary recreational facilities at Lake Elsinore State Park. This loan is to be made on the same terms as loans made to local agencies. Funds for the loan of $750,000 are to come from the Small Craft Harbor Revolving Fund and are to be repaid from revenues collected by the Division of Beaches and Parks for use of the facilities provided pursuant to Item 346, Budget Act of 1962.

Development of Lake Elsinore recreational area *Small Craft Harbor Revolving Fund* [49]	–	$750,000	–

---

[47] State Beach and Park Fund abolished by Chapter 892, Statutes of 1961 and balance transferred to General Fund.

[48] Transfers to the General Fund reported as General Fund revenue.

[49] A nonrevenue fund. Neither revenue nor expenditures are included in the budget totals.

GENERAL ANALYSIS

In accordance with the provisions of Chapter 124, Statutes of 1955, the California Olympic Commission, in co-operation with other organizations, provided facilities for, promoted participation in, and staged the VIII Olympic Winter Games in Squaw Valley, February 18-28, 1960.

The commission has been engaged in liquidating its fiscal affairs. The life of this commission terminated June 30, 1962, in accordance with Chapter 2035, Statutes of 1961.

Central Valley Water Project Construction Fund	*75,630*	–	–

The Capital Outlay budget presents the expenditures for the California Water Development Program and for construction of department facilities under the State Building Program. The Capital Outlay expenditures for the California Water Development Program include the cost of the construction and acquisition phases of the State water facility projects, the State contributions to federal-state projects, and state financial assistance to local projects.

A general explanation of the State projects under the California Water Development Program is presented in the State Operations budget on page 650 with a description of the significant units of each project and a timetable of design, acquisition, construction, and operation. The timetable is based on the best current estimates of project emphasis and production potential. Each expenditure for State projects in the Capital Outlay budget relates directly to the timetable which indicates the beginning and progress of all projects active during the current and budget years.

AID TO LOCAL IMPACT AREAS

Expenditures for aid to local impact areas are provided as required under the terms of Chapter 2031, Statutes of 1957 and Chapter 2019, Statutes of 1959. A circular area of 40 miles diameter with Oroville Dam as the center was designated by the Governor as an impact area in May of 1961. The same designation was made on the San Luis Dam area in October of 1962. Actual and estimated amounts for aid to local school districts (funds transferred to Department of Education for disbursement) and aid to local government for police, fire, and designated other local services are detailed below.

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Oroville Division:			
Aid to local school districts (Section 18303, Education Code)	($67,065) [4]	($101,811) [4]	($150,000) [4]
Aid to local government (Sections 65000 through 65011, Water Code)	6,058	150,000	300,000
San Luis Division:			
Aid to local school districts (Section 18303, Education Code)	–	–	(70,000) [4]
Aid to local government (Sections 65000 through 65011, Water Code)	–	–	225,000
Totals	$6,058	$150,000	$525,000
Less: Amounts reported as expenditures in project costs	—6,058	—150,000	—525,000
Net Expenditures	–	–	–

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64

CALIFORNIA WATER PROGRAM—Continued

STATE FINANCIAL ASSISTANCE FOR LOCAL PROJECTS

To assist local agencies in the financing of water projects, the Legislature enacted Chapter 2052, Statutes of 1957, entitled "State Financial Assistance for Local Projects." Chapter 1752, Statutes of 1959, amended the 1957 statutes; designated the law as the Davis-Grunsky Act; and provided initial funds. Chapter 1762, Statutes of 1959, provided $130,000,000 for the program. The act was further amended in 1961 by Chapters 520, 1286, 1348, and 1723.

This program provides state financial assistance to public agencies for development of needed and economically justified local water projects. To encourage agencies to develop the public recreational potential of local projects, state grants are provided for costs properly allocated to the incidental recreational and fish and wildlife functions. The program also permits state participation as a partner in local projects, under certain conditions.

The Department of Water Resources prescribes procedures and gives information to interested agencies pertaining to applications, receives and processes applications, makes findings of feasibility based on engineering, economic, and financial analyses of reports prepared by applicants, and makes reports to the Legislature on each project.

The Department of Water Resources, with prior approval of the California Water Commission, can make loans up to $4,000,000 and grants up to $300,000. Larger loans and grants may be made only after approval by the Legislature.

Over $7,000,000 in state funds have been approved for loans and grants under the program. Final applications for another $8,000,000 are currently under review or preparation.

	ACTUAL 1961-62	ESTIMATED 1962-63	PROPOSED 1963-64
Loans	$329,000	$422,300	$4,450,600
Grants	50,000	3,985,000	4,100,000
Administration	161,547	258,834	362,531
TOTALS, STATE FINANCIAL ASSISTANCE FOR LOCAL PROJECTS *(California Water Fund)*	$540,547	$4,666,134	$8,913,131

The following schedule reflects the estimated expenditure pattern of Chapter 1752, Statutes of 1959, loans and grants based on a preliminary review of applications received.

FEDERAL-STATE PROJECTS

SEA WATER CONVERSION PLANT

The plant was built by the Federal Government at Point Loma, San Diego County. It began operation in February 1962. It is a multiflash distillation type, having a capacity of 1,000,000 gallons per day. Steam to operate the distillation plan is provided by an oil-fired steam boiler. Distilled water produced by the plant is cooled to a temperature of 80° F., and purchased by the City of San Diego at the plant boundary. San Diego built a pipeline to a city reservoir approximately 3 miles away and provides pumping equipment for conveying the water to the reservoir.

DEPARTMENT OF VETERANS AFFAIRS

Veterans' Home of California

The Veterans' Home, a 2,412-bed facility, is located in Napa County. It is a home for aged and disabled, honorably discharged former members of the armed forces. The site of the home is on a hillside near Yountville with both single and 2-story buildings and a 4-story hospital. Most of the older structures of the institution have been replaced and all are now in good condition. While the hospital and intermediate care facilities are occupied there are some bed vacancies in the dormitory portions.

Minor projects totaling $82,750 are proposed in 1963-64 to correct deficiencies and improve the physical plant. Conversion of the single manually operated elevator serving the C and D wings of the hospital to semiautomatic operation is proposed at an estimated cost of $32,600 and will permit more efficient use of this equipment. Electrical circuits in the Lincoln and McKinley barracks are overloaded and in need of modernization at a cost of $24,000. Excessive summer heat in the west wing of the hospital requires the installation of cool shade screens at a cost of $16,000. The remaining $10,150 will provide for explosion-proof electric outlet plugs in the X-ray room, conductive flooring in the areas of the surgery and recovery rooms, and improved lighting in the hospital dining room.

State Construction Program Fund [c]	-	*1,000,000*	*1,250,000*

GENERAL ANALYSIS

Lump sum appropriations for project planning and miscellaneous repairs have been provided from which allocations to agencies are made as needed. The expenditures from such allocations are included in the individual agency budgets. That part which has not been allocated but which is estimated to be needed for further allocations, is included here as an expenditure.

Funds for preparation of complete project planning are proposed to continue the presently authorized procedures for securing sound cost estimates for subsequently budgeted projects.

Expenditures from available appropriations are estimated fo allocation to state agencies upon approval of the State Publi Works Board as prescribed by law for increased cost of construction when the lowest bid on a project is in excess of th available funds for such project. Savings from completed projects are transferred to this fund and are available by law fo such allocations.

Funds are proposed for miscellaneous repairs and improvements to be allocated to agencies upon subsequent determinatio of requirements.

SUMMARY

TOTAL EXPENDITURES *(General Fund)*	$2,344,966	$2,772,550	$3,087,000
Number of camps	38	42	46
Average number of wards	2,079	2,432	2,720

GENERAL ANALYSIS

Under the provisions of Section 880 through 890 of the Welfare and Institutions Code, the board of supervisors of any county may establish juvenile homes, ranches, or camps. Wards are committed by the juvenile courts to these facilities in lieu of commitment to the Department of the Youth Authority.

If certain standards as prescribed by the Department of the Youth Authority are met by the counties they are entitled to receive state funds. Reimbursement to counties is made for one-half of operating costs, but not in excess of $95 per month per child. There is no limit as to the number of camps for which one county may be reimbursed.

It is estimated that counties will be reimbursed for an average population of 2,720 boys and girls during the 1963-64 fiscal year with a total of 46 camps in operation at the end of the year.

Maintenance of homes and camps	$7,189,170	$8,876,633	$9,615,454

Assistance for Control of Juveniles

SUMMARY

TOTAL EXPENDITURES *(General Fund)*	–	$27,000	$27,000

GENERAL ANALYSIS

The juvenile border patrol is a co-operative program between the State and the City of San Diego, in accordance with Section 1760(d) of the Welfare and Institutions Code, to control the flow of juveniles crossing into Mexico. The State and the City of San Diego each contribute toward this program which is designed to prevent juvenile delinquency.

RECONCILIATION WITH APPROPRIATIONS

General Fund

APPROPRIATIONS			
Budget Act appropriation (Expenditures)	–	$27,000	$27,000

SUBVENTIONS FOR CORRECTIONS—Continued

SUBVENTION EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	ESTIMATED 1963-64

Assistance to Counties for Construction of Juvenile Homes and Camps

TOTAL EXPENDITURES *(General Fund)*	$423,415	$305,425	$684,575

GENERAL ANALYSIS

In accordance with the provisions of Section 891 of the Welfare and Institutions Code, the State may reimburse the counties for one-half of the cost of constructing and equipping juvenile homes, ranch camps, or forestry camps not to exceed $3,000 per bed unit. This includes the construction of new buildings (including related site development and utilities) or the remodeling of existing county-owned buildings into a juvenile home, ranch or forestry camp. The program is administered by the Department of the Youth Authority.

The appropriations are made for a period of 2 years with n more than a specific portion of the appropriation available the first year. This method of appropriation takes into accou a realistic construction time for these facilities and allows t State to make commitments to counties for planning and co struction time of more than 1 year.

Under this program a total of 1,960 beds will have been bu or funded from the time of inception of this program in 1957- through 1963-64.

SUBVENTIONS FOR EDUCATION—Continued

Apportionments for Public Schools—Continued

GENERAL ANALYSIS

PART I—CONTINUING PROGRAM

This section includes apportionments to local public school districts from continuing appropriations, as follows:

1. Apportionment for support of public schools.
   $201.36 per pupil in average daily attendance in the preceding fiscal year is paid to public school districts for support of kindergarten, elementary, secondary, and technical schools. This apportionment is based on a constitutional minimum augmented by legislative action.
   Article IX, Section 6, of the Constitution provides that the Legislature shall add to the State School Fund revenues to provide for an apportionment each fiscal year of not less than $180 per pupil in average daily attendance during the preceding fiscal year. This apportionment per pupil was increased by the Legislature from $180 to $193.37 in 1957; to $201.10 in 1959; and to $201.36 in 1961.
   The total cost in 1963-64 based on an estimate of 3,980,000 pupils in average daily attendance will be $801,412,800. This amount is funded by $3,500,000 available in the State School Fund and $797,912,800 from the General Fund.

2. Automobile driver training.
   $42 per pupil for reimbursement of actual cost of instructing pupils in the operation of motor vehicles, plus 75 percent of the actual amount in excess of $42 expended for replacing vehicles and simulators used, is authorized by Education Code Section 17305. The total reimbursement cannot exceed the total of the moneys in the Driver Training Penalty Assessment Fund. This fund receives its funds from a penalty assessment levied on offenses relating to operation of motor vehicles. In 1963-64 the maximum reimbursable expenses are estimated at $42 for 160,000 students, plus $100,000 equipment, for a total of $6,820,000.

3. Project-connected pupils.
   Special allowances are provided pursuant to Education Code Sections 18301-18307 inclusive for State Department of Water Resources project-connected pupils. In 1962-63 $101,811 is provided for this purpose and covers the Oroville area. In 1963-64 it is estimated that $150,000 will be required for this area and $70,000 for the San Luis area

4. Apportionment to junior college tuition funds for newly formed districts.
   Apportionments are authorized by Education Code Section 20211 for newly formed junior college districts to pay their junior college tuition fund tax. Areas not in a junior college district are assessed a tax to cover the cost in the preceding year of sending students to junior college. The special tax upon all taxable property in a county not situated in any school district maintaining a junior college is cancelled when the area is formed into a junior college, and the State General Fund pays the amount which would have been raised by the tax for a one-year period. During 1961-62 7 junior college districts qualified for $4,947,874, and in 1962-63 6 districts will require $2,016,794. It is estimated that $3,000,000 will be required in 1963-64.

5. Special educational programs for mentally gifted minors.
   Chapter 883, Statutes of 1961, authorized school districts to provide programs for mentally gifted minors. A "mentally gifted minor" means a minor enrolled in a public primary or secondary school who demonstrates such general intellectual capacity as to place him within the top 2 percent of all students having achieved his school grade throughout the State.
   A continuing appropriation from the General Fund is made for reimbursement of the excess expense to school districts who provide this program. The cost of this program is estimated as the product of $40 times 2 percent of the average daily attendance of pupils in kindergarten and grades 1 through 12 (74,288ADA), times 75 percent participation, or $2,228,640.

PART II—PROGRAM AUGMENTATIONS

Because of growing pressures on the local property tax base and difficulty in achieving proper equalization of educational opportunity for California's children within present disproportionate wealth districts, the following program augmentations are proposed to the existing State and local contributions for support of the public schools:

Equalization Aid increase for grades K-12:	
Countywide computational tax in lieu of district tax	($25,000,000)
Additional State support of foundation program	28,000,000
State support for less wealthy districts	
Equalization Aid increase for grades 13-14	2,000,000
Excess cost of special education	1,600,000
Adjustment of County School Service Fund	—1,600,000
Total Additional State Support	$30,000,000

Countywide tax support: Under our present system of public school support, it is next to impossible to devise a system of allocating State funds to school districts that will provide for uniform utilization of locally taxable wealth or permit reasonable equity in tax effort among the various districts. School district organization has in many instances separated children and wealth by district boundary lines which denies equal ability and effort to support an adequate educational program. In addition, basic aid guarantees prevent the State from using sufficient portions of its contributions to provide this equalization. For these reasons, the use of a countywide tax in lieu of a similar amount of local district tax is recommended, to be levied at the present computational levels for elementary and high schools. These levies will be used within counties to alleviate, in part, basic inequalities in wealth between districts.

Additional Equalization Aid for Grades K-12: In order to at least match the added local effort to be provided through the countywide support proposal, $28,000,000 is allotted for increased State support for the elementary and high school grades. Since the greatest need for funds lies in the districts of least wealth, it is proposed that this entire amount be applied to equalization effort for these less wealthy districts. Approximately one-half would be applied to an increase in the foundation program of all equalization districts, and the remainder provided as an incentive for local effort in those districts of such low wealth that even a maximum override tax produces relatively little ability to provide an adequate educational program.

Additional Equalization Aid for Grades 13-14: A proportionate increase in State equalization aid is also provided for Grades 13 and 14 in Junior Colleges. Growth requirements and the expanding role of these institutions under the Master Plan for Higher Education should be encouraged through an equivalent increase in the foundation program for Junior Colleges.

Special Education: Excess costs of classes for physically handicapped and mentally retarded minors should be increased by the amount by which the foundation program is raised in the regular programs. This proposal is planned to be financed by reforms in the distribution of funds to the County School Service Fund. In addition, adjustments should be made to eliminate deficits within the special education portion of the total State public school formula.

Legislation will be proposed to provide the program augmentations and reforms contained in this budget.

GENERAL ANALYSIS

Junior College Tax Relief

In recognition of the growth needs of the junior colleges in meeting their obligations under the Master Plan for Higher Education, the Legislature established a temporary program for junior college tax relief for Capital Outlay purposes. Chapter 1006, Statutes of 1961 appropriated $5,000,000 for this purpose, and a similar amount was approved in the 1962-63 Governor's Budget. These tax relief grants are utilized:

(a) For payment of interest and redemption of outstanding bonds issued for junior college purposes or for loans from the County School Service Fund for Capital Outlay purposes.

(b) For purchase or improvement of junior college sites or the planning or construction for junior college buildings on a matching basis not to exceed 1 part state funds for 4 parts district funds.

Chapter 1006, Statutes of 1961 also provided for recovery of accumulated surpluses in county school service funds, with all amounts over $5,000,000 to be earmarked in a special account of the General Fund for future educational appropriations. It is planned that this reserve will be utilized in augmenting apportionments for public schools during 1963-64.

Junior College Construction Assistance

Since the 1961 tax relief program offered no permanently satisfactory solution to the shared responsibility of the State and junior college districts in meeting the expanded role of these schools under the Master Plan for Higher Education, $20 million was included in the recently approved state building bond program for junior college construction. These funds are directed towards the unmet growth needs for facilities to house future students, and the Co-ordinating Council for Higher Education is now developing methods for equitable allocation of these funds.

This budget anticipates the development of legislation in the 1963 General Session which will appropriate $20 million on a matching basis for construction of educational facilities to meet the immediate unmet capacity needs of the junior college system.

Child Care Centers

EXPENDITURES *(General Fund)*	$4,947,851	$5,881,666	$5,556,395	—$325,271 (—5.5%)

GENERAL ANALYSIS

Objectives

Child care centers are established to provide care and supervision of children when it is necessary for the parent to work and the parent qualifies on the basis of need. The centers are administered under the provisions of Sections 16601 through 16645.27 of the Education Code.

Program and Performance

To carry out this program the State furnishes two-thirds of the cost, or about $0.28 per hour per child, for the maintenance and operation of the centers. The balance of the cost, or about $0.14 per hour, is paid by fees collected from those persons utilizing the program.

The Child Care Center Program was established on a temporary basis by the 1943 Legislature and was made a permanent program by the 1957 General Session of the Legislature. Legislative changes were made at the 1961 General Session of the Legislature affecting the state support of the program and also affecting the eligibility of parents to participate in the program. Chapter 882, Statutes of 1961, changed the level of General Fund support from $0.26 per hour to $0.28 per hour. Chapter 877, Statutes of 1961, liberalized the maximum income eligibility of parents who may use the centers.

Section 16622 of the Education Code provides that if, during any fiscal year there is apportioned to the Child Care Center Fund more or less than the amount to which the fund was entitled, the Superintendent of Public Instruction during the next or any succeeding year shall withhold from, or add to, the apportionment during the next or any succeeding fiscal year the amount of such excess or deficiency.

The following table sets forth the enrollment status of this program:

	Actual 1958-59	Actual 1959-60	Actual 1960-61	Actual 1961-62	Estimated 1962-63	Estimated 1963-64
Enrollment hours	18,202,673	18,921,635	18,972,390	19,343,537	19,389,500	19,677,793
Change from prior years	607,673 (3.5%)	718,962 (3.9%)	50,755 (0.3%)	371,147 (1.9%)	45,963 (0.2%)	288,293 (1.5%)
Total Entitlement	$4,593,310	$4,930,180	$4,994,128	$5,381,122 [a]	$5,448,395	$5,556,395

The 1963-64 Budget assumes a 1.5 percent increase over the revised estimate of the 1962-63 enrollment and also includes the provision of $46,613 to provide for 89,640 enrollment hours in 2 pilot child care centers located at Stockton and Oakland. These pilot centers for physically handicapped and mentally retarded children are authorized by Chapter 2096, Statutes of 1959.

The administrative costs of this program are carried in the budget of the Administrative Services Bureau, Division of Public School Administration, Department of Education.

TOTAL STATE CONTRIBUTIONS				
Existing program	$41,236,926	$43,001,872	$46,300,000	$3,298,128
New program	–	–	1,000,000	1,000,000
Total *(General Fund)*	$41,236,926	$43,001,872	$47,300,000	$4,298,128 (10%)

GENERAL ANALYSIS

The State Teachers' Retirement System will contain 301,435 active members, with an additional retired roll of 27,364 members on June 30, 1964. Since July 1, 1944, members' contributions have been on a full reserve basis. State contributions are appropriated in amounts required to liquidate the amount of maturing liabilities not funded from the members' accumulated reserve and contributions of employers, rather than as the liabilities accrue. Since July 1956 the members' contributions are fixed in percentages of salary which on the average will provide for accumulation of funds sufficient to pay for one-half the cost of the member's benefit for such service. The district payment since July 1956 has been 3 percent of the teacher payroll in the district (with a maximum limitation of an amount equal to $0.05 per $100 assessed valuation) plus $12 per teacher. Before 1956 only $12 per teacher payment was made by the district.

The State finances expenditures not funded by the contributions of employing agencies and members. The State's contributions to the Teachers' Retirement Fund and the Retirement Annuity Fund are used to finance the major portion of expenditures for retirement allowances. The major portion of such allowances is payable for prior service which is funded entirely from contributions of the State and the employing districts. Subventions to local retirement systems and a portion of death benefits from the Retirement Annuity Fund are also provided from state contributions.

The subventions to local systems consist of payments of amounts equal to the allowances which would have been payable had the retired members involved been entitled to benefits from the state system alone, The payments are made on the basis of the amounts withheld from local members in the preceding year, and are reduced by one-half of the benefit payable on account of service after 1944 on which no Retirement Annuity Fund contributions have been paid.

Chapter 2060, Statutes of 1959, added a program of monthly benefits for survivors of active members who die while in service. These benefits are payable upon such death as they occur after September 30, 1959. Currently the benefits are being financed from a reserve of contributions credited on account for service rendered prior to July 1, 1944.

---

[a] Reflects a deficit of $433,271 in the 1961-62 fiscal year which is included in the 1962-63 appropriation as authorized by Section 16622, Education Code.

GENERAL ANALYSIS—Continued

This budget provides a $1,000,000 increase in retirement allowances in 1963-64 in order to finance an improved benefit program to annuitants retired in prior years. Enabling legislation will be introduced at the 1963 General Session of the Legislature to define the benefits available to this group of annuitants. It is intended to partially recompense the low income retired teacher receiving a fixed annual allowance.

GENERAL ANALYSIS

Objectives

The proceeds from the sale of general obligation bonds of the State of California that are sold for the state school building aid program are loaned to eligible school districts for the purpose of financing the cost of land, construction of school facilities and equipment for educational purposes.

The school districts that have received loans will repay over a period not to exceed 30 years or in the case of districts that have used authorizations providing for deferred repayments, the period is extended for a maximum period of 10 years not to exceed 40 years and any unpaid balance at that time is canceled.

Program and Performance

The school districts of California have received financial aid for school building facilities since 1947 when a $20,000,000 appropriation was authorized, followed by a $35,000,000 appropriation in 1948, a $20,000,000 appropriation in 1952 and bond issue authorization that dates from 1950 to the current budget.

School districts establish their eligibility for loans from state bond issue proceeds after the district's outstanding bonds exceed 95 percent of the maximum that the districts could have outstanding under the laws on the date the conditional apportionment is made, or is within $25,000 of the total bond limit permitted.

Authorized bonds have been sold to the extent of $1,038,000,000 as of November 30, 1962, and additional bond sales are tentatively scheduled totaling $150,000,000 prior to June 30, 1964. The amounts to be repaid by the school districts are determined each year by the relationship between assessed valuation of the borrowing district and the amount the district must raise

SUBVENTIONS FOR EDUCATION—Continued

Debt Service on Public School Building Bonds—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

by local property taxes for payment on its bonded debt. Repayments are affected to a significant extent by deferment provisions contained in the statutes as utilized by certain school districts with a resultant effect upon the net cost to the General Fund as computed by fiscal year.

Fiscal Year	Total Deferred Payments
1957-58	$974,524
1958-59	2,787,825
1959-60	5,445,560
1960-61	8,905,004
1961-62	13,022,343
1962-63 (estimated)	16,513,487
1963-64 (estimated)	20,000,000

The period for repayment of deferred amounts was extended by statute from 30 years to 40 years with any unpaid balance canceled after this time.

The effective rate for state borrowing has ranged from a low effective rate of 1.74 percent in 1950 to a high effective rate of 4 percent in 1959, with the effective rate for the last completed bond sale for this program at a rate of 3.16 percent.

The actual debt service data from from the beginning of this program is presented in the following tabulation:

Fiscal Year	Debt Service Interest	Debt Service Redemption	Debt Service Total	District Repayments	Other Payments	General Fund Net Cost
1950-61	$1,700,084	–	$1,700,084	–	$882,216	$817,868
1951-52	3,351,125	$1,600,000	4,951,125	28,516	2,564,594	2,361,015
1952-53	4,911,250	4,800,000	9,711,250	1,458,364	2,647,829	5,605,057
1953-54	5,809,500	7,200,000	13,009,500	3,748,166	2,753,746	6,507,588
1954-55	7,015,000	8,800,000	15,815,000	5,845,374	3,107,431	6,862,195
1955-56	7,945,977	10,400,000	18,345,977	6,956,772	2,731,464	8,657,741
1956-57	9,038,340	10,600,000	19,638,340	9,456,916	2,777,678	7,403,746
1957-58	10,776,116	14,000,000	24,776,116	12,426,976	2,497,607	9,851,533
1958-59	13,477,634	15,500,000	28,977,634	15,584,844	116,664	13,276,126
1959-60	15,413,500	17,900,000	33,313,500	16,696,925	433,327	16,183,248
1960-61	18,289,625	21,300,000	39,589,625	17,981,133	1,221,851	20,386,641
1961-62	24,457,350	23,100,000	47,557,350	20,816,735	339,459	26,401,156
1962-63 (estimated)	29,074,500	29,200,000	58,274,500	21,143,717	115,000	37,015,783
1963-64 (estimated)	29,558,775	32,800,000	62,358,775	21,514,500	300,000	40,544,275

The school district repayments are estimated to total to $153,655,938 over the 14-year period to June 30, 1964, and amount to approximately 40 percent of the total debt service payments estimated for the period totaling $378,018,776.

The eligible debt service increase in the school district's financial plan is having a significant effect upon the district repayment computation and is offsetting the assessed valuation growth and tends to decrease the annual payment due to the State of California. This factor coupled with the deferment provisions extends the period for loan repayments.

GENERAL ANALYSIS

Objectives

The textbook program, under the authority of Section 7, Article 9, of the Constitution, provides for the publishing and purchasing of textbooks approved by the State Board of Education. The textbooks are then distributed without charge to pupils in the elementary grades of the public schools within the State.

Program and Performance

The 1963-64 program includes funds for a one-year distribution of the new adoptions in history and geography for the 6th and 7th grades and for a two-year printing program for prior adoptions. All books offered by publishers for the new adoptions were evaluated by the State Curriculum Commission and the commission recommended its choice of books to the State Board of Education for adoption. The State Board of Education is now in the process of adopting the textbook program for the 2 grades.

A program which would provide that all textbook adoptions be manufactured in the State Printing Plant has been estimated to have a potential savings to California taxpayers of millions of dollars over future years. This budget, however, proposes funds for the purchase of some textbooks which have not been offered on a lease plate basis for printing in the State Printing Plant. In the opinion of the Curriculum Commission, the purchase of these books will ensure the best possible educational opportunity for the pupils in California. To assure that this opportunity to purchase textbooks is offered at a reasonable cost in relation to state printing costs, it is proposed that the price differential be limited to 13 percent of a computed estimated cost figure which has as its base the cost of manufacturing the same or similar books in the State Printing Plant. This limitation will to some small extent offset the increased costs inherent in purchasing completed textbooks rather than manufacturing them in the State Printing Plant. The price differential of 13 percent allows a premium of $207,029 over the estimated cost of production in the State Printing Plant, but provides a 1st year saving of $430,341 in relation to the prices as bid by the various publishing companies.

Continuation of the proposed limitation would result in a reduction in the price of purchased books by $887,805 for the eight-year adoption period.

The following table reflects the subject and/or title of the proposed adoptions, and the number of copies needed and cost figures for the first year. The column "cost of printing" lists the estimated cost of manufacture of the book at the State Printing Plant except for books not bid by publishers on this basis. The columns headed "Cost of Purchase" list the bid prices submitted to the State of the purchased books, the costs that will be paid by the State under the proposed price limitation, and the reduction that the publishers will have to make to its bid prices for the 1st year.

National Defense Education

SUMMARY

TOTAL EXPENDITURES *(Federal funds)* [a]				
Title 3a—Improvement of instruction	$2,547,649	$2,671,875	$2,671,875	
Title 5—Improvement of guidance	1,039,694	1,073,302	1,086,000	
Totals *(Federal funds)* [a]	$3,587,343	$3,745,177	$3,757,875	$12,698 (0.3%)

GENERAL ANALYSIS

The National Defense Education Act of 1958 was enacted by Congress (Public Law 85-864) to provide financial assistance to states and their subdivisions in order to ensure trained manpower of sufficient quality and quantity to meet the national defense needs of the country. The total program is discussed in the State Operation Section of the Budget, National Defense Education. These titles, providing for reimbursements to local school districts, are administered by the State Department of Education.

Before a state can participate in the provisions of the National Defense Education programs, it must prepare and have approved by the United States Commissioner of Education a state plan for each program title which becomes the state's contract with the federal government. Federal funds are then released to the state in accordance with the approved state plan and on the basis of state allocations determined by the United States Commissioner under a formula prescribed in the act.

TITLE 3a—IMPROVEMENT OF INSTRUCTION

Objectives

Title 3a of the National Defense Education Act is concerned with the improvement of instruction in the fields of science, mathematics, and modern foreign languages.

Program and Performance

Under Title 3a of the act, school districts and offices of the county superintendents of schools file applications for funds for the purchase of equipment, materials, and minor remodeling with the State Department of Education and certify that local matching funds are available. The State Department of Education reviews the applications in terms of the state plan and either approves or disapproves the proposals. Upon approval by the State Department of Education, the local agency is authorized to proceed with the purchases as outlined in their project proposal and to file a claim for reimbursement of one-half of the expenditure.

Federal funds available for this title are matched by local school district expenditures and no General Fund appropriation is required.

Reimbursements to school districts *(federal funds)* [a]	$2,547,649	$2,671,875	$2,671,875	

TITLE 5—IMPROVEMENT OF GUIDANCE

Objectives

Title 5 of the National Defense Education Act is concerned with the establishment of programs of testing and guidance for the identification and encouragement of able students.

Program and Performance

This title provides federal funds for reimbursement to local school districts for the establishment and maintenance of programs in guidance, counseling, and testing in public secondary schools. School districts file applications for these federal funds with the State Department of Education where the applications are reviewed in terms of the State Plan for Title 5. If approved by the department the local district is authorized to proceed with its program and the district is reimbursed for part of the expenditure.

Existing state and local expenditures meet the matching requirement of this title and no General Fund appropriation is required.

Reimbursements to school districts *(federal funds)* [a]	$1,039,694	$1,073,302	$1,086,000

School Building Construction

SUMMARY

TOTAL EXPENDITURES *(State School Construction Fund)*	–	$168,613	$395,355

GENERAL ANALYSIS

The State Allocation Board is authorized to apportion funds under provisions of the State Project Area School Construction Law from balances available in the State Construction Fund. A school district may attain eligibility under prescribed conditions when the State of California's major construction projects create additional financial burdens measured by increased enrollment load identified as project children in average daily attendance. The enrollment increase attributed to this must be a minimum of 25 during the period and at least 5 percent of the average daily attendance in the district during the year. School districts that receive apportionments are required to repay the principal amount within a period of 30 years.

Applications have been received for projects in the Thermalito School District located in Butte County and it is estimated that expenditures will be made during the 1962-63 fiscal year and thereafter.

School Lunch Program

TOTAL EXPENDITURES (*Federal funds*) [a]	$6,173,006	$6,200,000	$6,200,000

GENERAL ANALYSIS

Under the Federal School Lunch Act, federal funds are distributed to school districts offering approved lunches to children on a partially reimbursed basis. During the school months of the 1961-62 fiscal year an average of 3,605 schools participated, an increase of 200 schools over the previous year. Surplus food commodities donated by the Federal Government during 1961-62 were valued at $12,772,126, an increase of $3,761,453 over the 1960-61 fiscal year. These surplus food commodities were distributed by the State Educational Agency for surplus property. Handling charges for this service, amounting to $994,149, were reimbursed by the school districts to the Surplus Property Revolving Fund.

TOTAL EXPENDITURES *(Federal funds)* [a]	$8,300,614	$8,500,000	$8,700,000	

GENERAL ANALYSIS

This program is sponsored by the Federal Government under the Agricultural Adjustment Act of 1949, to encourage school pupils to consume surplus milk. During the 1961-62 school year, 15,940,419 gallons of milk were consumed in this program, an increase of nearly 625,000 gallons over the previous year. An additional 7,503,194 gallons were consumed in the School Lunch Program.

This program, as well as the School Lunch Program, is administered through the Division of Public School Administration of the Department of Education.

GENERAL ANALYSIS

Objectives

The purpose of vocational education is to provide training to develop skills, attitudes and working habits and to impart knowledge and information needed by workers to enter and make progress in employment on a useful and productive basis.

Program and Performance

The vocational education program for California is based on a plan, co-operatively approved and financed by local school districts, the State Department of Education, and the United States Office of Education.

The available funds are expended for supervision and teacher training at the state level and as reimbursements to those local districts which meet the established qualifications of the program. These reimbursements are based on the excess costs to the school districts of meeting the prescribed standards.

In accepting federal aid for vocational education, the State has provided appropriations to match, in part, federal grants-in-aid contained in federal vocational education legislation. After the deduction of state operating costs, the remaining balances of state and federal funds for supervision and teacher training costs are distributed to public secondary school districts maintaining approved courses in vocational instruction in agriculture, homemaking, business education and industrial occupations.

Additional federal funds are available, starting in the 1961-62 fiscal year, for reimbursement to schools for their costs of providing training under the newly enacted Manpower Development and Training Act (PL 87-415).

The available funds have been allocated to programs at the local level as follows:

	Actual 1961-62	Estimated 1962-63	Estimated 1963-64
Agriculture	$324,488	$298,955	$297,164
Area vocational education	1,152,418	934,319	933,462
Business	153,632	128,999	130,632

MENTAL HYGIENE

Assistance to Local Agencies for Mental Health Services

	ACTUAL 1961-62	ESTIMATED 1962-63	ESTIMATED 1963-64
PART I—CONTINUING OPERATIONS	$2,509,686	$3,050,000	$3,450,000
PART II—PROGRAM AUGMENTATIONS	–	–	2,000,000
TOTAL EXPENDITURES *(General Fund)*	$2,509,686	$3,050,000	$5,450,000

GENERAL ANALYSIS

PART I—CONTINUING OPERATIONS

Financial assistance to local governments may be granted under Section 9034 and pursuant to Section 9030 of the Welfare and Institutions Code for the establishment and development of mental health services, including services to the mentally retarded, through locally administered and controlled community mental health programs. It is designed to augment and promote the improvement and, if necessary, the expansion of existing local psychiatric services in general hospitals or clinics that help to conserve the mental health of the people of California. The Department of Mental Hygiene is responsible for the review and co-ordination of this program.

This program began in 1958 and by the end of 1961-62, 18 local jurisdictions were participating in it. Plans have been approved under which programs in 20 jurisdictions will be reimbursed for the current year and this number will participate in the program during 1963-64. An increase of $400,000 over the estimated expenditures for the current year is proposed for 1963-64 based upon the anticipated further development of the programs within these 20 jurisdictions.

PART II—PROGRAM AUGMENTATIONS

Legislation will be introduced during the 1963 legislative session to expand the scope of the program and to liberalize and increase the matching provisions by the state. $2,000,000 in additional funds are proposed to finance these changes.

Federal Funds [a]			
Treatment	239,731	184,731	184,731
Totals	$6,705,000	$9,457,989	$11,722,150

GENERAL ANALYSIS

This budget provides funds for a state program for handicapped children, which is administered under the provisions of Sections 249 to 271 of the Health and Safety Code. The code provides that whenever the parent or guardian of the child is unable to finance necessary care, a designated agency of the county shall request the State to furnish such services. The county pays a part of these costs from the funds provided under the provisions of Section 270 which makes it mandatory that each county appropriate at least 1/10 mill on each dollar of assessed property valuation to finance the program.

The budget formula for distribution of these funds is as follows:

a. Treatment:

After the county has spent the 1/10 mill, the State will provide funds sufficient to bring the program up to $20,000, or 3/10 mill, whichever is greater. Treatment costs beyond that point will be shared in the ratio of $2 of state funds to $1 of county funds.

---

[a] Grants from Federal Government and expenditures therefrom are not included in the budget totals.

Subventions for Health and Welfare

PUBLIC HEALTH—Continued

Assistance to Counties for Care of Crippled Children—Continued

GENERAL ANALYSIS—Continued

b. Administrative Allowance:

The State will contribute two-thirds of the expenditures for administration of each independent county program made in accordance with an approved budget, but not to exceed 6⅔ percent of the expenditures in the prior year.

c. Diagnosis and Noncounty Resident Care:

The State finances the cost of diagnosis for all children believed to have a condition eligible for treatment, and the cost of treatment when the county or residence cannot be established.

Services rendered include necessary medical examinations and consultations, medical and surgical procedures, office and hospital visits, hospitalization, convalescent home care, rehabilitation services, and appliances such as artificial limbs, braces, hearing aids, etc.

Eligible medical conditions for this program are those which are remediable.

The addition of cystic fibrosis to the program in accordance with Chapter 1839, Statutes of 1961 is anticipated to cost $300,000 in the current year and $480,000 in the budget year. In the current year increased caseload, particularly in Los Angeles, will require a deficiency appropriation of $1,488,527. In the budget year normal program growth exclusive of the cystic fibrosis program will result in an increase of $2,084,161 in the State's share of the program.

TOTAL EXPENDITURES *(General Fund)*	$3,580,392	$3,563,496	$2,962,503

GENERAL ANALYSIS

Section 3298 of the Health and Safety Code provides for state grants-in-aid to counties for the treatment and care of persons suffering from tuberculosis. Decreased patient-days result from improved techniques of early case finding and treatment, decreased incidence of disease, and decreased bed occupancies. This is shown in the following table:

	ACTUAL					ESTIMATED	
	1957-58	1958-59	1959-60	1960-61	1961-62	1962-63	1963-64
Patient-days	1,432,232	1,303,568	1,131,191	971,127	836,820	731,799	639,958

Section 3300 of the Health and Safety Code provides a subsidy of $2.60 per paient-day for the first 36,500 patient-days of care, $2.30 per patient-day for the second 36,500 patient-days, and $1.75 for all additional days plus an additional amount specified in each budget act. The Budget Act of 1962 provided a supplemental amount of $2.30 to each category.

A supplemental amount of $2.44, an increase of $0.14 over the Budget Act of 1962, is proposed for the 1963-64 fiscal year based on the increased cost of care experienced by local sanatoria.

Section 3295 of the Health and Safety Code provides for the care of persons suffering from tuberculosis who violate the quarantine or isolation orders of a county health officer. An agreement has been made with the Department of Corrections to care for these persons at the Medical Facility at Vacaville and at the Institution for Women at Corona. Included in the budget request is $67,500 to reimburse the Department of Corrections for an average occupancy of 37 beds.

GENERAL ANALYSIS

Section 1157 of the Health and Safety Code permits the Department of Public Health to furnish local public health services to those counties of less than 40,000 population without recognized local health departments which contribute a minimum of 55 cents per capita. This program now includes Alpine, Amador, Calaveras, El Dorado, Glenn, Lake, Lassen, Mariposa, Modoc, Mono, Nevada, Sierra, Trinity, and Tehama Counties.

In accordance with general policy, these programs were instituted using the minimum number of public health nurses. One nurse is proposed for workload increase in Tehama County.

Two nurses and 2 sanitarians are proposed for Tuloumne County, and 3 nurses and 1 sanitarian are proposed for Siskiyou County. These counties have indicated their desire to contract with the State for service effective July 1, 1963.

GENERAL ANALYSIS

These federal and state funds may be allocated to qualified health departments under the provisions of Section 1100 of the Health and Safety Code to provide effective local public health services. State funds are allocated to local health departments in accordance with Section 1141 of the Health and Safety Code.

The General Fund portion for 1963-64 is proposed at the amount approved in the 1962 Budget Act plus an allowance equal to 20.7¢ per capita for estimated population increase, as a continuation of the policy established by the Legislature in 1962. After allocation of federal funds for special local demonstration and investigation projects, the balance of the federal funds is distributed in the same ratio as state funds.

TOTAL EXPENDITURES *(General Fund)*	$1,198,205	$1,420,379	$1,676,276

GENERAL ANALYSIS

This is a joint program sponsored by the Department of Public Health, the Department of Education, local school districts, and local health departments throughout the State. Treatment is provided for children with complicated medical diagnoses such as cerebral palsy, poliomyelitis, muscular dystrophy, amputation, and multiple sclerosis by therapists in special school facilities. The special classrooms and therapy units are built and equipped by the school district; the physical and occupational therapists, and medical supervision are provided through the Department of Public Health. Assignment of therapists is based on the number of children with cerebral palsy requiring treatment. Children with other disabling conditions receive treatment on a "time available" basis.

This budget provides funds for the department to employ these therapists, or enter into contracts for local health department to employ them. Therapists will be transferred to local agencies that operate independent programs by July 1, 1963 and to all local agencies by July 1, 1964.

GENERAL ANALYSIS

Section 435.3 of the Health and Safety Code provides that the State may participate in the federal hospital construction program. Hospitals include nursing homes, diagnostic and treatment and rehabilitation centers, and chronic disease hospitals. Allocations are made in accordance with the provisions of Section 435.6 of the Health and Safety Code to nonprofit as well as governmental hospitals.

GENERAL ANALYSIS

The social welfare public assistance program in California will provide an estimated 750,000 aged, handicapped and needy persons with monetary assistance and social services at an estimated cost of $827,000,000 in State, Federal and county funds in 1963-64.

The State Department of Social Welfare supervises the locally administered Aid to Needy Blind, Aid to Potentially Self-supporting Blind, Aid to Needy Children, Aid to Needy Disabled, Old Age Security, and Medical Assistance for the Aged assistance programs.

Within the area of local administration the department provides an extensive program of training for county public assistance personnel in the form of both an in-service orientation program for new personnel, and an educational leave stipend program for existing personnel. It promotes the extension of a completely federal financed program of child welfare services throughout the State, and proposes to provide such services with state personnel in those counties presently without programs of their own. It encourages the counties to initiate special projects directed towards improving services to recipients, with the ultimate objective of reducing dependency and promoting rehabilitation.

Licensing of agencies for the reception and care of aged and children, and for public and private adoptions is the responsibility of the State Department of Social Welfare. The Department provides reports to courts for independent adoptions and issues certificates of authority to institutions of the aged that provide life care contracts. Through agreement with certain of the larger counties these responsibilities have been delegated and are administered in part at the local level.

Pursuant to Chapter 2045, Statutes of 1961, the Welfare Study Commission made a final report to the Governor and to the Legislature on January 1, 1963. The commission's recommendations include proposed changes in coverage of the Aid to the Needy (Totally) Disabled and Aid to Needy Children programs. In anticipation of legislation to be proposed by the Governor for the purpose of implementing the recommended program changes, a total of $7,500,000 in state funds has been included in the Aid to Needy Disabled and Aid to Needy Children budgets for the 1963-64 fiscal year.

AID TO THE NEEDY BLIND

This is a public assistance program financed by the county, State, and Federal governments for needy persons without sight, or with impaired sight, who meet certain other requirements such as those dealing with residence and property. Social Security Act amendments in 1962 increased the federal participation in categorical aid payments by $4.20 per month per recipient effective October 1, 1962. In accordance with 1961 legislation authorizing a cost of living increase, an increase of $2 per month per recipient was made effective December 1, 1962. These adjustments increased the basic grant to $124 per month and the maximum grant to $174 per month per recipient. Medical care is provided at an average maximum of $15 per month per recipient.

AID TO POTENTIALLY SELF-SUPPORTING BLIND

This is a public assistance program financed by the county and State governments for needy persons without sight, or with impaired sight, who are unable to provide themselves fully with the necessities of life but are working on a plan for self-support. The Federal Government does not participate in this program.

However, Social Security Act amendments in 1962 increased the federal participation in categorical aid payments for the Aid to the Needy Blind program by $4.20 per month per recipient effective October 1, 1962. Section 3084.1 of the Welfare and Institutions Code requires a like amount be provided the Aid to the Potentially Self-supporting Blind recipients out of state and county funds.

In accordance with 1961 legislation authorizing a cost of living increase, an increase of $2 per month per recipient was made effective December 1, 1962. These adjustments increased the basic grant to $124 per month and the maximum grant to $174 per month per recipient. Medical care is provided at an average maximum of $15 per month per recipient.

AID TO NEEDY CHILDREN

This is a public assistance program financed by the county, State, and the Federal governments. The primary purpose of the program is to provide family security and financial assistance for needy children who are deprived of parental support or care. It is designed to keep children in their own family unit with parental responsibility for the family living plan; if this is not possible, the best substitute care is provided in the home of a relative, a foster home, or a children's institution.

State legislation effective January 1, 1962, increased the maximum monthly foster care payments from $75 per child to an $80 average for all children; and modified the state residence requirement.

A total of $7,500,000 has been included in the lines "payments to recipients" in this and the Aid to Needy Disabled programs, effective in 1963-64, for the purpose of financing proposed legislative changes. The legislation is to be proposed by the Governor and will be based on the recommendations of the Welfare Study Commission. The commission's final report was filed with the Governor and the Legislature on January 1, 1963.

AID TO NEEDY DISABLED

This is a public assistance program financed by the county, State, and Federal governments for needy persons who are permanently and totally disabled. The maximum average payment is $100 per month per recipient for assistance, and $15 per month per recipient for medical care.

A change in the definition of an institution will allow an average of 450 additional mentally retarded adults to receive help through assistance grants during 1963-64.

A total of $7,500,000 has been included in the lines "payments to recipients" in this and the Aid to Needy Children programs, effective in 1963-64, for the purpose of financing proposed legislative changes. The legislation is to be proposed by the Governor and will be based on the recommendations of the Welfare Study Commission. The commission's final report was filed with the Governor and the Legislature on January 1, 1963.

OLD AGE SECURITY

This is a public assistance program financed by county, State and Federal governments for needy persons at least 65 years old who also meet certain other requirements such as residence and property. Social Security Act amendments in 1962 increased federal participation in categorical aid payments by $4.20 per month per recipient effective October 1, 1962, and in accordance with 1961 legislation authorizing a cost of living increase, an increase of $1 per month per recipient was made effective December 1, 1962.

These adjustments increased the basic grant to $106 per month and the maximum grant to $171 per month per recipient. Medical care is provided at an average maximum of $15 per month per recipient.

MEDICAL ASSISTANCE FOR THE AGED

This is a program of medical assistance for the aged designed to furnish more adequate medical care to those elderly persons not recipients of Old Age Security who cannot provide for their needed medical care. Inpatient care expenditures are financed by 25 percent state funds, 25 percent county funds, and 50 percent federal funds. Outpatient care is financed by 50 percent state funds and 50 percent federal funds. No change from the program authorized by the 1961 Legislature is included in this proposal.

COUNTY ADMINISTRATION OF ASSISTANCE PROGRAMS

The cost of local administration of programs for the blind, children, disabled, aged, and medical assistance for aged is borne by the county and the Federal Government. Federal funds for county administration are received by the State and forwarded to the counties on the basis of estimates prepared by the State Department of Social Welfare, subject to adjustment upon receipt and audit of the counties' statements of expenditures.

SOCIAL WELFARE—Continued

Local Administration—Continued

TRAINING

The State and the Federal Government assist the county welfare departments in improving the quality of administration and service by encouraging employee training.

Chapters 1567 and 1780, Statutes of 1961, authorized programs for (1) expansion of in-service training opportunities for public assistance personnel of county welfare agencies; and (2) scholarships or educational leave stipends, to persons agreeing to work as public assistance employees of county welfare departments.

The 1962 amendments to the Social Security Act place more emphasis on adequate staff training and provide for payment by the federal agency of 75 percent of the cost of training activities.

Federal regulations for the field of training now require planned movement in the next 4 years toward

1. an organized in-service training program available to all staff in state and local agencies
2. provision for technical and professional education for positions designated as requiring such education in state and local agencies
3. provision of an appropriate number of technically competent persons to plan, direct and conduct the staff development program.

The 1963-64 General Fund cost of the 1961 legislative program, as modified by the 1962 Social Security Act amendments, is expected to be as follows:

a. County training and orientation	$43,545
b. Scholarships and stipends	56,250
c. Public assistance interns and field instruction units	4,000

To carry out the first of the requirements it is proposed to expand the operations of the state-operated orientation center. It is estimated that 23 larger counties will operate their ow orientation center and the central facilities will provide trainin services for the remaining 35. Approximately 400 beginning s cial workers will receive training in groups of 50 at a time. Th training offered is practical and covers the actual procedure used on the job. For operation of the center, $16,045 is pr posed from state funds and $48,135 from federal funds to con tinue the existing staff of 2 and the proposed staff of 4 trainin supervisor positions. To provide maintenance expenses of train ees attending the orientation and induction center, $27,500 o state funds is matched by an estimated $82,500 of federal fund In addition, $50,000 of child welfare services funds is set asid for institutes and conferences for local child welfare servic staff.

For scholarships and stipends for personnel to work in count welfare departments, the Department proposes:

1. The sum of $56,250, matched by an estimated $168,750 o federal funds to support stipends for persons who wil work in public assistance in county welfare departments
2. The sum of $300,000 of federal child welfare services fund to support 100 stipends for workers who will work o child welfare services in county welfare departments.

The Department desires to establish an additional public as sistance field instruction unit or intern program to help mee the shortage of trained and qualified personnel. It is propose to do this by contractual arrangement with the University o California at Los Angeles rather than through employment b the Department. For this purpose, $4,000 of State Genera Fund money is matched by an estimated $12,000 of federa funds.

CHILD WELFARE SERVICES

The Federal Government supports or augments a county program of child welfare services.

The program for 1963-64 calls for augmentation or supplementation of county child welfare operations in the sum of $392,234 from Federal child welfare services funds. Of this sum, approximately $150,000 is planned to be used by the Department of Social Welfare to employ 14 specialists and 5 clerical employees to provide child welfare services in local communities under co-operative arrangements between the Department and the county welfare departments in instances where the county cannot itself recruit the desired personnel.

SPECIAL PROJECTS

To promote local community activities for older persons with the intent to provide an opportunity for older persons to remain active and contributing members in their community, $150,000 in State funds is provided. These funds, which continue the current level of service, are administered in accordance with Chapter 5, Division 4 of the Welfare and Institutions Code.

Funds are also provided for projects of a pilot or experimental nature in accord with the purposes and criteria laid down in Chapter 5 of Division 1 of the Welfare and Institutions Code. These projects are designed primarily to be of use to the community in which they take place.

1. In the public assistance programs, the State General Fund portion is $611,600, to which is added an estimated $500,800 of Federal public assistance funds.
2. In child welfare programs, such projects are financed entirely from federal funds to an estimated total of $781,969.

LOCAL INSPECTION OF HOMES AND AGENCIES CARING FOR AGED AND CHILDREN

This program provides for the reimbursement of expenses incurred by counties and cities who may maintain approved services for the licensing and inspection of agencies for child care and home finding, and agencies for the care of the aged in accordance with the provisions of Section 1622 and 2302 of the Welfare and Institutions Code. This reimbursement is in the amount found necessary by the State Department of Social Welfare for proper and efficient administration, not to exceed $65 per year for each new or renewal license issued.

REIMBURSEMENT TO COUNTIES FOR ADMINISTRATION AND COST OF CARE OF ADOPTIONS

County adoption agencies are licensed to accept relinquishments, make adoptive placements of children, and to investigate and report on petitions for adoption filed independently. These agencies are reimbursed for administrative costs pursuant to Section 1641 of the Welfare and Institutions Code. Fees received from adoptive parents (up to $300) are abated to the cost of administration.

The cost of care for children committed to the State Department of Social Welfare or a public adoption agency pursuant to Section 226(c) of the Civil Code is reimbursed by the State.

SUBVENTION EXPENDITURES	ACTUAL 1961-62	ESTIMATED 1962-63	ESTIMATED 1963-64	CHANGE FROM 1962-63
